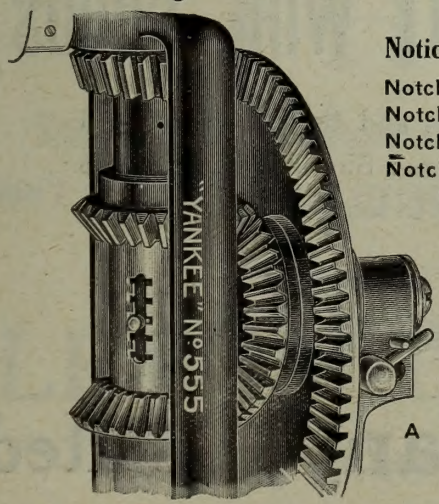
CUSTOM CATCHERS

Particularly in the case of AXE HANDLES, quality is the determining feature as to where the trade will go.

If you stock

STILL'S AXE HANDLES

you will be influencing a trade to your store which will prove exceedingly profitable. They are Gilmour shaped, and are made only of the very choicest, carefully selected and thoroughly seasoned timber.



Specify STILL'S

List and discounts on request.

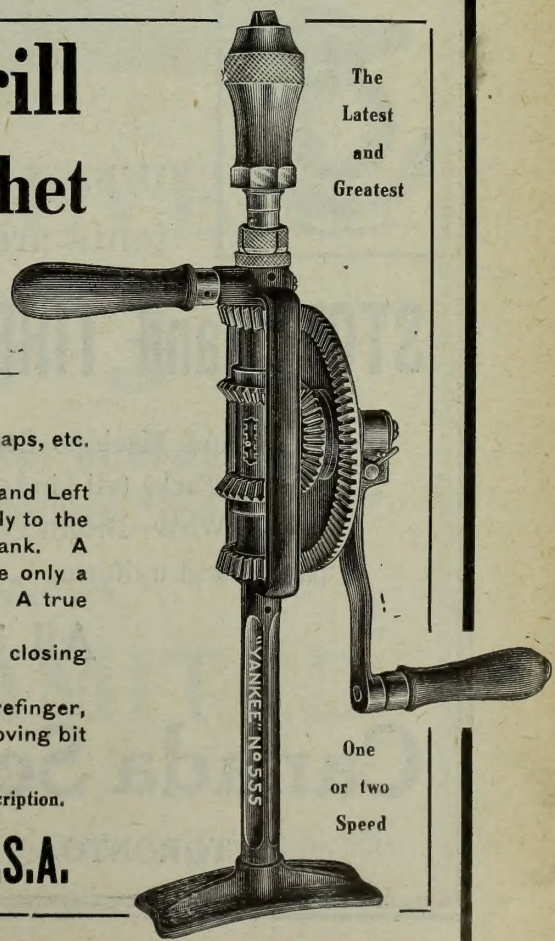
ST. THOMAS - ONTARIO.

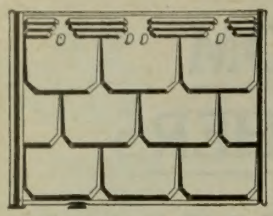
"YANKEE" Breast Drill with Automatic Double Ratchet Adjustable Ball Bearings



A

Notice the little shifter between the gears:—

Notch 1—gives you a plain drill.
Notch 2—A Left Hand Ratchet for removing taps, etc.
Notch 3- A Right Hand Ratchet.
Notch 4—An Automatic, Alternating Right and Left Hand Ratchet, the bit turning continually to the right regardless of the motion of the crank. A great advantage at close quarters where only a short throw of crank can be obtained. A true time saver.
Notch 5—Locks drill for opening and closing chuck.
Lever A—Change of speed with forefinger, without releasing hold on crank or removing bit from hole.



Sold by leading jobbers. Write for full description.

One or two Speed

NORTH BROS. MFG. CO., Philadelphia, Pa., U.S.A.

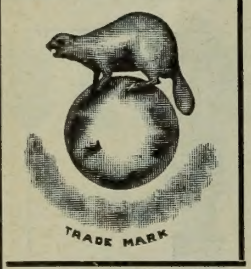
"EASTLAKE"
METALLIC SHINGLES
BEST BY TEST

Make all your customers permanent ones—do not experiment; sell them goods that you **know** will give satisfaction—goods that have **proven** themselves.

25 years ago, after months of experimenting and designing by our experts, in deciding on just the right requirements, we began manufacturing "**Eastlake**" Steel Shingles. We have never changed the first design—in fact, time has shown that it could not be improved upon. We can show you roofs that were covered with "**Eastlake**" shingles the first year and are in perfect condition to-day. Is not this proof that we selected the right design and used the best material—a 25-year actual test proves them the best.

Tell your customers you know "**Eastlake**" shingles are the most satisfactory in every respect — fireproof, weatherproof, durable and easiest and quickest to lay. You are backed by the oldest and largest sheet metal building material firm in Canada—a firm that has always "protected the trade."

The same high quality material and manufacture has placed all our goods in the front rank. **Steel Ceilings and Walls, Siding, Lath, Cornices, Skylights, Ventilators, Finials, Conductor Pipe, Eavetrough,** and a complete line of Architectural Metallic Goods.



Look around you—go after those unsatisfactory roofs; send us measurements for estimates.

"To my mind AN ACTUAL TEST is much safer than one of those PAPER GUARANTEES that will not hold water."
—The Philosopher of Metal Town.

GRAHAM NAILS ARE THE BEST

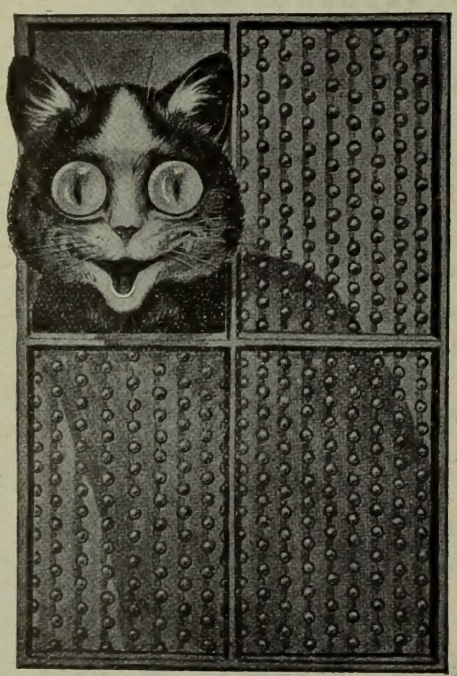
It's time that tells in saw service. Don't buy a saw that will last but a short time. Buy a saw that you can hand down to your grandchildren with pride in its sawing qualities.

Disston Saws

The Saws With a History

have been giving universal satisfaction for nearly seventy years. Hundreds are in use to-day that were made long before the Civil War.

Disston Saws are manufactured from our own Special Steel under the constant supervision of noted experts; steel particularly adapted for saw purposes, hardened and tempered by our patent process. Every inch of steel is perfect, every tooth is a clean cutter, and every saw is the best money can buy.



Avoid the irritation of constant saw troubles—save time, money and temper—by adopting and using a Disston whenever there's sawing to be done.

It's yours—The Disston Hand Book on Saws; a mine of saw information that interests Manufacturers, Contractors, Builders, and even the Man-About-the-House. A request brings it FREE. Address:

IMPORTANT ANNOUNCEMENT

There is a gradual rise taking place in the value of all commodities.

Deliveries of raw material are not so prompt as they have been.

Good buyers seem to have come to the conclusion that it is good business to anticipate their wants some time into the future.

Authorties have recently expressed their opinion that the balance of this year and next year will be the busiest in the history of Canada.

Only a short time ago it was necessary for buyers to look ahead and anticipate their wants for six months.

PRICES TO-DAY ARE AT THE BOTTOM

There will be a wonderful revival in most all lines of business — none more so than in Steel and Iron Hardware.

We have backed up our belief in an increasing business by building large additions to our plant, installing modern machinery, making large purchases of raw material, and recommend that our **customers buy promptly and liberally** to insure prompt delivery when the rush season opens.

Of course you will want the best; so order Hinges, Butts, Plated Butts, Brackets, etc., etc., from us.

The Famous "Three-Flue" Base Burner

A Problem in Cause and Effect.

Our latest and best production in the Base Burner line is now on the market, made in three sizes, one size with oven. It gives six times the heat of the ordinary Base Burner, due to its scientific flue construction. The minor accessories are equally first class, such as duplex nickel, removable nickel parts, etc. There are also other features, such as double mica door, catch, removable fire-pot, double gas cover, etc.; but the flue construction is the basis of success of the "three-flue" Base Burner.

No. 400 SERIES.

Circulation and Radiation equal the 400 Series Base Burner.

Do you want a Booklet?

are beginning to appreciate the implement business as one that can be successfully and profitably handled in connection with their regular hardware lines.

We have a line of goods which will warrant your confidence if you have or intend to branch out along the implement line. Our goods are well and favorably known, and are kept before the agricultural community through the medium of all the leading farm papers.

We supply the following goods

Success Manure Spreaders

Walking Plows of every description

Single and Double Riding Plows for Ontario and the West

Grain Grinders, Disc and Drag Harrows. "Leader" Scufflers. Pulpers, Agricultural Wheelbarrows. Also the famous Thom's Blower, Ensilage Cutters.

These goods can be and are being profitably handled by many of the leading hardware men.

We solicit your inquiries and will be glad to send a traveller to talk the matter over.

The Paris Plow Co., Ltd., Paris, Ont. *Western Branch Winnipeg, Manitoba*

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Different Ways of Country Store Advertising

Newspapers, Signs, Window Displays and Circulars Advocated — How to Conduct a Campaign Along These These Four Lines—Newspaper Space Often Misused — Much Counts on Personal Work of the Merchant.

By J. R. Gamble.

The term "country stores" is used here to distinguish the dealers of the smaller towns from the city merchants. In my opinion, there are at least four methods of advertising that can be made profitable to the dealers of the small towns:—

First—Newspaper advertising.

Second —Fence and tree signs and posters.

Third—Showwindow advertising.

Fourth—Circulars, leaflets and other advertising sent out by jobbers and manufacturers in connection with personal work of the dealer himself.

Newspaper advertising is the medium perhaps most commonly used by the country merchant, and the one from which he derives the least benefit. Not because space in his country paper would not pay if properly filled with good reading matter in which the farmer and his good wife would be interested, but for the fact that the advertisements of some of our country hardwaremen remind one of the letterhead or bill head of his neighbor, the general merchant, which is something like this:—

Office of John W. Jones, Dealer in Dry Goods, Notions, Hats and Caps, Boots and Shoes.

A little ancient, but it was good enough for his father years ago, and it hasn't been changed, although he hasn't had a pair of boots in his store for ten or fifteen years.

Misusing Newspaper Space.

Of course, the merchant who thinks his card inserted in the halfpage of his weekly paper for which he paid his good money, appearing week after week and month after month, and reading something like this :—

John Brown & Co.,
Dealer in Hardware, Stoves, Paints and Oils,

may think he is advertising his business, but he is merely contributing his share toward keeping up the country newspaper.

But with the help he can secure from the jobbers and manufacturers in the way of valuable suggestions and good cuts to attract attention to his advertisement, there is no excuse for the dealer letting his ad., though it be a good one, get stale. If we would make a study of advertising, selecting cuts of the proper size, and in the right proportion, and if we would just think over the lines that we could and should be advertising, our trouble would not be to think of something to take the place of the ad., which has been running so long that it reminds one of the appearance of Rip Van Winkle after his twenty years' sleep, but we would be trying to decide which lines we could best afford to leave out until the next change.

One Line at a Time.

Always advertise but one line at a time. One particular ad. advertised at a time, and at the right time, will bring better results than calling attention to several different lines in one advertisement. Change your ad. often. Never let it run more than two or three issues of the paper.

Here is where we country merchants are at great disadvantage in newspaper advertising. The papers are published weekly, and if we change often we can not have more than fifteen or twenty different ads. during the year.

It is well to get all the help you can from the advertising experts of the jobbers and manufacturers, but their ready-made ads. hardly ever seem appropriate for your particular trade. They do not know how to appeal to a dealer's home people, as the dealer himself does; especially if the dealer studies his trade and knows the peculiarities of his customers as he should.

These experts can give you some very valuable points as to arrangement of advertising, the space required, the style of type, etc., but when it comes to describing the good points of a certain plow to the farmers, or the baking qualities of a certain flour, the dealers are better prepared to write up the copy of their ads. than the other man, though he be an expert ad. writer, for he knows the people he is trying to reach.

Therefore, it is my advice to get all the valuable information of this kind you can; get the ready-made ads. and study them, for there is much in them that you ought to know, and that you never would otherwise secure; with the good points gotten in this way, combined with your own plain common sense, you will have an ad. that will not only bring attention but will bring results.

Pushing Certain Lines.

By all means have two or three guaranteed lines that you are continually bringing before the public's attention. I do not mean by this to fill your newspaper space with these and nothing else, but advertise them in the papers occasionally, and call attention, at the proper time, to them in circulars, posters, etc. For instance, if you will pardon a personal allusion, we have a particular line of tools, and one particular line of paint that we are always advertising in some way. We never let up, and the result is that we have built up a reputation on these lines that has advertised us more than all the other advertising we have done.

The second method, the use of the fence and tree signs and posters, is good, but one of doubtful value. It will discourage any of us, when driving through the country, if we see the signs we have gone to so much trouble and expense to put up, cut to pieces by some 'possum hunter's axe, or perforated by pistol balls, put there as the result of a near-beer or white-top jag, or a wildcat-whisky drunk.

It is a source of pleasure, however, to feel that you have the most attractive signs on the leading roads coming into town, and to know that the prospective customer is having it brought to his attention every few hundred yards that yours is the one place to buy cheap, for cash, the very best goods possible. That these signs increase your sales to some extent there is no doubt, but they are very expensive, and unless they are placed with care on the most prominent roads I doubt the use of them being profitable advertising.

Show Window Advertising

Third—Show window advertising I consider the most attractive that can be done. But I believe that there are comparatively few of the merchants in the smaller towns who take advantage of this cheap and profitable method of advertising.

It is true that some have good windows and trim them regularly, but there are hundreds of others who make practically no use of their windows other than to crowd them full of miscellaneous articles and leave them there indefinitely, to become dust-covered and shop-worn.

Some of the manufacturers are getting up attractive window trims and are doing a world of business in educating the dealers in window dressing. The trade papers are also doing an educational work along this line. The same idea should be carried out in window dressing as in newspaper advertising. Never crowd your windows with a conglomerate mass of different kinds of articles. One line at a time, well and attractively displayed, is much better. Of course, show window advertising is not as valuable

to the country dealer as it is to his city brother, for comparatively few of his customers see any one display if his window is changed as often as it should be. If, however, he has an attractive window, one that will challenge the attention and admiration of the man from the country, he will be sure to tell his family and his neighbors about it, giving a description of the display.

It is troublesome and sometimes expensive to decorate a large window, but it pays well for the trouble and expense. Of course, it goes without saying, that unless the windows are kept fresh-looking and scrupulously clean, they will produce exactly the opposite effect to that which is intended. They will repel, rather than attract.

We now come to the fourth and last method mentioned, and the one I consider to be the most profitable to the country stores.

Printed Matter.

I believe that the very attractive and instructive printed matter sent out by the manufacturers and jobbers, used in connection with the merchant's mailing list and handed out by his salesmen, wrapped up with purchases and enclosed with personal letters, bills and statements, to be the most valuable advertising the merchant in the small town can do. It is true that much of this matter is entirly wasted by being placed on the counter, to be blown about the store, where it is trampled on and so soiled that it is unfit to be sent out, and at the best only attracts attention to those who happen to come into the store. This, however, is the fault of the storekeeper and the misfortune of the concern who sent the matter out.

The best method we have hit upon to keep this matter in order and ready for distribution is to have a shelf, divided into sections, just under the wrapping counter, where this matter can be so classified that the salesman can readily lay his hand on the particular kind to suit the customer being waited on.

You can never tell where this class of advertising is going to bring returns. I had this fact brought forcibly to my attention only a few weeks ago, when one day an old negro walked into the store and called for a broom. He said he had his little grandchild sit down and read the leaflet which was wrapped up with his purchase of a few days before clear through, and if the broom was as good as that paper said it was he "sho' wanted one of dem brooms." The consequences were he got the broom he wanted, it sold itself—and he went away satisfied, and we had a much better profit than we would have had had we sold an unadvertised brand.

Personal Work.

We cannot understand how any live merchant can afford not to take advantage of this inexpensive and very profitable method of advertising. This method alone in connection with the merchant's personal work would keep his firm so prominently and favorably befor the public that he would, if necessary, dispense with all other advertising and hold his own with his competitors who depend solely upon newspaper advertising.

By personal work we mean the work of studying and catering to the wants of your customers. If you haven't what they want, get it—it makes no difference what it is—if it is in your line. Let them know that you are in the business to serve them to the very best of your ability. Shake hands with the men, be polite to the ladies and always give them personal attention, if possible, and kiss the babies.

We know men who live on such good terms with their customers that these customers enter the stores with smiles on their faces and outstretched hands, expecting nothing less than a whole-souled welcome and a hearty hand-shake; and when a customer enters into a store in that manner, you have the right kind of a salesman to handle him, he will certainly carry away with him the article for which he came.

It is the duty, it is the privilege, and it should be the pleasure of every merchant to be not only on friendly, but on the very best of terms with his customers. I know we very often hear such remarks as, "It is a cold-blooded business proposition," and "There is no sentiment in business," but, gentlemen, there is sentiment in business, and the merchant who lives such a clean life morally that his fellowman has the utmost confidence in him; and if he can look his customer to whom some great trouble or misfortune has fallen straight in the eye and can truthfully say, "God bless you, my friend, you have my profoundest sympathy," or can actually rejoice with his friend and customer who has just harvested a bountiful crop, or to whom some other good fortune has come, is doing advertising, the result of which will last as long as life itself shall last. The customer may forget the catchy ad. in the newspaper or the beautiful window display, but he will never forget the man whose sympathy he had in time of trouble or the man who rejoiced with him in his good fortune.

OPENING FOR CANADIAN CEMENT

According to a Government trade report, Canadian manufacturers of cement will find it profitable to devote more attention to the Newfoundland market, as with timber scarce and prices high, there is a growing tendency to use cement for building purposes on a much larger scale that heretofore. Belgium appears to be making a bid for that market, as is apparent by the imports. Quite recently from 300 to 500 barrels of cement from Belgium were unloaded at the wharf at St. John's. It would be advisable for some large Canadian cement manufacturers to appoint a representative in St. John's who could thus keep an eye on the building operations of the colony. The proximity of Canada should count in its favor.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Hobbies' New Catalogue.—A most useful book of reference in regard to the special tools and machines required for hobbies generally, and fretwork in particular, is Hobbies, Ltd., new 1910 catalogue which contains 228 pages and gives an excellent idea as to the trade which may be done in regard to supplying the needs of amateur craftsmen and others. A copy of this catalogue, which is generally sold at 6d., may be obtained by forwarding a request on any hardware firm's letterhead, to Hobbies, Ltd., Dereham, Norfolk, England.

Stoves and House Furnishings.—The Canada Stove & Furniture Co., Montreal, have issued an elaborate book of about 124 pages and cover, containing complete and illustrated discriptions of their large line of steel and cast iron ranges, cook and heating stoves, hotel ranges, base burners, heaters, gas stoves, hot air furnaces, registers, farmers' boilers, etc., together with their sundry lines of stove castors, tea kettles, sinks, lifters, pokers, stove repairs, etc. They also show their big line of washing machines, wringers, refrigerators, carpet sweepers, brass and iron beds, motor buggies and vehicles. The descriptive matter is printed in both French and English, so that the catalogue is specially adaptable for distribution in Eastern Canada. Copies will be sent on request.

HARDWARE LETTER BOX

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Stove Repairs.—W. G. Scott, Mt. Forest, writes: Can any reader of your valuable paper tell where I can secure repairs for the "Deflector" stove?

From Charles F. Rees & Co., 15 Baldwin Street, Toronto.—Editor.

Vacuum Cleaning Machines.—J. H. Worsell & Co., Goderich, writes: Will you kindly advise us through Hardware and Metal, the different firms who make vacuum cleaning machines, operated by hand, as we want to buy a machine of that description?

Manson, Campbell Co., Chatham, Ont., and the Perfect Manufacturing Company, Guelph, both make hand vacuum cleaning machines.—Editor.

Cider Mills.—D. Brocklebank & Son, Arthur, writes: Where can we purchase a cider mill?

From the London Foundry Co., London, Ont.—Editor.

Turpentine Distillery Being Established in New Brunswick

Million Dollar Company to be Organized and a Big Plant Installed to Produce Turpentine, Creosote, Wood Alcohol and Other Wood Products—Man From Russia Installing Plant.

A new industry for the extraction of tar, turpentine, creosote, wood oils, alcohol and other products from pine stumps, tree tops, etc., which is being opened up on the Miramichi river in New Brunswick is attracting considerable attention. The project is said to offer unlimited possibilities, and 80 men are now at work erecting the plant to be used. James Feinbrook, of Chatham, N.B., is in charge of the work and he is enthusiastic over its success. While in St. John one day last week he gave an outline of the project. In the course of a few months, he said, forty boilers and three distilleries will be in use and 300 men will be employed. A company with a capitalization of $1,000,000 is being promoted, and those interested in the venture besides Mr. Feinbrook are Gleickmann & Gleickmann, the National Rubber Co., and Charles C. Pears, of Montreal.

The industry is situated at McKenzie's Brook, eight miles from Doaktown on a branch of Cain's river, a tributary of the Southwest Miramichi. The testing plant has been in operation for some months and the product is declared by experts to be very promising.

The wood tar is said to be better than even the best Stockholm tar and can be sold to the Canadian consumer at a considerable saving. The turpentine is also of a high quality and samples which Mr. Feinbrook had with him had every appearance of proving satisfactory.

Since Mr. Feinbrook has entered upon the venture the price of turpentine has advanced twenty-five per cent. and this he said was very encouraging, as he had figured on the lower rate. The creosote which is manufactured is for the coating of bridge timber, sleepers, etc., and is a very profitable product to handle.

The secret process by which the tar and turpentine are extracted was discovered by Mr. Feinbrook himself and is carried on by means of charring and distilling. The inventor is a man of long experience in the timber business, having been born in the heart of the big timber districts on the Baltic and was interested with his brothers in mills before coming to this country. He conducted a small mill at Chatham successfully for some months but he has been engaged on preparatory work for the larger project for some years.

An option on a large tract of land on Cain's river has been secured and boilers and plants will be erected at intervals of five miles. Only dry wood is used, and it is thus impossible that the young growth of the country will be impaired by the new industry. Norway pine is the only wood handled and in the Cain river district there are enough stumps and refuse to keep the distilleries going for some years.

The large oven for charring has been completed at a cost of $6,000 and the distilling plant is also about ready for use. A gooseneck pipe leads from the charring oven to a large cylinder tank, where distilling is going on. A longer pipe connects the cylinder with an oblong tank where coil after coil of pipe is in position. The finished product comes out in a pipe at the bottom of the last tank.

Experiences of Hardwaremen in Public Life

Kingston Hardware Merchant has been Member of the City Council for Seventeen Years, Having Served as Mayor and Alderman, as well as Chairman of the Principal Committees.

Kingston, January 18.—Robert Elliott, of the firm of Elliott Bros., hardware, plumbing and tinsmithing, who is just completing his seventeenth year as member of the city council, and who was

ALD. ROBERT ELLIOTT, Kingston.

honored with the position of chairman of the Light, Heat and Power committee, is one of Kingston's most progressive business men. He was born in Kingston, and has spent all his life here.

When a young man, Mr. Elliott started in to learn the plumbing and steam fitting business, and qualified with high honors. Twenty years ago, he entered into business with his brothers, John M. and M. B. Elliott, and the result of their labor has been continued success. Not only does the business extend throughout Kingston and district, but all over the province, the firm having recently completed the work of installing heating systems in several government buildings, including the new Armouries at Toronto, the Royal Mint at Ottawa, the Armouries at London and St. Catharines, the new Arts and Medical Buildings at Queen's University, Kingston, and the new Collegiate Institute at Picton.

Although a busy man with his own business, Mr. Elliott has also found time to work for the city, and has given much of his time and service to the people. He is a worker from start to finish, and is one of those whose motto is "boom your city." He has had the honor of being a representative in the council for sixteen years, and has shown himself to be a worthy representative, always giving careful thought of the people's interests, before voting on any question.

Mr. Elliott also served as mayor, in 1896, securing the chair by a good majority, and carried out his duties with great credit to himself.

Just recently, Elliott Bros. made an extension to their shop, which is at the rear of their store, on Princess street, owing to increased business, and have installed new machinery. Motor power is used.

GALVANIZING SHEET METAL.

There are four processes of galvanizing sheet metal. One is the well-known hot method, in which the metal to be coated is immersed in a molten bath of spelter, the metal, of course, requiring that all oxidation and grease shall be removed by a pickling process.

Another process is the electrolytic method, in which an electric current is passed through a solution of zinc, leaving the products suspended in the solution, rent and the duration of time that the articles are left in the bath.

The third process is the sherardizing or dry method of galvanizing, in which the articles are covered with a zinc dust and the articles subjected to a moderately high temperature.

The fourth process is that developed by Cowper-Coles, in which the articles are coated by the vapor of zinc, the articles being placed in one compartment and the metallic zinc being heated to a temperature of vaporizing in a surrounding compartment.

CEMENT PRICES ADVANCING.

One effect of the merger of twelve of the largest cement-producing companies in Canada has been a greater feeling of security in prices.

Up to the present year prices of Portland cement have been fairly regular, but the inactivity in building last year, coupled with the coming into operation of two of the largest cement mills in Canada, left the market overloaded, and prices tumbled to the lowest prices on record, last spring the Toronto civic contract price of $1.28 per barrel being beaten by several municipalities.

Although the present year has been a record one for building, stocks of cement in manufacturers' hands have not been materially reduced, and price cutting has been going on all summer, the lowest sale reported in Toronto being at the record figure of 93 cents per barrel. From $1 to $1.10 was a more usual figure, however, but with the advent of the merger, prices have jumped back to the figures quoted in the spring, and stand, until the end of September, at $1.30. In the opinion of many a further advance will be made next month.

The remarkably low prices quoted have been of little advantage to the retail hardware trade in the larger cities, as in the price-cutting war, agents for the large companies competed with each other in securing even the smallest orders, the retailer being left to do business without a margin or leave the trade for the cement agents.

And that low prices do not encourage an increased consumption is also shown by the failure to decrease the stocks in the makers' hands. Another evidence of this is the lack of confidence in the market, one large concern, who are expected to use at least 2,000 barrels this fall, having declined an offer of 98 cents a barrel the day before prices were advanced.

With two large cement companies in Canada, production should be better regulated, and with the natural competition between these concerns, and the possibility of importing from the United States, prices ought to be kept stable and at a fair figure, allowing a fair margin of profit for manufacturer and dealer, large savings being made in marketing the cement as a result of the merger.

DUTY ON STOVE TRIMMINGS.

Canadian stove manufacturers, among other disadvantages, suffer a hardship in the high duty they have to pay on nickeled stove trimmings. Nickel is mined in Canada but exported to United States smelters, this making it cheaper to buy nickeled trimmings for stoves across the line than to cast and nickel them in Canada.

On nickeled stove trimmings a duty of 35 per cent. is imposed, but on stoves imported complete there is a duty of only 25 per cent. Consequently the Canadian stove manufacturers have to pay 10 per cent. more for the trimmings on their stoves than their United States competitors. And the nickel on the trimmings is originally produced in Canada.

Surely it is time to revise the tariff on stove imports and make it possible for Canadian manufacturers to compete on an equal basis with foreign makers in the western Canada market.

Considering the disadvantages they have to meet in importing asbestos board and nickeled trimmings, on both of which the foreign manufacturer is favored, it is reasonable to expect that the Government will either increase the import duty on stoves or establish an export duty on asbestos and nickel, the latter having the effect of establishing new industries in Canada and making the foreign, rather than the Canadian manufacturers, pay the higher price for these raw materials used in the making of stoves.

WHY BROOMS WENT UP.

Brooms are up in price again and are liable to go higher. Merchants will remember that on Sept. 1st last, a decline occurred of about 50 cents per dozen, but the original prices recovered towards the latter end of last week and are now as high if not higher than before.

The apparent shortage in the broom-corn supply is the cause for the advanced prices, and it is maintained by Canadian broom manufacturers that if the shortage is found to be real the prices will again soar.

In the meantime there is little hope of lower prices before January at least, and the chances are that they will go higher.

Advices from Chicago indicate that the broom corn manufacturers will be confronted with a serious situation. The price of the raw material has already risen from $85 to $200 per ton—a remarkable increase.

The cause is a general scarcity in broom corn. This may be that the crop is short or that farmers have not undertaken the sale of their harvests. The fact, however, remains that broom-corn can only be obtained with difficulty and at high prices.

Other reasons contribute to the present lofty condition of the broom-corn and broom markets of Canada and the United States. Last year, it will be recalled that raw material was high and naturally manufacturers had to work with small supplies. This is the time when manufacturers purchase and so when all went to buy stocks on hand were considerably depleted and prices went up. The rush of buyers therefore in addition to the scarcity of stocks further aided in boosting the prices of the raw material.

"The advance is general," remarked a manufacturer this week, "and there is little possibility of prices going back again before January."

They will only do so then in case broom-corn growers market their products and if the crop is actually a heavy one. The home of the broom-corn is from Illinois down to Texas.

Ruling prices for brooms at present are from $3 to $4.50 per dozen. These prices extend over Ontario and Quebec and practically throughout the west.

THE COPPER SITUATION.

Copper statistics last month are anything but favorable. Following upon the announcement of a pronounced increase in stocks held by European hands—the great bugbear of the copper market—comes the report of an additional increase in United States holdings. It is true that the former increase was expected, but not so the latter. That the trading in August resulted in 12,500,000 pounds of copper being added to the already heavy stocks in the States, came as a severe blow to the market. Production was at its highest point of the year, but the exportation was lower than for any month since February, while consumption was below that of any month

since April. This is a serious matter indeed. Can it be wondered that the markets showed weakness when it was apparent that stocks in the United States and in Europe had increased some 43 million pounds, as the result of one month's working? It shows the real strength of the metal that the market did not collapse altogether. There must be great justification for those who take such a confident view of copper when the metal can stand such a blow.

Unfortunately this natural strength is being offset by the extreme rate of production. It is being given no chance to restore that general confidence in the market which can alone stimulate business over and above the actual immediate needs of the consumer. A falling market holds off more business than it induces, and there is no doubt that with copper more stable, metal wanted for legitimate consumption would have largely increased.

It is certain that iron and steel would not be in the favorable position that they are now had not the large interests restricted consumption and given the legitimate consumption a chance to clear off surplus stocks. And if the remedy was effectual in iron and steel, why not in copper? There has been a tremendous increase in iron and steel consumption, but nothing like the same relative advance in copper. But the industries are allied, and, unless for some specific reason, the same improvement should be noticed in each case. Copper has been hampered by excess of production. There has been no pruning to strengthen the reviving influences at work, and thus we have legitimate growth strangled by heavy stocks.

Give copper a chance. Let there be some restriction of the heavy output. Let the consumption clear away some of the stocks that hang over the markets, and check any natural strong advance. Heavy buying transactions for speculative purposes only give a fictitious strength to the market. It is merely a changing of holders, and probably from a strong one to a weaker.

We believe that a strong legitimate demand is only waiting a favorable opportunity to break in, but that will not come until consumers feel fully assured that the lowest prices have been reached, and that copper is in for a steady advance. And that steady advance cannot come until stocks in speculators' hands are much less than they are now. With restricted output the demand now prevailing would soon make inroads on the stocks, for after all the consumption is good. But it needs to be very good indeed to contend with an output such as August produced.

VAST WEALTH OF AGRICULTURAL CANADA.

Some twenty or more years ago the value of the vast Canadian Northwest, so far as a grain producing country was concerned, was practically nothing.

Gradually, since the peopling of the Prgirie Provinces began, the yield increased in leaps and bounds—with the probable exception of 1907—until this year it is estimated that the wheat crop alone will exceed 113,000,000 bushels, and greater than ever before.

According to the Dominion Government crop bulletin, issued a few days ago, the revenue from the cereal crops of the whole country this year, should, in the aggregate, yield something over $50,000,000 more than last year. The total value of the crops is estimated (at first cost) at $500,000,000, and the increase over last year is therefore 10 per cent. The condition of the grain crops in Canada on Sept. 1st, was really better than had been expected. The yield of wheat in all the provinces was 168,386,000 bushels, or 43,696,000 bushels more than a year ago. All the provinces, with the exception of Ontario, show substantial gains in the yields of wheat, barley and oats. But aside from the three Northwest Provinces and Ontario, very little wheat is grown.

The Prairie Provinces this year give an increase of no less than 45,231,000 bushels in wheat, 79,942,000 bushels in oats, and 7,942,000 bushels in barley.

A resume of the increases in areas and yields of wheat in the west during the past five or six years shows wonderful transformations.

In 1903 there were 3,125,000 acres under wheat cultivation and the yield was 54,000,000 bushels.

In 1904, under wheat cultivation, 3,500,000 acres, yield 58,000,000 bushels.

In 1905, under wheat cultivation, 4,252,000 acres, yield 86,300,000 bushels.

In 1906, under wheat cultivation, 5,000,000 acres, yield 95,000,000 bushels.

In 1907, under wheat cultivation, 5,013,544 acres, yield 82,000,000 bushels.

In 1908, under wheat cultivation, 5,767,250 acres, yield approximately 100,000,000 bushels.

The acreage for this year is distributed as follows :

Area in Manitoba under crop : Wheat 2,642,111 acres ; oats, 1,373,683 ; barley, 601,008 ; flax, 20,635. Last year : Wheat, 2,850,640 ; oats, 1,216,632 ; barley, 658,441 ; flax, 50,187.

Acreage planted to grain in Saskatchewan : Wheat, 3,912,497 acres ; oats, 2,192,416 ; barley, 235,463 ; flax, 278,835. Acreage last year : Wheat, 3,703,563 ; oats, 1,772,976 ; barley, 229,574 ; flax, 264,728.

The exact figures for Alberta are not available, but those for last year are : Spring wheat, 212,677 acres ; winter wheat, 104,956 ; oats, 431,145 ; barley, 77,867 ; flax, 9,262. Acreage is increased nearly 100 per cent. this year.

The value of the 1909 crop is placed at $100,000,000. This is a conservative estimate made by a leading Canadian bank :

	Bushels.	Farm Value.
Wheat	113,979,336	$100,301,815
Oats	157,537,750	47,261,325
Barley	24,324,648	9,729,859
Totals	295,324,734	$157,292,999

This story carries with it a world of thought of what this great west means to Canada's future, to the manufacturing, financial and mercantile interests throughout the Dominion. The people pouring into the west from various countries must be of great importance to the western merchant who is planning to take care of the trade.

The high prices of wheat seem to puzzle the trade. North America produces by far the greatest amount of wheat in the world—about a third of the full supply. This year the yield is some 882,000,000 bushels, 80,000,000 bushels more than last year, or 50,000,000 bushels more than the crop of 1906, when the United States production was exceptionally large. Many speculators are at present onlookers, waiting for the mists to clear away. They hope that by the end of September complications will have been cleared away and that they will be in a better position to grasp the situation accurately.

We believe the practice of getting together in a social way should be encouraged. Business in these strenuous days demands so much of a man that he is apt to grow rusty in the amenities of social intercourse simply through lack of exercise, often the result of a delusion that he has not time. We grow brighter by contact with our fellows, and few men of affairs can talk five minutes on a serious subject without dropping a thought or two well worth cherishing. Besides, if you have learned something that is worth while, don't be selfish with it—pass it along to the other fellow. Nine times out of ten, from an interchange of thought, you will receive more than you give.

HEATING AND ROOFING TRADES

FOR USE IN ESTIMATING.

Roofing tin is furnished in two sizes —28x20 inch and 14x20 inch sheets. The larger size is mostly used, requiring less seams, and consequently cheapening the cost of laying. The smaller size is generally preferred by roofers for best work.

A box of roofing tin, either size, contains 112 sheets.

Thickness and Weight.

There are three thicknesses of good roofing tin made—IC (approximately 30 gauge, U. S. standard), 250 lb. weight per box, 28x20 inch; IX (approximately 28 gauge), 290 lb. weight per box; 2X (approximately 27 gauge), about 330 lb. weight per box. Weight per 100 square feet laid on the roof about 70 lbs.

IC plates are used to a far greater extent than the heavier grades, being less expensive; IX is generally used for gutters, valleys and flashings. For best roofs IX sheets are preferable, the extra thickness being worth more than the extra cost. The difference in weight is almost entirely in the black-plate base.

ICL, IXL, etc., designate "light weight" plates, below the standard gauge. ICW, IXW, etc., indicate "waster" plates, or seconds. No light weight of waster sheets are stamped with the "Target-and-Arrow" brand.

Covering Capacity.

For flat-seam tin roofing, one box 14x20 inch sheets will cover about 192 square feet; a box of 28x20 inch 399 square feet. To lay 100 square feet requires 59 sheets of 14x20 inch size; 28 sheets 28x20 inch size.

For standing-seam tin roofing, one box 14x20 inch sheets will cover about 169 square feet. A box of 28x20 inch 366 square feet. To lay 100 square feet requires 67 sheets 14x20 inch, or 31 sheets 28x20 inch. Sheets of 14x20 inch can be laid either the long or short way. The best roof is made by laying the sheets the 14-inch way. Similarly, in laying 28x20 inch, always lay the 20-inch way.

If two roofers figure to lay a roof of 28x20 inches, the one who lays it the 20-inch way cannot lay it as cheaply as the one who would lay it the 28-inch way, but he can make the better roof.

Cost Using 14x20 Inch Sheets.

The cost, using 14x20 inch sheets, will amount to about 25 per cent, more than the cost using 28x20 inch size, owing to the greater number of seams; hence more tin, solder, cleats and work are necessary.

Standard brands of good tin are put up in rolls, 14, 20 or 28 inches wide, for the convenience of roofers. Each roll contains 108 square feet (about 63 linear feet, 28x20 inch sheets, laid 20 inches wide). The rolls are painted one side or both sides, as wanted, with good metallic brown paint. Seams are carefully soldered by hand, using good 100 to 100 solder, and rosin as a flux. Every sheet should show the trade mark of the brand.

One gallon of good paint (metallic brown and linseed oil) should cover about 400 square feet of surface, one coat.—Hardware Trade.

MERITS OF COMBINATION HEATING.

One reason why a combination job is considered better than a hot water or steam job, writes W. J. Heald, is that better ventilation can be obtained: another is that all the advantages of the circulation of air (which in these days of fresh air cure is considered of so much importance) that is secured by the use of the hot air furnace are obtained, and the rooms farthest from the furnace are heated by hot water radiators and those nearby are heated by hot air registers, and thus avoiding the use of large and unsightly radiators in the large living rooms on the first floor where the room is of so much value.

It is also a fact that quick results are obtained when fresh fire is built through the hot air registers in a combination job. This is especially appreciated in mild weather, in the morning, and at any time when the fire has been allowed to get low, and quick results are desired.

Effects Economy.

Another feature of the combination is that the water is heated by the same fire that heats the furnace for the radiation of hot air and the heat from the hot water radiators is largely clear gain. In other words it provides more capacity for utilizing the heat from the fuel burned. All styles of heaters, it matters not whether it is steam or hot air heaters, find it difficult to retain or utilize the heat from the fuel burned. In fact it is claimed by some experts that quite often 90 per cent. of the heat from the fuel burned is lost, and as stated above, in the combination we are able to utilize more of it, and this is one reason why this system is gaining favor.

In combination heating, Mr. Heald finds the customer is inclined to want more hot water used than should be put in. He advises the use of as many hot air registers as can advantageously be used when putting in the combination plant, and that no room should be left without the hot air pipe that can possibly be reached.

It is a well-established fact that there is a limit to the distance that hot air can be carried successfully through a horizontal pipe, and it is in these remote rooms that hot water radiators should be placed of ample size to heat them without using a hot air pipe, but if radiators are placed in rooms to which hot air pipes can be taken, they should be placed in the exposed ends and one-half (or less) the size required, with a hot water system.

Heats Distant Rooms.

The principal advantage of the combination system over the hot air system is that of being able to carry heat by the hot water radiators to the remote rooms without loss, and heating them at almost clear gain instead of forcing the furnace to do it. Another advantage in the combination is that the heat is retained by the hot water radiators with a low fire and there is an economy of fuel.

The first cost of the combination is less than the cost of the all hot water or steam heat, and requires less fuel to operate, and there is no doubt in my mind that when the merits of this system are better known that it will be used in preference to hot water for residence heating, to a great extent.

The same rules for connecting the hot water radiators in a combination heater apply as in connecting a regular hot water heater. The hot air pipes should be connected before the hot water pipes or put up in a combination job, for the reason that it is more important that they shey should be put in without sharp curves and with plenty of rise. The water pipes can be run to accommodate the hot air pipes, and should not interfere with them.

ASBESTOS PAPER ON HEATER PIPES.

The use of asbestos paper on furnace pipes is little thought of by many who are scientifically inclined and who give as a theory to support their views that there is no air space between the asbestos paper and heater to give insulation. Be this as it may, writes J. S. Lane in the Metal Worker, however, the furnaceman is often called to place asbestos paper on pipes. When flour paste is used it is not only troublesome and sticky, but it is liable to attract the mice as they endeavor to get at the flour. The method that has been endorsed by many is to soak the paper in a tub of water and at the same time have a fire in the furnace so the pipes are hot. The paper should be put on with a lap of at least 2 inches, and then made smooth with a brush. When this is carefully done it will remain smooth and even.

MARKET FOR LINES AND TWINES.

There is said to be an excellent market in Newfoundland for lines and twines for use in the fisheries, the imports frequently approximating $100,000 annually. A perusal of the customs returns shows that during the three fiscal years 1904 to 1907, the imports from the United States rose from $36,771 to $77,290, and the imports from the United Kingdom advanced from $6,808 to $18,346, whilst the imports from Canada show an increase of only $1,000 during the same period. Of course, the total imports of lines and twines for the year 1907 were just double those of 1904; but Canada certainly should have claimed a greater percentage of the total increase.

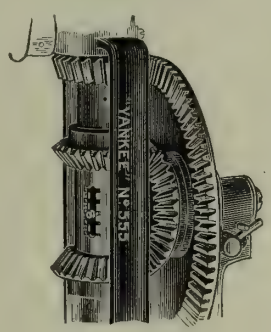
Canada Pottery Co., Iberville, Que.; capital, $90,000; to manufacture sanitary porcelain baths, lavatories and all kinds of pottery. Incorporators Alb. Clayton, O. Couturier and Arthur Clayton, Iberville.

NOVELTIES AND NEW GOODS

NEW ICE CREEPER.

The Smith Hardware Co., Montreal, are putting on the market a new ice creeper the "Little Clincher." Hitherto the objection to similar articles has been the bother of nails, screws, rivets or straps, but with the "Little Clincher" this nuisance is done away with. By a simple little grip arrangement the creeper is fastened to the heel in half a minute, and while practically invisible, is firmly fixed. In addition there is no need to remove them while indoors. The heel plate can be folded, reversing the spikes under the instep, and making the floors and carpets safe. Little clinchers are made of steel with especially hardened points, and grip the pavements firmly at each step. Ice creepers are far better and less expensive than accident insurance—a strong selling point for retail merchants.

Little Clincher Ice Creeper.



YANKEE BREAST DRILL.

North Bros. Mfg. Co., Philadelphia, are introducing new "Yankee" breast drills, Nos. 550, single-speed, and 555, double-speed, the latter being illustrated herewith.

New Yankee Breast Drill.

The peculiar feature of this tool is found in the shifter on cylinder between the small gears. The mere movement of this shifter in the various notches causes the tool to perform different movements. In the first notch nearest the chuck it is an ordinary or plain breast drill. In the second notch it becomes a left-hand ratchet useful in removing taps, but especially to loosen drill if it becomes jammed in a hole and cannot be moved forward or crank revolved backward. In the third notch it becomes a right-hand ratchet. In the fourth notch it becomes what is difficult to describe, but when seen excites admiration for what it does and curiosity as to how accomplished. When in this notch any movement of the crank, however short, or turned continuously in either direction, or a combination of the two, the drill in the chuck will always turn to the right and drill continuously, hence no time is lost and double the work is done as compared with single or a right-hand ratchet. The change of speed on the No. 555 (double speed) is made by crank toward gear for fast and away from gear for slow speed. This is done in the fractional part of the revolution and at any time, even while drilling, without removing the tool from work and with any of the various movements of the shifter. In design and construction the "Yankee" breast drill is a machine, built and finished as such. The frame is malleable iron, the spindle of steel, turned and fitted, the gears have the teeth cut from the solid to run smooth and accurately. The tool is finished in a dead black color in keeping with its character of a machine, and not in bright or gaudy color as hardware. The bright parts are nickel-plated and polished, and will not rust in stock or in use.

Mechanism of New Drill.

WHOLESALE HARDWARE CONVENTION.

The eleventh annual convention of the Canadian Wholesale Hardware Association will be held at the Chateau Frontenac, Quebec, on Thursday and Friday, Oct. 7 and 8. It is several years since a convention was held at Quebec, and there should be a good attendance.

The following week on Oct. 13, 14 and 15, the seventeenth convention of the American Hardware Manufacturers' Association will be held concurrent with the fifteenth annual convention of the National Hardware Association at Atlantic City, N.J.

TRAVELERS CHANGE POSITIONS.

C. D. Ten Eyck, who for several years was sales representative in Canada for E. C. Atkins & Co., saw manufacturers, Indianopolis, and who, since the establishment of their Canadian factory at Hamilton has acted as general sales manager of the Canadian branch, has resigned to accept the position of sales representative of the American Fork & Hoe Co., Cleveland, and will in future call on the jobbing trade in the United States in their behalf, as well as upon the jobbers in Canada, for the Maple Leaf Harvest Tool Co., Tillsonburg. Mr. Ten Eyck has been very successful in representing the Atkins Co., as is shown by the development of their business to a point where a Canadian factory was absolutely necessary, and his resignation was reluctantly accepted. The acceptance of his new position necessitates his removal from Toronto to Cleveland. Mr. Ten Eyck regrets this greatly as his associations in Canada have always been most pleasant, and he takes away about 40 pounds of avoirdupois more than he brought into the country several years ago.

C. D. TEN EYCK,

Who will Represent the American Fork & Hoe Co. in Future.

E. C. Atkins & Co., have appointed F. J. Klingensmith to cover the lumber-producing territory and hardware trade from the Ottawa around the Georgian Bay to Fort William and Winnipeg, C. R. Hubbard continuing to represent them in Lower Ontario, while A. D. Cantin, resident at Montreal, will represent them in the Province of Quebec.

The proposed additions to Grace hospital, Winnipeg, will cost in the neighborhood of $30,000.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Ground White Lead—Cut from 25c to 30c.

Toronto.

Ground White Lead—Decline of about 25c per 100 pounds.

MONTREAL.

September 24.—There is a very healthy tone to trade generally. Fall lines are moving in much heavier bulk, and delivery is being taken in lines that are not usually wanted just at present. Stocks in dealers' hands are very light, but they are becoming well assorted. Merchants are very confident as to good trade right through the fall, especially as money is circulating more freely, while farmers generally are getting good prices. Trade in the North-west is fully up to expectations, but in the east it is not so good as anticipated.

Lumbermen's supplies are moving in better strength every day, and while booking is going on for the majority of the lines delivery is being taken in axes and axe handles.

The demand for guns is still as strong as ever, and not only is there a scarcity in dealers' hands, but jobbers' stocks are also low. Last year, conditions were just the reverse. Sleigh bells, weather strip and snow shovels are in prominent demand, while house cleaning utensils are in strong request Prices on bolts and nuts have again advanced in the States, but locally no change has been announced, although the market is very stiff. Builders' hardware is also very firm.

Altogether conditions are very satisfactory. Prices are firm, dealers are ordering more confidently, and the shipping departments of the various jobbing houses are extremely busy, as goods are wanted immediately.

BUILDERS' HARDWARE—The active demand for builders' hardware, which has characterized the market all the year, continues, and most satisfactory orders have come in for lock sets, escutcheons, bolts, and butts. Although prices are very firm, the market is unchanged, and we quote : Lock sets (inside) $4 per doz. and up, lock sets (outside) $12 and up, common rim locks $1.10 per doz., porcelain knobs $1.10 per dozen.

FALL LINES—There is now a good movement in weather strip, sleigh bells, snow shovels, horse blankets, burners, cow ties and curry combs. Owing to the fact that little booking has been done, immediate delivery is being taken in many lines that are not usually consigned just yet. Dealers want to get their stocks in order early. Cutlery and silverware are moving well for the coming holiday trade. House cleaning lines continue to move strongly and carpet sweepers, brooms, mops pails, washing and wringing machines, scrubbing brushes and polishes are in active request. There is a general good demand from the Northwest, although nearer home it is somewhat quieter than was anticipated. Enamelware is selling splendidly in the Northwest.

MINERS' SUPPLIES—The demand continues steady. Sorting up orders in picks, hammers, and powder form the greater portion of the trade. The market is unchanged, and we quote :—Miners' picks, 17c a pound ; prospectors' hammers, 20c ; pick handles, $1.85 a dozen ; drilling hammers, 6c a pound ; crowbars, 3½c ; drill steel, 8c.

BOLTS AND NUTS—Although prices in the States have again advanced, quotations this side are unaltered. The demand is good, as dealers' stocks are light. We quote : Discounts on carriage bolts, ⅝ and smaller, 70 ; machine bolts ⅝ and less, 60, 10 and 10 ; coach screws, 75 ; stove bolts, 80 and 7½.

SCREWS—There is a steady call for screws, with the market firm and unchanged in price. We quote : 85 and 10 off for flat and round head, bright ; 75 and 10 off for flat head brass, and 70 and 10 for round head brass.

LUMBERMEN'S SUPPLIES—Delivery is now being taken in axes and axe handles. Booking continues to improve for all lines and fine trade is opening up. The market is unchanged, and we quote : Cant hooks, $12 a dozen and up ; axes, $6.50 a dozen and up ; axe handles, 1.15 and up ; cross-cut saws (inferior), 25c per foot and up, better grades 43c per foot and up : axe wedges 25c a dozen and up.

SPORTING GOODS—Guns are still in strong demand, and not only is there a shortage among dealers, but jobbers are not over supplied. This is somewhat of a contrast with last year. With the demand for guns, ammunition, wads and knives are also prominent. Hockey sticks and skates are in better call, as well as snowshoes. Other sporting lines are also showing improvement.

SHOVELS—Shovels are in fair demand, some good sorting orders being received during the week. The market is unchanged and we quote : First and second grades of spades, 60 and 2½ ; 3rd and 4th, 50 and 2½ ; scoops, 1st and 2nd grades, 50 and 5, 3rd and 4th, 45 and 5.

WIRE—The market is still unchanged, with an improving demand. We continue to quote : Barb wire, car lots and mixed, $2.50 ; small lots, $2.55 ; plain twist, car lots, $2.80 ; small, $2.85. Galvanized wire No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots f.o.b., Montreal. Coiled spring fencing, $2.30 ; straight and mixed car lots, and $2.35 small lots. Plain wire, bright, annealed and annealed and oiled, $2.25 base. Other lines $2.30 f.o.b., Montreal.

TORONTO.

September 24.—Booking for October delivery has been very heavy for the past ten days, and inquiry and orders for fall and winter goods are frequent and numerous. Sales show a satisfactory increase over the preceding weeks, and demand is general. Country and city hardwaremen are asking for shelf and heavy hardware, and builders' hardware, farm implements and mechanics' tools are brisk at present.

Prices are unchanged on all general lines, though jobbers state that some building lines are much too low. The general expansion in the iron and steel trade, with the consequent rise in prices, has improved the tone of the hardware trade. There is now no shading of prices, but a continually improving bettering of market conditions and a firming up of prices.

Wire nails are the particularly bright selling commodity now, and the constant demand has kept factories running at capacity.

BUILDERS' HARDWARE — Large quantities of locks, butts, hinges, keys, knobs, fasteners and other articles of like nature are being sold at present. This line has been a busy one all season and the end is not yet. Demand is made for machine-made sets rather than hand-made goods, and some big importations of high class goods have come in from the United States. The Canadian factories are running to the limit trying to supply the need for builders' hardware. Quite a lot of favorable comment has been made on the output of the Canadian manufacturers. Across the line some competition has developed among manufacturers of wrought hinges and butts which has caused an uneven market on strap and T hinges and wrought butts, many of them selling very low. Mechanics' tools are steadily active. Roofing paper is rushing.

HOUSEHOLD GOODS—There is a "between seasons" air just now. On the whole trading is satisfactory. Orders call for a variety of lines, but small quantities of each. Preserving kettles and bottles have gone out this week on late orders, and some goods sales of housecleaning articles have been effected. Galvanized pails and tubs are only fair in sales, and some few orders call for baskets of wickerwork. The demand for enameled, galvanized, japanned and pieced ware is only pretty good. Kitchenware is ordered spasmodically.

FALL LINES—Farm implements are going out rapidly to all sections of the province. Drain-cleaners in various sizes, spades, shovels, picks and barrows are the articles most in demand. A number of axes, poles, cant hooks and other like implements are going into the lumber country and not a few small orders for small heaters, drills and heavy tools have come in from the mining sections. Fall goods are particularly active just now and next week is expected to show even greater activity. Wire both barbed and plain is a trifle slow as yet, but new business is said to have been placed at the mills. Heating line goods are still wanted, and while present booking is not heavy, shipments are particularly heavy. Snow lines like shovels, sleigh bells, and scrapers were active early in the week.

HEAVY GOODS—Some nice sales of copper slating nails were made during

the past ten days, but the great feature of heavy goods and in fact the whole hardware trade is the nail demand. Wire nails are being ordered just now as freely as at any time during this year, and that is saying a great deal. Nearly every order of mixed goods calls for wire nails and not infrequently the demand is for nails alone. Sash weights have advanced $1 a ton across the border, following the ascent of pig iron, and wrought iron shelf-brackets have also advanced there, as have as well some grades of bolts and nuts. The tendency is to raise the price of all manufactured iron and steel lines in the United States, and Canada, it is expected will follow. Structural steel is fair in demand. Screws are nearly as brisk in sales as are wire nails. Rods, pipes and bars are steady, with good business being done. Cut nails are rather weak.

SPORTING GOODS—Guns and ammunition still hold the fort, so far as prominence in sporting goods is concerned. Shot has gone up 10 cents per 25-lb bag in the United States, on drop, buck and chilled, but no change is yet scheduled here. Football outfits and articles are being placed in the larger stores, though orders so far have not been large.

HARDWARE MARKETS

MONTREAL.

September 24.—Some heavy buying has been noticed this week. Not so much among the smaller purchasers, but by the larger users who are now waking up to the fact that the close of navigation is getting near, and that it is an expensive proposition to run out of metal during the winter. Spelter is in strong demand by the large galvanizing firms, and some heavy orders have been placed through the first hands. Galvanized sheets are also being ordered freely, the fact that Old Country makers will not quote for next year influencing the buying. Pig iron is also in active demand.

The jobbing trade keeps in a healthy condition, and orders, while not on the heavy side, are freely placed. The smaller users are working without stocks and with the markets in their present condition, can continue to do so without fear. No change in prices has been announced this week for ordinary jobbing lots. Of course prices are shaded according to quantity, but the fair average market price remains as it was last week.

Tin has been in good request, and some encouraging inquiries have been received. Copper is a little firmer again, and the shading noticed last week is not so pronounced. Inquiries are good, and plenty of interest is being taken in the market. Lead shows some improvement, but is still inclined to be weak.

On the whole the primary markets show more strength again. Tin has been fluctuating probably in view of the Banca sale. Copper is firmer both in London and New York, but another increase in stocks for September is anticipated. Spelter is still very firm, and in a good healthy position.

PIG IRON—Users of imported pig continue to place large orders for delivery before the close of navigation at slightly stiffer prices. Some very heavy shipments are expected. The Canadian demand is helping to improve the Old Country market. Canadian furnaces are also working on good orders, and the stiffness of prices in the States helps to strengthen the home market. The pig iron situation in the United States continues to strengthen, and there is heavy inquiry from the larger interests for delivery this year and early next year. Furnaces are working at full pressure, and heavy tonnage is being delivered. The railroads are purchasing steel heavily, and some of the mills have the greater part of their output sold to the end of the year. Steel lines are higher in figure, and the end is not yet. The Old Country market is showing improvement, and exportation is heavier. It is hoped that with the heavy demand in the States that Old Country pig may be wanted. Cleveland warrants are now quoted at 51 shillings and sixpence.

TIN—Although the English market has been fluctuating no change has been made locally, the average price for ordinary jobbing lots being around 33c. This price is, of course, shaded for large size orders. A good quantity of metal has been bought during the week and satisfactory inquiries received. As we have said the English market has been fluctuating, the approach of the Banca sale having a tendency to weaken the market. The consumptive demand is fairly strong, but on the whole both the London and New York markets have been somewhat colorless.

COPPER—The jobbing price of 14½ still obtains and with the primary market somewhat stronger, not so much shading is being done. Still, of course, inside prices can be secured for large orders. A good deal of copper has gone out during the week, and inquiries seem promising for much better business in the future. The New York market is on the whole stronger. There has been an improvement in this export business, but it is expected that stocks will show an increase for September. It is more than ever evident that production should be restricted to put copper on a strong basis.

SPELTER—A very heavy demand has arisen for spelter, the large galvanizing interests placing their orders to take effect before the close of navigation. The jobbing demand is also very heavy at $5.75. The English market is strong, and keeps at £23. The heavy buying going on for galvanized sheets, and the improvement in the brass trade, have made spelter very sound.

LEAD—No change is announced in lead, and imported is still marked at $3.45. Trail $3.35. Trade shows an improvement, but the English market is weaker and the situation is none too good.

TORONTO.

September 24.—Particularly in iron is the metal business good this week. The markets, both local and foreign, show strength with all prices, except those in lead, quite firm. Orders while increasing steadily in number are also growing rapidly in volume. The Canadian smelters are running at capacity, and one of them has been compelled to ask assistance of a neighbor to help fill the orders already booked for early delivery. On futures, especially those for 1901, all the iron industries are booking continuously, and in fact prefer to wait awhile before taking orders. It is generally understood that there will be another substantial rise in iron prices before the end of the present year, and for this reason the iron men prefer to wait before accepting bookings.

Foundries, pipe works and boiler makers are particularly busy and have been since the beginning of the summer. Demand for heating furnaces and hot water boilers, too, has considerably helped the iron situation. In steel almost the same condition exists. Structural bars and beams are wanted in various sections of Ontario for building purposes, and machine and tool steel is taking up vast quantities of that metal. All the other metals, even lead, show some strength over a week ago, and all of them are firmer in price, though lead is off color when bona fide sales are taken into consideration. Quotations are unchanged.

In the United States a number of things are happening. Demand for iron and steel is going ahead by bounds, and prices on all manufactured lines are advancing pretty generally. Some eastern furnaces have been complaining of scarcity of ore, and 100,000 tons of Cuban ore have been brought in. Development is noted, too, in Canadian Lake Superior ore, though as yet no large quantities have been taken out. Some English pig iron has been brought to eastern U. S. ports to meet the demand there, and this, together with importations into Canada, has caused the British markets to advance prices to nearly the figures of 1907. In scrap both Canada and Germany have made satisfactory sales in the United States, the former in iron and steel and the latter almost exclusively with steel.

PIG IRON—The demand for pig iron is still quite active. In fact this is the best selling article in the metal market. Delay is now being experienced with deliveries and shipments, and many furnaces and iron jobbers have their hands pretty full for a couple of months ahead. This has made the local market very strong. The prospects for 1910 are of the brightest. Bookings are offered for next year, but makers and jobbers fight shy, as an advance is expected before the end of this year. For ordinary lots iron prices remain unchanged. No. 1 Canadian foundry is about $20; No. 3 Middlesbro is $20.25, and Cleveland is $20.75.

COPPER—A fairly good business has been transacted this week. Foreign markets report a firmness that was absent a week ago. Trading with consumers has been about as usual. Prices, locally, are unchanged at 14c and 14½c for lake and casting ingots.

LEAD—The market is easier, but trading is better than last week; almost any price may be had for quantities on

actual sales, although quotations remain about $3.55 and $3.45 for imported and domestic leads in 100-lb. lots.

SPELTER—The market is a shade firmer, though local quotations remain at the old figure of $5.75. The galvanized trade is actively employed and are buying frequently though in small lots.

SHEETS AND PLATES—Enormous business has been done of late—for probably a month back—in both these lines. Further importations to cover orders and demand for fall delivery have had to be made. Prices are low considering the advances made in the iron and steel world, and are unchanged from last quotations. Stocks at present are very low.

TIN—This metal is firm, but unchanged in price. The local quotation is yet 32c. Malay tin is not coming forward so well as a year ago. This is said to be due to the low prices prevailing in Europe. The decline amounts to nearly 10 per cent.

OLD MATERIALS—Scrap iron is the busy line in old materials, the other metals being rather quiet with stocks pretty large. Machinery scrap is easier now that industrial plants are fairly well filled up. This, however, is the only scrap line which shows a change. The prices offered are as follows: Heavy copper wire, 11¼c; copper bottoms, 10½c; heavy red brass, 10¼c; heavy yellow brass, 8¾c; light brass, 6½c; tea lead, 2½c; heavy lead, 3c; scrap zinc, 3½c; No 1 wrought iron, $11; machinery cast scrap, No. 1, $15 to $16, stove plate, $13; malleable and steel, $8; old rubbers, 9c.

WINNIPEG TRADE GRIEVANCE.

Winnipeg, Sept. 21.—The members of the Retail Hardware Association met on the evening of Sept. 20 and discussed several questions regarding the protection of the retail trade. Several members produced evidence against local wholesale houses that were selling retail, and upon motion it was agreed that the secretary be authorized to write the wholesalers in question, producing the evidence which was presented and requesting them to discontinue the practice, upon the penalty of being dropped from the retailers' list.

It was further agreed that at the next meeting of the association, the secretary of the Retail Merchants' Association be asked to be present to explain the by-laws of that association, with a view to unite the two organizations. The general opinion was that the Hardware Association would be greatly assisted in maintaining their right should they have the co-operation of the other merchants.

J. Fowler, Goderich, is preparing plans for an addition to the hospital in that town. Approximate cost, $4,500.

A decision has been made by the Public Library Board as to the site for the new Hamilton library. It is the intention of the board to begin building operations as early as possible in the spring.

HARDWARE TRADE GOSSIP

Ontario.

Jacob Eyer & Son, Richmond Hill, are advertising their hardware and tinware business for sale.

Mr. and Mrs. J. Walton Peart, St. Marys, are spending a few weeks' holiday at Louisville, Kentucky.

Chas. Watt, Ottawa, has moved his hardware business from Bank Street to larger premises in Sparks Street.

W. G. Colville, who has opened a hardware store at Fort William, has taken his family to his new home town from Barrie.

Walter Timms, Stratford, has sold his tinsmithing business and stock to C. J. Werner, and in the future Mr. Timms will work for Mr. Werner.

James Brown, late with the Hobbs Hardware Co., London, has entered into partnership with J. Vance in the hardware business at Inwood, succeeding T. Smith.

T. F. Hodgson, Toronto manager of the Dominion Wire Co., spent last week in Montreal, and while there attended a reunion of the members of the Montreal lacrosse club's champion team.

Percy Applegate, an employe of J. B. Crawford's hardware store, at Dutton was placed under arrest on a charge of bigamy. He is said to have three wives at various points in the United States, and was arranging a fourth venture when arrested.

C. F. Grover, who formerly represented the Dominion Wire Co. in the territory west of Toronto, and has more recently been traveling for the London Fence Machine Co., has again joined the staff of the Dominion Wire Co., and will cover his old ground on their behalf.

Quebec.

J. & L. Lacombe, Sherbrooke, have been on a visit to Montreal.

T. H. Jorden, of A. C. Leslie & Co., has been visiting New York.

W. J. Wall, manufacturers' agent, Montreal, has been on a visit to Chicago.

A. J. Teakle, of H. & J. Young, Quebec, has been visiting hardware circles in Montreal.

The assets of J. A. Massicotte, grocer and hardwareman, at St. Prosper, are to be sold on Sept. 29.

John Irwin, Montreal sales manager, Brandram-Henderson, Montreal, has been on a visit to Toronto.

J. O'Keefe, manager at St. John, N.B., for the James Robertson Co., Montreal, has been on a visit to Montreal.

F. O. Lewis, president of Lewis Bros., Montreal, will be sailing for Montreal from the Old Country, about Oct. 3.

A. T. Linton, of Linton & Hall, Calgary, accompanied by his wife, has passed through Montreal on his way home.

Jos. R. Henderson, president and general manager of Brandram-Henderson, Montreal, has been on a visit to Winnipeg.

Art Ross has removed his sporting goods establishment from St. Catherine Street West, Montreal, to Peel Street close by.

T. C. Collins & Son, manufacturers' agents, Montreal, have moved from the Commercial Exchange building to No. 215 Coristine Building.

J. Thurston Smith, secretary and treasurer, Lewis Bros., Montreal, has returned from an interesting visit to the Cobalt country, going so far as Cochrane and Elk Lake. Mr. Smith speaks in most enthusiastic terms as to the prospects of the country, and considers that when the railroad reaches Elk Lake it will be a much bigger place than Cobalt. It was a great hardware section, and already the trade in general hardware goods totalled at Elk Lake $50,000 a month. There were many good stores in that section of the country. Mr. Smith is enthusiastic as to the silver wealth of the mines, but he is not so taken up with the cost of living. It was a great education for anyone, said Mr. Smith, to take the trip. C. M. Strange, during the conversation, mentioned that the country had changed greatly from the time when, as the first hardware traveler to go into that section, he had to take the narrow gauge to Gordon Creek, and then be towed in a scow to Mattawa, and on to Haileybury and New Liskeard.

Western Canada.

P. A. Sharpe is succeeding G. M. Aikins in the hardware business at Earl Grey, Sask.

Harry McClellan, hardware merchant of Alton, Ont., is on a trip to northern Alberta.

Great Britain.

A very pleasant "Coming of Age" celebration took place a week or two ago, when the employes of the Grove Chemical Co., Appley Bridge, enjoyed a day of outing and recreation at New Brighton, near Liverpool, as the guests of the Directors. This happy event celebrated the 21st anniversary of the Appley Bridge set of buildings erected in 1888, although the Company was established some thirty years before that date. The work-people of the company showed their good-will towards the directors by presenting a very fine polished oak aneroid barometer to Herbert and Walter Howarth. On a recent visit to Appley Bridge, it was noticed that several extensive additions had recently been erected, and the present very satisfactory condition of trade seems likely to continue indefinitely. The Grove Chemical Co. state that their Canadian trade is developing in a very encouraging manner. treal lacrosse clubs champion team.

A sanatorium will be established at Manitou Lake, Sask. The charter of the company will be issued and the erection of the building will be begun this fall. It is planned to have the new hotel open for business early next spring.

Little Things That Count in the Hardware Store

Loss of Custom Often Caused by Neglect in Minor Details—The Broken Latch Forgotten—Watch the Dust, Dirt and Dead Flies in the Display Window—A Merchant's Method in Greeting Every Customer—His Consideration for His Clerks—What Personal and Store Appearance Stand For—Persist in Showing the Prospective Customer the Goods You Have for Sale.

By Chas. W. Mantony.

The would-be purchaser on the outside pressed and squeezed and jerked at the latch-lock of the door. He paused, stared at it a while, sized it up carefully, and made a more scientific attack. The scientific attack had no effect on the door; but the would-be purchaser tugged till he grew red in the face.

"Wonder what's up," he muttered, suspiciously.

He glanced around for the bailiff's ill scrawled notice, the usual token of a distress for rent. None was in sight. People were inside the store, and business seemed to be going on as usual.

Just then the door was opened from the inside, and a cheerful clerk remarked:

"Lock's out of order. Awfully sorry. Get it fixed right away. What can we do for you?"

As a matter of fact, the lock had been out of order for nearly a week. People who were not acquainted with the peculiar knack of making it work properly when it didn't want to, had tugged vainly till the cheerful clerk came—or till they tired of the job, and went elsewhere.

Just how much passing business the merchant lost through that defective lock he never knew. How many sensitive people who had grown red faced with the foolish but natural conviction that the entire street was watching their futile efforts, is a matter for guess work; suffice that a fair proportion, whether they ultimately broke in or not felt like shunning that place forever afterward.

Of course, people should not be sensitive. This, doubtless, is a truism. There are very few people who are not sensitive, however, and some of these belong to the dead beat class, which, like the poor, we have always with us. So, after all, instead of trying to persuade people that it is foolish to be sensitive about a little thing, it is usually cheaper and quicker for Mr. Merchant the minute he finds his lock out of order, to telephone the locksmith.

Just One of Many.

The defective lock is frequently met with in stores in towns and small cities—particularly in the stores of merchants who are apt to procrastinate or forget. Incredible as it may seem, a merchant has been known to leave his door for a couple of months in such a condition that it is a genuine torture for a sensitive person to get out or in. It is a little thing. It is one of many little things which may bulk big in bad results.

It is very nearly related to the door that gets swollen with melted snow and won't shut or open except under almost hydraulic pressure; or the door that, the moment the customer enters, flies shut with a terrific and nerve racking bang; or the sidewalk that in winter is left covered with slippery ice, which often forcibly reminds the passerby that eternal trick balancing is the only price of safety and that carelessness goeth before a fall—and that leaves in him, too, whether he falls or not, a deep rooted dislike to Mr. Jones, the only merchant in the block who left his sidewalk as slippery as he found it.

Of course, this is Sept. But December is coming. Paste this over your desk, if you happen to be Mr. Jones, and next time you see ice on your sidewalk, have your clerk, first thing in the morning, in the quiet spell right after 8 o'clock, sprinkle a little sand where it will do most good.

In the Show Window.

This eternal watchfulness, this careful, microscopic attention to the little things of business, may be tedious to the man who has never practiced it—but it pays. In time it becomes a habit. The merchant becomes careful, watchful, attentive to little things, as a matter of course. No effort is required. The clerks get a good example, which, often, is a great deal better than a good "dressing down." And, after all, the employer's example counts a lot with the clerk.

For instance, your show window is intended for one purpose—to draw trade. The hot weather is here. Will that wilted lettuce, those shrunken cucumbers with the lines of drouth about them, those peaches and tomatoes with the obstreperous and outspoken bad spots—will they draw trade? Those glass sealers that have been piled into the window with the obvious dust still upon them because you were "rushed"—will they prove as attractive to the woman who joys in housecleaning, in comparison with the sealers carefully polished off by the man across the street? Are people going to be magnetized into coming in and buying when the white paper which carpets the bottom of your show window is black with the fly specks which have accumulated in the weeks that you have been too busy—or too careless—to change it? Will those dead flies in the odd corners emphasize the purity of your sugar and spice?

Show windows there are which naturally and inevitably inspire just such questions. People are touchy, especially about what they eat; and, even before cheap goods, the average housewife insists on clean, fresh, uncontaminated goods. So see that your fresh vegetables in season are kept fresh, that the dead flies are removed as they accumulate, and that your display is clean, even in preference to being artistic. Put yourself in the buyer's place. Then common sense will do the rest.

Little Things Inside the Store.

I know a grocer who makes it a point to speak to every customer who enters the store, right after his entrance. He may be waiting on an earlier customer at the time, but he will say, "Excuse me a moment," while he gives the newcomer a word of greeting and sees that a clerk looks after his wants. This grocer has developed the habit of doing this in what one might call the twinkling of an eye, so that, while the little diversion can hardly offend the first customer, it has inevitably a certain flattering effect upon the second. Frequently, even when he himself is not busy, the grocer will after the first word or two of greeting, turn the customer over to a clerk. He does this purposely.

"I believe in giving my clerks work to do," he says. "In some stores there is never a clerk will move unless the proprietor is busy. No—I don't think it's laziness, in most cases, but natural deference to what the clerk, rightly or wrongly, considers superior salesmanship; allowing such a practice isn't giving a clerk a fair chance to make good. Furthermore, it is educating a lot of customers to ask for the proprietor, and refuse to be waited upon by anyone else. When I call a clerk to

wait upon a customer, I show my confidence in that clerk. I think it is good business."

As for his practice of dropping everything to greet each newcomer, he calls it "my fad." It may be good business for some merchants, bad business for others. He is satisfied with the scheme.

But, whether so extreme an idea is going too far or not, it is much better business than keeping customers waiting while a clerk marches all the way from the back of the store, or while the proprietor concludes a half hour conversation with a bosom friend on some topic which has nothing to do with his business.

The customer merits the merchant's first attention, and that of his clerks. It should be prompt attention. Many merchants make it a rule to instantly drop private conversations the moment a customer comes in, and wait on the customer before resuming the thread of the narrative.

At the same time, it is not a bad idea when time is not pressing, to indulge in a little chat with a customer, regarding some topic of interest to the latter. You should be pretty sure beforehand, however, that the customer is not in a hurry to get away; and you should never linger to talk when there are others in the waiting line.

Other Little Things.

A man's personal appearance is doubtless his own affair. Nevertheless, it pays the grocer to dress well. A week's growth of incipient beard or a mop of hair that hasn't been combed or an old suit with patches and grease stains—these, really, are not prepossessing items in a merchant's make up. Neither are they in a clerk's.

It pays to have the paint brush used on the store front now and then. Usually there is very little woodwork about a modern store front, so that the expense of an annual retouching is scarcely worth mentioning. And it brightens things up immensely.

There are little sections of the windows that careless clerks persistently neglect to clean properly when they are at work with the mop. You may never have noticed them. Just take a look, and, if there are any little, dusty nooks or corners, have them swabbed out. Then take another look, and note the marked improvement in the general effect.

You use price cards in connection with your window displays. See that names are properly spelled. See that prices are distinctly marked. Strange as it may seem, the funny spellings which adorn price cards are legion. A missing letter, a "3" that looks like a "5" or a "5" that looks like an "8"—these are little things. But they count.

Let People See the Goods.

Keep your goods in view. This doesn't mean exposing perishables to sun and flies, but it does mean displaying stuff where it will be a continual reminder to the customer of something he wants and would not have bought if he had not seen it. Change these displays in window and on counter frequently. It may seem like unnecessary work to move a lot of unsold stuff back to the shelves and move a lot of other stuff out to the counter—but I've met many a merchant who credits a good share of his sales to the persistent habit of putting things where people can see them, and changing often.

And, above all, cultivate the faculty of looking out for the little things, of doing the little things that will help you to success, and of leaving undone the little things that are bound to militate against you.

BUSINESS POINTERS.

People like to do business with a man who is prompt. Be there when you say you will. Punctuality is the courtesy of kings.

Like master, like man. Many a good clerk has been spoiled by the wrong sort of employer, while many a poor clerk has made good under the right kind of instruction and example.

Some merchants treat traveling men as if they were all thieves. Those same merchants get mad if their customers treat them that way.

An ungainly, home-made word is "Sticktoitiveness," but it spells success in advertising more than in anything else. Don't be a quitter.

It's easy to begin well. A new broom always sweeps clean, but it is in the home stretch that races are won.

Treat your clerks like honest men, but don't tempt them with loose cash handling methods. Even honesty has its limitations.

Special sales are all right. Advertising is a necessity. Window displays are valuable, but the first rule in the book is to have the goods.

Every window display should be so made that each observer will go away with one idea in mind that will do you good.

The merchant who isn't generous soon gets the name of being stingy. Who ever heard of a stingy merchant being successful?

When you say to a customer, "What else would you like, Mr. Smith?" aren't you more likely to make him stir his mind for something else that he wants than if you say, "That's all, I suppose?"

Be merciful to the man with the subscription paper. He doesn't like his job and he isn't after money for himself. He will remember your courteous treatment.

Don't tie so much red tape around your parcel-wrapping and change-making methods that your customers will go to the other fellow's store when they are in a hurry.

In advertising follow the line of least resistance. Push hardest where competition is weakest until you are as strong as your competition.

Quality is the best talking point. Cut prices only attract the bargain hunters. They will leave you the next day. Customers who like the quality of your goods will continue to trade with you.

Do not sell goods that are regularly slashed by the price-cutters. The biggest cutter in your community sooner or later will make the biggest assignment for the benefit of his creditors.

There are thousands of people in the great failure army to-day who might have been successes but for losing their grip through discouragement, caused by constant fault-finding and suppression. It is not every youth that has the stamina to hold up his head, no matter how much he is repressed. Some tender natures, very finely and superbly organized, succumb to such treatment, and never develop, just as some delicate buds will not open their petals and fling out their fragrance in a cold atmosphere.

GLUE FROM COD'S HEADS.

An enterprising firm in St. John's, Nfd., has erected a factory, now in operation, for the manufacture of glue from cod's heads. The heads are thoroughly cleaned first of all, and then transferred to a large vat, subjected to a specific temperature, the steam extracting all the glutinous substance. The liquid is then conducted from the vat by pipes into large tanks, subjected once more to a specific temperature of heat, by which means the water is evaporated from the mass, after which the glue is drawn off and placed in suitable casks for exportation. The glue is of a superior quality, and its treatment by preservatives inhibits the possibility of any offensive odor arising from it when being used.

Woodstock city council have so far committed themselves to the new Delatre Street school proposition as to authorize the city solicitor to prepare a by-law providing for the setting aside of $30,000 for a new building, and for the repair of the Beale street school.

Trade Gossip from Canada's Eastern Provinces

Company After Charter Allowing it to Manufacture Turpentine From Stumps—Moncton Company to Make Steel Ladders —St. John May Get Sugar Refinery — Newcastle Hardwareman Married.

ST. JOHN.

September 22.—Application has been made to the Provincial Government for the incorporation of a company, to be known as "The New Brunswick Turpentine and Tar Company," with a capital stock of $1,000,000, and headquarters at Doaktown, Northumberland county. This is the company to which reference has been made in previous correspondence as engaged in building a plant for the extraction of turpentine, tar, and oils from pine stumps, etc.

The St. John Real Estate Co. is commencing the erection of a six-tenement wooden building on Murray Street. Wm. McDonohue will do the plumbing work. F. Neil Brodie is architect.

Application for incorporation has been made to the Provincial Government by William McAllister, of Moncton, and others, as the Empire Steel Ladder Co. Mr. McAllister secured a patent on this ladder in May, 1908, and it is the intention of the company to manufacture and sell the ladder, and also other minor flexible steel articles, and to carry on a business as founders, with a capital stock of $24,000.

F. C. Durant, who was in St. John a few weeks ago, looking over possible sites for the establishment of a sugar refinery, is again in the city and has been in conference with the Board of Trade and members of the city council. Mr. Durant is very favorably impressed with St. John as a location on account of its being on the sea coast and also having excellent rail facilities. He says his company would operate under a Dominion charter, and would be capitalized at $2,500,000. The plant to be erected would cost in the vicinity of $2,000,000. He is asking the city to grant a free site on the shore of Courtney Bay, and to give exemption from taxes and water rates for a term of years. He says that about 300 hands would be employed. The proposition is now being considered by the city.

W. S. Fisher, of the firm of Emerson & Fisher, has returned from a visit to the Toronto Fair, where the Enterprise Foundry Co., of Sackville, of which his firm are proprietors, had a large exhibit.

Harry V. Vaughan, manager of Emerson & Fisher's branch in Sydney, C. B., was in the city last week, having been summoned home on account of the death of his father, Samuel T. Vaughan.

There is considerable activity now in building circles. Several large contracts are nearing completion, such as the addition to the Royal Hotel, the big new brick and stone residence for F. P. Starr and the rebuilding of the marsh bridge abordeau. A large number of new dwelling houses are in the course of construction, and all through the summer there has been a good demand for building materials of all kinds.

The ground has been marked off in the "Island yard" for the new I.C.R. car repair shops to be built by A. E. Hamilton. The cost is estimated at about $7,000. Mr. Hamilton has also been awarded a contract by the C.P.R. to build a warehouse at Presque Isle, to be completed by October 15. The contract for the new consolidated school, which is to be built at Kingston, Kings county, to replace the one which was burned in April, has been let to Leonard Fairweather, of Hampton. The work will be started at once and the cost will be about $12,000. W. E. H.

HALIFAX.

September 21.—Considerable improvement is noted in the hardware trade since my last report. The travelers now on the road are sending in fairly good orders and the prospects on the whole for a brisk business during the autumn are much brighter than they were earlier in the season. The demand for fishing supplies is rather light at present, but the fishermen have made good catches this season, and they will purchase outfits later on.

Prices at the present time are steady and there have been no marked changes recently. An advance is expected shortly in zinc and galvanized sheet iron, as both of these articles are very firm and have a strong tendency to go higher. Cement continues in heavy demand, and large sales are reported. Glass is also in good demand, as is also roofing materials.

The millinery stores of Halifax had their opening displays of fall millinery last week, and the hardware store of Cragg Bros. also had "a millinery display." Few passed the store without pausing to "take in" the unique "millinery" display made by that firm in their north show window. The window was filled with some of the latest designs in headgear, formed with hardware or tinware, and trimmed with feather dusters, mops, etc. One hat worn by the ladies at the "North Pole," was quoted at $200, but it was offered for sale at $199.99. The body of this hat was in the shape of a mushroom, and it was made with a bath tub, with mops and feather dusters as trimmings.

There is considerable mining development going on in various parts of the province at the present time, and some of the gold mines are giving good returns.

Building operations continue quite brisk, and the contractors who have large jobs on hand are making good progress.

Halifax will have another hardware store in a very short while. The new firm will be known as the Halifax Hardware Company, and the members are all familiar with the trade. They are Mr. Laurence, who was a partner in the firm of H. H. Fuller & Co., Henry Bennet, who was manager of the same firm, and Mr. Way, who was on the road for many years for the Fuller Company. The firm will open up with an entirely new stock. J. H.

NEWCASTLE.

September 21.—Wm. Ferguson, of the hardware firm of John Ferguson & Sons, Newcastle, lieutenant of the fire brigade and ex-town councillor, was married to-night to Miss Bessie, daughter of Mr. and Mrs. Wm. S. Gremley. Mr. and Mrs. Ferguson left to-night for Montreal, where they will spend a week, then leaving for the Pacific coast, where they will seek a new home, Mr. Ferguson having severed his connection with the firm. H. W. H.

Interesting Trade Items Gathered in Ontario

St. Thomas Furniture Store After Stove Trade—Co-operative Store at Brantford not Paying — Bonus By-law Defeated at Goderich—Varied Lines Shown by Hardwaremen at Chatham Fair—Exhibits at Ottawa Exhibition.

KINGSTON.

September 21.—Dealers say stoves are beginning to move out, and, that there is every prospect of a good sale of stoves this season. The cold snap of a few days ago brought us a few sales. All the dealers are putting the stoves to the front, making special displays.

Several dealers have been doing some special advertising in the local papers, relative to hunting supplies. They have also been able to help along sales by attractive window displays. The hardwaremen have found that it pays to have attractive windows, and more attention is being paid to this now than there has been in the past. "Advertising is the life of trade, is an old saying," said one merchant, "but it certainly does pay."

It has been figured out that if the city adopts the system of using oil on the streets, to keep down the dust, it will save $1,000 per year, and if this is the case, ratepayers say that the oil system should be adopted. Last year it cost $3,066.60 to water the streets, and by oiling, it is to be cut down another thousand.

The sum of $23,000 is to be expended on repairs and alterations to St. Mary's Cathedral, including: decorations, $9,-

000; electric lighting and fixtures, $1,500, and installation of the ventilation system, $1,500.

Contracts have just been let for the new wing, at the Hotel Dieu, and work will be commenced this fall.

E. G. B.

OTTAWA.

September 21.—The Central Canada Fair is now an event of the past, and in history it may be marked as being a great success. The excess of receipts this year over 1908 was over $7,000, and the whole exhibition proved an interesting and instructive occasion. The only plumbers to have an exhibit this year—and it was a creditable one—were Currie & Levack. Other Ottawa firms exhibiting goods in the hardware line were: R. Mulhall; Gurney-Tilden, stoves and ranges; J. R. Cameron, New Idea furnace; Kenneth McDonald, Moffat stoves; S. A. Luke, D. Moore Company's stoves; Butterworth Foundry, ranges, furnaces and Fleming grate bars; National Mfg. Co., stoves and ranges; F. W. Bird & Co., Pariod Roofing; Philp Carey Co., Magnesia Flexible Cement Roofing; General Supply Co., Brantford Roofing; Canadian Oil Co., paints, varnishes and oils; Canadian Sheet Steel Corporation of Morrisburg; E. F. Dey, boats and canoes; Hurd & Co., boats, canoes and sporting goods; Ottawa Gas Co., gas stoves; The 1900 Washer Co., washing machines; R. H. Smith Co., St. Catharines, saws.

J. H. Connor & Sons had a good display of wringers and washing machines. They report a brisk business and are planning a good strong campaign after more business.

The sittings of the Royal Commission on closer trade relations between Canada and the West Indies are now being held in Ottawa.

G. E. M. H.

TORONTO.

Toronto, Sept. 8.—The retail merchants of Arthur Street have recaptured their fair share of business through a unique and cleverly-managed celebration. This street from one end to the other was torn up and was undergoing repairs, and reconstruction since the 1st of April. It was in such a condition that traffic was practically impossible. Business was suffering. The street looked for a long time as if an effort had been made to do something, and then, as if the officials had given the work up in disgust.

For weeks and weeks nothing was done. Either the workmen were out of material or else the engineer was changing his palns, or for some other reason the work was delayed. A great deal of indignation was felt by the merchants against the officials whose business it was to look after it. Women and children were in danger of breaking their necks, or at least, of spoiling their shoes in trying to wade through mud, mortar, stones, etc., and, therefore, turned away from Arthur Street to do their buying.

It was in this condition from the 1st of April to September, and when at last it was completed, the merchants conceived the practical idea of holding a celebration in order to let the people know that Arthur Street was once more passable and that they were anxious to see their customers back again. A few of them put their heads together, formed an organization, appointed a chairman, secretary and a treasurer, laid their plans, and went to work. All the merchants on the street fell in line and became enthusiastic supporters. Money was liberally subscribed; 2,500 Chinese lanterns were secured; two bands engaged, and the great celebration came off on the night of Sept. 1st. Great generalship was manifested on the part of the promoters. They distributed the Chinese lanterns to every house on the street, with the instructions to put them up in a certain way and at a certain minute on the evening of the celebration. Almost like lightning the whole street, which was packed on both sides by thousands of spectators, was under the brilliant illumination of 2,500 Oriental sparklers. Bands, calithumpians and the ever irrepressible boys, paraded the street until eleven o'clock, greatly to the enjoyment of the mass of the people and to the perfect satisfaction of the merchants of Arthur Street.

It is claimed that 30,000 people lined the street. Everybody went home well pleased, and Arthur Street had retained its full share of the trade to which it is entitled. While the promoters deserve much credit, the fact must not be overlooked that the merchants on the whole street worked unitedly and in harmony for the good of the street—this is the secret of the great success.

BRANTFORD.

Sept. 21.—The Brantford Co-operative News, a monthly publication, in its September number breaks into a tirade against The Canadian Grocer in its recent articles respecting co-operation. It says in part:—

"As to whether our educative work in Brantford will succeed remains to be seen. We think it will. Conditions point that way. If we are wrong and the five thousand working men feel that they need and can afford to pay for the luxury of 50 or 60 food distributors with the enormous multiplication of trade expenses, when one large central store selling everything, and four or five branch stores selling food would suffice, they ought to pay those 50 or 60 men a living profit, just as they themselves expect a living wage."

Possibly The Co-operative News is of the opinion that it can force the other stores in the city out of business, when, as a matter of fact, the local store is not on a paying basis.

A meeting of the temperance workers was held last week, when it was decided to go ahead with preparations for the "local option" campaign. The merchants of the city, on the whole, are favorable to the carrying of a local option by-law, being of the opinion that money now used to swell the coffers of the hotelkeepers will now go to the hardwaremen, grocers and others. The fight here will be a stiff one.

A referendum will be submitted to the people for a new market building, in connection with the proposed location of a new postoffice on the present market square. The proposed site is suitable in every way, and the buildings proposed would cost about $50,000.

Telephone City stores report that the sale of stoves for September, so far this year, exceeded the whole of the month in 1908. Other local dealers are also enthusiastic over the movement in stoves and furniture.

A. Ballantyne's west window is attracting some attention this week. It is a mechanical exhibit of Sherwin-Williams' paint, with the paint firm's trademark, as the centre.

The contract for the new Union Realty Co.'s building on Dalhousie Street has been let to Schultz Bros., and work will be commenced immediately. It will be three storey, brick.

A new Anglican mission will be erected on Brock and Elgin Streets, and work will be commenced shortly.

Bert Warren, late of Kloepper & Co., Guelph, has entered the employ of the Brantford Cordage Co., and is now on the road, traveling between Toronto and Montreal.

Buffalo capitalists have applied for a charter for an electric railway to run from Port Colborne to Welland, Port Robinson and Niagara Falls.

The annual meeting of the Sanderson-Hawld Co., Paris, was held last Monday, and report that in spite of the fire, which came in their busiest period, the year was a successful one. The new factories are now almost completed.

A. W.

GUELPH.

September 21.—H. Occomore, stove and tinware merchant, received the sad news this week of the death of his father in England.

A lot of cement is being sold in Guelph just at present; in fact, it is the opinion of several of the hardwaremen of this city that it has been about the best selling commodity they have had durin gthe past week or so. The exceptionally large sales of cement are due to the fact that a lot of farmers are building cement silos and barn floors, now while the cement is down so very low in price.

H. Occomore took in the Western Canada fair and did some business in London, one day last week.

A Guelph alderman who recently had need of a garbage pail went the rounds of all the local hardware stores getting prices, and then sent to Eaton's for a galvanized iron one, which he got so cheap that after paying express he was five cents ahead of the game.

Morgan White, of the staff of Kloep-

fer's wholesale hardware establishment, has left that firm to take a position with a large firm in eastern Ontario.

Matthew Kelly, superintendent of the Guelph Stove Foundry, has returned from his wedding trip, and settled down to work. Upon the eve of his wedding the employees of the firm gathered around him in the shop just at the close of the day's work and presented him with a very handsome set of den furniture, for his room in his new home. The firm also made a very handsome present to "Mat," showing that they, too, appreciated the happy faculty he has of making things go, and keeping everybody happy around their works.

An addition will likely be made soon to the Residence Building at the Ontario Agricultural College.

H. S. N.

CHATHAM.

September 21.—Chatham's fall fair, the Peninsular Exhibition, is in progress this week, this being the opening day. The exhibits are far ahead of anything in its history, and the attendance has been excellent. Two hardware firms take advantage of the opportunity to reach country and city customers by placing displays in the main building. Westman Bros. have an attractive exhibit of Jewel stoves and ranges, A. D. Westman, who is also an active member of the fair executive, being in charge. Geo. Stephens & Douglas are displaying Nordheimer pianos, White sewing machines, washing machines and other side lines to which they have been giving considerable attention in connection with their regular hardware business. Mr. Stephens himself was in attendance to-day.

Negotiations are in progress whereby it is expected that the Canadian Gas Power & Launches, of Toronto and Chatham, will dispose of their Chatham plant, formerly the Defiance Iron Works, to a new firm. It is anticipated that the deal will be completed in a week or two, and that the new proprietors will operate the concern at its full capacity.

The Petrolea Wagon Works, Petrolea, is adding a new paint shop, two storeys in height and 80 x 90 feet, to its plant and will shortly build a large shipping warehouse. The concern is exceptionally busy with 125 hands steadily at work.

The Crawford Handle Factory at Tilbury is running night and day in the effort to keep pace with orders. On the whole, the industrial outlook in this vicinity is very promising.

The Sydenham glass factory at Wallaceburg is now in full operation again, while the new factory is being rapidly rushed to completion so as to operate as soon as possible.

H. D. McCay, hardwareman, Kingsville, is branching out into other lines, having taken the contract to lay a large amount of silex walk for the municipality.

Mr. Brown, Thamesville, who has had some years' experience in hardware and tinsmithing, has purchased Mr. Smith's interest in the Inwood hardware firm of Smith & Vance. The new firm will be known as Vance & Brown.

E. S. Hubbell & Sons, hardwaremen, Thamesville, are having a cement walk laid to the entrance of their workshop.

H. Lendon, hardwareman, Leamington, who recently purchased the J. L. Wagner warehouse, intends to fit up the building as a mammoth hardware store. He has purchased a complete new outfit of shelves, fixtures and silent salesmen and intends making the new store the equal of any in western Ontario.

J. G. Crosby, hardwareman, Highgate, was recently elected president of the newly formed Highgate Lawn Bowling Club.

W. E. P.

GODERICH.

September 21.—Contracts were recently let for a new public school building at a total cost of $22,130. C. J. Harper is the successful tenderer for the plumbing, galvanized iron work and electric wiring, the figures for the three contracts being respectively, $820, $765, and $250. C. C. Lee receives the contract for a heating system, the figure being $1,959.

The by-law to guarantee the bonds of the American Road Machine Co. to the extent of $40,000 and to grant the concern certain other inducements to locate in Goderich was defeated at the polls. While the vote stood 524 in favor of the measure and only 114 against, the total favorable vote fell 54 votes short of the required three-fifths of the voters' list. There is talk of submitting the by-law a second time.

Local contractors report that this has been a good year for building, especially in the residential line, quite a few new buildings having gone up in the town, while local builders have also been active in the surrounding country. These new residences have been almost without exception modern and substantial structures.

V. L.

ST. THOMAS.

Sept. 21.—Trade in hardware lines the past week has been on the quiet side. The fall fairs being an attraction to a large number of city people, as well as those from the country. The merchants, however, are not complaining, as the season has been very good, and every one is looking on the bright side.

Col. Stacey, who has been on a visit here, left for his Australian home on Wednesday.

G. A. McMurtry has moved into his new store, and is busy getting into shape for the fall trade.

G. A. Ingram, president of the Ingram & Davey Co., is receiving the congratulations of his friends over a new partner he has taken into the firm. "It's a boy."

Ingram & Davey are showing two good windows. One is given over to stoves and ranges, the other displaying gas and electric fixtures, which are all connected, and lighted up at night, many sales have been made through this showing.

Geo. W. Brown, of G. W. Brown & Son, has returned from a trip to the Pacific coast.

A. Conn, of Aylmer, has taken a position on the staff of G. A. McMurtry & Co.

Albert Campbell, the Ross Street hardwareman, reports trade in good shape, and is looking for increased business as soon as the subway is completed. Mr. Campbell makes good use of his window, always having an attractive showing of seasonable goods, well arranged.

W. Rose, formerly of the Ingram & Davey staff, is now with R. H. Blackmore.

The W. B. Jennings Furniture Co. have taken over the agency for The Gurney Co., and are making a display of stoves and ranges.

News From the Prairie and British Columbia

Traveler Joins Saskatoon Heating Firm—Horse Show Windows in Hardware Stores at Victoria—Airship Window Display at Vancouver—Large Iron Works and Saw Plant to Locate near Vancouver.

VANCOUVER.

September 18.—In keeping with all the newspaper talk of aviation, an all hardware airship has been in operation during the past week in the window of McLachlan Bros.' hardware store on Hastings street, and proved quite an attraction. The gasbag was made of two galvanized tubs, two dishpans and two pieced tin pails. The carriage, which was suspended by cotton bed cord, consisted of an ironing board for platform, cage mouse trap for house, chalk line reel and dividers for steering gear; three vegetable grates constituted the rudder, bowl strainers and cake cutter, the propeller. The guard rail was spring clothes pins and brass jack chain. The propeller was operated by an electric fan, which was placed behind the background, this being covered with cooking utensils. A sign read: "Kemp's diamond ware is high in quality but low in price."

Among the new buildings for which permits were issued during the past week was one for a $95,000 brick hotel to be erected on Pender street by C. C.

Smith. Another item was for a $15,500 apartment house on Bute street. A large number of apartment houses are going up in different parts of the city, but principally in the west end, toward English Bay, which is the most popular residential section. This summer every place has been full, and good returns are realized. The total value of the permits for the past week was $167,826.

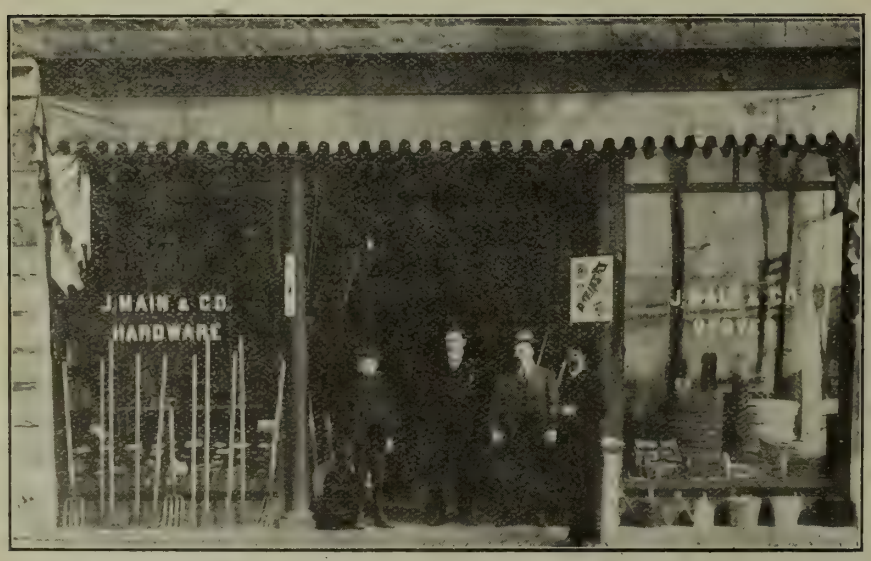
Hardware and plumbing men who have contracts in connection with the new courthouse are loud in their complaints over the slow work of the contractors. The stone walls have been standing all summer, with hardly a bit of work done, and though it was anticipated that by the rainy season the roof and dome would be on so that inside work could be gone ahead with. Instead, the work will have to stand over until spring, even if the the roof were started immediately, as it could not now be finished. This being the case, the contractors for inside work have all their material on hand and this amount of money will be tied up for several months yet. It was expected that inside work would have been under way by this time.

Last Saturday, the employees of McLennan FeFeely & Co., wholesale hardware, were taken to Gambier Island on a picnic by the firm. The idea was Mr. McLennan's, and the large crowd were given a fine time. The invitation included the request to "bring your children, if you are lucky enough to have any."

Rails for the Howe Sound Pemberton Valley and Northern Railway Company, which is constructing a line at the head of Howe Sound, arrived on the Blue-funnel liner Cyclops. There were 370 tons. The rails will be shipped at once by scow to the scene of operations, and will be laid this fall.

The Sumner Iron Works Company, of Everett, Wash., has purchased 30 acres of land in Burnaby municipality, immediately east of the city, with the intention of erecting thereon a large plant, the estimated cost of which is $300,000. The adjoining property has been purchased by the Burton Saw Works, of Vancouver. It is the intention of the latter company to also start the erection of a plant immediately.

Interior of Main's Vancouver Store. Mr. Main is Standing in Front of the Counter to the Left.



Housed in a modern three-storey stone building in the heart of the east end business district of Vancouver, is the business of J. Main & Co.

Mr. Main is an enthusiastic, wholesouled Scotch-Canadian, and this attribute no doubt accounts for the great success he has made of his business.

Born in Edinburgh, Scotland, he immigrated to Vancouver nearly twenty years ago, entering the employ of Thos. Dunn & Co., but engaged in business for himself in January, 1902, and has succeeded in building up a remarkably fine house-furnishing and mechanics' tool business. Apart from occupying the entire building (owned by himself) he also has a large storage warehouse to accommodate the large stock he finds necessary to carry.

Mr. Main is a great admirer of Hardware and Metal—"It's a very useful publication—I don't know how hardware men could get along without it," said he.

R. B. B.

Exterior of Main's Hardware Store, Westminster Avenue, Vancouver.

VICTORIA.

September 16.—The Esquimalt Water Works Company have just placed a large order for water pipes. 55,000 feet of 2 ft. 6 in. welded steel pipe, to cost over a quarter of a million dollars. This pipe when laid will be capable of carrying 15,000,000 gallons per day into Victoria. Delivery will commence on March 1, and be completed before June 1st. The pipe is to be shipped via the Suez Canal. The pipe is to be constructed at the Vulcan Works, Motherwell, Scotland. This will be the first welded steel pipe to be used for water mains in B. C.

The purchasing agent of the city council has awarded the contract for 5,000 feet of galvanized water pipe to C. M. Cookson at $16 per 100 feet.

The B. C. Electric Railway Co. have begun the instalation of their big power plant at Jordon river.

A company has been formed, by local and English capitalists, with half a million dollars subscribed for the manufacture of Portland cement at the Rosebank lime quarries, Esquimalt harbor.

The contract was awarded yesterday to Luney Bros., whose tender was in the neighborhood of $50,000, for the construction of the new building to be built on Government street for the Royal Bank.

The Dominion Bank has opened a branch here, temporary premises having

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises should not fail to use the Want Ad. Advertisement page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere who is looking for just such a proposition as you have to offer.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost **must** accompany all advertisements. **In no case** can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

TECHNICAL BOOKS

HARDWARE STORE BUSINESS METHODS—Forty subjects of the greatest interest and value to hardware merchants are discussed, including Rules and Regulations for the Store, Good Buying, Stock Taking, Collecting Accounts, Changing a Credit into a Cash Business, Starting in Business, Profit Figuring System. Price $1.00, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East Toronto.

been secured. The Bank of Toronto is also to establish a branch here.

The B. C. Agricultural Association has offered three cash prizes for the best decorated window, advertising the horse show. Eleven entries have been received, two of these are from hardware dealers. The window of the Shore Hardware Co. is very well decorated. An arch extends from one corner of the window to the other, on this are the words, "Victoria Horse Show" in horseshoe nails. The colors, red, yellow and green are conspicuous, these being the colors for the horse show. The window is further decorated with all the needs of a blacksmith shop, with most of the necessities of a stable, buckets, pitchforks, curry combs, etc. The window is lighted with colored electric lights and is very attractive.

Drake & Horn, the Yates street hardware dealers have also put in a good display. A life-size model of a horse and all sorts of "horsey" tools complete the display, with the colors red, yellow and green worked in.

SASKATOON.

September 19.—D. A. Ross, of Winnipeg, has taken an interest in the Western Plumbing & Heating Co. Until recently Mr. Ross represented the Dominion Radiator Co. in Manitoba and Saskatchewan. The firm now consists of Smith, McAdam & Ross.

George McAdam, an employe of the Western Heating & Plumbing Co., and a brother of Mr. McAdam, of that firm, recently left for Edmonton, being presented with a fine pipe before going.

T. A. S Campbell, of Zelma, has sold out his business to V. P. Byam.

It is proposed to have the sand-lime brick yards, promoted by G. R. Wedderburn, running some time in November. N. L. Thompson has prepared plans for the necessary buildings. Mr. Thompson is also preparing plans for a residence for D. L. Bettschen, to be erected on Saskatchewan Avenue.

D. G. R.

WINNIPEG.

Sept. 22.—Edward Barry, manager of the Canada Paint Company, of this city, recently rehearsed his experiences while on a tour of the Western Provinces, a few weeks ago. It was twenty-five years since he had visited points west of Winnipeg, and the present business conditions were, he said, an eyeopener to him. Mr. Barry called on several of his customers in various towns and cities, and took particular cognizance of the movement of paints and varnishes. Coming from the east as he did, he could not believe that paints could retail in such large quantities as he himself saw them moving in several stores that he visited. He had been dubious about filling such large orders that frequently came in from rural merchants, fearing least the financial condition would not warrant such voluminous orders. The result of his visit west at this particular time, however, assures him that with the present enormous building operations in progress, the demand for the goods is very urgent and that there is no fear of a money scarcity.

At a Masonic banquet in this city a few days ago, a speaker from London, England, who was spending a few days in the city, took occasion to refer to the hustling business methods of western men. "We do not credit all we hear in the old land," he said, "about towns springing up in a few weeks, and merchants becoming independently rich in a comparatively short time, but a visit to the country and to your city changes the aspect. I read in the paper recently about the McClary Manufacturing Co. being burned out on Saturday to the extent of $150,000, and on Monday morning, scarcely without the slightest hitch, business was going on as usual, two doors up the street. At home," he said, "it would take a company three weeks to get a new office in running order, and business for years would be seriously damaged. I know now, the secret of Western Canada's great development."

Winnipeg retail hardware merchants as a rule are well skilled in the art of window decoration and display. Perhaps the most noteworthy display this week is the interior arrangement of stoves in Wyatt's store. Fifteen stoves, consisting of coal and wood heaters, are arranged in order of size in a perfect row reaching from a few feet from the entrance to a distance of about forty feet toward the rear of the store. It would be impossible to enter the store without noticing the arrangement and customers are naturally attracted by it. The tapering arrangement from the smallest to the largest is quite distinguishable. At the farthest end of the line the stove stands 5 feet 10 inches in height, while the little heater at the extreme end is only 2 feet 4 inches. The prices range from $47.00 to $6.00, and this feature is also suggestive and interesting.

The McClary Mfg. Co. expect to occupy their repaired premises within ten days' time. Carpenters are busy laying new floors, the roof having been laid some days ago. Preparations are being made to have new office fixtures installed and the staff returned to new quarters before the stock is put in. The stock for the time being is stored in several vacant buildings in the city.

A line of goods which always proves profitable and satisfactory in every way to the reatailer is oil stoves. In the west particularly these articles are in great demand in the fall and spring seasons, particularly before the larger furnaces and heating apparatus are brought into use. In midwinter also they are used extensively to heat individual rooms to a greater temperature than that supplied by the furnaces. Local hardware stores are well stocked with them and they are moving well.

J. L. Ross, treasurer of the Pease Foundry Co., Toronto, and of the Pease, Waldon Co., Winnipeg, is in the city this week, and expects to remain with the local branch for some weeks.

L. C. Stephens, buyer for the G. F. Stephens Paint Manufacturing Co., sailed for the old land a few days ago, on a two-months' tour of Europe.

L. C. H.

BRASS ROLLING MILLS REOPENED.

The Canadian Brass Rolling Mills Co.'s plant, at New Toronto, which has been standing idle for the past four years, are to be reopened at once by the Ontario Brass Rolling Mills Co., who secured a charter about six months ago. A gang of workmen are at work putting the plant in shape and the mills will be in operation within two weeks.

The plant was sold a year or so ago, being taken over by J. F. Brown, furniture merchant, Toronto, a large creditor of the old company. Mr. Brown immediately set to work to reorganize the concern, and has secured two experienced Detroit men, Edward McMahon, as general manager, and Mr. Farrell, as secretary-treasurer, of the new company.

Mr. Brown states that there is a market in Canada for all the brass rods and sheets the New Toronto plant can manufacture, and the new company is now in a position to guarantee the operation of the plant and be able to supply all customers with rods and sheets of the finest quality. A staff of 40 to 60 men will be put to work at once, and the number will be doubled in a few weeks.

Interviewed by Hardware and Metal, Charles Morrison, of the James Morrison Brass Mfg. Co., said he was glad to hear that the New Toronto brass mills would soon be in operation again, as Canadian brass goods manufacturers would like to help in developing the brass rolling industry in Canada.

The starting of the new plant may result in the re-imposition of the duty on brass rods and sheets, which was taken off a year or so ago, owing to the mills being out of commission. The duty, it will be remembered, was originally established to protect the New Toronto industry, but the promoters were unable to finance the plant until it became a paying proposition.

RECORD OIL CARGO.

Last week Standard Oil barge No. 57, a four-masted schooner, brought to the Queen City Oil Co., Toronto, from Cleveland, 453,511 gallons of gas oil, the largest cargo of oil ever brought into that city on one ship. The boat was emptied in one night through a pipeline connection.

Ald. Brocklebank has commenced work on the erection of Calgary's new public library.

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook — Hardware Quotations Corrected by Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

The carpenters, electricians and metal-workers' strike which was referred to in last issue is perhaps more serious to the hardware business at the present time, than ever before. Before the strike wholesalers found it difficult to keep up with the rush and were continually waiting for goods from the manufacturers. The wholesalers now have the goods and as far as Winnipeg is concerned there is no heavy demand for them. It simply means that the local builders' hardware will enjoy a longer season than anticipated as the delay will necessiate some of the work carried far into the winter months. The subsidence of the trade for the present, however, is a considerable loss, the expected output for 1909 will not be realized in the lines affected by the strike at any rate. The out of town shipments continue heavy in builders' hardware and general fall lines.

In sporting goods the rush is well over in guns and ammunition, but the season has been very heavy. The demand is strong now for skates and hockey sticks. As usual out-door athletes' supplies are not very large.

Bar iron and heavy goods lines are moving well. Manufacturers have been taxed to meet the demands in these lines. Generally the various lines are moving freely and everyone expects greater things.

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.80 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base, plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12 $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

SHRP-SHAVR SAFETY RAZOR

25c.

There is no better razor sold at ANY PRICE

We do it to Sell our Blades

Sold under a positive guarantee. Your money back if you want it.

Shrp-Shavr Razor Co

Smith Hardware Co., Limited
2 & 4 Lemoine Street
Montreal, Canada

We sell it at 25c. to create a quick and large market. FOR OUR BLADES because we make the BEST blade. In fact, "it's all in OUR BLADES." The profit to the retailer as well as to the manufacturer is in the continuous sale of blades.

The frame or blade-holder is beautifully SILVER PLATED, and the adjustment is absolutely correct. It fits the face. The blade can be adjusted or released instantly. But you don't shave with a razor frame whether it costs $5.00 or 25c., the blade is the thing.

Our proposition is a revelation and revolution in safety razor selling. The SHRP-SHAVR is the ORIGINAL 25c. RAZOR.

When writing to advertisers, kindly mention having seen the advertisement in this paper.

Will you be short on floor finishes?

Many good customers have been lost because they could not get the goods they wanted at the time they wanted them. Dealers in many localities have found an unusual demand for floor finishes this fall, and it has been necessary for them to place additional orders. Anticipating this unusual demand, we are prepared to take care of rush orders from our warehouses throughout the Dominion with Sherwin-Williams Floorlac. This product is a varnish and stain combined and can be readily sold at a good margin of profit. If you find that you are going to be short on floor finishes, send us your order and we will make prompt shipment.

purpose erecting a three storey addition, work upon which will begin at once. The addition will cost $10,000.

The contract for the new building for the Banque Provinciale du Canada, to be erected at Moncton, has been awarded to Philip N. LeBlanc. The building will be three storeys high. The contract for the heating and plumbing has been awarded to H. G. Hagan & Co.

A company has been formed, financed by Victoria and British capitalists, and with half a million dollars subscribed for the purpose of establishing works for the manufacture of Portland cement at the property known as the Rosebank lime quarries, Esquimalt harbor.

W. J. Lindsay, the man who is interested in the locating of a wagon and carriage manufacturing plant at Port Arthur, says his plant will be established shortly. "There is sufficient business contracted for to give employment to, says Mr. Lindsay, "from 125 to 150 men all the year round."

Recent permits issued at Winnipeg include: A. Simmons, house, $5,000; E. E. Wise, house, $3,600; J. W. Parker, house, $1,700; B. Donner, house, $2,800; Joseph Grapski, house $1,000; D. Corbett, eight dwellings, cost $8,000. B. J. Smith, two dwellings, $4,000; A. Asselstine, dwelling, $2,000.

The new sash and door factory of the Robt. Bisset Co., at Strathcona, has been put in operation and the machinery is now running under a full head of steam. The new factory is situated on the site where stood the previous buildings which suffered total destruction by the several unfortunate fires of the last few years.

The following permits for dwellings were issued recently at Ottawa: J. E. Northwood, brick veneer dwelling, $3,500. James Kelly, brick veneer dwelling, $1,500; Frank Wilson, brick veneer dwelling, $1,700; Mrs. A. T. McPherson, brick veneer dwelling, $1,600; A. S. Moodie, brick veneer dwelling, $2,600; J. H. Burbridge, brick veneer dwelling, $3,000.

Among the more important building permits issued at Montreal early this week are the following: Jos. Grenier, two houses, $4,000 each; Sisters of St. Sulpice, two buildings, $500 and $5,200 each respectively; T. Lebel, three houses. $4,000; L. Clement, two buildings of three houses each, $6,000; Jos. Dupuis, dwelling house, $3,500; Mrs. Ed. Roy, house, $3,000.

A contract has been let at Winnipeg for a large building for the Westinghouse Company and work is to be commenced immediately. It is understood that the building is to be eventually seven storeys high but probably only four storeys will be finished by December 1 when it will be occupied. James McDiarmid will build it and J. H. G. Russell is the architect.

Building permits were granted at Vancouver recently by Inspector Jarrett as follows: S. J. Wing, three houses, $4,050; Geo. Doran, $1,500; T. J. Whiteside, $2,500; J. Andrews, $1,700; Thos. L. Grey, frame dwelling, $3,000; J. E. Guinet, frame dwellings (2), $3,600; Nixon & Wright, frame dwelling, $2,500; Alma Dobson, frame cottage, $1,000; James White, three frame dwellings, $12,000.

A gang of workmen are busy making alterations at the factory of the Dominion Mfg. Co., Galt, which, when completed, will double the size of the present premises. The business has grown so rapidly during the past year that it has been necessary to enlarge twice already, and when the addition is completed the staff of employees will be increased from 25 to 50, and a large number of new machines will be added.

The following building permits have been issued recently at Vancouver; A. Frame, frame dwelling, $2,000; Jas. White, frame dwelling, $2,500; E. Miller, frame dwelling, $2,200; G. C. Ossenger, frame dwelling, $4,000; E. J. Escott, frame dwelling, $4,600; T. M. Henderson, frame dwelling, $6,000; H. Mitchell frame dwelling, $2,600; A. E. Greening, frame dwelling, $5,600; Donald McDonald, frame dwelling, $1,800.

The increasing popularity of yachting, particularly the motor boat branch, together with the possibilities in the fishing industry for boats equipped with gasoline motors, will likely lead to the establishment at Vancouver of another large boat-building plant with a factory and machine shop in connection for the manufacture of small gasoline engines. Frederick E. Seedering, of New York, who represents a well-known eastern American gasoline engine manufactory and yacht building concern, is interested in the new industry.

Municipal Undertakings.

Nelson, B.C., will spend $5,000 on sewerage works.

A new sewer will be constructed on Clifton street, Winnipeg.

A number of sewers will be constructed at Collingwood this fall.

A new sewer will be constructed on Bridge street, Sackville, N.B.

Armstrong, B. C., ratepayers favor spending $10,000 on improving the water and light services.

Fort William has accepted Engineer Galt's plans for the new waterworks intake pipe to cost $30,000.

Tenders were opened last week for the million-dollar contract for widening the Montreal aqueduct. F. H. McGuigan, Toronto, was one of the eleven who tendered, and Quinton and Robertson, Montreal, were lowest. Decision was deferred.

Over ten miles of steel pipe, costing over a million dollars has been ordered by the Esquimalt Waterworks Co. from the Vulcan Works, Motherwell, Scotland, to bring the Goldstream water to the City of Victoria. Delivery is to begin on March 1, and 55,000 feet of steel pipe is to be landed before June 30 next.

The contracts for part of the new sewerage system for Orillia, amounting to $34,109, have been awarded. Contract "A," sanitary sewers, J. A. McIlwraith, Collingwood, 111,815; "B," receiving basin and pumping house, T. Clement, Orillia, $6,175; "C," laying force main pipe, J. A. McIlwraith, $3,828; "D," cast iron pipe, Canada Foundry Co., $8,125; "G," machinery, J. McDougall & Co., Montreal, $4,166.

Railway Development.

The Canadian Northern are rushing the survey of their new road from Toronto to Ottawa. The line will cost in the neighborhood of $10,000,000.

The steel of the B. C. electric railway company has been laid from New Westminster to Cloverdale, a distance of 12 miles, comprising the first section of the Chilliwack extension of this company's line.

The ratepayers of Guelph will at the January municipal elections vote on an extension of the Guelph Radial Railway system, not only to Puslinch Lake, but also to Hespeler, to connect with the extensive system running into that town.

S. Anderson, who is now operating 40 miles of electric railway, is looking into the posibility of a street railway system from Fenelon Falls to Bobcaygeon passing through Sturgeon Point, and it has been suggested that a large hotel and pavilion may be erected on the beach at the east end during the coming winter.

Laying steel on the line of the Canadian Pacific between Saskatoon and Wetaskiwin will be completed in October. This line will constitute the main line of the Canadian Pacific between Winnipeg and Edmonton, and much traffic which now goes by way of Calgary will be diverted to it as soon as it is completed.

The tri-weekly pasenger trains over the Grand Trunk Pacific Railway, which have hitherto run only to Scott, Sask., will go through to Wainwright, Alta., 100 miles farther west. The regular passenger service is now within 115 miles of Edmonton, and it is stated that through trains from Winnipeg to the Alberta capital will be in operation next month.

William R. Clarke, financial manager of the Alberta & Great Waterways Railway, which holds a charter to build from Edmonton to Fort McMurray, and holds also a Provincial Government guarantee of bonds for the line, announces that he is prepared to commence immediate construction upon the road. The capitalization of the company includes English, French and American money.

New Companies.

Eastern Construction Co., Toronto; capital, $40,000; to carry on contracting and building business. Incorporators, A. Mullin, G. Service and J. L. Wood, Toronto.

Natural Enamelware, Toronto; capital, $1,000,000; to manufacture enamel wares. Incorporators, J. H. Carter, H. C. Secord and R. B. Young, Toronto.

The Retail Paint Trade

DISPLAYING PAINTS.

In displaying paints, says an exchange, not many fixtures are necessary, but what are used are none the less important. Have good material for background and base—something that may be easily changed.

Use a plain colored carpet or cloth for floor, with a well-painted background; or, better, good hangings on a rod, in black, or brown, or blue, to match the floor.

The lights should be invisible, if possible. Too often beautiful effects are destroyed by the prominent position of electric lights or gas jets. Display your own goods and not the wares of the light company. A reflector at the top of the window is in general the most satisfactory light. Draw the curtain far enough to hide the light. If gas or oil lamps are used, shades may be put over them so that they will reflect from above the proper light and thus be largely out of sight.

Everything in the window should be clean. To accomplish this, even a window full of paint cans should be carefully dusted and cleaned every day. It means also that you do not permit show bills and other advertising foreign to your business to be displayed in your window.

The display, if it is to help sell goods, must attract attention by its novelty, interest by its suggestiveness, and educate by giving information regarding the articles to be sold.

It is not enough simply to amuse or to astonish, but the display in some way must be connected with the article you want to sell.

A stump of a tree put in the window would no doubt attract much attention and lead to questions as to the cause of its being there, largely because it would seem so foreign to the business. It would not, however, sell paint. But a card, "'High Standard' Paint will cover even such wood as this," would connect the display with the article you want to sell and would set the passer-by to thinking.

Do not pile your window full of paint and call this a window display. It might cause someone to look once, but not again. Even such an arrangement, however, can be made to attract attention by adding something out of the ordinary. A thoughtful young clerk in charge of the windows of his store put his samples of cans into the window in a neat way and then above them suspended a stuffed hawk looking down on the display below. On a plain card was "The Hawk always selects the Best."

Try to find something new—at least something new in the paint business.

In making up a window display it is important to try to look at it from the standpoint of the buyer. The question is what arrangement of your paint will best show the purpose for which it is to be used, or the method of using it so

Don't Get "Notions" About

Floorglaze

Please don't get the notion that FLOORGLAZE is good only for floors. FLOORGLAZE is a solid-color floor-enamel with all the elasticity of good paint, and more; and that has a dozen uses about the house, indoors and out. It's so advertised for you that it can't help selling once; and its own quality sells it again to the same people—and their neighbors. FLOORGLAZE is the kind of goods that strike you as about right for your store.

Send for a sample Can and Color Card now.

WHITE LEAD

Tiger  Brand

The practical painter has confidence in this lead as a result of over thirty years satisfactory experience.

Made from absolutely dry White Lead and ground in pure refined linseed oil.

MADE FROM DRY LEAD "Tiger Brand" MADE FROM DRY LEAD

THE MONTREAL ROLLING MILLS CO.

as to attract the passer-by and suggest his need.

Show what you can to advantage and no more. The quantity in the window is not to be in proportion to the size of the stock carried. Very often a single can or the article to be covered with the paint is sufficient for the display.

PAINT AND OIL MARKETS

MONTREAL.

September 24.—The feature of the market this week has been the break in ground white lead. For some reason the harmony which has hitherto prevailed among the grinders has been disturbed, and cutting has been indulged in, prices in some quarters tumbling from 25 to 30c. This has, of course, upset the market, and for the present no certain price prevails.

Trade generally has been very good. Ready mixed paints have sold well while the demand for oil and colors shows that painting generally has been very heavy. Dealers are confident as to the maintenance of the demand and with the markets stiff, except in the one instance mentioned, prospects look very favorable.

TURPENTINE—Quotations keep up, and buyers are content to pay the price for their immediate necessities without any disposition to stock up for the winter. We quote 78c for single barrels net 30 days.

LINSEED OIL—The favorable weather and the activity in the workshops have made the demand for linseed oil very general. The marked firmness in prices, also induce users to purchase liberally. We continue to quote: 1 to 4 barrels, in one delivery, raw 64½c per gal.; boiled, 67½c per gal., net 30 days, f.o.b., Montreal.

GROUND WHITE LEAD—The harmony among the grinders has been disturbed, and severe cutting has been made in some brands, although others have not yet been altered. The demand, as reported last week, has been a somewhat sluggish, but the lower quotations are expected to stimulate the call. We now quote: Strictly pure about $5.25 to $5.75, according to quality, and No. 1, $4.85 to $5.25 f.o.b., Montreal.

RED LEAD—A fair call is reported. So far the article has not been affected by cutting which is going on in white lead. We quote— Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; less quantities at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

WHITE ZINC—More active trade is being done in this line. The market is steady, and unchanged. We quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5½c.

PUTTY—Some attempt has been made to bring about lower quotations, but with the heavy demand manufacturers have not decided to make any change, and we continue to quote— Standard putty, 800 lbs., in casks, $1.75; in 100-lb. drums, $2; bladder putty, 400 lbs., in barrels, $2.15; in 100-lb. cases, $2.25; in 25-lb. tins, $2.15; 12½-lb. tins, $2.35, f.o.b., Montreal.

TORONTO.

Sept. 24. — Business is opening up again, and during the week some spirited trading was done. A big season is ahead of the paint trade, unless some unforeseen disaster occurs. It is conceded on all sides that the prospects are very rosy. Inquiry continues for all lines, and travelers, jobbers and manufacturers state that the paint business is gaining all the time.

White lead prices have gone all to pieces this week, the disruption of the association of grinders has pulled quotations down about 35 cents all round. Toronto jobbers say they do not understand the details which brought about the disorganization, but aver that cutting undoubtedly had something to do with it.

Turpentine prices are stiff, with an upward tendency. The majority of local jobbers quote an advance, and advances are noted in the south. Linseed oil and the other lines remain unchanged. The rosin market continues to advance and reports from the south are that prices are sure to remain firm.

WHITE LEAD—The disorganization of the white lead association has brought about newer and lower prices. Generally speaking these amount to a reduction of about 35 cents, although some lines hardly go so low. Some of the changes noted are as follows:—Decorators pure, $5.65 from $6.10; select flake, white, $6 from $6.35; Ramsay's pure, $5.55 from $6; Elephant genuine, $6 from $6.35; Robertson's, $5.90 from $6; Sanderson, Pearcy, $5.75 from $6. The other lines are also proportionately lower. Demand is very good.

RED LEAD—This line holds its own with demand fair and prices steady. Casks are $4.50, and 100-lb. lots $4.75 to $4.80.

TURPENTINE—This commodity has been rather unsteady with a small advance since last week. On Saturday last there were six steamers reported at Savannah, to load with naval stores, which includes, cotton, rosin and turpentine, and it is said that there are thirty additional steamers expected in Savannah soon to take out cargoes, which may have a tendency to clean up the market, and unless the supplies coming forward are more than is expected, the prices for turpentine and rosin are almost sure to re-

YOU KNOW JUST WHAT YOU'RE SELLING

when you hand out "English" Liquid Paint to your customer—and he knows just what he is buying The **guarantee formula** is on the can, stating plainly that the white base on which

"English" Liquid Paint

is made is 70% Pure White Lead (Brandram's B.B. Genuine) and 30% Pure White Zinc. No paint can possibly be better, for Brandram's White Lead is recognized as the best in the world. If you are one of those dealers who believe in **knowing** just what they are selling to their customers, you'll appreciate "English" Liquid Paint, with its guarantee label.

Just write us a postal card for prices and selling plans.

MOORE'S HOUSE COLORS

A PURE LINSEED OIL PAINT

The goodwill of the PAINT TRADE is a most valuable asset, and by selling Moore's House Colors this goodwill is assured to you. The reason is that our paints have reached the high water-mark of perfection in durability and quality—the colors are true and the pigments thoroughly ground. Give them all the prominence you can, it will repay you. Color card and price-list on application.

Benjamin Moore & Co., Limited

New Office and Works: West Toronto, Canada. New York, Chicago, Cleveland, Carteret, N.J.

Let Us Give You a Pointer

YOU are naturally anxious to get your full share of the paint trade of your district, and as the painter often wishes to produce rubbed effect on gloss-finished work, you can safely recommend

FLATTINE
WOOD FINISH

FLATTINE gives the appearance of a high-grade rubbed finish, without the labor and expense of rubbing with pumice and oil or water. It is a great moisture-resister, and does not mar or scratch white. Every up-to-date hardwareman should handle FLATTINE. *Send to-day for particulars.*

INTERNATIONAL VARNISH CO., LTD., TORONTO

Makers of Fine Varnishes **Branch of Standard Varnish Works**

NEW YORK CHICAGO LONDON BERLIN BRUSSELS

main firm, and, especially in turpentine, likely to advance.

Locally the quotation of turpentine has gone up 2 cents, single barrels now being at 82 cents, although some old turpentine is yet being offered at 80 and 81 cents, while 78 cents was the quotation given by at least one house, and 80 cents was the highest given by a second. All houses, however, state a tendency to firmness and higher prices.

LINSEED OIL—As regards linseed oil the prices in Great Britain, both for linseed oil and flaxseed remain very firm and at such figures as positively preclude the possibility of any oil coming to Canada for the balance of this season. There is no change in the price of oil locally—64½c and 67½c for raw and boiled oil still holding good. The ½c quotation is yet the butt for the joker.

GLASS AND PUTTY—The glass market is firm with deliveries yet active. Hardwaremen report good sales of glass in small quantities. With the advent of the fall season demand for putty continues to show improvement. Putty in oil is very firm and prices are being adhered to strictly. Bulk putty in casks are quoted at $1.75; 100-lb. drums, $2; bladders, $2.15 (barrel lots), and $2.25 (cases).

STAINS AND VARNISHES—There is a strong market in these lines, with a splendid demand. Ready mixed paints, too, are active. Jobbers say just now all these interior and prepared lines are about the most satisfactory paint goods moving.

PETROLEUM—Shipments and deliveries continue to be the ruling feature in illuminating oils. Supplies are pretty free, and there is at present a large quantity held in stock. Prices are firm, though unchanged from last week:—Prime white coal oil is 13½c, water white 15½c, and Pratt's astral, 17½c. There is still a fair demand for gasolene at 16½c and benzine at 15½c.

FIREPROOF PAINT.

Several tests of linseed oil fireproof paint have been made during the past year and have proved such paint to be positively fire resistant. These tests have embraced "set" tests on small buildings in Chicago and St. Louis, and also actual service tests of houses painted with this paint and exposed to fire in the natural course of events.

In both of the "set" tests two small frame buildings about 14 feet high and 7 feet square were erected 5 feet apart. One of the buildings was painted with standard brands of linseed oil paint, while the other was painted with the linseed oil fireproof paint. Both were alto stand for several months for natural seasoning. A large pile of kerosene-saturated straw and wood was then put between the buildings and a fire kindled.

In the Chicago test, the building coated with ordinary oil paint took fire and was totally consumed in 32 minutes, while the one painted with the fire-proof oil paint was merely charred on the side next to the fire. The protective paint prevented it from catching or spreading.

In the St. Louis test, there was a strong wind which forced the fire against the fire-proofed building and away from the other. Here the fuel was replenished several times, but the fire-proofed building did not catch. In 71 minutes the other building fell blazing against it, a ruin. Examination of the protected house showed merely charring, with no evidences of spreading.

A test of the fire-proof paint in service occurred in the natural course of events in the case of a building owned by Mr. A. C. Talmage, of Chicago. This building has been painted several years with the paint when a structure 10 feet away caught fire and burned to the ground. The only ill effect was charring, the protective coating preventing the spread of the flames.

These tests effectively demonstrate that it is possible to fireproof wooden structures, and interior woodwork in buildings where concrete, tile or other fire-proof material is used in the body of the structure. For this latter service of fire-proofing interiors a compound is made which prevents the spread of fire in curtains and other delicate interior furnishings.

HARDWARE PATENTS.

The following is a list of patents issued by the Canadian Patent Office on Aug. 31, relating to hardware and metal, and furnished by Fetherstonhaugh & Co., 5 Elgin Street, Ottawa:—

120205—T. B. Lasher, Bridgeport, Conn.; table knives, International Silver Co.

120229—C. H. Kohn, Stade, Germany; E. Taubert, Leipzig, Germany, motor planes.

120230—W. R. Bevan, Belvedere, Kent, Eng.; D. T. Morley, Welling, Kent, Eng.; nut locks.

120250—C. D. Baldwell, Paris, Texas; artificial fly fish hooks.

120256—J. J. Conway, Bellingham, Wash.; cooking utensils.

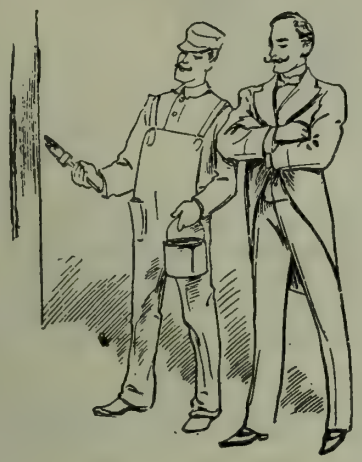
120273—F. L. Gormley, Boston, Mass.; lifting jacks.

120301—R. H. Reed, New York City; safety razors.

120317—G. F. A. Lorde, Stockton, Cal., tools.

120321—J. D. Tully, Denver, Colo.; drills.

Owing to the stress of business, Robert Starke, of Starke-Seybold, Montreal, has resigned his command as Lieut.-Col. of the 3rd Victoria Rifles.



John L. Tyson, accountant for Wilkinson & Kompass, carriage hardware merchants, Hamilton, was introduced on the Exchange at the Board of Trade, Montreal, recently, by W. H. Evans, of the Canada Paint Co.

THE CANADA PAINT COMPANY, LIMITED

ABOUT BARN PAINTS

Always in the Fall the farmer thinks of painting. It is a good time to paint up barns and fences. It is a good time for the storekeeper to bring constantly before the farmer the value of

RAMSAY'S OUTSIDE PAINTS.

There is just as much money in it for the dealer as there is in the expensive house-paints. You can sell them at $1.00 a gallon and make a good profit. They cover well barns, fences, bridges and roofs of all kinds. The expensive house-paints are not needed for this work. That is why we offer Ramsay's Outside Paints, a good paint for the purpose, and a good paint for profits.

Finest of English White Lead

Exhaustive tests recently made of Cookson's English Genuine White Lead in Oil in comparison with the other leading English makes show Cookson's in point of color, opacity and covering power, very much superior.

In covering power alone Cookson's is fully 15% better than its nearest competitor—This means an actual cash saving of 15% in the cost price.

We import Cookson's in large shipments direct from Newcastle-on-Tyne, and can supply you at very low prices.

A CUSTOMER WORTH CULTIVATING

The paint dealer who is ignoring, overlooking or neglecting the trade of the woman is certainly losing a golden opportunity to do more business and make more profit. The housewife has learned to use paint—she recognizes and appreciates its sanitary qualities; she knows that paint not only preserves and makes things last longer, but she has also discovered that good paint reduces the work necessary to keep the home "spick" and "span" —that it is a labor-saver as well as a beautifier. You will find her a customer worth cultivating. Every woman in your town is a possible customer for your store. Among the Martin-Senour Line of

Paints that Brighten Up the Home

there are paints, varnishes and stains for the furniture and floors, the woodwork and doors; paints for wood and iron things—for the sideboard and wardrobe, the stovepipe the radiator, the bath-tub; enamel paints for the iron bed, the porch furniture, and for the walls; Roman Gold paint for little artistic touches and for renewing old picture frames, etc.; paints for the flower pots, the fly screens and the storm doors; paints for every purpose—on the house, in the house, or around the house. It's up to you, Mr. Dealer, to let the women know that you can supply their every paint need with Martin-Senour Paints. It's up to you to suggest new ways for her to use paint. The time is ripe **right now** to get busy for the woman's trade. You can get it and hold it with our line. Write today for our plan to help you reach the women.

Winning the Buyer's Favor

The best possible buyer is not made an actual buyer at a single step.

It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale.

Winning the buyer's favor is the work of trade-paper advertising. Under ordinary conditions it should not be expected to do more.

The Pocket Edition "Gillette"
Solves the Christmas Shoppers' Problem

How many people, between now and December 25th next, will enter—or pass—your store, wondering, "*What shall I get him?*"

Wouldn't it be worth something to you to be able to show them and sell them the answer?

Can you think of a better answer than a Pocket Edition **GILLETTE** Safety Razor?

It is new in style and compactness.

It is beautiful in case, in finish and in workmanship.

It is the essence of convenience.

It will give comfort and satisfaction every morning for the rest of his life.

It is just the right price for the average Chistmas shopper.

In a word, it's the perfect Christmas box for a man.

Why not show it and sell it?

Last year the holiday sales of **GILLETTES** were enormous, and the profits of the dealers who pushed them were most satisfactory. This year, with the growing popularity of the **GILLETTE**, and the added attractiveness of the Pocket Edition, they will be still larger and still more satisfactory for the dealers who link their selling energy with the **GILLETTE.**

Stock up now for the holiday trade. Make your window and counter displays as attractive as you possibly can. Get your **GILLETTE** signs up in plain sight. Our newspaper advertisements direct your customers to look for these signs. Put your enthusiasm into the **GILLETTE** and you'll find no other specialty that responds so generously in cash profits.

GILLETTE Safety Razor—Standard Set—$5.00 retail.

Pocket Edition in cases heavily gold or silver plated or gun-metal finished, with razor and blade box to match—$5.00 to $7.50 retail.

GILLETTE Combination Sets—especially suitable for Christmas gifts—$6.50 to $50.00.

Our factory is already overtaxed. Orders booked ahead will have the preference.

"A satisfied customer means many sales."
—The Philosopher of Metal Town.

CORRUGATED IRON

Three Points of Superiority in Our Galvanized Corrugated Iron :

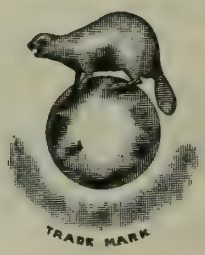
Only the finest, COLD-ROLLED steel is used because cold-rolled steel is a much tougher and finer material than the hot-rolled article.

The steel, to pass our rigid inspection, must be properly galvanized—guaranteed a perfect, even, bright coat. The poorly coated material is not as good as painted black iron.

Then the corrugations of our corrugated iron are absolutely uniform. They are PRESSED ONE AT A TIME, not rolled; for with the rolling process the corrugations are not uniform, and will not fit accurately.

It's absolute perfection in workmanship and quality of material used that make *our* galvanized corrugated iron SUPERIOR TO ALL OTHERS.

Flat or curved—galvanized or painted.
Any size or gauge.



Our special prices on car lots or season's requirements will interest you. Send for our new catalogue—No. 70. It contains interesting information on the roofing question.

MORE ABOUT GRAHAM NAILS

For some years we've been quietly working to improve the quality and finish of Graham Nails; working to crowd in more of strength and value than had previously been thought necessary. And without any advertising to speak of we've been doing a remarkable business, because the nails were good.

It is worth your while to know that

—**Graham Nails are Strong!**

—**Graham Nails are Smooth!**

—**Graham Nails are Uniform!**

—**Graham Nails are Superior!**

We're not so anxious after profit but we can afford to do better than you expect, even with such a commonplace product as nails. We do the best we know how to give you the kind of goods that recommend themselves. And in regard to Graham Nails we are giving better value right along, which means better satisfaction.

H. S. Howland, Sons & Co., Limited

Wholesale Hardware Merchants,

We Ship Promptly. **TORONTO** **Our Prices are Right.**

Graham Nails are the Best.

It's time that tells in saw service. Don't buy a saw that will last but a short time. Buy a saw that you can hand down to your grandchildren with pride in its sawing qualities.

Disston Saws

The Saws With a History

have been giving universal satisfaction for nearly seventy years. Hundreds are in use to-day that were made long before the Civil War.

Disston Saws are manufactured from our own Special Steel under the constant supervision of noted experts; steel particularly adapted for saw purposes, hardened and tempered by our patent process. Every inch of steel is perfect, every tooth is a clean cutter, and every saw is the best money can buy.

Avoid the irritation of constant saw troubles—save time, money and temper—by adopting and using a Disston whenever there's sawing to be done.

It's yours—The Disston Hand Book on Saws; a mine of saw information that interests Manufacturers, Contractors, Builders, and even the Man-About-the-House. A request brings it FREE. Address:

IMPORTANT ANNOUNCEMENT

There is a gradual rise taking place in the value of all commodities.

Deliveries of raw material are not so prompt as they have been.

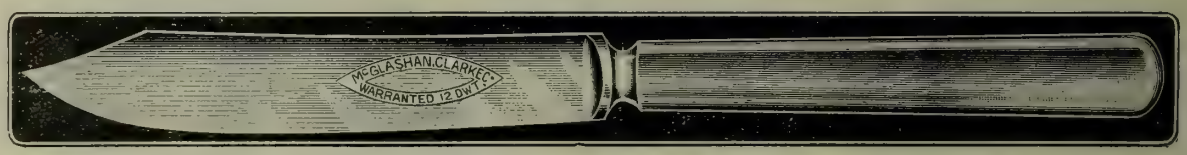
Good buyers seem to have come to the conclusion that it is good business to anticipate their wants some time into the future.

Authorties have recently expressed their opinion that the balance of this year and next year will be the busiest in the history of Canada.

Only a short time ago it was necessary for buyers to look ahead and anticipate their wants for six months.

PRICES TO-DAY ARE AT THE BOTTOM

There will be a wonderful revival in most all lines of business — none more so than in Steel and Iron Hardware.



We have backed up our belief in an increasing business by building large additions to our plant, installing modern machinery, making large purchases of raw material, and recommend that our **customers buy promptly and liberally** to insure prompt delivery when the rush season opens.

Of course you will want the best; so order Hinges, Butts, Plated Butts, Brackets, etc., etc., from us.

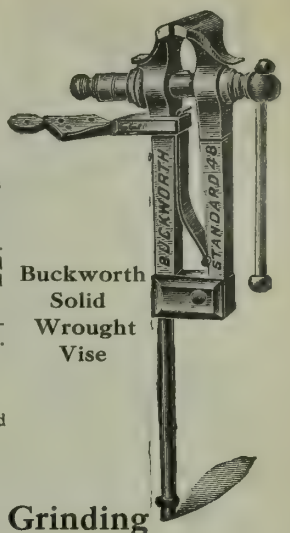
BUCKWORTH

Solid Wrought General Blacksmiths' and Clip Horn Anvils, with Crucible Steel Face : : :



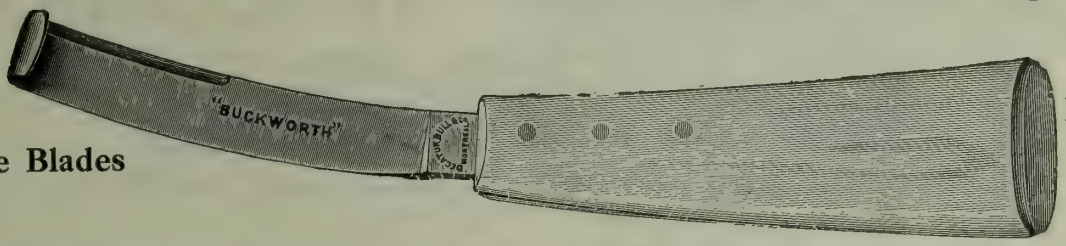
We call special attention to our Farrier's Clip Horn Anvils. These Anvils are the result of years of careful study on our part of the Farrier's wants, and we are now able to present an anvil that is perfection.

With years of experience and careful study of the advantages and disadvantages of the various makes of anvils on the market, we here present an anvil which is as near perfect as it is possible to be. The size of face, length and fulness of horn and depth of drop have all been considered. We defy a better shaped anvil for general blacksmithing.

Every genuine **BUCKWORTH** Anvil is made of the best Wrought Iron and faced with the best Crucible Cast Steel, carefully tempered and tested to secure absolute uniformity. The **BUCKWORTH** Anvil is made by the latest improved methods. Top and bottom are each one solid piece, and only one weld at the waist.

The steel faces to these anvils are all put on in one solid piece.

NOTE.—That every genuine **BUCKWORTH** Anvil is stamped the name **BUCKWORTH** together with the word "original" on a hammer.



Buckworth Solid Wrought Vise

PRESTON & MONTREAL

VALUE OF GOOD COPY

Personally, I believe "ads." in trade papers should be made so attractive, so interesting in some way that the merchant as he glances through the trade journal will stop and see what you have to say. The simple announcement that you are in business is not enough. I don't care how prominent a firm is, they should not get the idea they are so big that all they need to do is to reproduce their name on a page in a trade journal and say nothing more. They should do something to make the merchant curious; in fact, somewhat anxious to meet the travelling man you are sending out to represent you.

—TOM MURRAY, Chicago.

The R. McDOUGALL CO.
LIMITED
Galt, Canada

THE AYLMER

DOUBLE ACTING HOUSE FORCE PUMP

With Cock Spout and Reversible Handle, has Brass Cylinder, fitted with Brass or Glass Valve Seat. Arranged to drop the water to prevent freezing.

The reversible handle can be placed at any angle, thus making either a right or left hand, or straightaway pump, as desired. It is built on the plan of our submerged Cylinder Well Pump, is double acting, has heavy seamless brass upper and lower cylinder with brass or glass valve seat and expansion plunger bucket. It is compactly built and very powerful. The base is a new and neat design and is attached to the cylinder by means of three heavy cap screws.

The expansion plunger is a feature not found on any other make of pump. By means of the rubber disc in connection with the cone-shaped stem, the leather on the upper plunger can be expanded by means of an ordinary wrench, turning the adjusting nut on top of pump to the left without removing the pump from the well. This enables the user to keep his pump in proper adjustment without the expense of a pump expert.

Question. What is a Gas Ring?

ANSWER. A gas ring is a cast-iron, circular, perforated tube which, together with its "mate" takes the place of the lower fire-pot in a "Sunshine" furnace. It is fed by two gas pipes on either side. When one tap is turned on, two-thirds of the ring only can be lighted, the other tap feeds the remaining third. When putting in a coal fire it is not necessary to remove a bolt, or nut, or grate,--the gas ring is a permanent arrangement, a model of instantaneous change.

The gas ring is the newest development in gas accessories. Its sterling worth and convenience is at once recognizable.

Base Burners

IN DEMAND

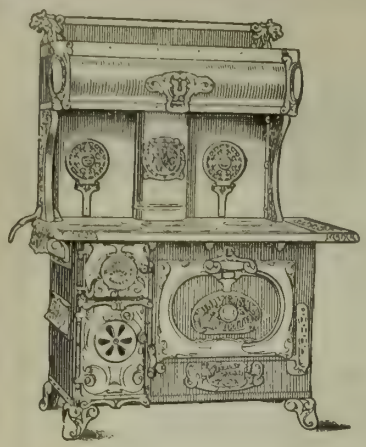
The "ART LAUREL." Baseburner

¶ Yes, that's so--but the kind you sell will either bring you more business or more worry. Look around--ask yourself questions--are you sure you have the best line--can you be convinced when facts are proven--for example, will you try one sample Baseburner from us--place it on your floor--give it breathing space--then watch the magic of its charms--how it "gets" your customer. Back of that, you can have the evidence to close the sale convincing, practical talk. "The proof of the pudding," as it were.

"Man alive!" you can't afford to trifle with your good trade offering stoves that only have the "glitter"--and lack the ability to work. Fling our argument back at us--make us prove our statements in a practical way.

Say in a few words on a post card:

"Send me a No. 315 Oxford Art Laurel and outline to me what you can do to help its sale and many more."



You'll say life's worth living when you hear our proposition.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

J. W. Harris Rotary Ventilators

THE BEST MEANS FOR INSURING PURE AIR

One Testimony:

Montreal, June 7th, 1901

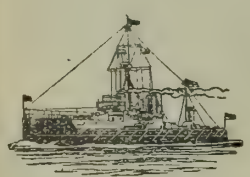
J. W. Harris Mfg. Co., Ltd.,
Montreal

Gentlemen:—

I have been using your "J. W. Harris Rotary Ventilators" on several houses in this city with the best results. The tenants of these houses declared that your Ventilators are of great advantage to them.

I also installed two (2) 18-inch on my stable, and I can say that your Ventilators cannot be surpassed by any to take out the sweating or the bad smell in any room.

Yours truly, F. D. MONK,
58 St. Frs. Xavier St.



Write direct for booklet and catalogue to-day. Learn about our system of ventilating. A pleasure to send books.

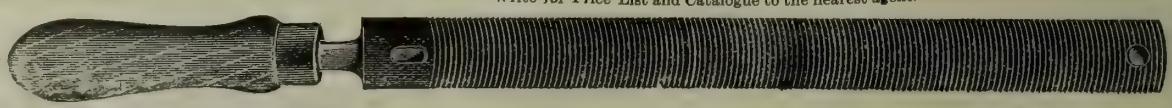
THE PATENT "DREADNOUGHT" MILLING FILE



Registered Trade Mark

Will make a surface on Steel, Brass or anything, that it looks as if it were burnished, after cutting so rapidly that it will astonish you, on Steel or Cast Iron, and then again on Brass or Bronze without apparent loss of cutting quality. This will make you think. It made the British Government think, it made the Krupp Co. think. Made them think that it would pay to use the Dreadnought in every department, and now that they are using them extensively, their "Think" has turned to a certainty, that it does pay to use the Dreadnought, and in our own CANADA they are rapidly being adopted by the largest consumers.

JUST THINK:—This file CAN BE RE-SHARPENED MANY TIMES, without drawing the temper, thus making it "absolutely the cheapest file that can be procured anywhere."

JUST THINK:—If you try a sample order and are not perfectly satisfied with the goods, you may return them. We want your business and are determined to satisfy you, if you but give us the chance.

"Not the First Shingle but the first Perfect Shingle."

A Shingle of Doubt is a Trouble Forever

Ordinary metal shingles are generally water-tight. The "Galt" is always water-tight. Any practical man can see that in a glance.

When metal shingles leak they leak through the locks, invariably. Water gets in the side-lock and is forced by the storm up past the end-lock through the roof. This point—the intersection of three shingles—in the "Galt" Shingle is protected by our patented "closed-end" shown in the cut below, which positively prevents leakage. Notice the broad, deep, self-draining side-lock and continuous, over-lapping end-locks.

This is the shingle with the future and now is the time to get control of it in your locality if you wish to handle it next year. Drop us a card to-day. They are patented in the "Galt."

Important Points in Displaying and Selling Stoves

C. A. Eddy Argues That the Dealer Who Sells Only One Line of Stoves Has an Advantage Over Others Who Display the Makes of Several Manufacturers on Their Floor—Suggestions Regarding Window Display and Sales Methods—Ideas Which Can be Adopted in a Thanksgiving Window Display.

Success in any line of business comes first, from knowing how to do a thing, and then, earnestly working until you have completed what you started out to do. A great many men have good intentions, but these intentions do not carry them very far, because they are not headed in the right direction. They do not know how to carry out plans which they realize are necessary to the success of their business.

In selling stoves there are certain rules which must be followed to insure success. Before a man can build up any business it is necessary for him to have the goods. The quickest road to success in selling stoves lies in handling a high grade line made by a reputable manufacturer. A merchant cannot make a mistake if he does this. Sales will be easier, because the merchant is then backed by modern selling and advertising plans furnished by manufacturers, which bring customers into his store, asking for the special class of stoves he sells.

Many merchants keep samples of cheap stoves just for comparison with the better class of goods. Where there is much catalogue competition, this is a good plan, because it enables a merchant to show a customer the difference between a stove made for mail-order buying and one made by a reliable manufacturer to sell at a fair price.

Sell One Line of Stoves.

The experienced and successful merchant will admit that selling one line of stoves is the most profitable method. With three or four conflicting lines you can do justice to none of them. If a customer comes into the store and is interested in buying a stove you take her to one of the lines and explain its good points. You elaborate on the workmanship, the quality of the material used and end up by telling her it is the best stove money can buy.

Suppose, however, that she is interested in a stove you carry which is made by some other manufacturer. What are you to do? You cannot then turn around and tell her the stove she likes is the best stove for her purpose, because if you do, you immediately prove to her that your talk about the other stoves was not genuine.

When a merchant tries to handle several lines of stoves he is sure, in a great many instances, to be placed in an embarassing position which not only causes him much annoyance, but the loss of many stove sales as well.

The better advertised line of stoves a merchant can handle the more profit it means to him. Advertising is necessary to the selling of goods nowadays, and it is of vital importance to the dealer that he be backed by strong selling helps from the manufacturer whose goods he represents.

The Floor Display Important.

Next to the quality of the stoves, a great selling feature is the manner in which they are shown on the floor. Every stove on a merchant's floor should be given careful attention and critically inspected before being placed on sale. It should be well blackened, and the nickeled parts thoroughly cleaned, until they will attract the casual buyer's attention by their brightness and brilliancy.

Keeping stoves in good condition means ready sales, because people judge a stove to a big extent by its looks. The more care and attention put upon a stove the easier it is sold.

Fit up a Special Stove Room.

A good plan in displaying stoves is to have a special stove room fitted up in an attractive manner. On one side of the room can be placed a row of steel or cast ranges with the elbows, collars, etc., in place on the ranges, giving them the appearance of being set up in working order. On the other side can be placed the base burners which, when arranged in a row, will attract immediate attention because of the large amount of nickel work and brilliancy of the base burners.

By having a special stove room the stoves, in a great many instances, are much easier to sell. A person buying a stove in a store many times has his attention distracted by other goods displayed, or people coming in to buy various articles. If a merchant has a special sales room containing stoves only, the customer's attention is confined just to stoves and the result is that sales are much easier and quicker made.

Prepare Early in the Fall.

One mistake many merchants make is in not being prepared for the stove business early in the fall. They do not realize, until it is too late, that the man who is prepared is the man who gets the business. If people make up their minds to buy a stove during the first cold snap they are not, in a great majority of cases, inclined to wait until the merchant gets in his stock, and the result is that the order goes to a competitor.

Every merchant, in order to be ready for the first stove business in the fall, should remember that in September there is generally a cold snap. This cold snap brings the best customers.

A full line of stoves should be on the floor at this season, all polished and ready for setting up in the home. When customers go into the store it is a part of the merchant's or his clerk's duty to find out at once the stove they are interested in buying. As soon as they secure this information they should take them direct to the stove they have in stock as near like the ones they are interested in as possible.

The stoves should be pulled out, placed on a truck and then every feature and good point of the stove should be fully explained so the customer can readily understand.

In selling stoves many dealers do not place themselves in a customer's position—they talk about the smooth castings, the flues, magazine feed, etc., features of which many customers do not understand and consequently the talk goes into one ear and out the other.

A merchant is wrong in assuming that the customers knew about these features. The best plan is to explain in the simplest and clearest manner possible the advantages of the stove and why it will pay the customer to buy it. While the stove is out in the middle of the floor keep turning it around so the customer can see all sides of it. If a corner of the stove is kept toward the customer the size of the stove will appear to the best advantage. Much depends upon the manner in which a salesman handles a customer as to whether or not a sale is made.

High-Class Clerks Important.

Many merchants do not seem to realize how important it is that their clerks be high class and have a full knowledge of the goods they carry in stock. A clerk in a store is an important part of the business—no business can be run without sales. When it is known that the greater part of the sales of the average store are made by the clerks, it can be seen how essential it is that the merchant take an interest in the clerks and know positively that they are well acquainted with the goods for sale and capable of selling them.

Hardware clerks should be thoroughly in earnest in their work. When a customer enters the store the clerk should show his earnestness in every move he makes. A customer can generally tell by looking at a man whether he is sincere, enthusiastic and in earnest. If he is, he will have more respect for him and the way is then paved for an easy sale.

When a clerk is making a sale to a customer he should drop everything else and think only about that one sale. He should concentrate all his energies on that one particular customer and not let his mind wander from one thing to another in the store and wonder how soon the customer will make up his mind and when he can start doing something else.

Good Advertising Also Important.

A most important feature in selling stoves is good advertising. Newspaper advertising affords the greatest advantage to a merchant because the great majority of people nowadays read newspapers—not only the news items, but the advertising columns as well. If the advertising is interesting, well written and made attractive by the use of good cuts, there is no reason why it should not be a good investment for any merchant.

In advertising stoves the best plan is to always quote prices. Buyers want to know what goods cost and they are al-

ways more interested in reading an advertisement where there is some mention made of prices and any special inducements which a merchant has to offer.

Good Window Displays.

In connection with newspaper advertising good window displays are essential. In fact, window displays are one of the most effective and profitable forms of publicity a merchant can use. There is hardly one store in a dozen that does not have at least one good window that can be devoted to a display of stoves.

A merchant need not necessarily be a professional window trimmer in order to have his windows look neat and attractive to the eye. If he will follow a few simple rules and use a certain amount of good judgment and good taste there is no reason why his windows cannot be made valuable allies in attracting people into the store.

A simple display will, as a rule, make

Stove Store of Albert Welch & Son, Toronto.

the most direct appeal. In displaying stoves, for instance, they can be shown as attractively as almost any other line of merchandise, and a good stove display put in at the right time will always result in sales.

The manner in which the stoves are arranged and the number shown depend upon the shape and size of the windows. The size of some windows will only admit of one good-sized stove being shown. In others, a half dozen or more can be easily accommodated. Whatever the size of the windows, do not crowd them, as stoves do not show to advantage when crowded together.

Plain Windows Trim Best.

In trimming a window for a stove display too much fancy trimming should not be used. If cloth is used, an excellent and very inexpensive material is Atlantic bunting. Cheese cloth can also be used to good advantage. It may be pleated, hung in loose folds or stretched tightly, with good effect.

Another good background can be made by using the zincs or stove boards placed side by side to cover the entire back. This can be occasionally relieved by stove pipe used as columns across the top of the back cover. The elbows can be fitted in to finish off the tops of the columns.

In showing stoves, base burners especially, the most attractive method is by lighting them on the inside with red or yellow lamps or by placing red tissue paper inside the isinglass doors. An attractive base burner display can be made by placing a stove in the middle of the window and beside it a bucket full of coal and a card with something like the following: "This stove will heat a room 12 by 16 feet for 12 hours without any attention."

If the coal were emptied on the floor of the window the effect would probably be more striking.

The same idea might be used with a wood stove, substituting chunks of wood for the coal.

The Display of Ranges.

In displaying ranges the main points to be brought out are the conveniences, cooking qualities of the range, fuel economy, etc. A good plan in showing a cooking stove or range is to set it in the window just as it would appear in a kitchen, in fact the window might be trimmed to represent a kitchen. Run a piece of stove pipe from the stove to the end of the window, around and on the stove and use kitchen utensils such as pots, pans, etc. In the fire box place a small oil burner and over it put a kettle of water. The door of the oven should be open and inside may be placed a pan of nicely browned biscuits, loaves of bread, meat, etc.

Light the oil stove and the water in the kettle will soon be steaming away at a great rate. If it is a wood stove have a wood box in the proper place—if it burns coal have a coal scuttle with a shovel, etc. The remainder of the window can be filled with different kitchen utensils the store carries in stock.

Stoves shown in the window should always be carried in stock and on display inside the store. The best plan is to show them on a raised platform, each stove given as much room as possible in order that the doors may be easily opened and customers may see the ends and backs of the stoves as fully as possible. A good plan is to have a card on each stove giving the price and describing briefly the main features of the stove.

In selling stoves there is no reason why the merchant who is aggressive, keeps his stock up to date in good condition, sticks to one good trade-marked line and advertises it should not be successful.

Success comes not by wishing but by working, and the man who gives to his business his best efforts will get the best from his business.

HARDWARE LETTER BOX

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Shelf Ladders.—Wm. Bonner, Pictou, N.S., asks where he can secure steel store shelf ladders.

S. B. Martin, Dalton, Ohio, makes this line.—Editor.

Christmas Toys. — "Subscriber," of Brantford, asks for the makers of toys for the holiday trade.

The Ideal Mfg. Co., Detroit; J. Owen, 168A Mansfield Street, Montreal; Morton E. Converse, Winchendon, Mass.; Columbia Grey Iron Co., Columbia, Pa.; and the Ives Mfg. Co., Bridgeport, Pa.—Editor.

Window Dressing—M. H. Leggatt, of Chesley, asks if a magazine on hardware window dressing is published.

There is no such publication. The only work on this subject is "Hardware Window Dressing," sold at $2.50 by the Technical Book Department of the MacLean Publishing Co., 10 Front Street East, Toronto.—Editor.

Dry Grain Measures—Emerson & Fisher, St. John, ask who makes dry grain measures.

A Root, Greenbush, Ont.—Editor.

Glass Bottles—Fraser Hardware Co., Galt, ask what concerns in Canada make glass bottles.

The Diamond Flint Glass Co., Toronto, and the Sydenham Glass Co., Wallaceburg.—Editor.

Gasolene Lights—W. H. Turnbull & Son, Scotland, Ont., ask for the name of a London, Ont., manufacturer of gasolene lights, which has a generator, and the gas passes through a 1½-inch pipe to the lamp.

The light referred to is probably made by the National Light & Manufacturing Co., London. Other makers of gasolene lights are the Empire Light Co., 16 Victoria Square, Montreal; the Beach Foundry Co., Winchester, Ont., and the Best Light Co., Canton, Ohio.—Editor.

Advertising in a Town Without a Paper

Hardware Merchant in a Manitoba Village Plans to Publish a Store Paper of His Own in Order to Combat Mail Order House Competition—With a Good Mailing List He Ought to Get Satisfactory Results—Experience of an Ontario Merchant Who, Under Similar Conditions, Established a Print Shop in His Store.

George M. Watson, Rossburn, Man., does business in a village where there is no newspaper and finds it necessary to do something to hold the trade of his local farmers and village folk from going to Winnipeg and Toronto catalogue houses. After considering various means of doing this he has decided to publish a store paper of his own, similar to those of the Battleford Trading Co., Battleford, Sask.; Johnson Bros, Boisevain, Man., and W. F. Macpherson, Prescott, Ont., sample pages of which were illustrated in Hardware and Metal of July 3.

In the three places mentioned, however, local newspapers are published, and the circumstances are, therefore, different from those surrounding Mr. Watson. Where there are local papers it is questionable if it will pay to publish a store paper, as the same money spent in running an enlarged ad. in the papers will, in the opinion of many, bring greater results than by repeating the local paper ad. in a store paper and circulating it in practically the same field.

In a village without a paper there seems no question about the wisdom of trying to reach the people in the district by a store paper, and thus educate them to trade at home, and increase the value of their property by building up towns near at hand. As there may be other hardwaremen located in small towns like Rossburn, the experience of a country merchant in Ontario will be interesting.

Merchant His Own Printer.

About two years ago, R. J. Thomas, Hartford, a village of 200 population, decided to make an effort to extend his business with the farmers and village residents, and having no local paper, began by using rubber stamp announcements, soon following this up with gelatine pads, later installing a typewriter, and afterwards a small printing press and type. Mr. Thomas explained his experience as follows:—

"When I began to look over the stock we had in the store that was salable and yet not in sight of the customers—things that they would be buying every day if they only knew we had them—I made up my mind that there must be a way quicker than I had, and yet not take up any more room on paper than I was using.

Typewritten ads. were coming to us from wholesale firms, and I looked up the price of a typewriter. I rented two different kinds to see if they would do what I wanted of them, and they did the work, so I bought one for $35.00. Using this with a copying ribbon, I was able to make about 35 or 40 copies at once. This meant double work, as I was sending out 65 to 75 copies.

"This method of advertising I continued with some improvements, aided with the pen, in the way of illustrations, until I had put out my Xmas ads. Then we were so busy, I could not get time to do any more till after the holidays. Up to this time the cost had been: for the gelatine pad about $1 (this makes two pans); typewriter, $35; extra ribbon, $1; printed paper to put ads. on, $2 per thousand. The distributing was done through the school children.

"After Xmas I decided to enlarge my list of customers, by sending circulars to the residents on the Indian reserve. We took stock in January, and found our turnover had increased by $1,000, so it made me more confident that advertising had done its share in the work. In looking over the ground and counting up the people, I found it would take about 250 to 275 copies. Then came the problem of what to get to do it with.

"Among the machines I looked at were Neostyle, the Rotary of the same kind (these to use wax paper) at about $15 and $40 respectively. These could be used with the typewriter I had. Next in order came the Writerpress at about $150, and the Polygraph at about $75 to $100. At the prices named, I believed it would pay to buy a small printing press, and after investigating I bought a second-hand Pearl press, size 7x11, for $75, and type, inks, paper, and the necessaries that go with them, until the outlay will run about $150, and with this I am not only doing my advertising, but making bill heads, dodgers, paper bags, want cards, blotters, envelopes, etc."

One Mistake to Avoid.

A mistake too often made by local merchants is that of looking upon his near-by merchant as his greatest enemy. In order to develop a business it is necessary to adopt means to secure the trade of those near at hand and discourage possible customers from sending money to catalogue houses for supplies. In a village like Rossburn, a place not large enough to support a newspaper, it should not be difficult to show farmers and other property owners the foolishness of sending their money to build up Winnipeg or Toronto at the expense of their local tradesmen. Every dollar spent at home tends to build up local enterprises and as the village grows property will increase in value and opportunities for making life more enjoyable will become more numerous.

Too many merchants, however, are not far-seeing enough to take this broad stand but rather use their energies in trying to capture trade from local competitors by price-cutting or by offering a higher price to customers for their farm products, and while local merchants are scrapping amongst themselves the mail order houses are gathering in the cream of the cash trade and leaving only the less profitable credit business for the home merchant.

If a merchant has a local paper in his town he should give it generous support and demand in return that the editor conduct an intelligent campaign in support of local enterprise. But if no local paper exists a merchant will do well to establish a store paper, aiming in each issue to give some reason why the local merchant deserves support, but always backing this up by quoting prices which will compare favorably with catalogue goods, freight, etc., added, and keeping standing that trite saying: "The memory of quality remains long after the price is forgotten."

IRON AGE CHANGES HANDS.

The Iron Age of Sept. 23 and the Metal Worker of Sept. 25 contain announcements that these papers have been purchased by Charles T. Root, publisher of the Dry Goods Economist and other trade papers. The Iron Age was established in 1855, by John Williams, when "America was a half-settled agricultural country with rudimentary industries and dependent on Europe for most of her manufactured goods." To-day the United States has metal industries which rival those of any country in the world and David Williams, son of the founder of the Iron Age, in transferring the paper to its new owner, justly claims some credit for his paper for this wonderful development. The Iron Age has borne a reputation for accuracy and fairness which has had much to do with its success and as the same staff will continue to conduct the paper, its career under the control of its new owner ought to be equally successful as in the past.

NEW MENDING CEMENT.

A new cement has been put on the market by H. Nagle & Co., Laprairie, Que. It is a granite cement for mending holes in pots and pans, and when it is remembered how often faults appear in the enamelware and tinware, it can be understood that "Vol-Peek" has a wide consumptive field. It carries a good profit with it, and should be worth investigation by the hardwareman.

AN XMAS GOODS NUMBER.

An inquiry came to the editor a few days ago as to where iron toys could be purchased for sale in a retail hardware store during the Christmas season. This line has been successfully taken up by hardwaremen during the past few years and some jobbers now stock them. The names of some manufacturers and agents are, however, given in the "Letter Box" department on another page.

As there is a tendency to stock holiday goods early this year and indications point to one of the best seasons experienced for many years, the October 16 issue of Hardware and Metal will be a special "Christmas Goods Number," in which both editorially and in the advertising pages suggestions will be given regarding articles to push and methods to adopt in order to increase the volume of holiday trade.

Readers should, therefore, make it a point to study the announcements made in the October 16 issue in order to be able to place orders of holiday goods early and make certain of securing stocks of the most salable and profitable goods.

PRIZE FOR WINDOW DISPLAY.

Thanksgiving Day has been set for Monday, October 25, and hardwaremen will do well to prepare a special Thanksgiving window suggestive of a bountiful harvest and a family reunion in which a turkey is being carved.

The week before Thanksgiving can be made a busy time in the store if a special display is arranged and the attention of the farmers and townspeople drawn to the window through an announcement in the local papers. Roast pans, carving sets, and kindred goods will be required to prepare and serve the dinners for the many family reunions which will be held and the merchant who makes an effort to secure this business is the one most likely to get it.

If a good display is arranged the window should be photographed and a copy sent to the editor of Hardware and Metal, who offers a copy of "Hardware Window Dressing," a $2.50 book for the best photo submitted. Here is a chance for a clerk with ambition to become a successful window trimmer. The book contains numerous practical ideas which can be used to advantage in window displays during the Christmas season and throughout the year.

EXPRESSES HIS APPRECIATION.

Editor Hardware and Metal—In looking over the exhibition number of Hardware and Metal we think that exhibitors of stoves and hardware have every reason to compl ment you upon the exceeding justice in bringing out their displays so prominently. Respectfully yours,

W. H. Rumball & Co.

Victoria Harbor, Ont., Sept. 23, '09.

OPPOSITION TO NEW MANITOBA CORPORATIONS ACT.

Winnipeg, September 27.—The continued examination of the Extra Provincial Corporations Act by business men of Manitoba has tended to intensify the opposition to its coming into effect on November 1 next. Each organization, namely, the Board of Trade and the brokerage association have appointed committees to investigate the details of the act with a view to discover its scope. They have done this quite thoroughly, having each secured legal advice upon its interpretation and having further discussed the measure with the provincial secretary who is in the main responsible for its appearance. The various committees have also discussed the act with several other members of the cabinet and are quite prepared to submit reports to their respective associations.

The brokers' association committee has gone into the matter more thoroughly than any of the other enquirers and as a consequence the association has been hanging fire until this committee was ready. Some time this week, however, the brokers' association will hear the report of the committee, and should it be ratified then all the organizations will come together and call a public meeting, at which the conclusions of the committees will be aired.

The committees refuse to divulge anything regarding the nature of their reports, but it is known that their investigations have been thorough and the indignation keen, and little difficulty is anticipated in rousing public opinion against an enactment which according to their minds, legislates such a large volume of business away from this province.

Unjust to Provincial Business.

It has been made known that the provincial secretary has admitted that the act may be interpreted so as to be a severe injustice to the business of the province, but the interpretations which he puts upon it, and the interpretation which was meant to be put upon it when it was framed, does not in any way discriminate against extra provincial corporations doing business in this province through an agent or a broker. But according to the interpretation of the attorney-general of the province it does aim at the outside corporations and the resident brokers also, for he says, "what I see that is objectionable in the act is the fact that resident brokers are discriminated against and encouragement given to commercial travelers which is absurd." It would seem then that the act was manifestedly incongruous, but so long as there remains the slightest possibility of such an interpretation as the average business man puts into it, the associations referred to above, are prepared to fight it to the finish.

The deputy provincial secretary in discussing the measure stated recently that the act was simply a reproduction of the foreign corporation act which this act repeals. The only alteration made is that the new act provides that outside corporations cannot use the courts of the province if they are not incorporated within the province. Heretofore extra provincial corporations doing business here through the brokers had the same privileges as provincial corporations with respect to the courts, and this was considered an injustice.

Should Not be Enforced.

Granting that it has been in force for some time under another name, say the business men, it does not follow that it should continue, neither does it follow that because it is almost identical with the Ontario act, and very similar to the act in force in the western provinces, that it should be enforced in Manitoba. The deputy minister drew attention to the fact that the act was in force in British Columbia and that it was enforced, but that there was no complaint from B.C. brokers or the firms they represented, simply because, he said, a proper interpretation was put upon the act. Further, he said, no one can interpret the act as the business men of Manitoba interpret it, and have it enforced without the consent of the government which reserves to itself the right to interpretation. These arguments throw the whole act into ridicule. It matters not how or where the act is enforced, or how long it has been in existence, no sane man in this province

is going to stand idly by and see an act go through which may or may not throw into jeopardy the commercial life of the province. An the movement which is on foot at the present time will preserve at any cost the interests of this province and this country.

PUSH FLY SCREENS NOW.

How many hardwaremen are pushing fly screens at this season? Many have moved their stocks of screens to the back of the store but a growing number are realizing that sales can be made in the fall as well as in the early summer as the cold and rain are now driving the flies inside and at no season of the year are they as great a pest and a source of such danger as during the fall months.

"Kill the house-fly" is now the slogan in the medical and scientific world, it being generally recognized that to the housefly can be traced numerous cases and even epidemics of disease. The fly and the mosquito are considered the most dangerous germ carriers, gathering loads of filth from manure piles, etc., on their numerous legs and carrying it into the house where the filth is deposited in sugar bowls, milk, on fruit, or on the faces or lips of infants.

While the druggist is making his heaviest sales of flypaper, ought to be an opportune time for hardwaremen to make many sales of wire cloth or window screens.

ABOUT BUYING HARDWARE.

"Subscriber," writes criticising the suggestion made in a recent issue of Hardware and Metal, that merchants should confine their buying to one house and rely upon receiving thorough service and fair treatment in return for placing all their business through the one channel.

Our correspondent says: "My policy is to treat every traveler as a friend and although the bulk of my trade goes to one jobbing house, I always have a friendly greeting and open ear for every traveler who calls on me, and as a result I frequently have placed orders for specialties carried by other jobbing houses or by manufacturers who find it necessary to go to the trade direct in order to introduce their goods.

"I also find that courteous treatment of travelers have given me many opportunities of getting inside prices on many lines others have had to pay regular prices for.

"Your argument may be good, so far as stoves and furnaces is concerned, but in general hardware buying I consider it a mistake to confine my purchases to one house."

FALL BUYING OF BINDER TWINE

General approval has been expressed regarding the suggestions made in the letter of J. T. Holmes, Whitechurch, in Hardware and Metal of September 11, manufacturers and retailers in different sections of the country having expressed approval of the points made in his letter.

The Consumers Cordage Co., Montreal, send the following comment on the question of buying twine in the fall: "We agree with Mr. Holmes in his remarks and have been educating the dealer to buy his twine under this arrangement. You understand a manufacturer would rather take orders for a smaller quantity, and know that the twine would be sold, than have customers order a large quantity and have it lying all over the country. It means to us long delays in settlements and dissatisfaction in every way, as it is impossible for us to pay the freight on shipments of twine when it leaves here, and then again pay return freight on the balance that is left over. We trust that your readers, who deal in twine, will take this matter up seriously, and that they will be educated to buy their twine under the arrangement as per Mr. Holmes' suggestion."

Charles C. Lee, Goderich, writing of Mr. Holmes' suggestion says: "The idea is one that struck me and it is on this idea that I gave my order this fall, and I see no reason why it will not work out with all parties concerned."

D. A. Macnab, of Macnab Bros., Orillia, writes: "I have read Mr. Holmes' suggestion and would say that with regards to this line in our section, it has become a very small part of our trade, this being the fault of the manufacturers, as not only the hardware and implement dealers handle it here, but every blacksmith and also a number of farmers in each section have agencies and are out canvassing the country, which means very little business for the dealers. Therefore we have very little to do with it, of late."

A. W. Macpherson, Prescott, writing on the same subject, also refers to the demoralization resulting from the trade being cut up into so many agencies. He writes: "Certainly, if over buying is the cause of price cutting on this particular line, Mr. Holmes' suggestion is a good one, if generally carried out, that is to place a limited amount on booking order, and increase or re-order when requirements are known. Local conditions, however, largely govern whether we can make any money on binder twine or not. In this district, I know where twine has been sold at ½ cent per pound advance on cost, by farm machinery agents and small country stores, who seem to wish to swell sales, regardless of profit. Then, again, a farmers' club purchased a ton of twine and handed it out to members at cost. I fancy other districts could report similarly. The manufacturers of the twine I sold this season issued a curcular letter placing a minimum retail price of 1 cent per pound advance on cost of their twine, and if all the makers, and distributing agents for twine would name a minimum retail price for Ontario, and then protect the legitimate dealers, by refusing to sell to consumers, or to any who are found not to have adhered to said prices, this to my mind would most readily solve the question satisfactorily to all concerned, and I certainly think the plan feasible. The advance I have named, one cent, barely covers the cost of handling, and under present conditions, I assure you I am careless about doing any extended twine business, and shall certainly buy cautiously until conditions improve."

Hardware and Metal would like to receive short letters from other merchants on this question. What, for instance, is the condition of affairs in the maritime provinces, in the western provinces and in other parts of Ontario?

FARM LIFE BECOMING POPULAR.

Farm life and the ownership of land are becoming very popular with all classes of society not engaged in farming. Many of these classes once looked upon the vocation of the farmer with contempt. Wherever men congregate or come together—on the street, at luncheon, on the train, or in their clubs—the conversation turns to the desirability of ownership of the soil.

It is becoming the ambition of almost every man to own a piece of ground and to cultivate it—at least to superintend its cultivation. Thousands of business men are putting their money into western lands for the security that land ownership gives. There is not so much buying for speculation as there is buying with the idea of making future homes.

Men who are acquiring these homes take a practical interest in their development, too. They want in time to become a farmer. On every suburban train discussions are heard about various kinds of incubators or garden tools or other appliances used upon small suburban estates.

Don't allow idlers to loll around the store.

Send bulky purchases home for the customer.

Take as much interest in your employer's business as if it were your own,

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Tin—Advance of ½c.
Lead—Advance of 15c per 100 lb.
Turpentine—Advance of 2c.
Linseed Oil—Advance of 1½c.
Red Lead—Cut of 25c per 100 lb.

Toronto.

Wire—Advanced 5c 100 lbs.
Linseed Oil—Up 1½c.
Red Lead—Decline of ½c a pound.
Staples—Up 5c 100 lbs.
Cotton Goods—Higher 1c.
Sash Cord—Advanced 1½c.
Lead—Up 10 cents.
Tin—Advanced ½ cent.

MONTREAL.

October 1.—A good fall trade is now being done in all seasonable lines, and the tone of the markets is very firm. Reports from travelers show that a strong consuming demand is being experienced by dealers generally, and that indications point to a more active call later on. There is not the need now for farmers to economise, and it is expected that later on they will be in much better evidence as buyers of general hardware.

Booking for later delivery is quiet, but as goods are now being taken that are usually dispatched later in the month the lightness of the booking can be accounted for. Lumbermen's supplies are, however, on the forward delivery list, although axes, axe handles, and cross cut saws are now being shipped. Snow shovels are moving more prominently, and there is a strong call for sleigh bells, weather strip, cow ties, burners, horse blankets, and other seasonable lines.

Guns and ammunition are still scarce, and some dealers are carrying very light stocks. The hunting season promises to be an excellent one, and merchants anticipate a good sale for all supplies. The Maritime Provinces are not such prominent buyers as last year in these lines. Not because the aggregate demand has fallen away, but because other quarters are buying better. Cutlery and silverware are in strong demand, and it is evident that dealers mean to make a good showing in these lines this winter.

Bolts, nuts, wire nails, and screws are showing stimulation, and it is evident that a good deal of repair and construction work is going on. Builders' hardware is just as prominent as ever. Stoves and ranges are commencing to move well, the cooler weather having the effect of making dealers prepare for coming demand. House cleaning utensils are moving strongly, and enamelware is prominent. There is a good healthy demand from the north west, and the rate of improvement is better than in the east. Prices are unchanged, and the market is firm in tone, and optimistic.

BUILDERS' HARDWARE—With the continuance of the building movement, not locally but in the country, builders' hardware is a prominent mover. Lock sets, sash lifts, porcelain knobs, and door pulls are in active call. In fact every line is showing good strength. The market is firm, with no improvement in the difficulty of obtaining lock sets from the manufacturers. We quote: Lock sets (inside) $4 per doz. and up, lock sets (outside) $12 and up, common rim locks $1.10 per doz., porcelain knobs $1.10 per dozen.

FALL LINES—Immediate delivery is being taken in weather strip, snow shovels, and sleigh bells, and orders show improvement in bulk, as dealers experience a better trade and feel more confident as to the future. Good sorting orders have been received in lanterns, lamp burners, chimneys, stable and barn requisites. House cleaning and kitchen utensils, such as carpet sweepers, wringers, food choppers, sad irons, scrubbing brushes, mops, pails and polishes, are in good demand. Silverware and cutlery are showing very gratifying strength, and dealers are evidently preparing for a good demand. Enamelware and tinware are selling well, especially in the north west where stocks in these lines are extremely light.

SPORTING GOODS—The strong call for guns and ammunition continues, and jobbers' stocks show the drain. Cartridge belts and bags, revolvers, primers, and hunting knives are likewise moving well. Reports as to the hunting season are very promising, and sportsmen are preparing for "the time of their lives." The demand for skates and hockey sticks is now very marked, and the heavy stocks carried by the jobbers are already showing signs of the inroads made upon them. Snowshoes, toboggans, and sleighs are moving in fair strength. With the cool evenings the call for gymnastic lines has improved, and fair orders have been received for dumb bells, Indian clubs, and other requisites.

MINERS' SUPPLIES—Fair sorting orders have been received for picks, hammers, and powder. The other lines are on the quiet side. Railroad supplies are also steady, the most prominent movers being hammers, picks, concrete mixers, and steel scrapers. We quote: Miners' picks, 17c. a pound; prospectors' hammers, 20c.; pick handles, $1.85 a dozen; drilling hammers, 6c. a pound; crowbars, 3½c.; drill steel, 8c.

BOLTS AND NUTS—With the heavy construction work going on, bolts and nuts show improvement, and some good orders have been received. Nails are also in better demand, due to the fixing up going on in barns and other buildings. The market is unchanged, and we quote: Discounts on carriage bolts, ⅜ and smaller, 70; machine bolts ⅜ and smaller, 70; machine bolts ⅜ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—With bolts, nuts and nails, screws are in good request. The market is firm, and we quote: 85 and 10 off for flat and round head, bright; 75 and 10 off for flat head brass, and 70 and 10 for round head brass.

LUMBERMEN'S SUPPLIES — Axe, axe handles and cross cuts saws are going out steadily for immediate delivery. The other lines are inclined to be quiet again. Camp supplies are showing better strength. We quote: Cant hooks, $12 a dozen and up; axes, $6.50 a dozen and up; axe handles, $1.15 and up; cross-cut saws (inferior), 25c. per foot and up, better grades 43c. per foot and up; axe wedges 25c. a dozen and up.

SHOVELS—There is a fair demand at unchanged prices. We quote: First and second grades of spades, 60 and 2½; 3rd and 4th, 50 and 2½; scoops, 1st and 2nd grades, 50 and 5, 3rd and 4th, 45 and 5.

STOVES AND RANGES—With the colder weather a good stimulation has been given to stoves and ranges, and the season has opened out well. Oil heaters are showing improved strength, and in fact all heating lines are showing improved strength, and in fact all heating lines are active. Pipe and elbows are in better demand.

WIRE—The demand has improved, and good assorted orders have been dispatched during the week. Prices are unchanged, and we quote: Barb wire, car lots and mixed, $2.50; small lots, $2.55; plain twist, car lots, $2.80; small, $2.85. Galvanized wire No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots f.o.b., Montreal. Coiled spring fencing, $2.30; straight and mixed car lots, and $2.35 small lots. Plain wire, bright, annealed and annealed and oiled, $2.25 base. Other lines $2.30 f.o.b., Montreal.

TORONTO.

October 1.—Heavy deliveries of goods booked during the past two months have been made the closing days of this week. Letter orders still arrive asking for supplies in fairly large quantities. The hardware trade is in a splendid position at the present time, all jobbers stating that they are well satisfied with the business now being done. Goods are moving in much heavier volumes than was the case last fall.

Stable goods, farm implements of the small variety, Japanned ware, lanterns, lumbering tools, builders' hardware, and guns are the principal lines moving, though there is a general satisfactory call for all hardware goods.

Prices are firming up on all sides. Black fence wire; in fact, wire of all kinds, has increased 5 cents a hundred. Staples, too, have gone up the same amount; and cotton goods—sash cord, rope, twine, etc.—are quoted 1 cent higher. These are the only actual changes reported this week, but manufactured iron and steel lines still get stiffer.

BUILDERS' HARDWARE—Trading is steady, and jobbers catering especially to builders' hardware state they are still behind in getting out goods. While there cannot be said to be an advance in this line over last week, buyers are more insistent in their requests for early delivery. Sash cord has gone up since last issue 1½c a pound, from 29½c to 31c. This is the only line under this head which has changed its price, and is due to the advance of all cotton goods. Cotton rope and twine have gone up 1c a pound. Lock sets, escutcheons, bolts and butts are among the principal articles called for, and bells and knockers of

old-fashioned patterns have had a number of demands. Roofing paper is still active. Screws are actively steady.

HOUSEHOLD GOODS — Japanned ware in pans, pails, coal hods, fire shovels, etc., are going out splendidly this week, especially to country points. Galvanized pails and tubs as well as wooden lines are fair in demand. Heating goods and sundries are increasing almost daily, and some very fine orders for stove pipes have been placed.

FALL LINES—The smaller varieties of farm implements are in steady demand. Manure forks, axes, lanterns, spades and shovels are the emphasized lines; and lumbering implements, especially cross-cut saws, peevies and canthooks have gone well this week. Tool handles have been more active than any other one line in this group. Cow chains, halters and stable requirements are going out well to country points.

WIRE—Black fence wire and all other kinds of wire, too, have gone up 5 cents a hundred pounds. Wire in coils is now $2.30, which is the base for a number of wire lines. Galvanized wire, $2.75; galvanized barb, $2.55; and plain twist, $2.85. Staples, too, have advanced at the same rate—$1 a ton. Plain are now $2.55 and galvanized, $2.80.

HEAVY GOODS—This line continues to show improvement. Buyers are now anticipating future requirements. Nails are as busy as ever with firm prices ruling, and the other lines show much better business. Stove bolts and nuts have gone up across the border, following the general advance of building bolts and nuts last week. So far, there has been no advance here. Rods have been in big demand both in Canada and the United States and prices have gone up there pretty high.

SPORTING GOODS—Both guns and rifles have had big sales this week, and strange to say black powder is having a bigger demand proportionately than smokeless this fall than for sometime back. The close season on partridges has eased off the call on finer grades of shot, but No. 4 (duck shot) has been selling well. Rifles are beginning to go very freely.

HARDWARE MARKETS

MONTREAL.

Oct. 1.—There is a very bright tone to the metal markets. This is not surprising considering that trade is well maintained not only by the larger interests but by the smaller concerns, and that the primary markets are showing greater strength. With the strong advance in London, tin locally has gone up ½c. and jobbing prices are quoted at 33½. Lead also has given a spurt, and with the English market over the £13 mark again advance 15c. and is now quoted at $3.60. This makes Trail $3.50. The stronger tone in copper has not affected local quotations, although there is less desire to shade for fair size orders. Spelter is unchanged, although both the English and St. Louis markets have advanced, but the market price is very firm.

Continued activity is noticed among the trade with regard to the placing of orders for delivery before the close of navigation. Delivery over next year, however, is another proposition. Holders are very bullish, and it is extremely difficult to get orders accepted even at enhanced prices. This may not be good for users, but it shows that sellers have a very optimistic opinion as to the state of trade in 1910.

There is no doubt that the great development in iron and steel in the States is having a far reaching effect upon the other metals, and causing prospects to look rosy. According to William E. Corey, President of the United States Steel Corporation we are now in the midst of the greatest development in the history of the iron and steel business. Next year will witness record breaking productions, and will be the greatest in railroad buying and building ever known. W. E. Corey may have his reasons for being so bullish, but there is no doubt that indications point to some such conditions. Railroads are behind hand in their development, and there is every reason to assume that sooner or later they must launch out into necessary improvements. The development in iron and steel is not only having a sympathetic influence upon the English iron and steel, but it also tends to strengthen the other metal markets. But for the heavy production in copper, this metal would have advanced in relative proportion.

At present there is a bullish feeling locally, and merchants are very pleased with the situation. They may or may not have a rude awakening.

PIG IRON—Large consignments of pig iron are being distributed, and the delivery will be continued up to the close of navigation. With the increasing firmness in figures, ex-store prices will be considerably advanced over last year's so that users are endeavoring to cover themselves well. Canadian furnaces report plenty of business at very firm prices. Delivery is not easy to obtain in some cases. In the States the movement in iron and steel seems faster than ever. Bookings continue to increase, and furnaces and mills are becoming more and more behind hand in their delivery. Further advances in finished steel lines are shortly expected.

Pig iron still displays an advancing tendency, and furnaces are chary of accepting contracts for next year. The Old Country markets are showing better strength. The increase in shipbuilding, and the better exportation to Germany, combined with the sympathetic influence of the U. S. markets, have improved the tone. Cleveland warrants are now quoted at 52 shillings and four pence, an advance over last figures of ten pence.

TIN—With the advance in the English market tin was marked up locally ½c., making jobbing prices 33½. Orders during the week have been of good bulk, with the metal wanted at once owing to absence of stocks. Inquiries are good, and consumers are evidently keeping in close touch with the markets. The advance in tin in the English market was not unexpected, the time being ripe for the bulls to take a turn.

COPPER—Copper has maintained the improved strength noted last week, and local quotations are unchanged at 14½. Buying is very good, and jobbers are satisfied with the amount of metal going out. Stocks are light and inquiries show that plenty of business is maturing. Business in New York has been steady, and there is an active inquiry for deliveries over the end of the year. Undoubtedly the improvement in iron and steel is helping copper, and but for the unfavorable statistics much more business would break in. There is still, however, the belief that copper is not yet out of the wood.

SPELTER—Spelter is very firm at $5.75, and the buying is heavy, especially from the galvanizing interests. The English market has still an advancing tendency. The brass trade is buying well, while galvanizers are active. With St. Louis strong, spelter generally is very bullish.

LEAD—With an advance over the £13 mark in London, local prices for imported advanced 15c. and we now quote jobbing lots at $3.60, with Trail at $3.50. Lead has shown more activity this week, and some good orders have been received despite the advance. The English market shows a better consuming demand, and prices readily respond.

SCRAP—There is very little change in scrap market, except that lead lines are sagging. There is not much scrap offering and trade is quiet. Heavy copper and wire, lb. 11c.; heavy red brass, 10c.; light brass, 6¼c.; tea lead, 2¼c.; heavy lead, 2½c.; scrap zinc, 3c.; No. 1 wrought iron, $11; machinery cast scrap, $14; malleable, $12; miscellaneous steel $6.

TORONTO.

October 1.—Of late the Dominion Iron and Steel plant has been practically deluged with orders, so much so that they have been compelled to turn over some of their business to another Canadian plant. This but emphasizes the situation in regard to iron and steel in Canada. Metal men, large and small, all over the country are speaking enthusiastically of the business outlook and their own prospects. Actual trade, local metal men state, is better now than for some time—better than the past two months, at least, and much better than a year ago.

The market is firmer, too, with the possible exception of some grades of scrap iron. This condition, however, will improve shortly. Lead and tin have advanced and manufactured iron and steel lines are going up from week to week.

Pig iron has gone up in Europe, no doubt due to the recent importations by the United States. Across the border all iron and steel, crude as well as manufactured, have advanced; even ore is slated for an advance of 50 cents a ton, if that advance has not already taken place. Everybody is buying pig iron in the United States and all the furnaces are running pretty near ca-

pacity and very close to the record of 1907.

PIG IRON—The market is broadening, although just now trading is very great. The demand this week is better than has been noted for several weeks. Steel-making irons are particularly active and there is a better movement in foundry iron. Some booking for 1910 has taken place. Stocks are only moderate and sellers are not running after the business so much, as was the case two months ago. Prices are firmer, but unchanged. No. 1 Canadian foundry is about $20; No. 3 Middlesboro is $20.25, and Cleveland is $20.75.

LEAD—More business is passing in lead this week, and for a change this metal is getting active. Prices have advanced in consequence 10 cents a hundred. Imported pig lead is now $3.65 and domestic $3.55 in 100-lb. lots. A little better figure might be obtained for larger quantities.

TIN—This metal has also increased in price, having advanced since last issue ½c a pound. The local quotation now stands at 32½c. Trading is more active this week.

COPPER—While the red metal is unchanged in price—the quotation being at 14c and 14½c for lake and casting ingots—and there is more business passing, the situation is not regarded as satisfactory. The enormous production and the heavy surplus of stocks do not conduce to give an optimistic feeling. The increase of industrial output during the coming winter may also help relieve the strain.

SPELTER—This metal continues to keep very firm and active. The quotation remains at $5.75.

SHEETS AND PLATES—Good business continues in sheets and jobbers have stocked up in anticipation of further trading this fall. The price schedule is well maintained. Demand for plate is good and the tone of the market is firm.

OLD MATERIALS—There is a slightly easier tendency in scrap iron, though prices are unchanged. The situation is expected to recover itself before long. The prices offered by dealers are as follows: Heavy copper wire, 11½c; copper bottoms, 10½c; heavy red brass, 10½c; heavy yellow brass 8¾c; light brass, 6½c; tea lead, 2½c; heavy lead, 3c; scrap zinc, 3½c; No. 1 wrought iron, $11; machinery cast scrap, No. 1, $15 to $16; stove plate, $13; malleable and steel, $8; old rubbers, 9c.

CATALOGUES WANTED.

Paine & McMillan, North Vancouver, B. C., ask hardware manufacturers and jobbers to supply them with copies of their latest catalogues.

The Steele Hardware Company, Parkhill, Ont., successors to Jackson & Yorke, and composed of Reg. F. Scott, recently of Forest, Ont., and Gerald Steele, London, with the former as manager, also ask for manufacturers and jobbers' catalogues.

HARDWARE TRADE GOSSIP

Ontario.

Cain & Nelson, hardwaremen, at Grand Valley, are succeeded in business by Nelson & Doods.

D. Courville, hardware merchant, Alexandria, is about to take possession of the Crystal Block in that town.

J. A. Fife, hardware merchant, Nepigon, with his family will shortly move to Fort William, where they will make their home.

Robert Horne, hardware merchant, Sudbury, has purchased a site for a larger store opposite his present location, he being cramped for space in the premises he now occupies.

Milton Carr, hardware and general merchant, Cobalt, reports business in the mining country to be far in excess of last year's volume. Prospects for the coming winter he considers very bright.

The Fife Hardware Co., newly established in Fort William, has been obliged, owing to some delay in the construction work of their own building, to open up temporarily in the Enzer block.

Henry A. Eager, Hamilton, father of Harry Eager, representative of Wood, Vallance & Company, at Toronto, died at Hamilton on Sept. 27. Mr. Eager was formerly assistant postmaster of Hamilton.

The hardware, plumbing and tinsmithing business of James Chalmers at St. Mary's, is advertised for sale by tender until October 14. Mr. Chalmers, who established the business about fifty years ago, is retiring because of ill health.

After a continuously successful business career of thirty-five years in their present location at Ottawa, the hardware firm of Graves Bros. is announcing its retirement from business, to take place on May 1 next.

Alex McDougall, who has been representing Rice, Lewis & Son, Toronto, on the north shore, will beginning next week cover the same territory for Wood, Vallance & Co., Hamilton, succeeding W. G. Colville, who has opened up a hardware store at Fort William.

The Midland Electric Co., who were the pioneers of metallic filament lamps in Canada, have amalgamated their business with the newly formed Canadian Tungsten Lamp Co., of Hamilton, and will move to that city. The Canadian Tungsten Lamp Co. have acquired all the Canadian patent rights for constructing Tungsten metallic filament lamps and have built and equipped a large factory in Hamilton, especially for the construction of these lamps. Frank Goodwyn, who was the proprietor of the old Midland Electric Co., and who has been the vice-president and manager since its incorporation into a limited liability company, is moving to Hamilton to take charge of this branch of the business.

Quebec.

M. Burelle, tinsmith, Beloeil, has assigned.

A. Desjardins, St. Joseph du Lac, has been in Montreal for a trip.

W. H. Thorne, of St. John, N. B., has been on a visit to Montreal.

J. B. Damour, Ste. Philomene, Que., has been visiting Montreal hardware circles.

R. J. Lockhart, of Gurney, Massey Co., Montreal, has been visiting Toronto.

J. E. Vallee, of the Traders Co., Buckingham, has been on a visit to Montreal.

J. R. S. McLernon, manager of John Round & Sons, Montreal, has been on a trip to Toronto.

W. Small, of Small Bros., Dunham, Que., has been visiting the Montreal hardware trade.

F. W. Bailey, manager of the Magnolia Metal Co., of Canada, Montreal, has been on a visit to Toronto.

John Hendry, president of the Canadian Manufacturers' Association, visited Montreal on his way to St. John and Halifax.

Dr. Perrigo, of Montreal, was summoned to attend N. A. Rhodes, vice-president of the Rhodes Curry Company, Amherst.

A. Lemieux, of Henryville, Que., J. A. Paquin, of St. Eustache, and T. Gagnon, of St. Stanislaus, Que., have been visiting Montreal.

William Paterson, of Paterson & Jenkes, manager of the Eureka Shovel Works, Montreal, was married to Miss Symington at the Crescent Street Presbyterian Church, Montreal, on Wednesday. The honeymoon is being spent in New York.

A. M. Thompson, of B. & S. H. Thompson, Birmingham, grand nephew of the late S. H. Thompson, founder of the firm, has been on a visit to the Canadian head offices in Montreal. Mr. Thompson is now on a trip to the Pacific coast.

Otto T. Barnard, who has been selected as the Republican candidate for the mayoralty of New York, is chairman of the Board of Directors of the Herring-Hall-Marvin Safe Company, which company is about to erect a plant in Canada in conjunction with the Canadian Fairbanks Co., Montreal, its Canadian representatives.

Western Canada.

J. R. Hannah, tinsmith, Borden, Sask., has moved to Vonda.

Dale & Lowery, hardware merchants, Kitscoty, Alta., have dissolved partnership.

J. Mielhausen, hardwareman, Govan, Sask., has sold the harness department of his business.

W. H. Gordon & Co., hardwaremen at Daysland, Alta., are advertising their business for sale.

C. F. Smith, hardware merchant, Milestone, Sask., is succeeded in business by R. H. Thorburn.

T. A. S. Campbell, hardware merchant at Saskatoon and Zelma, Sask., has sold his Zelma branch to V. P. Byam.

Excavation work has begun on the foundations for a brick business block at Saskatoon, for F. M. McEown & Co., hardware merchants. The building will be a two-storey brick structure to cost about $5,000.

Trade Gossip from Canada's Eastern Provinces

Industrial Awakening in New Brunswick — Important Copper Property Sold—General Trade News.

HALIFAX.

Sept. 27.—The wholesale hardware jobbers report the fall business pretty fair, and they expect that it will become brisker from now on. The volume of trade is not as good as anticipated earlier in the season, but an improvement is looked for. Prices on the whole are pretty steady at present, but advances are looked for in the near future in some lines. The lead markets are firm and an advance in prices would not cause any surprise. Sheet zinc is now quoted at ten shillings per ton higher than it was two weeks ago. Ingot tin is another article on which the price is very firm. Linseed oil also holds very firm, but the price will probably be modified in the near future. Several of the Halifax hardware firms are making displays at the provincial Exhibition, now being held in this city.

In the Fisheries building William Robertson & Son have a very fine display of hardware, nets, lines, twines and general marine supplies. The exhibit is very neatly arranged, and it attracts the attention of all visitors to the building.

F. J. Cragg, the retail hardware dealer, has a good display of vacuum cleaners of small sizes. These are comparatively new articles on this market, and the firm is taking advantage of this opportunity to introduce them.

The Lawrence Hardware Co., the new firm that is about to start business, have taken the building on Granville Street, formerly occupied by C. R. Hoben, stove dealer. The premises are now being put in shape, and the firm have already ordered most of the stock, they will be ready for business in a very short time. The stand which they have secured is in the centre of the business district, and as all the members of the firm are young men, they will no doubt receive a good share of the public patronage.

ST. JOHN.

Sept. 29.—There seems to be an industrial awakening in New Brunswick. Hardly a day passes without the announcement of some new industry, or the transfer of some enterprise from a small company to a larger concern, that can work it to advantage. During the past few months considerable interest has developed in the mineral resources of the province, and some cheerful predictions are made relative to coal, antimony, iron, and oil shales. During the past week the Westmorland copper mine, at Dorchester, one of the richest in the province, was sold by the Maritime Exploration Co., to the firm of L. Vogelstein & Co., of New York, one of the largest copper concerns in the world. The new owners announce their intention of beginning work at once on a large scale, for the development of the mine, and expect in the near future, should results prove satisfactory, to erect a concentration mill with a capacity of 1,000 tons of ore daily. This industry would afford work for about 500 men.

At Hartland a company has been organized and will apply for incorporation as the Hartland Concrete Block Co., for the purpose of manufacturing concrete goods of every description, especially concrete blocks for building purposes. Property at Hartland for carrying on the work was secured last week. The officers of the company are Dr. W. DeC. McIntosh, president; A. G. Baker, vice-president; Arthur Dickinson, managing director, and J. B. Daggett, secretary-treasurer.

Tobias Glickman, Moses J. Glickman, Philip Glickman, Philip B. Glickman and Charles Pierce, of Montreal, and Joseph Feinbrook, of Chatham, have applied for incorporation as The New Brunswick Turpentine & Tar Co., with office at Doaktown, to manufacture tar, turpentine, etc., as outlined in previous correspondence. The capital stock of the company is $1,000,000.

F. W. Holt, C.E., is now engaged in making a survey of the site for a new drill hall near the Barrack square, and it is apparently the intention of the Government to push the project forward as soon as possible.

The British West Indies commission, which is inquiring into trade relations between Canada and the British West Indies, is to meet here this week.

Donald M. Campbell, head salesman at Tweedale & Co.'s hardware store in Fredericton, is to be married in October to Miss Zuma Burtt, of St. Mary's.

Interesting Trade Items Gathered in Ontario

Steel Range Plant at Brantford Begins Operations—Hardware Dealers Make Exhibits at Fall Fairs—New Factory at Windsor to Make Can Openers—Another Natural Gas Discovery Near Chatham.

KINGSTON.

September 28.—S. J. Horsey, one of Kingston's best-known hardwaremen, has just completed twenty-three years in the business, and his many friends are extending congratulations. Mr. Horsey was born in Kingston, and has lived here all his life. He entered the hardware business as a partner, with his father, twenty-three years ago, and by his strict attending to business, has worked up a fine trade.

Miss Lorraine Dalton, daughter of W. B. Dalton, hardware merchant, was married to Andrew Shearer Forman, Montreal, electrical engineer, at St. George's Cathedral. E. G. B.

PETERBORO.

September 29.—R. G. Braund added another department to his large general store in the south end, when, last week, he divided off a large room at the rear used as a feed shop, and store-room, and intends to use it as a show-room for stoves, enamelware, etc. Mr. Braund has in the past done considerable business in these lines. He utilizes three floors, cellar, ground floor and an upstairs, practically the entire size of the main shop. H. T.

CHATHAM.

September 28.—Stoves are commencing to move out quite briskly, thanks to the recent cold spell, which serves as a reminder that the weather will be still colder. Window displays of ranges and heaters are much in evidence. The stove business is better now than it has been for some time. Sugar beet tools are in great demand at present, owing to the fact that the farmers are commencing the beet harvest. This has proven a very profitable crop to the farmers, and consequently, hardwaremen find it worth while to devote good attention to this line of trade. Despite drawbacks here and there, the harvests have turned out well, and the outlook is for excellent prices. Recent rains helped fall plowing and most of the fall seeding is done. All this helps to inspire confidence in the farming community, with the result that money is spent more freely, and cash in many instances displaces credit.

Geo. Stephens & Douglas, hardwaremen, have found their display at the fall fair a very good advertisement. Washing machines, which formed one item, have been moving briskly since the fair, while already this week they have sold two pianos as a direct result of the exhibit in that line.

Watt & Sons, plumbers, report an unique experience in instaling waterworks systems at the lake, where they have been putting in quite a few pneumatic systems. Following a failure of the water supply, the strong pumping has brought, in several cases, a flow of natural gas, which started with a pressure of 80 or 90 pounds, and has been steadily increasing. Unlike the natural

gas in use here, it is entirely without odor.

Geo. Trott, of Bothwell, has disposed of his hardware business to Dent Bros.

Jules Perrott, formerly salesman for Geo. Stephens & Douglas, hardwaremen, is now in the piano business, having been appointed manager of Grinnell Bros.' new branch store at Windsor.

Reissner Bros., steel range manufacturers, of Leamington, had an exhibit of Modern ranges at the Western Fair, at London. Greenhill & Moffatt, hardwaremen, of Leamington, are making a big display of this range.

The residence of W. H. Goodhue, hardwareman, Ridgetown, was entered by burglars last week and a sum of money secured.

Hubert Milord, Wallaceburg, has invented an electric jewel, designed to prevent the burning of wires of arc lamps in connection with moving picture shows. These jewels have been cast at the Wallaceburg Brass Works, and filed by Mr. Milord himself, but a machine will shortly be installed for their manufacture on a larger scale.

W. E. P.

PARIS.

Sept. 28.—The exhibits of Paris hardware dealers were the features of the annual exhibition of the Paris Agricultural Society, held on Thursday and Friday. D. Sinclair showed a fine range of coal stoves and gas stoves and ranges. Cunningham & Co. had a display of water systems, of which three were sold. Harvey Wilson had a fine showing of stoves and miscellaneous hardware. The windows of the Paris hardware merchants were also specially decorated for the occasion, a hunting window of Harvey Wilson being probably the best. It showed a fine array of guns and shot, with stuffed birds, life-like in the distance.

In speaking to D. Sinclair, the latter remarked to your correspondent the splendid season they had this year, especially in their tinshop department. Among the contracts secured by them were metal work and steam heating in the Watson Mill, Brantford, galvanized iron work for the Sanderson-Harold Co., and 13 metal ceilings for the magnificient new public school.

A.W.

BRANTFORD.

Sept. 28.—Telephone City stores are advertising their stock of cutlery and plated ware at a straight discount of 20 per cent. Good sales have resulted from their use of newspaper space.

W. H. Turnbull & Son, Colborne St., are disposing of their stock of second-hand stoves, taken as part payment for new stoves at greatly reduced prices. The store is open each evening until nine.

Factories in the east ward, including Ham & Nott's refrigerator and screen door factory, and the Buck Stove Works are asking for better fire protection. The local waterworks commission are urging them to instal their own fire protection plant, similar to Massey-Harris and the Cockshutt Plow Co.

A copy of the Hamilton by-law relating to the storage and sale of oil, has been received at the city hall. It is proposed to frame up a by-law here to govern local requirements.

Norman Wall, who is leaving the Brantford Screw Company to accept a responsible position in Toronto, was presented with a suitcase by his associates, J. B. Detwiler making the presentation.

M. H. Robertson will erect a four storey building on Dalhousie Street.

B. S. Jones has been awarded the contract for the cement arch bridge at German Mills, near St. George.

The Brantford Steel Range Company has completed organization, with the following officers:—President, John Muir; vice-president, G. H. Wilkes; secretary-treasurer, J. S. Dowling; directors, J. H. Ham, F. W. Ryerson, W. R. K. Stamford. The company has commenced operations in their premises on Dalhousie Street, but a new factory is contemplated.

Building permits for the past week include A. Patterson, brick extension to store on William Street, $600; Charles Ward, $1,000 brick dwelling, Brunswick Street; William Cudmure, brick dwelling, Eagle Avenue, $1,500.

Another side of departmental store competition is cited by the Waterford Star. A farmer sent for some goods to a Toronto store, and a Waterford merchant saw him receive them and said, "I would have sold you every article you have there for less money than you paid, and saved you the freight besides." The farmer replied, "possibly you could, but I have taken the local paper for years, and have never seen you advertise these goods."

An important real estate deal was transacted at Paris last week when Randall and Shawcross sold a number of lots on Grand River Street, the main street, for $50 per frontage foot. New stores will be erected on them immediately.

H. L. Pratt intends building a new brick block on Cross Street, Niagara Falls.

Chippewa ratepayers passed a by-law granting exemption from taxes for 10 years, and a fixed assessment of $25,000 for a further 10 years, to the Electrical Furnace Products Company, of Pittsburg. The company has purchased 19 acres, and will erect a $50,000 steel plant to manufacture structural steel. They will be in operation before next spring, and will employ 60 men to commence.

The new tube works of the Page-Hersey Iron and Tube Company, at Welland, are now in the process of erection. An inch mill in addition to the buildings now in course of construction, will also be erected. About 500 hands will be employed.

A. W.

WINDSOR.

September 27.—The Windsor Superior Manufacturing Co. is the name of a new concern formed here for the purpose of manufacturing a patent can opener, which has been on the American market for some six or seven months. S. G. Allen, of Detroit, is patentee, and the new company possesses the sole Canadian rights. The American branch is in Detroit. The Canadian company is capitalized at $40,000, Walter Boug being president. The Windsor factory has been in operation for about a week, and it is expected that the finished article will be ready for the Canadian market in about a month. The plant is at present located in the Thompson building, Pitt Street West, but a permanent factory will probably be erected shortly. The can opener is an arrangement with two blades, so that one can rip open either the side or top of a can.

News From the Prairie and British Columbia

Building Active at Vancouver and General Trade Reported Good—Hardware Firm at Victoria Wins Window Dressing Competition—Saskatoon Correspondent Reports Trade Very Satisfactory and Tells of the Rise of Another Town on the Prairies to the West of That City.

VANCOUVER.

September 25.—Although the season is getting on, activity continues in the hardware trade. The briskness is noticeable in all lines. The summer was wetter than usual, but building conditions were not affected in any way, and now that fine weather is coming at this late time of the year, advantage is being taken of it, and all progress possible made. It is usual, too, with the advance of the year, to see a falling off in the trade in the north, consequent upon a partial cessation of operations during the winter, and it is a good evidence of the substantial nature of trade here that no complaints have yet been heard. It shows that the city is growing when such fluctuations are not so apparent.

The value of building permits for the past week totaled $212,850. The principal item was a $90,000 six-storey brick block on Granville Street, to be built by the Granville Loan & Building Company, The Robertson-Godson Company, wholesale hardware and plumbers' supplies, will erect a brick warehouse to cost $35,000. T. J. Lightheart will build a $15,000 apartment house on Nelson Street, and T. A. Tiedman took out a permit for a warehouse on Pender Street, to cost $15,000. The total value of permits issued during the first half of this month was $467,100, considerably more than was taken out for the whole of the month last year.

Howes & Smith, who have conducted a hardware store on Ninth Avenue, Fairview, have dissolved partnership. Mr. Smith will take in as partner J. Mac-

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises should not fail to use the Want Ad. Advertisement page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere who is looking for just such a proposition as you have to offer

RATES.

kenzie, formerly with the Canadian Rubber Company. The new firm will be known as Smith & Mackenzie.

Gibson Arnoldi, a New York lawyer, who is spending some time on the coast, has written Vancouver and other cities asking what inducements will be given the Irondale Steel Company to locate. This company operates at Irondale, Washington, and owns coal areas in British Columbia on Graham Island, and iron ore deposits on the west coast of Vancouver Island. James A. Moore, of Seattle, is president of the company, while Mr. Arnoldi is fiscal agent.

J. A. Flett, Ltd., is having a range demonstration at its Mount Pleasant store all this week.

VICTORIA.

Sept. 24.—The B. C. Agricultural Association's annual exhibition is being held this week. A very good showing is being made of farm produce, live stock and many manufacturing and industrial exhibits. One of the most prominent exhibits is that of the B. C. Hardware Co., their exhibit of Lorain ranges in the Main Building is very good. In the Machinery Hall the B. C. Hardware Co. also make a very large showing of field and farm implements, buggies and express wagons. Good display of stoves and ranges was also made by A. & W. Wilson, and Watson & McGregor.

Andrew Sheret had a neat display of plumbing, a model bathroom being fitted up with baths, wash basins, etc.

F. G. Brenton, formerly with Lamplough & Co., Montreal, is now representing Schuchardt & Schutte, manufacturers of machinery and small tools of all kinds.

The prize offered by the B. C. Agricultural Association, for the best dressed window, advertising the Horse Show, was awarded to the Shore Hardware Co. Their display showed a lot of careful and painstaking work. The colors, red, green and gold, were worked into the background, giving a rising sun effect, and a varied assortment of requisites for driving and the stable, very tastefully arranged, completed the display.

E. Turbayne, representing Lewis Bros., Montreal, is in town this week, renewing old acquaintances. It is almost six years since Mr. Turbayne was on the coast, as representative of Rice Lewis & Son, Toronto. Mr. Turbayne is much impressed with the improvement in the coast towns during the last few years, Victoria and Vancouver having almost doubled in size.

Harry Telford, an employe of E. G. Prior & Co., was very badly hurt last week, he was on the elevator when a box weighing 135 pounds fell down from the floor above, striking him on the head. He was picked up in an unconscious condition, and taken to the hospital, where it was found that his skull was fractured. Since then he has been progressing favorably, and is now well on the way to recovery.

A permit has been issued for the erection of an addition to St. Ann's convent, which wil cost $60,000. The contract for the plumbing and heating has been secured by the Colbert Plumbing Co. The addition will be four storeys in height.

Peleg Howland, head of the firm of H. S. Howland, Sons & Co, of Toronto, was in the city last week, on a pleasure trip. Mr. Howland was much pleased with the business outlook on the coast.

W. B. C.

KAMLOOPS.

September 25.—A visitor to this city this week was C. H. Choate, head of the Eureka Planter Company, of Woodstock, Ont., who is in the west to learn the requirements of the people and to locate a site in the event of a branch factory being established in this province. He was much impressed with this location, and when he returns, in about a week, a committee of the Board of Trade will have a definite proposition to submit to him. If the industry comes here, from 25 to 50 hands will be employed all the year round in the manufacture of all kinds of garden and planting tools.

REVELSTOKE.

September 25.—The Rickman Cement & Construction Co., of Vancouver, has installed a cement pipe-making plant in connection with the instalation of the sewerage system now being put in by this city. This is the first interior city of British Columbia to adopt the use of cement for this kind of work.

R. B. B.

SASKATOON.

September 24.—Building operations in the city continue active, giving employment to all classes of labor—bricklayers, carpenters, plumbers, etc., all alike are busy. Cornice and metal workers and tinsmiths, too, report a busy season. Some of the main buildings now under construction in the city are the new C. N.R. station, Union Bank building, Bank of Montreal, Bowerman block, Baldwin block, Kempthorne block, Cahill block, Gordon Ironsides' cold storage. collegiate institute and public school.

The McClary Mfg. Co. have just completed a frame warehouse for distributing purposes, while the big four-storey implement warehouse for the International Harvester Co. of America, is completed, with the exception of the interior work. Besides these, a host of residences and houses of all sizes are being put up in all the residential portions of the city. Altogether, the building programme for the city this year is a long one, indicating the return of prosperity to the west. It is reported that the Saskatoon Milling Co., of which Hon. A. P. McNab, M.L.A., is a director, will begin on a 500-barrel flour mill this fall, to be ready for next season's business.

On September 21 the citizens of Saskatoon voted $17,450 for the extension of the waterworks system in certain portions of the city. These extensions are to be made in addition to the programme of extensions mapped out earlier in the year, and now partially completed. Many applications for sewer and water connections to private houses and other buildings are now on file at the city offices. So numerous are they that it will be impossible to fill all the requests this year. $30,000 has also been voted for the purchase of a market site and the erection of buildings thereon.

A Masonic Temple is also spoken of, besides a Y.M.C.A. building, and the university buildings, which are to be erected to the east of the city, on the site recently purchased by the Board of University Governors. When the business blocks at present under construction are completed the business portion of the city will be the larger by about a dozen good-sized stores. A portion of the Kempthorne block, on Second Ave., now being built, will be occupied by S. T. Kempthorne, hardware merchant. Mr. Kempthorne is at present occupying temporary premises on First Ave. Temporary city offices are also under construction, while the John Deere Plow Co. intend building a warehouse.

D. G. R.

WINNIPEG.

Sept. 28.—Harold Duncan, manager of retail paint department of the J. H. Ashdown Hardware Co., was married last week in this city, and is spending a few days in Kenora prior to taking up his residence here. His fellow employes presented him with a large electric lamp.

Walter Nan Carron, manager of the J. H. Ashdown hardware house in Calgary, spent a few days at the parent house in this city last week. He reports conditions quite favorable in the western province.

Comba & Son, metal workers and heaters, of this city have never been rushed with orders for hot-air furnace work to such an extent as they have this fall. Mr. Comba has been in business seven years, and can scarcely keep up to the orders that are daily coming in. He states that the extensive building during the year, and the easy money situation accounts for the development in his trade.

Clements & MacDonald, who opened a retail hardware and grocery store at Winnipeg last spring will be compelled to enlarge their premises in the near future to accommodate their fast growing trade. Next spring they plan to build an additional store for their hardware stock.

Three men prominent in the steel industry of the United States, visited the city this week, and looked over the field with a view to establishing an office here for some steel corporation in New York. D. A. Merriman, one of the party stated that they would open an office at once and be on the field as early as possible.

Stephens Barn Paints

Another profit-making line for you, Mr. Hardware Man—there is no question as to the quality of Stephens Barn and Elevator Paint. It's the Best in the West—a moment, one fact to prove it. For years the great railroads and elevators of the West have used it exclusively—would these experienced buyers use it were it not the best? We assume the responsibility for all materials. Careful consideration of our facilities will convince you of the broad character of the service we are in a position to render.

An opportunity to talk with you at your convenience will be appreciated. Write us, and we will take pleasure in presenting you our proposition.

A few Reasons Why You Should Handle

PEASE ECONOMY ROUND HOT WATER BOILERS

They are built especially for basements with low ceilings ---which gives them a wider demand.

They have Iron to Iron connections.

They have a large Centre Water Column.

They are set without rubber packing or washers.

They have large, powerful Direct Fire Surfaces.

They embody every modern improvement in boiler construction which is of real value either in adding to heating efficiency or reducing fuel consumption. As a result

ECONOMY BOILERS ARE EASY TO OPERATE AND ARE VERY ECONOMICAL.

If you are a practical dealer, a perusal of our Booklet will convince you. Send for a copy to-day.

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook — Hardware Quotations Corrected by Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Oct. 1.—The local market is apparently feeling the effect of the various strikes. According to latest reports, the bricklayers are about to come out in sympathy with the carpenters and metal workers. In this case all building operations will be at a standstill, and the effect will be felt upon the retail as well as the wholesale houses of the city. The good effect of the trade in builders' supplies and hardware has been to turn the attention of the various merchants to other lines, which have been somewhat neglected during the great building rush of the summer. The turn came, however, at a time when fall goods were in demand, and the local trade has revived greatly in these. Everywhere the output of enamelware, preserving kettles, small heaters, shovels, picks, snow-shovels, are moving well, and the merchants' display in these lines are encouraging. We quote an advance of 2 cents on Victoria building paper. It is expected that shovels will advance in the near future.

Wholesalers report collections fair.

Travelers report the merchants throughout the country carrying small stocks of stoves and heaters, and this accounts for the large orders that have been coming in recently for stoves of all kinds. The trade is destined to be heavy in all stoves this year. Until the present merchants have been buying on the basis of last year's business, but as money accumulates from the large crop that is fast being shipped out, and immediately upon the return of cold weather, a marked revival in the stove business is anticipated.

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.80 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base, plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12 $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

The Western Soap Co., Vancouver, will erect a new and modern factory .

The Northern Pyrites Co. will likely build a large ore dock at Fort William.

The plans for the new Hedley Shaw Co.'s mill and elevator at Port Colborne are ready.

The Hamilton Sewer Pipe Co. are looking over Medicine Hat, preparatory to locating a factory in the west.

A municipal bonus of $400,000 to the Dominion Iron and Steel Co., to encourage the establishment of a shipbuilding industry in Sydney, is a suggestion put forward last week.

The Irondale Steel Co., of Irondale, Wash., intend to locate a plant, similar to the one at Irondale, somewhere in the Province of British Columbia, on a site to be selected.

A big Canadian shipbuilding company composed of Montreal capitalists is proposed for the construction of the Canadian navy. Some English concerns may also locate in Canada to do the work.

Kamloops will likely secure a new industry as a result of the visit of C. H. Choate, head of the Eureka Planter Co. at Woodstock, Ont., which company proposes locating a branch factory in British Columbia.

Ground has been broken at Orillia for the new Tudhope carriage Co. factory and the work will be rushed forward with the utmost speed. The building will be ready for some of the employes by December 15, and the factory should be going full blast by the end of the year.

Without a dissenting vote, the ratepayers of Chippewa last week passed a by-law granting exemption for ten years and a fixed assessment of $25,000 for a further ten years to the Electrical Furnace Products Co., of Pittsburg. The company has purchased nineteen acres of land and will erect a $50,000 steel plant to manufacture structural steel. Railway switches and the erection of buildings will be commenced at once, and the plant will be in operation before spring. The company will employ about sixty men to commence with.

New Companies.

Carriage Factories, Ltd., Montreal, capital, $4,000,000; to make vehicles of all kinds. Incorporators, G. P. Grant, A. J. Brown and F. G. Bush, Montreal.

Buckingham Graphite Co., Toronto; capital, $150,000; to develop and treat ores, minerals and metals. Incorporators, W. W. Dunlop, R. H. Cuthbert and S. Linn, Toronto.

The Peerless Heater Co., Toronto; capital, $40,000; to manufacture and sell boilers and hot water heaters. Incorporators, A. Dods, G. Grant and R. P. Stockton, Toronto.

Jacobs Asbestos Mining Co., Montreal; capital, $3,000,000; to mine and work asbestos and other minerals. Incorporators, F. Lewis, A. McReaper and A. Charters, Montreal.

Tobin Arms Mfg. Co., Woodstock; capital, $100,000; to manufacture firearms and metal specialties. Incorporators, K. Harvey, H. A. Little and A. J. McIntosh, Woodstock.

Montreal Safety Gas Machine Co.; capital, $100,000; to manufacture gas-producers, machinery, ranges, heaters, burners, etc. Incorporators, A. J. Brown, R. O. McMurtry and G. R. Drennan, Montreal.

Windsor Superior Mfg. Co., Windsor; capital, $40,000; to manufacture and deal in wares of every description composed of wood and metal. Incorporators, W. Bong, Jno. Atcheson Smith, Windsor; and S. T. Allen, Detroit.

Railway Development.

Twenty miles of the Great Waterways Railway will be built this year between Edmonton and Fort McMurray.

B. Corey has applied for a franchise to operate an electric railway on the streets of Welland. It is expected to run from Port Colborne to Niagara Falls.

The N., St. C. & T. Railway will at once start extending the line from Welland to Port Colborne, and it is expected to be in running operation this fall. The survey has been completed and a lot of the material ordered.

Municipal Undertakings.

A storm sewer system is proposed for London.

The Township of York intends to construct a sewerage system at a cost of $7,500.

If Barton Township is annexed to Hamilton, that city will spend $125,000 this winter on sewers in the east end.

Public Buildings.

A $25,000 school is proposed to be built at Guelph.

A new Methodist church is proposed to be built at Kamploops, B. C.

The erection of a large railway station at St. John is being considered.

Tenders are called for the erection of a public library building for Orillia.

Plans have been prepared for the new branch post office to be erected at Montreal.

Tenders are being called for the erection of a building for the trustees of the Nelson Y. M. C. A.

The Board of Education has been granted $10,000 for alterations to the Central school at Collingwood.

Ground has been broken at Toronto for the new museum in connection with the University of Toronto.

Three new Salvation Army halls are to be built at Vancouver just as soon as the necessary money can be found.

A $16,000 separate school will be built in the north-western part of Toronto; and a $14,000 school in East Toronto.

The contract for the construction of the Masonic Temple at Prince Albert has been let to A. Anderson, at $60,000.

The plans prepared by H. S. Griffith, Vancouver, have been accepted for the new Y. M. C. A. building in Victoria.

Salvation Army citadels are proposed for the north and west ends of Winnipeg, which will cost in the neighborhood of $15,000.

Work has commenced on the fisheries building being erected at the Queen's Park, New Westminster, for use at the exhibition.

Work has been begun in the erection of the new $16,000 Church Club, in connection with the Dunn Avenue Presbyterian Church, Toronto.

The new Salvation Army citadel at Calgary, which is to be one of the best structures of its kind in western Canada, will cost about $12,000.

David Ewart, chief architect for the Dominion Government, is engaged in the preparation of plans for the proposed new departmental block at Ottawa.

J. Rawson Gardiner has awarded the contract for the new Sunday school and chancel for St. Simon's church at Montreal, to Mills & Cole. Cost estimated at about $5,000.

The Ontario Government has decided upon a thorough and comprehensive reconstruction of the Provincial Parliament buildings, the work to be proceeded with immediately.

Plans for the new Fort William union depot have reached that city and contractors there are now figuring on them preparing to put in tenders for the work of erecting the structure.

The new hospital, to be erected in Grand Forks by Dr. C. M. Kingston, is to be of cement blocks, the contract for the manufacture of which was let this week to Lutley & Gallipeau.

Contracts have been awarded to McGrath & Crowley for the erection of a fine new wing to the Hotel Dieu hospital, Kingston, and work will begin at once on its construction. The new building will cost $40,000.

A building permit was granted to the Jesuit Fathers for the erection of a new church at Montreal. The new structure is to cost in the vicinity of $40,000, and building operations will be commenced as soon as material can be obtained.

Tenders for the building at Toronto, of the new Parkdale Public School, were opened and the following awards made: Masonry, H. Needham, $24,800; carpentry, Crocker & Le Drew, $13,500; plastering, T. Blackburn & Sons, $3,700; painting, J. Phinnemore, $1,525; plumbing, Fred Armstrong Co., $1,880; roof and tinsmithing, A. B. Ormsby & Co., $1,807; heating and ventilation, J. R. Seager, $3,625; heat regulating, Johnston Temperature Regulating Co., $695.

IVER JOHNSON

SAFETY AUTOMATIC REVOLVER

A revolver that can be discharged in any other way than by pulling the trigger is a mechanical absurdity as well as a constant danger.

The things you can do to an Iver Johnson Safety Automatic Revolver without discharging it would keep you busy all day. The one thing you can't do to it is—fire it in any other way whatever than by pulling the trigger.

Handsome in appearance, made in many styles—like a rifle for accuracy—hard-hitting and speedy—but always safe to handle.

Don't Let YOUR Profits Get Away

The Trade everywhere is making money on Iver Johnson Revolvers because they are good revolvers, absolutely safe revolvers, and widely advertised revolvers. We keep them before the reading public in the big magazines and the sporting papers.

Keep them before your customers, be ready to handle the enquiries we send you, get *your* share of the profits of our combined efforts.

Shortage in Stocks of Guns and Rifles

Shooting Season on and Difficulty Experienced in Getting Supplies—Result Will be Early Orders for Other Winter Sporting Goods—Suggestions for Sporting Window Displays.

The shortage in guns this season in many quarters is to be regretted, as dealers are meeting with an excellent call, and every indication of it being continued for some time. Last year the conditions in many cases were just the reverse. The demand, although fair, was nothing like so strong as it is now, and stocks were heavier than merchants cared to see. But the reaction has come as we expected, and many dealers have not only cleared off the old stock, but are well on with this fall's order, and like Oliver Twist are vainly asking for more. Here there is another instance of the value of having confidence in the future, and of not looking at one season's trade through the spectacles of a previous one. Many merchants, because their guns did not sell so well as was expected last fall were afraid to book heavily this year, and only placed a small kind of sorting up order to round off their lines. Now that the demand has proven much better than they anticipated and seems likely to become even more active, many jobbers are not in a position to supply them with the goods they want. The merchant, however, who had faith in the consuming demand of the country, and belief in its recuperative powers, ordered more heavily; and acting on the belief that other men would be doing the same, placed his order early with his jobber. This man is the merchant who will reap the harvest now.

Shortage Followed by Larger Demand.

There is one point in regard to fluctuations in the consumption demand of which many dealers seem to lose sight. And that is, that poor demand must, according to the law of average, be followed by a good one. Of course, this is not a hard and fast rule year in and year out. There may be more than one season or year, as the case may be, of poor demand, but sooner or later the reaction must come. The fat year must follow the lean one. And this is only natural. Consumers may have to deny themselves for some time but when the reason for this retrenchment has passed, not only do they make up for the economy, but the reaction carries them beyond what in a normal time they would have consumed, so that in the end the dealer finds himself better off after a lean and a fat year than if both years had been normal.

If the dealer, who is now vainly imploring his jobber for guns, had said to himself earlier in the year—"well, last fall my sale of guns went away behind what it should be, but those who would not buy then will assuredly be wanting them this year, while the natural growth of the country must create entirely new customers, therefore I will not be guided by last season but will order even more heavily," then this merchant would be in the happy position of having plenty of stocks, and of selling probably to consumers unable to get suited at competing stores.

It certainly pays to be optimistic in buying. Not the optimism that induces a merchant to launch out when indications point the other way. But the optimism that gives the merchant some belief in the recuperative powers of his country and the effect it must have on the consumption after a period of economising.

Bearing in mind the state of affairs in guns, merchants should order their hockey sticks, skates, toboggans, and snowshoes early and in good volume. Of course, it is easier to rectify a shortage in these lines than in guns, but still all the same the delay of a few days in the despatching of the goods is fatal to a sale. A consumer who wants a particular kind of skate or stick will not wait until the merchant gets delivery. He wants the article probably that evening, and the intimation that the goods are on order, or that the merchant is tied up through a shortage for the time being is not good enough. The articles, unless the merchant is in the happy position of holding a monopoly and the customers does not avail himself of the mail, are bought elsewhere. If stocks in these lines and other sporting ones are not made up, order at once, and order confidently, but of course in reason.

Window Display Sugested.

The merchant with the sporting goods department—and who has not one these days—has, from now on, the best opportunity for running windows which are not only among the easiest to design but offer the most striking advertisement for the whole store. There is nothing to equal a camp scene or some other hunting design to attract the passer by, and cause them probably to comment upon the window while at home. "So-and-so has a fine hunting display in his wondow. His guns look fine, and I believe that I will buy a new one instead of making the old standby do. In any case, So-and-so seems pretty wide awake, and he would be worth a call for other articles." Such an observation at the dinner table is worth all other methods of advertising put together.

It would be well for the merchant to run a series of sporting windows these days. He could, for instance, by keeping almost to the same background and accessories depict several stages in a hunting camp. This would create a great deal of interest in his window, and advertise the store. For instance he could call his first window, "the opening of the camp." With a background of artificial bush, a small tent and other camping requisites can be thrown down carelessly on the ground as if the hunters had just arrived. Guns, knives, revolvers, canvas coats, blankets, etc., can also be displayed. In this window the merchant should tell observers to watch the growth of the camp. In a few days the tent can be raised, a fire built with a pot suspended over it, and the guns and camp utensils neatly arranged around. This could be headed "ready for action." In the third window the cardboard figure of a hunter can be placed at the entrance of the tent in the act of firing at a deer or other animal just disappearing at the other side of the window. This can be described "the first shot." The next window can be given over to "a heavy day's sport." Here cardboard representations of animals representing "a heavy bag" could be displayed with boots and other gear showing heavy usage, and plenty of empty shells lying around. The last scene could be made to represent the breaking up of the camp. Of course, these are just the bare ideas. The merchant can elaborate on them as his artistic taste leads him. It is possible with some simple changes to alter the window so that the same things can be made to represent almost a new window. The merchant thus avoids the monotony of an unchanged window, while at the same time arousing the interest of the community as to what will appear next. All this time he has a good setting for his guns, ammunition, wads, primers, knives, revolvers, canvas coats, and other accessories.

Must Understand Customers Wants.

There is one great point in connection with the success of a sporting goods department, and that is that the merchant must understand his customers' wants and anticipate them. This is the way to gain confidence and acquire popularity. Sportsmen are keen, and like sportsmenlike handling which they are always ready to reciprocate to the utmost. As a rule they like to get all they want at the one establishment. If they can do so, and are treated rightly they will not go from the store. It is, of course, to the interest of the dealer to assist in this peculiarity to the utmost; but if he has not the goods, customers, no matter how conservative and faithful, must of necessity go elsewhere for what they need, and if some of them stay elsewhere, no one can really blame them. The dealer, who would have and retain the preference, must do something far more than keep the heavy and more profitable lines. The better and more fully equipped the establishment, and the more accommodating it is in every way, the more it will prosper.

C. A. Lusby, secretary-treasurer of the Amherst Foundry Co., Amherst, N.S., is spending a week in Toronto in company with Mrs. Lusby.

The Retail Paint Trade

HOLDING TRADE.

In going after new customers, the paint dealer should not forget to keep in close touch with his old ones. There is little to be gained by securing a new client, if an old one drops out, and therefore while it is incumbent upon the merchant to extend his connection he must hold on to what he has already gained. We give this little advice, not because we are so foolish as to imagine that merchants are not well aware of the fact, but because it is easy in the midst of a strong campaign after new business to forget, for the moment, the well-being of the older connection, especially as the latter are more often left in the hands of the clerks.

It should be the special care of the merchant to keep track of those who have in the past bought paint from his establishment. A very good plan is to write or call upon those property owners who bought paint in the spring, and find out if everything is satisfactory. It sometimes happens, for instance, that owing to the carelessness of the painters, in painting immediately after rain, when the wood was damp, or not taking the trouble to scrape the cracked and peely surfaces, that the painting has been most unsatisfactory. Thereupon the paint itself is at once condemned, and while the merchant is entirely ignorant of anything acting against his interests, and the purity of his paint lines, the property owner in question may be going around telling his neighbors of the inferior stuff sold by So-and-So. Dissatisfied people, instead of going at once to the fountain head, and complaining to the dealer, often say nothing to him, but do far worse—run down the business of the dealer behind his back.

For this reason, therefore the merchant should keep in touch with those customers who are not tried friends, and who would be less inclined to tell the merchant of anything not satisfactory. The dealer can then find out if there are any complaints, and promptly deal with them. It is astonishing what silly mistakes practical painters can make, and when the property owner himself attempts the job the chances are more than doubled of some blunder occurring. Even if there has been no cause of complaint, the customers appreciate this interest on the part of the merchant. They feel that the mere act of a sale was not all the merchant wanted. He desired to make a friend, and in making a friend to look after the latter's interests even though the sale had long ago been made.

Besides, the inquiry after the state of the house or barn makes a good opportunity for pushing other lines. Maybe the interior of the house does not now match the exterior. This could be seen from a personal call, and a gentle hint as to how floor stain would improve this room, or varnish improve that article of furniture, would bring business that

THE particular dealer we want to get in touch with this time is the man who is tired of handling the kind of paints and varnishes and enamels that don't pay shelf-rent—the dust-catcher kind nobody ever calls for twice, and few people even once. There's news for that dealer in the selling power of FLOORGLAZE (the king of solid-color floor enamels), GRANITINE (the floor finish that wears amazingly) and quite a few other lines of ours that make good.

If that dealer wears your hat it will pay you to ask us questions this very day

Send for sample can of FLOORGLAZE, or GRANITINE

THE MONTREAL ROLLING MILLS CO.

might never come any other way. It is well to go after new customers hot and strong, but at the same time see that the old customers are satisfied, and canvassed for other needs.

The merchant should make certain that his clerks are keenly alive to this important point, and that the order for a small tin of varnish from an old customer is just as courteously received, and just as much appreciated, as the large order from the new customer, who has recently been landed by the boss. The merchant should see likewise that his clerks know how to treat complaints. Nothing is more annoying to a customer, who may in ignorance blame the paint for a shoddy piece of work, to be treated by the clerk with a contemptuous air, or with the amused tolerance that an expert may give to an inexperienced man who makes mistakes and does not know it. A complaint should not be dismissed with the indifferent remark that "our paints are guaranteed good, and your painter must be at fault." The customer will not be convinced by that, but will go home more strongly of belief that the paint was to blame.

Take hold of the complaint gently. Let the customer feel that he has a sympathetic listener, and then cross-examine him carefully, as to the method of painting adopted. Find out if any of the common blunders of the painter had been committed, and then when the fault has been exposed, point out how impossible it was for the paint to prove satisfactory under such conditions. Treated in this way the customer will see the fault, and feel that after all the paint was not to blame, and that the merchant had not sold him inferior stuff.

The success of a paint department depends as much, if not more, upon the holding of the old customers, as to the acquiring of new ones.

PAINT AND OIL MARKETS

MONTREAL.

Oct. 1.—A greater number of changes occurred in the paint and oil markets this week than has been noticed for some months past. Following the break in ground white lead, and there still seems no settled market price to this article, came an advance in turpentine and linseed, and a decline in red lead in sympathy with white lead. Varnishes and japans, with the stiffening of turpentine, also seem to be shaping for an advance.

The cutting in white lead is undoubtedly inducing more liberal buying, and some good orders have been dispatched during the week. Paints and colors have been helped by this, as dealers, in ordering their white lead, have included the other lines.

Apart from the excitement in white lead a good steady business is being done in most lines, and is likely to continue for some weeks.

TURPENTINE —Owing to the greater cost of getting out supplies in the matter of labor and material, and the increasing scarcity of good turpentine "farms," this article steadily advances, and has been marked up 2c per gal. The demand is of a fair character. We now quote 80c for single barrels, net 30 days.

LINSEED OIL — With the increased sale for white lead, linseed oil, in direct sympathy, has had a very good call. It is reported that seed is somewhat scarce, and with stocks not over abundant quotations have been marked up 1½c. We now quote: 1 to 4 barrels, in one delivery, raw 66c per gal.; boiled, 69c per gal., net 30 days, f.o.b., Montreal.

GROUND WHITE LEAD—The cutting still continues, although nothing like so marked as it was last week. There is no doubt that the demand has been stimulated, especially for the better grades. The good business conditions which at present prevail are also helping. There is as yet no settled price in the market, but quotations may be said to be around what they were last week, and we quote: Strictly pure about $5.25 to $5.75, according to quality, and No. 1, $4.85 to $5.25 f.o.b., Montreal.

RED LEAD—Although the market in the Old Country is no lower, local prices have been affected by the cutting in white lead, and the market has eased off 25c per 100 lbs. The demand is fair. We now quote: Genuine red lead in casks, $4.25; in 100-lb. kegs, $4.75; less quantities at $5.75 per 100-lbs.; No. 1 red lead, casks, $3.75; kegs, $4.25, and smaller quantities, $5.25.

WHITE ZINC—Keeping pace with the good demand for other painting lines, white zinc has been active with no change in quotations. We quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white Zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5½c.

VARNISHES AND JAPANS — With the stiffening of prices in turpentine, it is not at all unlikely that quotations for varnishes and japans will be increased. The turnover is most encouraging, and shows the healthy industrial conditions now existing. Small tins of varnish for "touchingup," and of wood stains are said to be in very good demand. Varnish gums are firm, and clean, well-picked parcels are soon secured by users.

PUTTY—In some quarters a scarcity of bladders has been noticed, and customers are being induced to take 25 or 100 lbs. irons instead. There is a large turnover in bulk putty, as well as in the smaller packages. We quote: Standard putty, 800 lbs., in casks, $1.75; in 100-lb.

When you sell Paint sell the Real Thing

Give your customers paint that is all paint, pure paint—no adulterants.

Give your customers what you know will do absolutely satisfactory work.

"ENGLISH"

LIQUID PAINT

is guaranteed pure paint, with a formula on the can. This formula shows the base on which the paint is made: 70% pure White Lead (Brandram's B. B. Genuine) and 30% pure Zinc White, mixed ready for use with pure linseed oil, pure turpentine, and dryer.

This means satisfied customers; brings them back to your store and sends their friends to you.

TORONTO.

October 1.—Continued improvement is noted in paint selling this week. On the whole trading is better than last week. Every painter has plenty of work ahead and jobbers report new business cropping up every day. The painting season in the larger cities and towns of Ontario looks as if it will extend right into the winter.

Country hardwaremen state that satisfactory conditions prevail in their immediate neighborhood and aver that more farmers are using paint this fall than for some years past.

Red lead has declined this week, following the cut in white lead a week ago. Linseed oil has advanced. There is a decided stiffening in turpentine, and trading is being done at figures nearer the market quotation than has been the case for the past three months. There is, however, little demand for "turps." Varnishes have firmed up since the advance in turpentine.

All grades of rosin have advanced, the lowest grade has advanced about 60 cents per barrel, and is now 70 per cent. higher than it was in the month of June, and there is every probability of a continued firmness.

TURPENTINE—The turpentine market at the ports of production continues to be reported short of stock, comparing with last year. Added to this there has been a very serious storm in the naval stores belts of the southern States, which gives encouragement for further advances. The present outlook indicates that the local market may be advanced before the week is out. There is a decidedly firmer tone to the market. While the quotation remains at 82c for single barrels, the best that can be done by buyers is 81c, and that figure is liable to change in half a day. The turpentine situation is much unsettled and very little trading is being done. If the price increases there is a suspicion that substitutes may again get a chance.

LINSEED OIL—The local market has advanced 1½c, the quotations now being 66c for raw and 69c for boiled oil in single barrels. The seed market in Great Britain has advanced within the last few days, and there seems a probability that these prices will be maintained firmly as the quantity of seed reaching Great Britain is only a little more than half that was on the way at the same time last year, so that unless the Canadian market breaks for seed it seems very likely that the price for linseed oil for the fall is pretty sure to be maintained firmly.

WHITE LEAD—The low prices quoted last week induced some good buying. A number of hardwaremen who carry fairly large stocks of lead are taking advantake of the market and booking lead for future delivery. A number of the new prices are: Decorators' pure, $5,65; select flake, white, $6; Ramsay's pure, $5.55; Elephant genuine, $6, Robertson's, $5.90; Sanderson, Pearcy, $5.75.

RED LEAD—Following the cut in white lead there has been a corresponding decline in red lead, amounting to 25c per hundred pounds. Casks are now $4.25, and 100-lb. lots $4.50 to $4.55. Trading is splendid.

GLASS AND PUTTY—At the present time these are two of the foremost paint-selling lines. Window-glass is going out well to country points for repair work, and new buildings in the larger centres are calling for good quantities. Stocks are being depleted. Putty is also selling well, a good demand existing for all grades. Bulk putty in casks are at $1.75; 100-lb. drums, $2; bladders, $2.15 to $2.25.

STAINS AND VARNISHES— These goods have stiffened since the advance in turpentine, but no actual price changes are yet reported. Sales are fair.

PETROLEUM — Prices are firm, though unchanged from last week. Delivery still goes on. Booking, while fair, is a little on the light side. Prime white coal oil is 13½c; water white, 15½c; and Pratt's astral, 17½c. There is still a fair demand for gasolene at 16½c, and benzine at 15½c.

SELLING OF PAINTS.

Good, common sense talk persisted in regularly will sell paint materials. Occasional circularizing of selected lists of property owners pays. If letters are sent, they should be real letters in form and feeling and not a general flight of fancy printed to look like a letter. There is a big difference and the recipients know it. There are far too many general advertisements masquerading around the country as letters. If you can't cast what you want to say in the form of a letter, don't print it like a letter. Make it frankly a circular, or folder, or card.

PAINT POINTERS.

Paint is like a dog—abuse ruins it. Treat it kindly and it is your faithful slave.

The time to cure a case of peeling is before the paint is applied.

Haste in "getting the job finished" is paid for, with interest, in "making good" the failure.

Good paint on a bad surface is likened unto a house builded upon the sand.

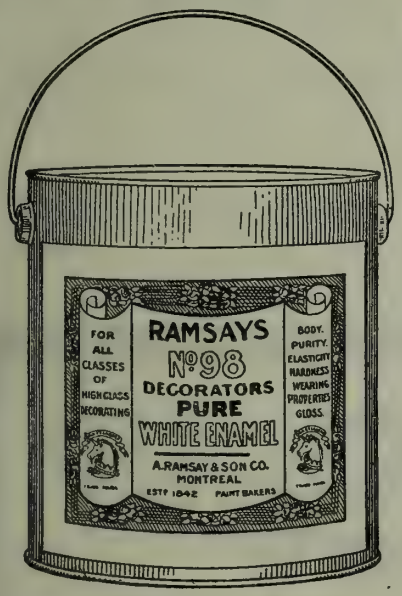
When you sow thistle-down you don't expect to reap sugar cane. When you use paint improperly you shouldn't expect good results.

Paint that will not peel when it ought to peel is not fit to paint with.

Moisture under the paint is a thousand times worse than moisture in the paint.

Paint is not whitewash and you must not expect it to prove satisfactory as paint if you treat it like whitewash.

Moisture is to paint what cocaine is to man—it destroys moral fibre.



"An ounce of prevention is worth a pound of cure"—cure the faulty conditions and the paint will need no cure.

ENAMEL FOR THE PAINTER

Haven't you often noticed what a difficult thing it is to get a real good high-grade white Enamel for high-class painters' trade? For years dealers have been obliged to bring in these Enamels from abroad at exorbitant prices and sell at little or no profit.

RAMSAY'S No. 98

changes all that. You have herean enamelunsurpassed by any imported into the country. It is for the Decorators - for high grade work. It is not cheap—that is as cheap things go, but it is cheap for what it claims to be. You should learn about this Decorators' Enamel anyway, in order to be posted. Write us for special booklet on Ramsay's No. 98 Enamel.

The Biggest Business-Bringers in the Hardware Line Are

"STAR EXPANSION BOLTS"

There are two "**Reasons Why**"

Star Expansion Bolts
are made to stay; and in making your fastenings to brick, stone, concrete, tile, slate, and so forth, don't forget that the Star is going to hold as long as the wall stands.

United States' Engineers
and the "big men" in the architectural world, specify **STAR EXPANSION BOLTS**, thereby putting them in great demand by contractors.

We are the largest advertisers of Expansion B lts in this country! You may take up a copy of almost any trade paper, and you'll see the large space which we use every month.

We have a bundle of co-operative plans by which **WE BRING CUSTOMERS TO THE DEALER'S DOOR!** You will be interested in these, **FOR THEY DO NOT COST YOU A CENT!**

Drop us a line to-day for some samples.

There's no ice so slippery that "*Little Clinchers*" will not carry you over without a fall. They grip the pavement firmly at each step.

"Little Clinchers"

make icy pavements, roads and hills as safe as the floor in your home. They're adjustable to the heel of your shoe in *half a minute*—no nails, screws, rivets or straps. They're invisible and comfortable.

No need to remove them indoors—simply fold the heel-plate forward, reversing spikes under instep, and the floors and carpets are safe. "*Little Clinchers*" are made of steel, with specially hardened points. If your jobber cannot supply you with these goods, write us.

HAMILTON (22 Calibre) RIFLES

Money Makers

Models 27 and 027

Prices $2.00 and $2.25

We Specialize on Boys' Rifles

We build our rifles under patents exclusively our own and confidently claim to make the best rifle ever built for the money.

MODEL No. 27 is an efficient sporting rifle, with hammer action, of few parts and exceedingly simple, using 22 calibre short or long cartridges. The barrel is bronze, rifled and steel jacketed, finished in blue black gun finish. Breaks down for loading and ejecting shells. Flat stock and forearm of gun of gum wood. A beautiful model, symmetrical and well balanced. Barrel is 16 inches long, length of rifle over all, 30 inches. **Price $2.00.**

MODEL No. 027 is exactly like No. 27, except the stock and forearm, which are of genuine walnut, turned and beautifully finished. **Price $2.25.**

Other models are Nos. 15 at $2.00, 19 at $2.50 and 23 at $3.50, each a winner in its class.

Our continuous advertising in the boys' papers will bring the business to you, as every boy will want one and you should have a stock on hand. **Write for catalogue and net trade prices.**

THE HAMILTON RIFLE CO., Box 202, PLYMOUTH, MICH., U.S.A.

IT IS THE WIDE AWAKE DEALER

who gets the LEAD in the building trade. CONTRACTORS know the man who sells the right ROOFING, and every dealer can increase his business by getting after the local builders first and then stir up your customers who call for paint or any other building improving articles. Perhaps you never thought of the money you are MISSING by neglecting the local ROOFING BUSINESS. YOU cannot fall down with our strong SELLING SYSTEM behind you. We also make a fine variety of Wrapping Papers.

We carry a large stock of our leading brands, and our prices are reasonable always.
Compare them with others and with our quality, and we win easily.

CURRENT MARKET QUOTATIONS.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

Crowbars, 3½ cents per lb.

TRADE B MARK

Amatite ROOFING

"Easy to sell because consumers want a Roofing that needs no Painting."

IF *you* do not sell Amatite Roofing in your territory soon somebody else will, because there is a constantly increasing pressure from the consumer.

We are spending $100.000 on advertising annually to make this demand.

We are teaching the consumer to demand a roofing *that does not need painting.* The day of the "Paint-me-often-oids" is past. People everywhere are asking for the roofing with a *mineral surface* which will need no care.

Amatite costs no more than roofings that need continual painting. The customer gets 100% more value in a dollar spent on Amatite than on any of the old-fashioned so-called "rubber" or "gum" roofs. Send along your order.

The FLYER

A Brand New High-Speed Washing Machine on a Brand New Principle

PATENTED 1909

It means washing with the hard work left out

A Big machine, Big in every way—Big in power, Big in speed, Big in ability to do the work, Big tub with a Big opening, Big seller.

Has simple, strong and accurately machined mechanism seated on steel ball-bearings. Is fitted with a large evenly balanced fly wheel that is easy to start and carries the action over its heaviest load with little effort. The entire working gear is attached to the cover and lifts easily with it. No troublesome connections to make.

Don't Wait for Something to Turn Up. Try a "WANT AD."

THROW A SPRAT TO CATCH A MACKEREL

You can't fish without good bait.

It's not the cost of the bait, but the knowledge of just what bait to use to catch the kind of fish you are after.

A want ad. in HARDWARE AND METAL is the right kind of bait to use when you have any proposition of interest to Hardware, Stove and Tinware dealers, clerks or travellers.

The cost of advertisement will be very small compared with the results you will secure. 25c. or 50c. per insertion will pay for a want ad. which may prove worth dollars to you.

Every day you delay you are handicapping your business.

If it is a set of tinner's tools you have to sell, why not get them out of the way and get the money for them which you can use in your business?

If you want to sell your business, let the men know about it who would be interested in buying it, and you will realize a higher price than if you only negotiate with two or three people.

If your proposition has anything to do with the hardware trade, try a Want Ad. in HARDWARE AND METAL. Address our nearest office.

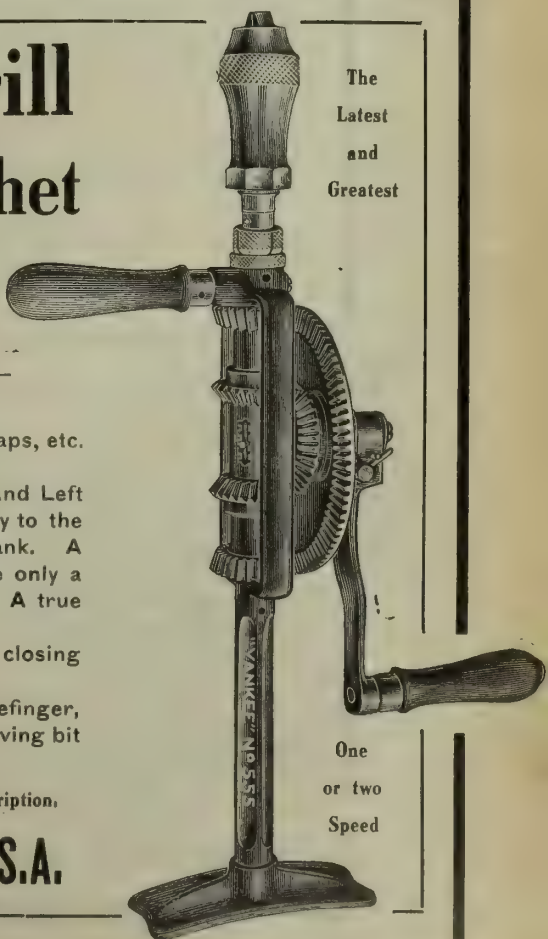
"YANKEE" Breast Drill with Automatic Double Ratchet Adjustable Ball Bearings



Notice the little shifter between the gears:—

Notch 1—gives you a plain drill.
Notch 2—A Left Hand Ratchet for removing taps, etc.
Notch 3 - A Right Hand Ratchet.
Notch 4—An Automatic, Alternating Right and Left Hand Ratchet, the bit turning continually to the right regardless of the motion of the crank. A great advantage at close quarters where only a short throw of crank can be obtained. A true time saver.
Notch 5—Locks drill for opening and closing chuck.
Lever A—Change of speed with forefinger, without releasing hold on crank or removing bit from hole.

Sold by leading jobbers. Write for full description.

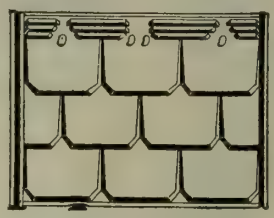
One or two Speed

NORTH BROS. MFG. CO., Philadelphia, Pa., U.S.A.

"You know the difference between 'claims' and 'proofs.' Claims MAY hold customers, but proofs WILL hold customers."—*The Philosopher of Metal Town.*



Mr. Hardwareman

Are you aware that **EASTLAKE METALLIC SHINGLES** are the best steel shingles on the market? Now we are not claiming anything we cannot prove.

"Eastlake" Steel Shingles were produced twenty-five years ago—long before any other steel shingle. The roofs that were covered with "Eastlake" Shingles that first year are to-day in as good shape as when they were laid—never having needed repairs.

"EASTLAKE"

STEEL SHINGLES

No other galvanized steel shingle can even claim such a record. Remember this fact when others say to you "My shingles will last a century."

Satisfy your customers. Give them a shingle that has proven itself—that you know will insure the utmost satisfaction.

"Eastlake" Steel Shingles are made by the oldest and largest sheet metal building material firm in Canada—a firm whose policy has been "Protection to the Dealer" from the start.

We also manufacture **Galvanized Cornices, Skylights, Ventilators** and **Finals, Metallic Ceilings, Siding** and **Lath, Corrugated Iron, Conductor Pipe, Eavetrough, Fireproof Glass Windows, Doors,** etc., and Architectural Sheet Metal Work generally.

Write us for catalogue and estimates.

The Metallic Roofing Co. Limited
TORONTO & WINNIPEG

1673

THE Dealer who builds up a successful business is the man who handles "STANDARD" goods.

This brand on a package is a guarantee of quality.

For over a third of a century we have been manufacturing

Wood Screws, Wire Nails, Tacks

Machine Screws; Iron, Brass and Copper Rivets and Burrs; Staples, Corrugated Fasteners; Stove, Sink, Tire and Sleigh Shoe Bolts; Bright Wire Goods; Wire—Bright, Coppered, Tinned, in coils and cut to lengths, etc.

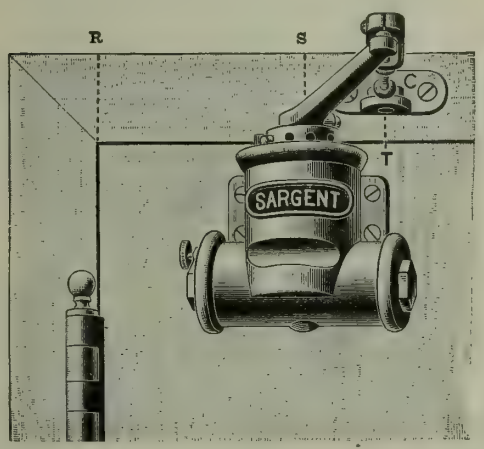
Sargent's Liquid Checks and Springs

FOR EITHER HAND WITHOUT CHANGING IT IN ANY WAY

Straight Adjustable Foot "E"
(Part No. 35)

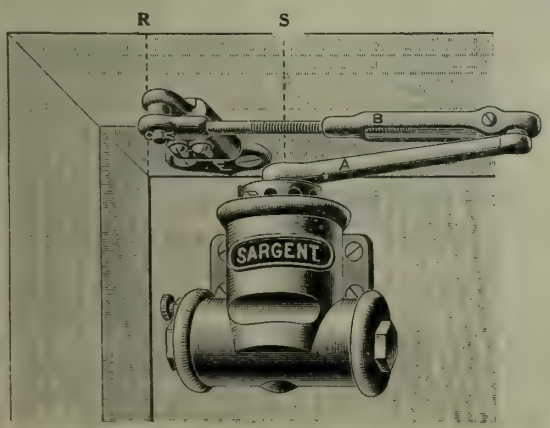


The unsightly and unsatisfactory soffit, corner and flush hanging brackets heretofore in use are not now required because of Sargent's Improved Method of Applying Door Checks with detachable feet. The arms, instead of protruding into the room, lie parallel to the door. Sargent's Check, by our method, draws the door toward, instead of away from the hinges.

Angle Adjustable Foot "D"
(Part No. 34)

Get the Business

It is in your town if you try for it, and there is money in it for you. Convince these neighboring merchants that they need Sargent's Liquid Door Check and Spring and that now is the time to have it applied.

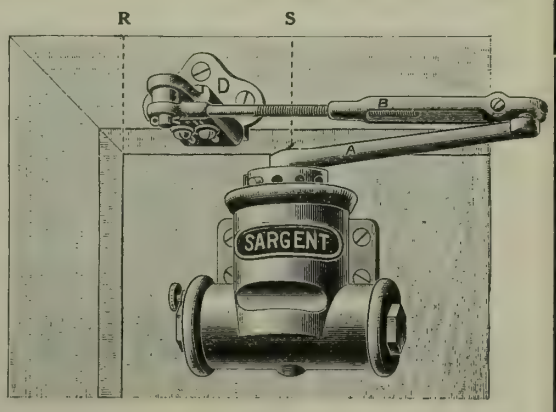


Check attached to Right Hand Door. Can be used on Left Hand Door without changing the Spring or any of the parts.

Begin Early

Many buildings in your town will need this Check during the coming winter. Look around and with a little effort you can increase your profits by supplying the schools, office buildings, hospitals, churches, public buildings, libraries, fire houses, hotels, stores and dwellings.

Sargent's Liquid Door Check and Spring



Simple, Strong, Durable. Suitable for all Doors. Easy to Apply, Regulate, and Keep in Order. Compact and Powerful Spring. Prompt and Effective in its Action.

Check attached to Left Hand Door with Straight Adjustable Foot. Can be used on Right Hand Door without changing the Spring or any of the parts.

F.&W.

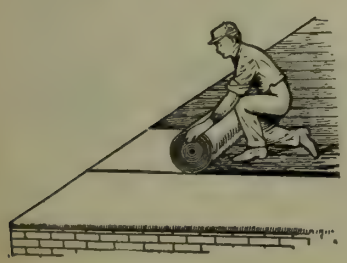
"Samson" Weatherproof Ready Roofing

adaptable to roofs of any kind and very easy to apply. Tell your customer it will keep out wind, rain, snow and dust, and "Samson" has a tendency to last—needs no coating.



Mr. Merchant, now is the time to sell "Samson" Roofing, for now is the time it is being used.

High Quality—Low Price

You may procure "Samson" in 36 inch rolls of 1 square (108 square feet) in three different plys, viz: one, two and three, with nails, caps and cement carefully packed inside the roll. A roofing is never really known until it is tested. Write for prices and samples.

A superior brand of ready-made, up-to-date roofing.
Good where any good roof is needed.
Will stand tropic heat or arctic cold.
Looks like rubber, but has no rubber in it.
Has no tar in it. Has no odor.
Can be laid by any intelligent workman.
A perfect non-conductor—the best insulating fabric made.
For all commercial purposes, practically fire-proof.
It is vermin-proof. Rats will not touch it.
Under stable floors it is most excellent.
Acids cannot affect it like tin or iron.
It is tight, pliable and waterproof.
It is cooler than iron and more durable than tin or shingles.
It is not coated with a mass of spongy fibre which holds water and is soon soaked off.
It is not backed with asphaltum or rosin, and when properly laid, there is little, if any, expansion or contraction.
It makes a fine, plain flooring, taking the place of oilcloth.

GRAHAM NAILS ARE THE BEST

The Brand of Saw his Grandfather used in 1840 is still BEST to-day

It's time that tells in saw service. Don't buy a saw that will last but a short time. Buy a saw that you can hand down to your grandchildren with pride in its sawing qualities.

Disston Saws

The Saws With a History

have been giving universal satisfaction for nearly seventy years. Hundreds are in use to-day that were made long before the Civil War.

Disston Saws are manufactured from our own Special Steel under the constant supervision of noted experts; steel particularly adapted for saw purposes, hardened and tempered by our patent process. Every inch of steel is perfect, every tooth is a clean cutter, and every saw is the best money can buy.

Avoid the irritation of constant saw troubles—save time, money and temper—by adopting and using a Disston whenever there's sawing to be done.

It's yours—The Disston Hand Book on Saws; a mine of saw information that interests Manufacturers, Contractors, Builders, and even the Man-About-the-House. A request brings it FREE. Address:

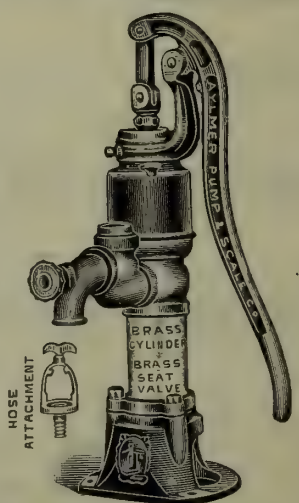
About now is as good a time as any to consider the advisability of determining on a line of Pumps for the coming season.



McDougall Pumps are Standard Pumps and have been for thirty years, so you have this experience at your call. We have learned a lot in that time, too, and are willing to share up

Remember "Aremacdee" is a guarantee.

The R. McDOUGALL CO.
Galt, Canada LIMITED

THE AYLMER
DOUBLE ACTING HOUSE FORCE PUMP

With Cock Spout and Reversible Handle, has Brass Cylinder, fitted with Brass or Glass Valve Seat. Arranged to drop the water to prevent freezing.

The reversible handle can be placed at any angle, thus making either a right or left hand, or straightaway pump, as desired. It is built on the plan of our submerged Cylinder Well Pump, is double acting, has heavy seamless brass upper and lower cylinder with brass or glass valve seat and expansion plunger bucket. It is compactly built and very powerful. The base is a new and neat design and is attached to the cylinder by means of three heavy cap screws.

The expansion plunger is a feature not found on any other make of pump. By means of the rubber disc in connection with the cone-shaped stem, the leather on the upper plunger can be expanded by means of an ordinary wrench, turning the adjusting nut on top of pump to the left without removing the pump from the well. This enables the user to keep his pump in proper adjustment without the expense of a pump expert.

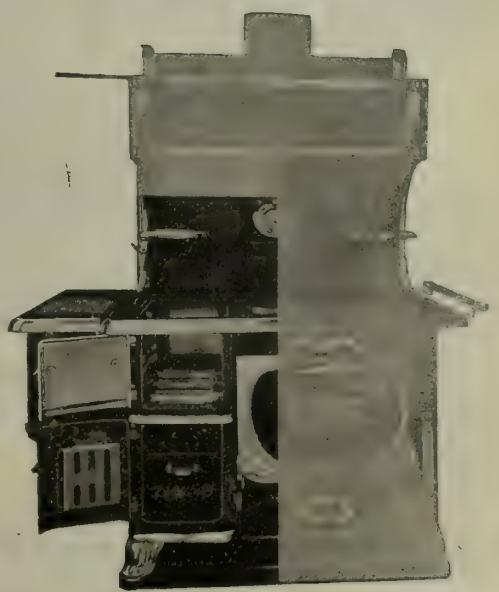
Sugaring Buns

on the Canada B. The whole shelf and pan slides out. Just the thing for basting a roast or turkey.

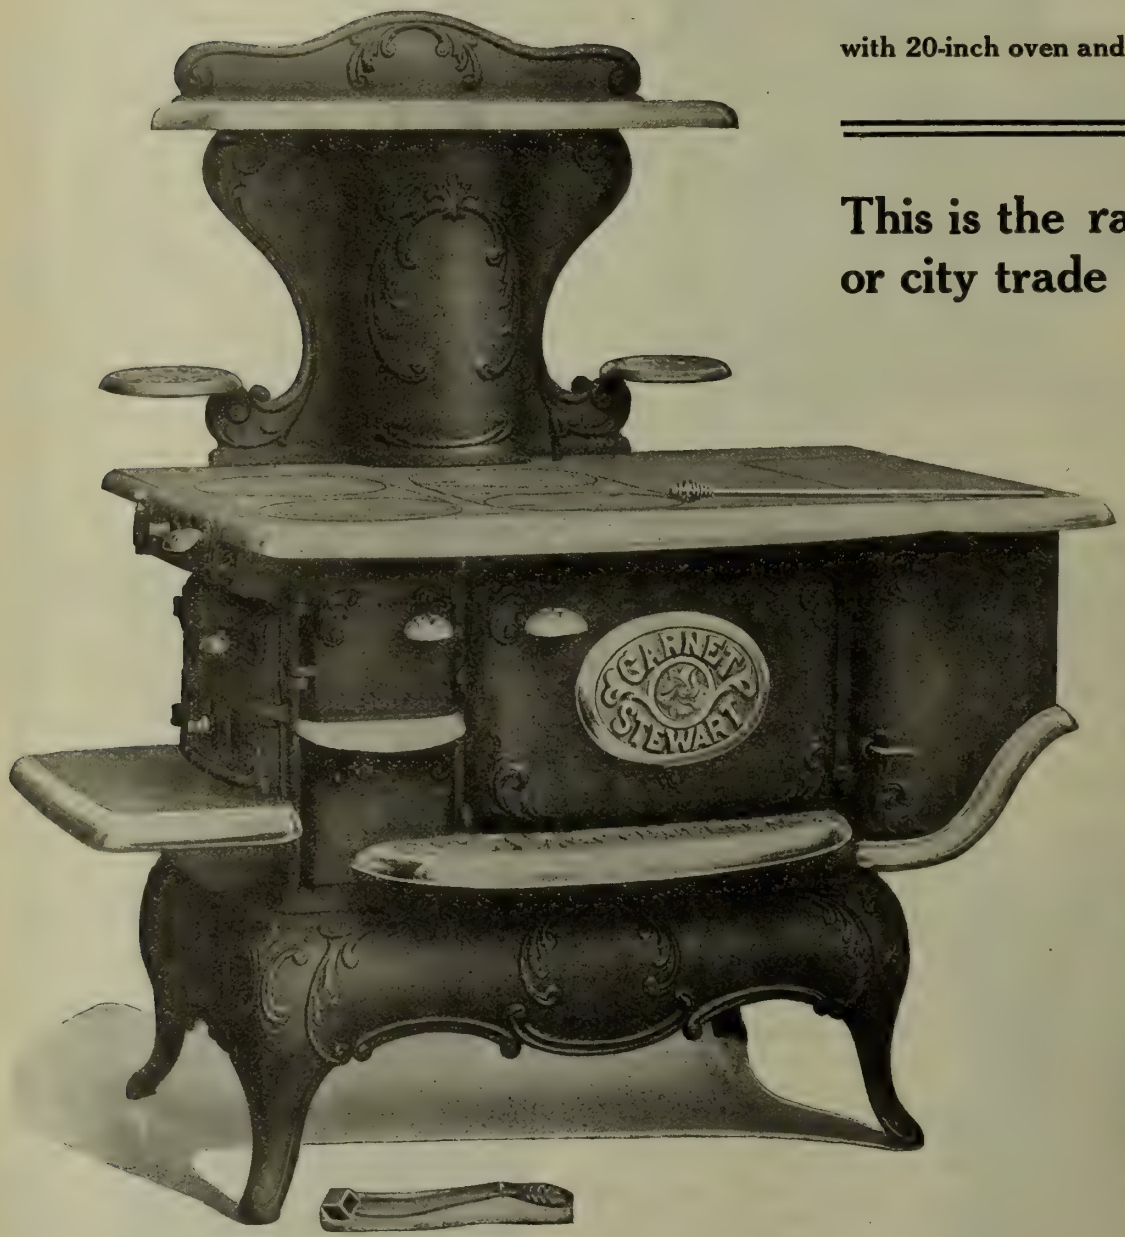
The Canada B Steel Range

It is a pleasure to sell the Canada B. Satisfied customers are quite willing to pay a little more for this handsome range. If you wish to increase your sales and make a reasonable profit, write for the exclusive agency for your town. Made only by

The Moffat Stove Company - Weston, Ont.



The Design and Construction of High Closet



is registered. The door is in one piece, opens down and forms a shelf; does away with breaking dishes or bruising your fingers like the roll-over door on other makes; also gives larger opening in door frame.

The roomy Ash-pan

just fits under the clean-out door; the door frame has a projecting mouth for this purpose; open this door just off the catch for keeping fire over night. Steel ovens are made from No. 12 gauge Breton stretched steel.

GARNET "GOOD CHEER" RANGES

with 20-inch oven and 4 or 6 hole top

This is the range for farm or city trade

All cast linings.

Duplex grates.

No back grate rest to warp or burn out.

Fireback well ventilated and long lasting.

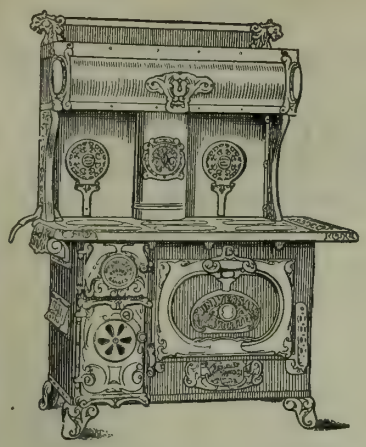
Key-plate top with lever lift.

Nickel all removable.

Handsome design and best finish.

Works to perfection.

Price right.



We also have the smaller size (No. 9-18) which has firmly established itself in public favor during the past two years.

"JEWEL" STOVES and RANGES

The Ideal Jewel Heater
With Its New 1909 Dress

Dress does not make the man, neither does it make the stove, but it certainly improves the appearance of both man and stove.

The Ideal Jewel has been on the market for a number of years and proved itself a Perfect Heater in every way. Now, that it has been re-dressed, it is one of the handsomest and most thoroughly reliable heating stoves on the market.

Mr. Stove Dealer—If you expect your full share of the fall trade you must keep your stock up-to-date. The Ideal has every modern improvement known to the stove trade. With or without oven.

CONGO

"NEVER-LEAK" ROOFING

CONGO is a roofing that is made and sold in handy rolls all ready to lay. Nails, cement and caps in sufficient quantity are packed inside so that there is nothing else to buy. The caps are galvanized iron instead of the usual tin and so they do not rust. Ordinary caps soon rust and become useless. Leaks and trouble result.

Any man can lay Congo Roofing. It demands no special skill or experience.

Congo is applicable to any building and to any kind of roof, although it will give best results on sloping roofs. It can be laid on farm buildings right over old shingles; it is so tough that the rough surface will not hurt it. It can be used on factories and the fumes of coal smoke will do it no damage.

Congo suits every purpose and every purse, because it is made in three grades, namely: 1-ply, 2-ply and 3-ply. The 3-ply is guaranteed for 10 years. The guarantee is a real *guarantee*, and does not require a lawyer to enforce it for you. It consists of an Insurance Bond issued by the National Surety Company and is enclosed with each roll of Congo Roofing ready to be filled out and sent in for registration.

Samples of Congo and new booklet mailed free on request.

Quality Talk

That's what finally counts. No matter what you sell, it's a certain sure thing the article of **genuine** merit brings **popularity** to your store, and satisfaction to the purchaser. This is a truly applicable saying when applied to the stove business and worthily instanced in the **Imperial Oxford** Cast Range and the **New Chancellor** Steel Range. The dealer who displays either of these two lines on his floor has the evidence to back up his quality talk. Look into this matter of quality. Mr. Merchant—just see how important a factor it is in the ranges we have just mentioned. Then when you get interested, write us for our helpful plan—the livest, brightest kind of a stove proposition ever offered—do it now—it means—bigger sales for both of us.

are beginning to appreciate the implement business as one that can be successfully and profitably handled in connection with their regular hardware lines.

We have a line of goods which will warrant your confidence if you have or intend to branch out along the implement line. Our goods are well and favorably known, and are kept before the agricultural community through the medium of all the leading farm papers.

We supply the following goods

Success Manure Spreaders
Walking Plows of every description
Single and Double Riding Plows for Ontario and the West

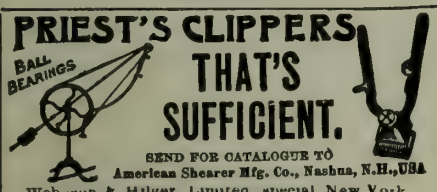
Grain Grinders, Disc and Drag Harrows. "Leader" Scufflers. Pulpers, Agricultural Wheelbarrows. Also the famous Thom's Blower, Ensilage Cutters.

These goods can be and are being profitably handled by many of the leading hardware men.

We solicit your inquiries and will be glad to send a traveller to talk the matter over.

The Paris Plow Co., Ltd., Paris, Ont. *Western Branch Winnipeg, Manitoba*

DIRECTORY OF MANUFACTURERS



Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

A Series of Retail Ads

We have had a series of roofing advertisements prepared, at considerable expense, especially for retail dealers' use. Attractively designed and forcefully written, these ads are bound to create a strong impression in favor of "Brantford" "Roofing" and the dealer who handles it. Plates of this series will be sent free to all our agents. If you're not already handling "Brantford" "Roofing" it's time you were. Better write for our proposition.

Importance of Window Displays in Holiday Trade

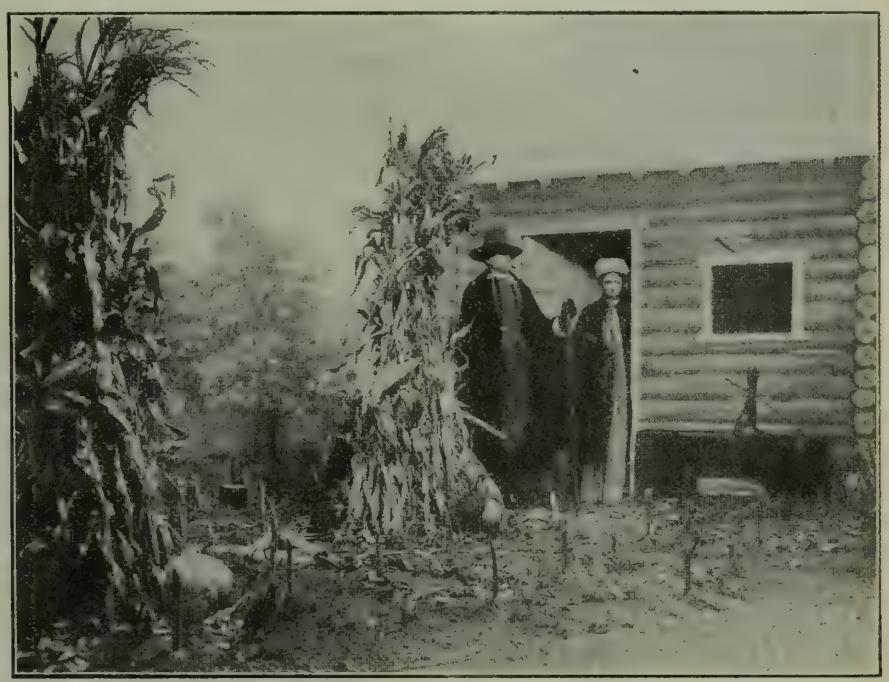
From Thanksgiving to Christmas a Busy Season for the Hardware Merchant—Trade Developed by Making Attractive Window Displays — One Window Can Well be Given up to a Special Display While Using the Other for Seasonable Goods—Harvest and Hallowe'en Displays Also Suggested.

With Thanksgiving Day only a fortnight away, merchants are reminded of the necessity to prepare for the holiday season, and every effort should be made from and until Christmas to make the volume of fall and holiday business show a substantial increase over previous years. Crops have been good, factories have been running with full staffs, and in some cases overtime, and as a result money is freer and conditions are right for an energetic campaign for an increased holiday trade.

Merchants will do well to order holiday stocks early and see that the members of the staff, who look after the advertising and window dressing prepare their work ahead, so that when the real busy season arrives no time will be lost and every posible minute can be given to the important work of selling. And with work of this kind done in advance an early selling campaign can be instituted, and a large hole made in the holiday wares during the early part of December, good customers being advised to buy early, when the stocks are at their best, and the oportunity for making a selection the greatest.

As a beginner for the fall and holiday campaign, nothing could be better than an atractive Thanksgiving window display, as a good beginning will go a long way towards impressing the enterprise of the store upon those whose custom you most desire. And just as "calamity howling" and talking "hard times" has a bad effect upon business by encouraging those who have money to spend to put it away into safe keeping, so will an air of prosperity, and a few words regarding the "return of prosperity" have a desirable effect upon business.

PHOTOGRAPHS WANTED.



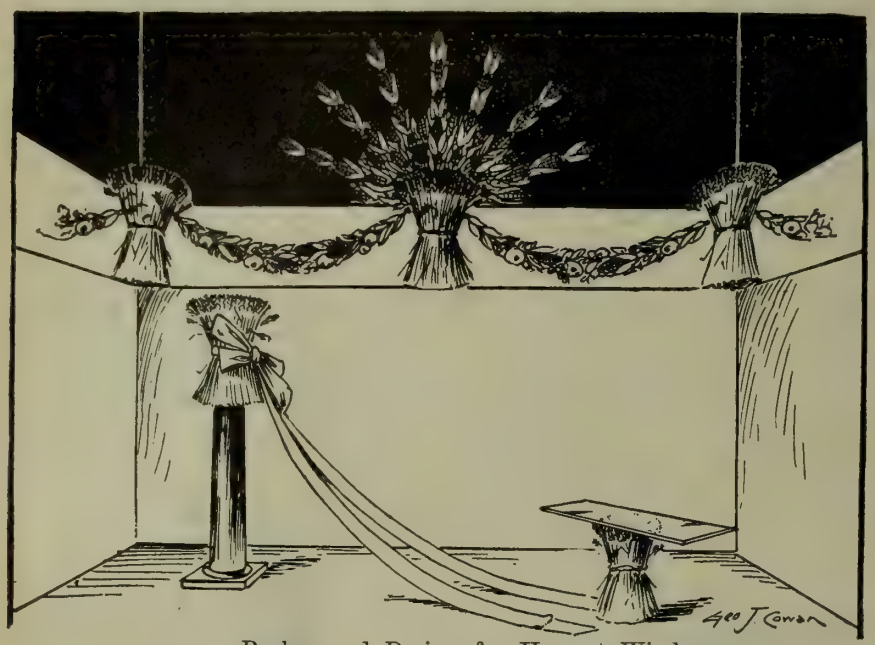
The editor of Hardware and Metal offers a prize of a copy of "Hardware Window Dressing" (cloth bound, $2.50), to the Canadian hardware clerk or merchant sending the best photograph of a Thanksgiving display in a hardware store window. The display can be either a special "harvest" window or made up of seasonable goods from the hardware stock. If the photographs received warrant it, two prizes will be awarded, address:

Editor Hardware and Metal,
10 Front Street East, Toronto.

In the acompananying engraving we show a Thanksgiving window trim, which is within the reach of any retailer who has a clerk on his staff capable of making a rough design on canvas. Or if such a clerk is not at hand the local sign painter can be called into service. In the design the background only is painted, the log cabin, sky and tree in the distance being sketched on canvas, the door being left ajar and two wax figures dressed in Puritan costume placed there. This could be varied by having the figures dressed in pioneer or backwoods costume.

The display shown in the photograph was made by the Jones Hardware Co., Richmond, Indiana, they aiming to reproduce a scene showing an attack by Indians, just as the two Puritans were leaving their log cabin to attend Thanksgiving service. Two arrows will be seen sticking into the cabin wall near the turkey, which is tied to a block and ready for execution. In a display of this kind a live turkey would add realism to the shocks of corn and pumpkins on the turf in front of the cabin.

As stated before a timely display of this kind, even though it means some expense and trouble to prepare, will repay the retailer, who wants to begin his holiday campaign by attracting attention to his store. The local newspapers will be only too glad to publish paragraphs describing the window, and farmers who come to town will be sure to visit the store to see the display.



A Display full of Suggestions for a Th anksgiving Window Trim.

A HARVEST BACKGROUND.

When making a special display depicting a seasonable scene and in which it is advisable to keep the wares of the store in the background or hidden altogether, the hardwareman will, of course, also make a special display of seasonable goods in an adjoining window. At Thanksgiving time, for instance, a window of cutlery and carving sets or a kitchen scene showing the Thanksgiving dinner in course of preparation are features which can be developed into displays which will help in selling goods. In some cases, however, the size of the window will not allow a special display such as has been suggested and here a harvest background similar to the one illustrated could be used to advantage in a display of carving sets.

The broad frieze can be made from an extra wide board covered with white felt. Each upper rear corner and also the rear centre of this window are to be decorated with a sheaf of grain, preferably wheat. From each of these sheaves are suspended garlands made of vegetables, fruit and grain. These garlands can be

made by simply fastening the various items to the board border by means of pins or needles, so as to produce the festooned form.

Background Design for Harvest Window.

At the back of the central sheaf make a sunburst of grain by radiating a series of laths, and to this spoke-like foundation secure ears of corn, as illustrated. Fill in at the base of the spokes with ears of corn, also as shown. The background to such a window can be of mirrors, paneled wood, or else a gathered or pleated cloth.

Additional features can be introduced in such a setting by arranging a sheaf of wheat in the form of a pedestal, this to be done by covering a pedestal with an outer layer of wheat, and tying it midway, in the usual manner. Above this feature place a glass shelf, upon which merchandise can be shown in the usual way.

Another idea is to mount a sheaf of wheat on the top of a high pedestal, and in the centre of the sheaf to tie a large bow of ribbon, extending the streamer ends in graceful drapes to the floor.

A small spray of wheat can be used with good effect in decorating one of the corners of the large show card used in such an exhibit. Smaller sprays also can be attached to the smaller price tickets.

NOVEL DISPLAY FOR HALLOWE'EN.

The pumpkin or "Jack-O-Lantern," shown in the illustration, was constructed of wagon rims 4½ feet in diameter, forming the ribs. Over this was pasted heavy building paper, painted with water color paint to imitate as nearly as possible the color of a pumpkin. A large banana stem was used to represent the stem of the pumpkin. The nose was made of a large squash which was hollowed out, nostrils cut in it and an electric light put inside. The mouth and teeth were made of a large sheet of steel, the teeth being cut very irregular and painted white, and the outside edge of the steel painted red to represent lips. The eyes were made of six-inch glass balls painted white, with the pupils black and crossed. Inside these glass eyes were electric lamps which produced the winking effect. The eyebrows were made of black curled hair placed over each eye, and a goatee was made of a bottle brush. The mouth was lined with red calico, and the tongue made of the same material stuffed with excelsior and protruding slightly from the mouth and the mouth lighted up with electric lights had somewhat the effect as shown in pictures of the infernal regions. No background was required owing to the size of the "pumpkin," but shocks of corn were used on the sides, while at the top was a quotation from one of James Whitcombe Riley's poems as follows:

"When the frost is on the pumpkin
And the fodder's in the shock."

Novel Hallowe'en Window Display Like ly to Attract Attention.

HARDWARE CONVENTION AT LONDON.

A meeting of the Executive Committee of the Ontario Retail Hardware and Stove Dealers' Association will be held at Toronto, on Monday, Oct. 25, this being Thanksgiving Day, and single fare rates available on the railways.

At this meeting arrangements for the fifth annual cenvention to be held at London will be completed, the dates having practically been decided upon as Tuesday to Friday, Feb. 8, 9, 10 and 11.

Several manufacturers have already applied for space in the exhibit hall, and arrangements are being made to have booths uniform in size, the association constructing a framework eight feet high enclosing the exhibits. A smoking concert with a program of music and song will be rendered in the exhibit hall on Tuesday evening, this providing retailers and salesmen an opportunity of renewing old friendships and forming new acquaintances.

A mock sale, in which a traveling salesman will attempt to sell a line of goods to a retail buyer, is also being arranged as a feature of the first day's program. Visits will be made to various manufacturing plants and an entertainment committee, made up of local manufacturers and jobbers, will look after the social features of the gathering.

Business Methods of Canadian Hardwaremen

Good Plan for Keeping Things in Their Proper Place—Chatham Jeweler's Novel Advertising Scheme—Do Fall Fairs Help Retail Business?—Advertising Floats in Parades — Brandon Hardwareman Conducts a Guessing Competition.

PUT THINGS IN RIGHT PLACE.

Hamilton, Oct. 6.—"Of all the troubles I have with young clerks," remarked a local hardwareman, as he transferred a handful of nuts and bolts from the wrench box to their proper receptacle, "it is that of teaching them to put things back in the proper place. Now, however," he added, "the trouble has been cut down to a minimum; though even now, as you see, it will persist in cropping up.

"How do I do it? To understand, you must remember how these mistakes happen. Every now and then there will be a "rush" spell—half a dozen customers crowding in at the same moment with half as many clerks on hand to attend to them. A customer want a few hat pegs, say, and the clerk takes down a dozen different varieties from the shelves in order to suit him. Or it's cake pans, or bolts, or padlocks—small articles of which there are quite a variety.

"Having made his sale, the clerk finds three or four customers to be waited on. The practice used to be to just cram the whole assortment of goods into the nearest receptacle, or leave them sprawling on any portion of the counter where they happened to be. Then, when, a week or two later, we wanted a particular size of a particular article, we'd find it was out of stock—and, next day perhaps, discover half a dozen of just the size and article we wanted in the wrong box, or lying under the counter. We've lost dozens of sales in just that way, or precious minutes of time hunting for things I knew we had in stock, but which no one could find. That's why I devised my 'scrap counter.'

"I set aside a little space on each counter. When a clerk has made his sale, he is required to place the stuff he didn't sell right there, while he goes on and makes his next sale, and he is strictly forbidden to try to replace the articles on the shelves while there are customers to be waited on. Then when a dull half hour comes, one clerk is entrusted with the job of distributing the articles which accumulate on the scrap counter. He takes his time, he is not hurried out of his wits, and he doesn't make mistakes.

"The scheme has at least three good points. First, it saves the clerk's time and secures the customer prompt service. Second, as a rule we know where an article is to be found. If it is in stock, it is either on the scrap counter or in its proper place. Third, it gives me a good opportunity to teach my new man for the time being a good knowledge of where to find the stock, by putting him, under the casual guidance of an experienced man, at the job of distributing. Of course, it doesn't obviate all possible mistakes. But it is most certainly a labor saver." W. E.

A GUESSING COMPETITION.

Brandon, Sept. 31.—The Kelly Hardware Co. have announced a guessing competition in which every purchaser of goods amounting to 50 cents is entitled to one guess as to how many shot are contained in a bottle. The person making the nearest estimate of the shot in the bottle wins a $50 shot gun. The second nearest estimate receives a $12 silver tea set, and the person making the third nearest estimate will receive $3 value in cartridges or other goods they may select. The bottle does not contain shot alone. With each cash register ticket for 50c a coupon is given on which to estimate. These are dated so in case of a tie the date and time will decide the winner. The contest closes Nov. 20 at 8 p.m. G.W.

ADVERSTISING FLOAT.

Cayuga, Oct. 2.—E. B. Davis, hardware merchant, had a cheap advertisement in a civic holiday celebration here recently. H. E. Burgess, who has been managing his business, but who has since left for western Canada, assisted by Roy Hashel clerk, constructed an advertising float the total outlay for bunting, flags, etc., being only $3. The float was covered,

Advertising Float Used at Cayuga.

the top and the wheels were boxed in with signs, while on the wagon platform inside a framework was a small display of hardware, the central feature being a hammock on which reclined a boy. The back of the wagon was used for a display of mechanics' tools and building paper. W. W.

DRUMMOND SUCCEEDS WARREN.

Chas. D. Warren, Toronto, who for the past five years has been president of the Lake Superior Corporation, has resigned from that office and is succeeded by T. J. Drummond, Montreal. Mr. Warren made known his retirement

T. J. DRUMMOND, MONTREAL,
The New President of the Lake Superior Corporation.

at the annual meeting of the corporation held at Camden, N.J., on Oct. 6.

Mr. Warren has brought the Lake Superior Corporation through a difficult tangle. At the time he accepted the presidency the subsidiary companies were in the hands of receivers and some 1,500 actions and claims were pending. With the aid of the Ontario Government, which had pledged $2,000,000 to make re-organization possible, Mr. Warren has brought order out of chaos and has wiped out not only all debts, but as well the Government loan guarantee.

During the coming year the works at the Soo will see the extension of the steel-producing plant; the doubling of the capacity of the blast furnace, the erection of a merchant and structural steel mill; and the extensions of the Algoma Central and M. & N. S. railways. Arrangements are also under way for the establishment at the Soo of the first electric smelting plant in Canada, under the direction of Dr. E. Haanel, Dominion Director of Mines.

The other officers elected at the annual meeting were 1st. vice-president, J. Tatnall Lea; second vice-president, W. K. Whingham; third vice-president, J. Fraser Taylor; secretary-treasurer, T. Gibson.

One way to face difficulties is by turning your back on them.

Success is too nimble to be caught by the lazy business man.

PUBLISHED EVERY SATURDAY.

MAKE YOUR PLANS EARLY.

Thanksgiving Day will be celebrated early this year, on the last Monday in October. This suggests the need of making plans for attracting trade to the store by live advertising and window dressing, and, as suggested elsewhere in this issue, it will pay to begin a campaign on Thanksgiving and keep the interest warm until the doors close on holiday trade on Christmas eve.

This week we publish some suggestions for Thanksgiving, harvest and Hallowe'en window displays and in succeeding numbers of Hardware and Metal space will be given for suggestions considered helpful in developing an increased trade in holiday goods.

Next week's issue will be a Christmas goods number, and readers of Hardware and Metal will do well to pay particular attention to the holiday announcements made in this special number.

THE BREAK IN WHITE LEAD.

The recent break in white lead prices has drawn attention to the situation in paints generally. All through the summer prices held fairly steady and as the season advanced the markets became firmer.

About the middle of August white lead in oil began going out in fair volume, and as each week went by the quantity moving increased. Towards the end of September, however, there came a lull with cutting in white lead prices, this being followed by the news that the association had broken, and prices cut from 25 to 35 cents a hundred pounds. This was followed a few days later by a cut of 25 cents in red lead, and the trade was advised to book at the low figures. Many hardwaremen are doing this for the replenishing of their stocks for the fall and winter trade.

Corroders, manufacturers and jobbers state that the present situation is but temporary, and that in a few days' time prices will be back at the figures ruling all summer ; bringing in justification of this the evidence of the steadily increasing prices of other paint materials. "Oil," they say "is going up, and lead, too, is increasing in value. As these two articles enter largely into the manufacture of ground white lead there cannot be any doubt that prices will advance."

On the other hand it is held by some that the price of white lead has been too high all spring and summer.

By the way booking has been done the past fortnight it looks as if white lead stocks will be carried over into the spring by some retailers and in this case it is likely that prices of white lead will be easy at the opening of next season.

A PROFITABLE SIDE LINE.

An increasing number of retail hardwaremen are looking outside their front door for business without neglecting opportunities for capturing all trade which comes to the store.

Frequent references have been made to merchants who have adopted plans to secure increased trade from farmers in the near-by country, either by calling personally, sending a clerk to make calls, or by sending literature to names on a mailing list.

Criticism has been heard that owing to the small margin on some classes of roofing, together with the keen competition on this line, some hardwaremen have not busied themselves in looking up new buildings for business of this sort.

This does not apply to orders for structural iron, however, for which there is an increasing demand, owing to the greater security in building construction demanded by municipalities and fire insurance boards. The increased cost of heavy lumber and the tendency to erect better store fronts also helps in creating a demand for steel beams, etc.

Here is an opportunity for retail hardware merchants to develop a trade in structural shapes, such as beams, angles, channels, tees, plates, flats, rounds and squares in connection with their trade in heavy goods. The business is yet young and the merchants who go after this trade can work up a profitable business.

The manager of a bridge works company, doing business with hardwaremen, in discussing the opportunities for hardwaremen in this line of activity, said that if hardwaremen would only keep their eyes open for new buildings being erected, or old store buildings being reconstructed, they could turn the information gained to their own profit by sending particulars to the bridge company, who would co-operate by forwardign quotations and other information.

Structural steel and concrete are the building materials of this age and the more the hardwaremen know about them the better equipped will they be to secure trade from builders for these classes of goods, as well as for roofing and builders' hardware. Establish a connection, therefore, with concerns selling structural shapes and cement, and give preference to companies selling through the trade and advertising in your trade paper.

BURGLARS HELP SELL LOCKS.

Every now and then the average town has a burglar scare. A few cracksmen make a tour of the houses of the well-to-do and carry off a little silverware or a few dollars in small change. Straightway, housewives are on their guard, and look under the bed at night for the burglar.

There is scarcely a house in any town which hasn't a couple of defective locks, or where there aren't some windows with broken catches. Locks are small things and window catches are still smaller; but the height of the burglar panic is just the time for the hardwareman to lick into shape a neat little window display, helped out with a few attractive advertising cards, and take advantage of the prevailing subject of interest to get rid of the locks which he has been perhaps carrying over for a couple of years. "If you haven't invited the burglars to call, see that your doors are properly locked." "A lock on the inside wil' keep a burglar on the outside." "A sound catch saves cash." These and kindred catchy phrases will help out.

Sometimes the lock on a room door is broken and when the winds of winter blow, the door bangs back and forth, keeping the inmates awake at night, and filling them with thrills at the thought of imaginary burglars. "Does that banging door keep you awake?" is a catchy sign to anyone who has had the experience, and will help to diminish a little group of locks attractively arranged on your smallwares' counter.

Then there are padlocks for the chicken coop or woodshed. "An invaluable help in poultry raising." "Protect your chickens from midnight callers." Signs of this sort will prove particularly interesting at a time when local newspapers are telling about the "dastardly" operations of certain chicken thieves.

A little display in a small show window, or on a prominent corner of the counter—a few attractive show cards to help out—perhaps a "local reader" in the paper—these things will remind the public that you are alive to the timely opportunity.

HOW TO IMPROVE INSURANCE RATINGS.

Failure to Apply Principles of Economy to This Department of Expenditure—Consultation With Local Agents Advisable in Order to Ascertain Details of Rating and Necessary Items of Improvement—Where a Small Outlay Made Big Saving.

One of the most important questions that the merchant or manufacturer can ask himself at the present time is: How can I improve my insurance rating? Authorities with whom this matter has been discussed declare that the indifference displayed by some of the most wideawake business men with reference to the risk represented by their premises is nothing short of surprising. The great majority have never taken the trouble to ascertain from local agents what their key rates are or to inform themselves with reference to those details which constitute them. It is safe to say that, if they did, they would stand self-accused of their failure to apply the first principles of economy to this department of expenditure.

Fair Basis of Rating.

Although it is a commendable fact that forces are at work with the object of bringing about a better condition of things, the local insurance agent has not, heretofore, been expected to exercise his initiative in this matter. While a town is under a minimum tariff where risks are not always considered on their individual merits, but subject to the same rating whether good or bad, no great reform can be worked. Obviously, the specific rating which weighs the conditions surrounding a building and charges accordingly is the fairer; it discriminates justly between the good and the bad. Of course, the town's fire equipment and its fire record are always matters for consideration and are made the basis of penalties or credits as the case may be. Authorities state that the time is not so far distant when all centres of population will come under the specific rating.

Consult With the Agent.

What step must the merchant in a town to which specific rating is applied, first take in the direction of improvement of his individual risk? He will go to his insurance agent and ascertain his key rate. The agent will inform him as to the full details of that rating, where he is penalized and where he is credited, and, if he be a competent man, will also be able to tell him what he must do to improve the risk.

On one point there cannot be too great emphasis—that the first duty of the merchant is to emply a competent insurance agent, not because he is a relative or friend, or out of charity, but because he is a competent man.

A merchant's insurance is more frequently gauged by the rate than by his own requirements. He is willing to spend three, four or five hundred or a thousand dollars for insurance, and the agent who can supply him with the largest amount of insurance for that money is the man who is doing him a service. Low rates do not necessarily mean less premiums, but probably would mean a larger amount of insurance. The minimizing of fire possibilities is likewise an important point to keep in mind.

In stringent times, the merchant looks at his insurance and if he thinks he can save a hundred or two he is going to do it. The man who can show him how he can best effect that saving is the man who gets his business and keeps it.

Reductions Mean Improvement.

There is scarcely a conceivable circumstance under which this rule will not apply, that reduction in rate is made for improvement. Instances are not wanting which go to show that where changes have been made to comply with recommendations with the object of securing better rates they were of such a character as to add materially to the value of the buildings, and in many cases were in contemplation before the owner had thought of their significance from an insurance point of view.

A merchant who has in view the "improving" of his risk by remodeling or rebuilding should first ascertain from the insurance agent doing his business how those changes are going to affect his rating.

Consultation between the agent and the insured, at such times, should be the rule and not the exception. It is here that the competent man can do good service; if he does not advise his clients somebody else will.

Small Outlay for Big Saving.

Case after case can be cited in which the most inexpensive improvement to building or equipment has effected great saving in insurance bill. Hardware and Metal's attention was recently drawn to a notable instance in which a manufacturer by an expenditure of $50 cut down his bill by over $500. By instaling a bucket tank, by bricking up a small hole, by protecting floors or woodwork near stoves or furnaces, by keeping packing material in proper bins—these and scores of other little things all count in the making up of a rate. The fact that there is a deduction made for no cellar or basement is significant. The cellar is so often made a dump hole for all kinds of rubbish, and is the place of origin of many fires that the penalty seems justified.

Faults of Management.

The faults attributed to management, in the mercantile survey on which rates are based account for a large list of penalties, any one of which may be easily overcome. For example, if there are stovepipes through the floors or partition, not protected, an additional 50 cents is charged! through the window, roof or wall, with double metal chimney, 50 cents additional; not protected, $1; entering bottom of flue vertically, 25 cents extra; entering flue in attic or unused room, 25 cents additional; bottom of elevator shaft used for closets, etc., or waste, 50 cents; untidiness, rubbish, ashes, etc., in cellar or attic, 25 cents; open lights in show windows or electric bulbs covered with tissue paper or paper shades, 25 cents extra, and so on. There may be points about the construction of a building which the tenant or owner can as easily improve upon as in removing any of the "faults of management," and with reference to these the fullest consultation with local agents is urged. There is not only the individual risk to be considered, but likewise the reputation of the town. It is safe to say that the progressive merchant who recognizes the importance of his own status will not long stand for deficiency of municipal equipment.

This paper intends to discuss the matter further and would be pleased to learn the experiences and opinions of merchants and manufacturers throughout the country by whom the question of improved risks has been seriously considered.

ALWAYS COPY ORDERS.

Many merchants neglect to take a copy of orders given to traveling salesmen, relying upon their memory to keep track of the stock, and upon the salesman to see that the order is filled properly.

This system is to be condemned, however, as a loose method likely to cause trouble for the merchant sooner or later. With few exceptions, salesmen can be relied upon to treat customers fairly, but the exception proves the necessity for a rule, and none should object to hand the retailer a carbon copy of the order booked. This will aid the merchant in checking the receipt of goods and will also be a guide in giving further orders.

A case in point occurred during the past week, when a retailer stated that he had placed an order with a salesman for a special line of goods. These were not delivered when promised, and the merchant could not remember the name of the firm with whom he placed the order, although he remembered the post office address. He was unable, therefore, to write a letter regarding the order until he had made inquiries and secured the name of the concern.

System counts for a lot in the conduct of a retail business and the retailer should insist on receiving a copy of each order he places for goods needed in the store.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Copper—Cut of ¼c.
Builders' Hardware — Some lines, 10 per cent. advance.
Sash Cords—½c advance.
Cotton Clothes Lines—5 per cent. advance.
Cotton Twine—½c advance.
Plain Wire—Bright, annealed and oil annealed. Now $2.30 base.

Toronto.

Canadian Lock Sets, Etc.—Advanced 10 p.c.
Harvest Tools—Advanced 5 per cent.
Stove Bolts—Now 80 p.c.

MONTREAL.

Oct. 8.—A slight sagging appeared in copper during the week, and prices were cut in some cases ½c. In the other metals no change was made, and the markets have been firm with a bright tone. Jobbing orders have come in freely, and from the trend of the inquiries it is evident that users have not only plenty of work on hand, but a good deal in view. The larger users continue to buy well, and are making themselves well secure for the winter. The general opinion seems to be that much stiffer prices are likely next year; and the fact that producers will not accept orders for delivery after the end of the year, shows that they think well of the prospects. Spelter is moving splendidly, and so are galvanized sheets. In fact, there is nothing to cavil at in the state of the markets, barring the sagging that appears in copper.

The primary markets have shown a certain amount of firmness, evidence of good buying going on. Despite the Banca sale tin has displayed little fluctuation, and looks to be fairly strong. Copper has given way in the London market, but this is not so much the poor consumption as the rate of production, and the consequent increase in stocks. Exportation from New York has improved again, but this, as we have pointed out before, does not mean the disappearance of the metal. Spelter is still exceedingly firm, while lead shows a marked improvement. There is a strong progressive movement in iron and steel, and things are regularly booming. Locally there is a very good tone, and furnaces and mills are busy at firm price.

PIG IRON—The market is much about the same as it was last week. Orders for imported iron are being huriedly placed, so as to get the stuff in before the close of navigation, while heavy consignments are now arriving. Canadian furnaces are very busy, and the strong wave of prosperity now appearing in the United States markets is having a very strong influence upon things here. Manipulation going on in Dominion steel and coal shares, has given rise to the statement that an attempt is being made to get control of the coal company with the ultimate object of a merger of the two concerns, or the amalgamation of all the leading steel and coal concerns in the country, creating an enterprise along the lines of the United States Steel Corporation. The further progress of their maniuplation will be watched with interest. The heavy buying in iron and steel across the border continues, and the rate of progress is very fast. Many furnaces have withdrawn from the market, or are quoting prices that some weeks back would have been considered ridiculous. The mills have sold all the steel they can spare for this year, and are indifferent as to booking business. Further advances have been made in bars, plates, and shapes. Cleveland warrants are now quoted at 52 shillings and threepence, a decline of one penny, but this is only speculative, and market conditions in the Old Country are reported as being brighter with an increase in ordering.

TIN—Despite fluctuations in the primary markets, there has been no change in tin, and we continue to quote 33½ for ordinary jobbing lots. A large amount of metal is going into consumption. The English market seems somewhat stronger. Despite the Banca sale, figures held well, and there is not only a good home consumption, but New York is buying well. The advance in tin plate, and the fact that the mills will be running full up for the remainder of the year make the situation look very healthy.

COPPER—Shading has been noticed in copper, and jobbing quotations may be said to have declined ¼c, and we now quote 14½c. Trade is good, and jobbers report satisfactory inquiries. Stocks in users' hands are light, and no ordering is done unless the metal is wanted for immediate wants. The English market is still in a speculative state, and quotations do not show the steadiness at one time associated with copper. Statistics as to European copper holdings show a big increase in stocks for September. This is not healthy in view of the increase anticiated in American stocks.

SPELTER—There is no change in spelter, and the jobbing price is still firmly fixed at $5.75. Orders are very good, and plenty of metal is changing hands. The strength of the market is inducing the heavy users to cover themselves well into next year, especially as producers are not anxious to book for delivery far ahead. The European syndicate has the market under strong control, and are helped by the strong demand from galvanizers. The St. Louis market is still advancing, and it is stated that stocks of spelter are less than one month's output, while consumption is greater than the output. Copper should be in this position.

LEAD—The market is unchanged at $3.60, with Trail at $3.50. The advance in the English market has made local quotation much firmer, and with trading showing improvement, a much better tone is apparent. Quotations in the English market have advanced a little under somewhat better buying, and strong holding by spot sellers. General trading prospects being brighter, this has reflected upon lead, especially as arrivals are being held down.

SCRAP—There is little doing in the scrap market, and we quote: Heavy copper and wire, lb. 11c.; heavy red brass, 10c.; light brass, 6½c.; tea lead, 2½c.; heavy lead, 2½.; scrap zinc, 3c.; No. 1 wrought iron, $11; machinery cast scrap, $14; malleable, $12; miscellaneous steel, $6.

TORONTO.

Oct. 8.—The situation among the metals is much the same as at last quotation, with the exception that the prospect of further advances in iron and steel is not so certain. The high prices in the United States has caused some of the big buyers in that country to hesitate, and this has made for a conservative feeling among the dealers and metal men generally. They look at the situation in two ways. Further high prices may be provocative of importations from abroad, and they may also act as a dampener on business.

Orders are still heavy, and nearly all the plants are running at capacity. Booking for 1910 is still discouraged with the exception of steel rails. In fact, railway buying is expected to be one of the principal features of next year.

PIG IRON—There is excellent demand for pig iron. While Cleveland warrants are reported easier in other markets, the prices locally remain firm, the opinion being that the markets outside are influenced by speculation. Supplies are fair, and there is inquiry for 1910. The whole situation is satisfactory, and the outlook is encouraging, showing an upward tendency, though no immediate advance is expected.

COPPER—The red metal is holding its own locally at 14c to 14½c, for lake and casting ingots. A great many of the outside markets note an easier feeling due to high stocks, and the speculation indulged in. The local situation shows that copper is quietly steady, with rather more inquiry this week.

LEAD—This metal remains firm at the stiffer price of last week—$3.65 for imported, and domestic 10 cents less. Business compared with the several previous weeks is very active.

TIN—Unchanged in conditions and price, 32½c remaining the local quotation. Fair trading is being done.

SPELTER—Demand is again broadening, and this week the call has been large. The price is firm at $5.75, the unchanged quotation from last week.

SHEETS AND PLATES—Stocks are being steadily depleted. The sales of both these lines has been unusually large this season and have exceeded expectations. The tone of the market is firm.

OLD MATERIALS — All the scrap metals are steady and unchanged from last week. Prices also remain as at last issue.

HARDWARE MARKETS

MONTREAL.

October 8.—As anticipated, some lines of Canadian hadware have advanced, locks, knobs, keys, escutcheons being now 45 and 10, an advance of 10 per cent. American lines are still very stiff, and another advance is expected. Wire quotations have been unaltered for some time despite the higher prices across the border, but a change has now been made in plain wire—bright,annealed, and oiled and annealed, which is now 2.30 base, an advance of 5c. Cotton goods have also gone up, sash cords being 30c for No. 8 and larger instead of 29½, clothes lines, 50 ft., $1.25; 75 ft., $1.85; 100 ft., $2.50; about 5 per cent. advance; and cotton twine, 20c instead of 19½c. These are the only changes announced at present, but the market generally is very firm, and further changes are likely in the near future. Dealers would be wise, therefore, in placing their orders promptly, and in looking ahead more than they have been doing. Hand-to-mouth ordering on a rising market is not good buying.

Trade has been very good during the week, but there is no doubt that colder weather would cause a stimulation in winter lines. Ontario and Northwest are buying freely, but Quebec is somewhat quiet.

Lumbermen's supplies are moving very freely now, and some good assorted orders have been received. Guns are still scarce, and the other sporting lines are in strong demand. Hockey sticks are moving very freely. Cutlery and silver ware are showing fine stimulation and a marked advance on former years is shown. Bolts, nuts, and wire nails are in great demand, and jobbers' stocks are showing the inroads, especially in nails, some heavy consignments of the last named going out to the Northwest.

BUILDERS' HARDWARE—The firming of prices in the States, where another advance is anticipated, has caused Canadian prices to be very stiff, and, as we expected, locks, knobs, keys, escutcheons and other hardware are now quoted at 45 and 10 instead of 50 and 10. Delivery is still hard to obtain in some lines, and with the demand continuing heavy, the situation will not become any better. With the advance in cotton goods, sash cords No. 8 and larger are 30c instead of 29½. We quote: Lock sets (inside) $4 per doz. and up, lock sets (outside) $13.20 and up, common rim locks $1.10 per doz., porcelain knobs $1.10 per dozen, sash cords, 30c.

FALL LINES — The market is firm with an advance in cotton clothes lines, 50 ft. being now $1.25; 75 ft. $1.85; 100 ft., $2.50, which is about 5 per cent. increase. Cotton twine is now 20c instead of 19½c. Weather strip, snow shoes, sleigh bells, sleigh heaters, ice creepers, are now moving freely, while sorting orders are good for lanterns, lamp burners, chimneys, horse blankets, cow ties, etc. Silverware and cutlery are moving in better strength. House cleaning lines are in free demand especially from the large centres.

SPORTING GOODS—The demand for guns and ammunition is still very strong, and delivery in some lines is hard to obtain. Skates and hockey sticks are in great request and jobbers' stocks are rapidly becoming low. Skate straps, hockey pucks, and snowshoe ties are now moving freely. The market is firm with no change of importance.

MINERS' SUPPLIES—The demand continues of a steady character, fair sorting up orders being dispatched. Railroad construction is being pushed forward vigorously in some districts, and good orders have been received in hammers, picks and concrete mixers. We quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—The market is very firm under a strong demand, and an advance may come at any time. Nails are selling freely, and if the consumption continues delivery may become hard to get. The Northwest is buying in particular strength just at present. We quote: Discounts on carriage bolts, ⅝ and smaller, 70; machine bolts, ¾ and smaller, 70; machine bolts ⅞ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—There is a very good demand for screws, and the market is firm but unchanged. We quote: 85 and 10 off for flat and round head, bright; 75 and 10 off for flat head brass, and 70 and 10 for round head brass.

LUMBERMEN'S SUPPLIES—These lines are now moving in very good strength, and lumbering districts are preparing for a strong demand. All articles are being taken immediately, as stocks are on the light side. We quote: Cant hooks, $12 a dozen and up; axes, $6.50 a dozen and up; axe handles, $1.15 and up; cross-cut saws (inferior), 25c per foot and up, better grades 43c. per foot and up; axe wedges, 25c a dozen and up.

SHOVELS—The demand continues good, and an improvement is noticed locally. The market is unchanged, and we quote: First and second grades of spades, 60 and 2½; 3rd and 4th, 50 and 2½; scoops, 1st and 2nd grades, 50 and 5; 3rd and 4th, 45 and 5.

STOVES AND RANGES—The warm weather has tended to keep back the demand for heating lines, but steady buying is noticed. Oil heaters and cookers are in fair demand, and heating accessories, such as coal hods, pokers, and ash sifters, are moving well for immediate delivery.

WIRE—An advance has been made in plain wire, bright, annealed, and oil and annealed, of 5c, the base price being now $2.30. Other lines are still the same. We quote: Barb wire, car lots mixed, $2.50; small lots, $2.55; plain twist, car lots, $2.80; small, $2.85. Galvanized wire No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots f.o.b., Montreal. Coiled spring fencing, $2.30; straight and mixed car lots, and $2.35 small lots. Plain wire, bright, annealed and annealed and oiled, $2.30 base.

TORONTO.

October 8.—September is reported to have been the best opening month of the fall season in the history of the hardware business in Toronto, and one of the best selling months of late years. The goods ordered, too, were of a higher grade, and permitted of larger profits for both jobber and hardwareman. Since the beginning of October the staffs of the various jobbing houses have been helping out the shipments and deliveries of hardware lines ordered during the previous weeks, and this has made the shipping rooms of the various warehouses present a more than usually animated appearance.

The demand is made at present for almost every hardware line. The improvement in the iron and steel trades has naturally made a call for seasonable hardware, and the fact that the past summer was an exceptionally good one from the farmer's point of view has wonderfully improved business at country points. There is continued activity in building in the larger centres with a consequent heavy demand for builders' hardware. Nails are also wanted, as are as well cutlery and sporting goods.

Prices are firm for all kinds of hardware and almost every week one or two lines are slated for an advance. This week knobs, locks, keys, window fasteners and cast articles of like nature among builders' hardware of Canadian manufacture have increased 10 per cent., with American made goods firmer. Harvest tools are also up, the increase amounting to 5 per cent.

BUILDERS' HARDWARE—All orders taken now for this line of hardware have a "hurry-up" call attached to them. The market is firm for all lines, and in

many of them advances have taken place within the week. Especially is this so in regard to Canadian door sets, escutcheons, knobs, locks, keys and window fasteners, which have gone up 10 per cent. from 50 and 10 to 15 and 10. In knobs the advance is only on the metal line, and porcelain, mineral and jet knobs remain at net, these goods having been advanced some time ago. Wrought brass butts are now 45 off revised list and wrought steel fast joint and loose pins are now 70 p.c. straight instead of 65 and 10. Spring hinges are firmer and the new price of No. 20 is $8.40 per gross. Sash weights too, are firmer, small lots going as high as $1.40 and even $1.50. Last week's advance in sash cord holds. The movement of goods is very satisfactory.

TOOLS—Like builders' hardware the call for tools, especially those used in the building trades, is active just now. Miners' and lumbermen's tools are fair in demand. All prices are very firm. Bit stock drills are now 57 cents a dozen, an advance of 4 cents, but miners' picks are somewhat easier, being quoted at $4.25 a dozen for the 6 to 7 pound sizes. Shovels and spades are steady at the easy figures quoted some weeks ago, and good orders have been placed for them and kindred lines.

HARVEST TOOLS—An advance of 5 per cent. has been made on harvest tools this week. There is a splendid demand for seasonable farm goods. Halters and cow ties are very active lines, and some fair stable fittings orders have been placed. Barn door hangers are slightly easier.

FALL LINES—The hardware articles going out under this head are rather varied just now. Besides the steady demand for general shelf hardware there is a call for many articles used about the farm and stable and country house. Lanterns and lamps and lighting and heating supplies, besides repair outfits and mending articles generally. Fence wire is selling well. All prices are firm.

HOUSEHOLD GOODS—A number of woodenware lines in tubs, pails, washing and scrubing utensils, etc., have been going out in fair sales of late. There is also a demand for galvanized articles and enamelware as well; also some tinware for kitchen use. Housecleaning articles are now much better in demand than they were some six or seven weeks ago.

HEAVY GOODS—Stove bolts are now quoted at 80 without any additional discount. In fact all stove lines are particularly firm. Stoves and furnaces are having splendid sales this season. One of the largest heating manufacturers reports his inability to supply the demand for furnaces, and he states the stove business is in much the same condition. Nails are keeping up to their high record for production, and jobbers state the demand for them comes from all over the Dominion. Blacksmiths' outfits and tools are active just now, and fair calls are made for certain sizes of structural material. Continued big sales are made in bars, with rods and pipe also very good.

SPORTING GOODS—These goods are among the leading hardware lines moving just at the moment. There has been a record sale of shot guns this fall which has brought stocks pretty low. In fact the big demand was not anticipated. Rifles are inquired for now more frequently than last month. Orders for powder and shot have been good. Cutlery is moving better than for months past. Hunting knives have the best call, but some fine holiday goods have been shown of late. Silverware and plated sets for Christmas have also been displayed. A number of football supplies have been sold. In winter sporting goods, hockey sticks and tobaggans are the leaders, one house sending out a carload of the latter goods for distribution in the west.

Hardware Trade Gossip

Ontario.

Wm. Vokes, dealer in carriage hardware at Toronto is succeeded by Wilkinson & Kompass, Hamilton.

Peleg Howland, of H. S. Howland, Sons & Co., Toronto, is back from a pleasure trip to the Pacific coast.

Sutherland Bros'. stove and tinware shop at London was damaged by smoke and water through a fire in the next block, last week.

E. T. Carter, who succeeded O. G. Priestland at Jarvis, Ont., three months ago, reports business as active and crops harvested by farmers in his district very satisfactory.

Reg. F. Scott, of Fergus, and Gerald Steele, of London, have purchased the hardware business of Jackson & Yorke, Parkhill. The new firm will be known as Steele & Scott, and will be under the management of the former.

J. B. Archer, manager of S. W. Moore's hardware store at St. Catharines, was a visitor in Toronto on Tuesday. Mr. Archer says that if he lives until February he will attend the Retail Hardware convention at London.

Mrs. Sparrow, widow of the late W. H. Sparrow, who for many years kept a hardware store at 87 Yonge Street, Toronto, died last week. Two sons, William and George, are both in the house furnishing business in Toronto.

The Automatic Tool Co., Toronto, has made an assignment for the benefit of the creditors. The assets of the concern are about $1,600, and the liabilities about $600. The company had been in business only a few months and prospects seemed bright, when the financial pinch came.

A. Matthews, Ltd., has been incorporated at Toronto, with a capital of $30,000 to take over the manufacturing of roofing and sheet metal material business carried on by Asa Matthews. The incorporators are Asa Matthews, John O'Donnell, Israel Morin and W. N. Downs.

The liquidators of the Ayton Cordage & Power Co., have issued statements of the winding-up of the affairs of the company, and have sent them out with dividends to the shareholders out of the assets, which amount to less than 3 per cent. The statement shows the balance, dividend among shareholders to be $1,-79.30.

George W. Howland, of the Graham Nail Works, Toronto, defeated H. A. Gunn, sales manager of H. S. Howland, Sons & Co., Toronto in a close race which ended last week. Mr. Howland became the happy father of a little girl on Oct. 1, while Mr. Gunn was all smiles on Oct. 2, when a baby boy was added to his family circle. Mr. Howland says Graham Nails are the best.

The Natural Enamelware Co., Toronto, who recently secured a Dominion charter, with $1,000,000 capitalization, have not yet decided where their factory is to be located. They propose to make high-grade enamelware and steel kegs for containing chemicals, white lead, horseshoes, etc. G. DeCourcey O'Grady is acting as trustee of the company until a permanent organization is effected. The new company have opened offices in the Canadian Birkbeck building, Adelaide Street East, Toronto.

Quebec.

J. H. Plummer, president of the Dominion Iron & Steel, has been stopping in Montreal.

The assets of J. A. Massicotte, hardwareman and grocer, St. Prosper, have been sold.

Robert Ryan, of Three Rivers, called at the Montreal office of Hardware and Metal. Mr. Ryan says the business outlook is very good.

J. Owen, of the Auto-Strop Safety Razor Co., Montreal, has returned from a long stay in Toronto, looking after his company's interests there.

W. Drysdale, mfg's agent, Montreal has been suffering from a severe attack of pleurisy, and has been treated at the hospital. He is now about again.

D. Lorne McGibbon, of the Canadian Consolidated Rubber Co., is president of the Canadian Consolidated Felts—a merger of the three leading felt companies in Canada.

Geo. Cullen was awarded $1,600 damages at Montreal by a jury presided over by Justice Guerin, against Frothingham & Workman. The plaintiff has been severely injured while moving heavy pieces of hardware, while in the employ of the defendants.

STOVE PEDDLERS CONVICTED.

An interesting case was decided by Justice Riddell, Toronto, last Friday, when he refused to quash a conviction registered against J. W. K. Van Norman and other peddlers at Owen Sound on May 29 last, for peddling stoves in Grey County without a license.

Van Norman, in appealing against the conviction and asking for a remittance of the fine, produced an agreement with the Western Foundry Company, Wingham, stating that Van Norman was a manager, and that the others were hired by him, and Van Norman argued that he and his men were not obliged to take out licenses.

The local magistrate held that the document was not a bona fide agreement, and that Van Norman had merely bought the stoves for sale, and Justice Riddell upheld him in this position, refusing to grant the appeal.

Trade Gossip from Canada's Eastern Provinces

Window Displays Made in St. John Hardware Stores — Cement Firm Looking for Location at St. John—Process of Making Iron Pipe.

ST. JOHN.

Oct. 4.—The retail hardware stores here have some very timely window displays of hunting and lumbermen's supplies. The windows of T. McAvity & Sons, and W. H. Thorne & Co., are particularly attractive for huntsmen. The local hardware dealers generally adopt the plan of making distinctive window displays, and as the majority have large window spaces they can do so to good advantage.

During the past week T. McAvity & Sons, have had their five windows occupied by hunters' requisites, carpenters' tools, lumbermen's supplies, blacksmiths' implements and fittings and fancy brass and nickeled chafing dishes candlesticks, etc. Each window was confined to one line. For instance, the hunters' window showed the stuffed figure of a bear standing on his haunches and wearing a cartridge belt filled with ammunition, a knife between its teeth and a rifle clasped in one of its fore legs. Around the animal were shown guns, revolvers, ammunition of all kinds, and in fact, everything that a hunter would require. Speaking of this display, the window trimmer said the sale of hunting goods had been particularly large, so great in fact, that a rush order for more stock had been sent away and the new goods were being opened up last week.

The window devoted to lumbermen's supplies showed axes, chain and rope of various sizes, hones, a grindstone, (mounted), crosscut saws, peevies, horse blankets, lanterns and horse fittings of various kinds. The blacksmiths' window had a portable forge and all tools incidental to work of this kind.

The carpenters' window contained everything needful for house building or repair work.

Asked about his methods in planning and executing window displays, the trimmer replied that he believed in always making a display of one line of goods at a time. It was much more effective than a mixed window in which one thing was not more prominent than another. "I change the windows as often as possible, and invariably use only one line of goods. I never make a plan or draft out a window before I start," he said, "but I always aim to make the display a little different. I use my own ideas entirely, and I find that the windows usually have the desired effect of selling the goods."

The site which Mr. Craig wants is situated on the bank of the river, so that schooners could load there and there is an abundance of lime stone in the vicinity.

The Town of Dorchester, Westmorland County, has invited Mr. Craig to locate there, and has offered a free site with water frontage on Shepody Bay, a spur railway track and exemption from taxes.

The exhibition association are planning the erection of a new building to be devoted to agriculture, and also new cattle sheds, in view of the Dominion Fair being held here in the fall of 1910.

Customs receipts for the port of St. John, for the month of September, amounted to $106,215.72, which is an increase of $12,444.94 over September last year.

W. E. H.

MONTREAL.

October 4.—During the recent convention of the National Master Plumbers' Association in this city, a visit was paid to the iron pipe plant of the Montreal Rolling Mills, where the process of manufacture was explained by the staff of the company, headed by Assistant General Manager Ross McMaster. It will be remembered that the members of the Ontario Retail Hardware Association excursion party visited the Rolling Mills in August, but were prevented from seeing iron pipe and fittings made owing to an accident in one of the furnaces forcing the closing down of the plant for a few days.

At the time of the master plumbers' visit huge traveling cranes were seen transporting the skelp from the yards to the gas furnace, where it entered in flat sheets, and on leaving was drawn through a bell and formed into pipe of the butt weld type. Pipe of 1¼ inch size was being drawn in 20-foot lengths, and the night before, September 16, a record run of 3,991 lengths of this size had been made.

Leaving the gas furnace the red hot lengths of freshly formed pipe are drawn onto a platform by boys and then passed on by chain rollers to a sizing roller, and passing through this is made a uniform size for threading. From this it is carried by chain rollers across a table where an automatic counter registers the number, and on to the threading department, where it is dropped into piles. Then a crane carries bundles to tables where the rough ends are removed, the pipe threaded and couplings put on. The next process is the testing of the pipe under a water pressure of 600 pounds, far greater than will be required in actual use. The galvanizing is done in vats at the main works of the company, but a new galvanizing plant is to be erected at the pipe works during the coming year.

A section of the pipe drawing building is given over to the manufacture of couplings, short lengths of iron being bent into form and then forged and hammered, afterwards going to the machine department to be finished and threaded.

Interesting Trade Items Gathered in Ontario

Ottawa Hardware Firm to Retire From Business — Sporting Goods Merchant May Run for Kingston Mayorality.

OTTAWA.

Oct. 5.—Trade is becoming brisk now and one dealer remarked that on Saturday he had sold thirteen stoves. However, the stove business is good with everyone.

The building permits for the month of September amounted to $172,050 as against $178,350 last year. However, there has been a big increase and the year's total will show a substantial increase.

J. M. Young, of the Ottawa Paint Works, reports trade as being good, and reports a brisk demand for glass. Turpentine is quoted at 80 cents a gallon in barrels and linseed oil at 70 cents.

Charles Watt has moved from the corner of Bank and Somerset streets to 116 Sparks street.

J. A. Acton's store on the corner of Bank and Third Ave. has been greatly improved by some alterations at the rear. More room and better facilities for display are the result.

The Philip Carey Co., manufacturers of Flexible Magnesia Cement Roofing and Asbestos coverings, have opened an office in the Citizen Building. G. Dingwell is in charge.

After thirty-five years of successful business in their present stand on the corner of Sparks and Metcalfe streets, the well-known hardware and sporting goods firm of Graves Bros. announces its retirement from business, dating May 1st. Established in 1874 by Fred T. and Frank G. Graves, under the firm name of Graves Bros., this business has become one of the best known in Ottawa and eastern Ontario. Shortly after its inception Frank Graves died and since then Fred T. Graves has carried on the business under the original firm name. Seven years ago his son George C. Graves was admitted to partnership and by the courteous and fair treatment of

customers a large, substantial and increasing business has been built, so that their departure from the old stand is regretted.

G. E. M. H.

KINGSTON.

Oct. 5.—The inland revenue collections for the month of September, totalled $10,114.77.

Ald. "Harry" Anyrone, of Anyrone Bros., sporting goods, is beinng urged by his friends, to run for mayor next year. As yet, he has given no decision. He has been in the council for several years, and has rendered good service. This year, he is chairman of the property committee, which had a good deal to do, in the erection of a new dome at the city buildings, with other alterations.

According to figures compiled by Assessment Commissioner Gordon, the population of Kingston has only increased by twenty souls during the past year. The total assessment is $8,930,348, or an increase of $276,723 over last year. The business assessment amounted to $365,259.

Ten painters, employed by A. McMahon & Co., went on strike, Monday, over the employment of non-union labor. The men were on strike several months ago, over the same cause.

Elliott Bros. have just completed the work at the Royal Military College, of putting in new water mains, and erection of a tank 115 feet high.

A resolution passed by the Board of Health, states that after May 1, 1910, no privy vault, cess pool or reservoir into which a privy water closet, staple or sink, shall be hereafter established or maintained within the limits of the City of Kingston, within a certain boundary, and that the method of disposal shall be by means of water closets, sinks and proper fixtures, connecting and discharging into sewers. This new regulation will result in the expenditure of thousands of dollars during the fall and winter.

E.G.B.

GUELPH.

Oct. 5.—Oscar Klinck, of the staff of G. A. Richardson's upper Wyndham Street hardware store, was married recently to a Miss Brown of this city.

James Howie, of the staff of Bond's hardware store left on Saturday morning to take a position in Toronto.

The stove business in Guelph during the past week has been exceptionally good, the best in fact which some of the local stove dealers have witnessed for years. Messrs. Occomore, Wolcott, and Howard all expressed opinions to this effect. Penfolds also reported an active trade during the past couple of weeks.

Will Mitchell, of the wholesale department of Bond's hardware store, has left for Vancouver, where he is to act as an agent for a ready roofing firm.

G. A. Richardson has two good windows, one of hunting goods entirely, and the other dressed of nothing but tinned kitchenware.

Bond's hardware store has one very good hunting goods window, while their other is dressed with builders' tools exclusively.

The sales of builders' supplies, particularly cement, have been very gratifying in Guelph hardware stores during the past week.

News From the Prairie and British Columbia

Vancouver's Fire Brigade Using Motors Instead of Horses—To be Record Building Year—New Industries at Vancouver—Big Deal for Timber Land on Vancouver Island — Opening of New Warehouse at Winnipeg.

VANCOUVER.

October 2.—The value of the month's building permits was in round numbers $800,000, as compared with $324,505 for the same month of last year. For the past week the permits totalled $78,915. The total for the year to date is $5,700,000, or within $300,000 of the figures for the whole of 1908, which was a record year. The outlook, therefore, is that 1909 will establish a new record in building. In a year or so, when the larger structures are completed, the appearance of the city will be much improved. One of the incentives to erecting dwellings, is the terms on which the C.P.R. is selling lots in one of its sub-divisions. They are offered at $500 if the buyer builds a house to cost not less than $500 and to live thereon for three years, otherwise the cost is to be $1,000. Many are taking property on the building terms, with the result that many houses are going up in that particular part of the outskirts.

Vancouver had a test the other day of self-propelling fire extinguishing apparatus which would be difficult to equal in any other city in Canada. It was in connection with No. 1 hall, which is equipped with a horseless brigade, having ladder, hose and chemical wagons all motor-powered, while the pumping engine is a huge steam traction. Chief Carlisle declares that after test the motor machines cost far less to maintain than horses, they can get to a fire in half the time and are far handier in manipulation. It is expected that in time all the fire halls in Vancouver will be equipped with mechanically propelled apparatus.

Walter Thomas, of Vancouver, whose invention of a gas producer was announced some time ago, has sold the patent rights for the United States to capitalists represented by B. H. Silver, of Bellingham and Seattle. The price is not states, but is reported to be in the neighborhood of the seven figures. The first plant after the Thomas patent to be established in Canada for industrial purposes will be erected at North Vancouver and will be ready about next month. The American syndicate will also erect one shortly in Washington state.

VICTORIA.

September 30.—One of the most important deals in the history of the Island has just been put through. The C.P.R. has just signed an agreement with the American Securities and Finance Company for the title of 54,000 acres of the best timber land lying around Cowichan Lake, the price being $1,500,000. The C.P.R. are to build a standard gauge railway from Duncans to the lake, a distance of about 25 miles, and from Duncans to tide water, about 5 miles. It is understood that the railway will cost close to 500,000. As indicating that the mills will be amongst the largest in the west, it is stipulated in the agreement with the C.P.R. that the capacity of the plant will be at least 150,000 feet per day and the minimum cut per annum shall be 40,000,000 feet. This deal will open a large tract of country. It is also the intention of the C.P.R. to build a hotel at or near the lake, as it is a great fishing and hunting resort.

The sewer by-law was defeated by four votes at Nanaimo this week. Two other by-laws carried. The Bastion street bridge and the waterworks by-laws getting the approval of the ratepayers.

The Ladysmith city council has awarded the meter contract to Jovante Meter Co., an English firm with an agency in Winnipeg. Five hundred have been ordered with more to follow as required.

The advisory board of St. Andrews Cathedral have decided to effect improvements and additions to Institute Hall which will involve an expenditure of $25,000.

The Victoria purchasing agent is calling for tenders for 20 tons of pig lead. Tenders will be received up to November 15th.

W. B. C.

SASKATOON.

Oct. 4.—Prospects for fall trade are good. The cold snap during the latter part of this week induced merchants to uncover the remaining heaters from last season, in case there should be a demand for them earlier than usual. Shipments of this season's stoves and heaters are now arriving. Threshing operations are still in full swing and hardware men continue to supply the necessary equipment for this business. The business done in carpenters' tools for the past few weeks has been remarkably good, while ammunition and other sporting requisites find their way over the counter at frequent intervals. All kinds of builders' supplies, paints and oils, are selling well. Wheat of the best grades continues to

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises should not fail to use the Want Ad. Advertisement page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere who is looking for just such a proposition as you have to offer.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

Price $1.00, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East Toronto.,

come in from the surrounding districts, thus giving additional impetus to the volume of business done in the city. Travelers report receiving good orders, and in some cases beyond their ex[illegible]tations.

In addition to the above by-laws, the ratepayers have given their sanction to the construction of a subway at Twenty-Second Street, under the C.N.R. tracks, to connect the eastern and western portions of the city. The undertaking is estimated at $90,000, $70,000 of which will come out of the city funds, the remaining $20,000 to be put up by the Canadian Northern Railway, in compliance with the order of the Railway Commission. Away southwest of town the C.N.R. are pushing their line on towards Calgary.

Only a few days ago the steel was laid as far as Kindersley, the first divisional point, about 126 miles from here. For some time it has been known that this would be an important point on the new line and many have decided to cast in their lot in the new town. Several were settled near the new townsite previous to the arrival of the railway, but it was not until the steel was actually laid that the town began to grow in earnest, when things were in shape for bringing in building materials, fuel and supplies. The company have surveyed several miles of side-tracks and yards. A station is to be built, with roundhouse, shops, water tanks, etc. In the new town there are already two hardware stores, Dykes & Rutley and Phillips Bros.; four general stores, blacksmith shop and various other establishments. Lumber yards are to follow, and soon every line of business will be represented. The new town is situated in the heart of a fine farming country, which makes its prospects as a business centre of the brightest.

WINNIPEG.

Announcements were sent out last week by the McClary Mfg. Co. for the re-opening of their building on Bannatyne Avenue, on the evening of October 2. The management were very much gratified by the attendance of over 550 Winnipeg citizens, who enjoyed a well prepared programme. Manager Foote conducted the visitors through the spacious building and great interest was manifested in the remodelled structure. Improvements made include a modern elevator, vaults, a sprinkler system and electric fire alarms, connected with the central fire station. The new bin fixtures are unique and absolutely fire-proof, being constructed of heavy wire casing, electric welded, thus allowing light into the bins to display the goods. Mr. Foote received many congratulations on the equipment of the new interior, and also upon the short time in which the work had been accomplished.

On August 28 the fire occurred. The next day temporary offices were in use and the following day goods were being shipped. One week was spent in cleaning up and on September 8 four floors and the roof were laid complete. The storage and care of salvage was a great feature of the intervening events. In the auditorium rink, where all the enamelware was stored, about eighty women and twenty-five men were employed to clean, cull and pack the goods.

The reconstructed building was beautifully decorated for the reception. Dancing, refreshments and music were the chief attractions.

Retailers report trade very quiet just now in the general lines. They are very much disappointed in the collapse of the builders' hardware and carpenters' tools trade, owing to the great strike which has been pending for several weeks. The continued summer weather has prevented the retail trade in stoves and heaters from moving and there is nothing especially in demand. The month of September was a good one for local retailers in spite of strikes which began to be felt about the last ten days. The demand was good in buck saws, files, door mats, both brush and metal, lanterns and various household goods. It is owing, no dodbt, to these seasonable goods that retailers can report September trade so encouraging.

It is expected that the carpenters will be back to work this week, when the demand will greatly increase for builders' hardware and tools. Many new men will be engaged and there will be several weeks of good weather to permit a great rush in an attempt to complete many new buildings.

The new building being erected by the Gutta Percha and Rubber Company in this city, for the use of the Winnipeg Rubber Company, will be one of the finest wholesale houses in the west. The building will be 120x50 feet in dimensions and seven stories in height. It will be absolutely fire proof, its pillars and beams being solid concrete and the exterior, red brick. A. A. Andrews, who is manager of the concern stated that the output to the retail hardware merchants during the past year was 70 per cent. in advance of any previous year.

The Miller-Morse baseball team won the league cup in the mercantile and wholesale hardware leagues. Last winter also they won the Moulden trophy in hockey.

L. A. Blackwood, sales manager in the wholesale house of Miller-Morse Company, left last week for Nova Scotia. L. C. H.

Reasons for Objections to New Act in Manitoba

The Extra Provincial Corporations Act Being Strongly Opposed—Meeting Held and Opposition Voiced—Business Men Claim It to be Unfair to Large Outside Manufacturers Doing Small Business in the Province.

Staff Correspondence.

Winnipeg, Oct. 5.—On the evening of October 1, the various committees representing the Brokers' Association, the Manufacturers' Association, Board of Trade and Grain Exchange, met for the purpose of converging into one argument the results of the various committees investigating in their respective departments regarding the opposition to the present reading of the Extra Provincial Corporations Act, which is to go into effect on November 1st next.

There was a large number of Winnipeg's most influential business men present, and H. P. Pennock, who has conducted the campaign against the Act, and who has been instrumental in arousing the present effective opposition, was asked to preside over the proceedings.

The secretaries of the various committees submitted their reports, which in almost every way were found to harmonize. After discussing the various points brought forward, a general committee was appointed to frame a resolution, which would embody all the arguments submitted, and this resolution is to be forwarded to the Cabinet with the request that the date of the enforcement of the Act be postponed until after the next session of Parliament.

Objections to the Act.

The four main clauses of the resolution will direct the attention of the Cabinet to the following grievances:—

1. Resident brokers and agents already pay a local and provincial business tax, and this should be sufficient, irrespective of the the firms they represent.

2. The extra provincial corporation fees are altogether unfairly proportioned, a firm with several millions capitalized stock and doing a comparatively small business within the province will be compelled to pay more than a firm whose capital stock is less, and whose business in the province may be vastly more.

3. It is unreasonable that any company be asked to submit their annual financial report to the Government, which may or may not become public property.

4. Brokers and commission men consider it unjust that they should be discriminated against in favor of travelers.

The act manifestly offers inducements to outside firms to dispense with resident brokers' services, which service will be put into the hands of traveling salesmen.

Local business men who are doing all in their power to oppose the increase are very anxious that outside firms and manufacturers, which are affected by the Act, should co-operate with them. It is understood that some steps have been taken by the Manufacturers' Association, and it would seem reasonable that the combined opposition of each party would be more effective than individual action. Manitoba business men are working for that which will greatly benefit manufacturers, and they think that in some way the outside firms should acknowledge their endeavors.

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook — Hardware Quotations Corrected by Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Oct. 8.—Wholesalers are receiving light orders this week, and the trade in their line is quiet. The out-of-town merchants stocked heavily some weeks ago, and farmers are busy at home just now. As a consequence orders for immediate shipments are light. Seasonable goods alone are in demand to any great extent. Axes, axe-handles, snow shovels, logging chains and ammunition are in special mention. We quote new prices on logging chains and shovels this week. Ruddy harvester oil and linseed oil have each advanced two cents.

The barbed wire market is weaker, but new prices will not be quoted until the first of the year at any rate. The following wire prices prevail. The trade is heavy in galvanized and corrugated roofing at present.

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.80 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12 $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

HORSESHOES — "M R M" and "Bell" iron. No. 0 to 1, $4.50; No. 2 and larger, $4.25; snowshoes, No. 0 to No. 1, $4.75; No. 2 and larger, $4.50; steel, No. 0 to 1, $4.85; No. 2 and larger, $4.60; featherweight, $6.

HORSE NAILS—"MRM" cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75 10, 11 and 12, $2.65 in 25-lb. boxes.

WIRE NAILS—$2.80 Winnipeg and $2.35 Fort William.

CUT NAILS — $2.90 per keg base; pressed spikes, $3.30 base, usual extras.

SCREWS—Flat head, iron, 80, 10, 10, and 10 per cent.; brass, 75 per cent.; round head, iron 80 per cent; brass, 70 per cent.; coach, 67½ per cent.

BOLTS—Carriage ⅜ and smaller, 65 per cent.; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55 per cent. copper; No. 7, 29c; 8, 29½c; and over, 45; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots 3; stove bolts, 77½.

RIVETS AND BURRS—Iron rivets, 55 per cent. Copper, No. 7 29c; 3, 29½c; 9, 30½c; 10, 31¾c; 12 34c. Copper burrs, No. 7, 39c; 8, 40c; 10, 43c; 12, 46c. Copper rivets and burrs; No. 8, 30½c; 10, 33c per lb.

HARVEST TOOLS—50, 10 and 5 per cent.

AXE HANDLES—Turned, s.g. hickory, $3.15; No. 1, $1.90; 2, $1.60; octagon, extra, $2.30; 1, $1.60.

AUGUR BITS — "Irwin" bits 47½; other lines, 75 per cent.

BLOCKS—Steel, 45; wood, 60 per cent.

HINGES—Light T and strap, 65 per cent.

HOOKS — Brush, heavy, per dozen, $8.75; grass, $1.70.

FILES — American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

STOVE PIPES—6-inch, $8.69; 7-inch, $9.31.

TINWARE, Etc. — Pressed, retinned and plain, 75 and 2½; pieced 30; japaned ware, 35; Famous enamelled ware, 50; Imperial, 60, one coat, 60; Premier, 50; Colonial, 60; Royal 60; Victoria, 45; White, 70 and 5; Diamond, 50; Granite, 60 per cent.

GALVANIZED WARE—Pails, 40 and 5 per cent. Other galvanized lines, 37½ per cent.

LOGGING CHAINS—5-16, $5.50; ⅜, $5; 7-16, $4.70.

SHOVELS—Discounts on No. 1, 60 and 2½ per cent.; No. 2, No. 3, No. 4, 50 and 2½ per cent.; No. 1 scoops, 50 and 5 per cent.; all other grades 45 and 5 per cent.; fifty cents per dozen net is added to equalize eastern freights.

SOLDER—20c per lb.

LANTERNS—Cold blast, per doz., $7; painted, $3; galvanized, $4.10; 26, $3.35 roofing, 28, $3.45 and $4.45. Crimped, coppered, $9; dash, $9.

ROPE—Sisal, 9½; pure manila, 11¼; British manila, 10c; lath yarn, 9¼c.

CORRUGATED IRON AND ROOFING, Etc.—Corrugated iron, 28 gauge, $4.35; pressed standing seamed roofing, 28, painted, $3.20; galvanized, $4.30; 26, $3.55 and $4.55.

BAR IRON—Bar iron, $2.35; Swedish iron, $4.75; sleigh shoe steel, $2.50; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $13.

PIG LEAD—$5. Lead pipe, $6.

SHEET ZINC—Casks, $7.00; broken lots, $8.

COPPER—Planished copper, 33½c per lb.; tinned, 24c.

IRON PIPE—Black pipe, ¼ in., $2.45; ⅜, $2.75; ⅛, $3.30; ¾, $3.90; 1, $5.65; 1¼, $7.70; 1½, $9.25; 2, $12.35; 2½ $20; 3, $26.50; 4, $38; 4½, $50; 5, $48.50; 6, $62.50. Galvanized: ¼ in., $3.40; ⅜, $3.70; ½, $4; ¾, $5.20; 1, $7.50; 1¼, $10.20; 1½, $12.50; 2, $16.60; 2½, $30.

FITTINGS — Wrought couplings, 60; nipples, 75; malleable fittings, 25; bushings and unions, 60.

GALVANIZED IRON — Apollo. 16-gauge, $3.90; 18, $3.95; 20, $4; 22 and 24, $4.10; 26, $4.30; 28, $4.70; 30-gauge or 10¾-oz., $4.90; Queen's Head, 20. $4.10; 24, $4.30; 26, $4.70; 28, $4.90.

TIN PLATES—I.C. charcoal, 20 x 28, full box, $9; ½ box. $4.75; IX. full box, $11, ¼ box, $5.75; IXX., full box, $13.50; ½ box, $7.

TERNE PLATES—I.C. plates, $8.50.

CANADA PLATES — Half polish, 6 and 7-inch, $3.10; 8-inch, $3.35; full polish, 6 and 7-inch, $3.85; 8-inch, $4.10.

LUBRICATING OILS—600 W. cylinders, 80c; Maple Leaf cylinder, $1 per gal., 700 A. cylinder, 75c; Sterling cylinder, 55c; Perfection cylinder, 45c; Capital cylinder, 60 and 55c; Solar red engine, 32; Atlantic red engine, 30c; Eldorado castor, heavy, 28c; medium, 28c; Ruddy harvester, 30c; standard gas engine oil, 36c; Renown engine 38c.

PETROLEUM AND GASOLENE — Silver Star, in bbls., per gal., 19c; Pemoline 25c; Sunlight, 21c; case $2.35; Family Safety, 24c; Search Light, 22c; Sterling Light, 24; Silverlight, 21; engine gasolene, 24c; Acme Lamp, 32; White Lily, 23; Royal, 22½c.

PAINTS AND OILS — White lead, pure, $6 to $6.50, according to brand; bladder putty, in bbls., $2.50; in kegs, $2.55; turpentine, bbl. lots, 85c per gal. linseed oil, raw, 71c; boiled, 3c per gal. advance on this price.

Edmonton Quotations.

BARB WIRE—$4 per 100 lbs.; plain twist wire, $4.25; brt. wire staples, $4; poultry netting, 50 per cent.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

The M.C.R. anticipate a busy winter in their St. Thomas shops.

A large planing mill will be erected at Montreal by Friedman Bros.

The Cockshutt Plow Co., Brantford, are making additions to their plant.

The C.P.R. contemplate erecting a 250,000 bushel elevator at Vancouver.

A new sash and door factory is to be built at Victoria, B.C., by Burdick Bros.

The B. C. Electric Co. will erect a second car shop at New Westminster for the repair of cars.

The Canadian Northern Railway have a permit for a new freight shed at Brandon to cost $9,000.

P. J. Noel, Merrill, Wis., proposes establishing a large factory for woodenware at Fort Frances.

The Beaver Lumber Co. have purchased a site at Portage la Prairie for the extension of their plant.

The Robinson & McKenzie Lumber Co. will erect a mill at Kamloops, B.C., if a site can be secured.

V. Williamson has been given the contract to build a laboratory building at Walkerville for the Geo. H. Rundle Co.

The Hartland Concrete Block Co. is a new concern which will make concrete goods of every description at Hartland, N.B.

The Grand Trunk will shortly commence work on a considerable enlargement of their freight sheds at Turcot, west of Montreal.

The Provincial Steel Works Co., Welland, are considering plans for the enlarging of their plant by the erection of a 100-ft. addition.

The Atikokan Iron Co., Port Arthur, will operate their plant all winter, having made arrangements to sell their output in the east.

Work will be commenced almost immediately on the rebuilding of the Niagara Falls planing mill, Niagara Falls, recently destroyed by fire.

Another story will be added to the Ogilvie flour mills at Fort William, and the Kaministiquia Power Co.'s plant at the same place will be doubled.

Work has been started on the foundation of the new Camrose, Alta., planing mill. The building will be rushed to completion as speedily as possible.

The David Craig Co., Boston, Mass., capitalized at $1,500,000, and manufacturing concrete-block houses, desire to establish a branch plant at St. John, N.B.

The B. F. Graham Lumber Co. has announced its intention of constructing at Victoria, B.C., in the near future, a sawmill with a daily capacity of 100,000 feet.

The National Carbon Co., Cleveland, Ohio, makers of electrical batteries, carbons and supplies, will locate a Canadian factory at Toronto to employ over 200 hands.

Vickers, Maxim & Co., and other British ship-building firms offer to establish navy yards in Canada if given the contract to construct the ships of the new Canadian navy.

The furnaces at the Granby smelter are being further enlarged to smelt about 4,500 tons of ore per day and manufacture 40,000,000 pounds of copper per annum.

The American Finance and Securities Co., New York, have purchased C. P. R. timber lands on Cowichan Lake, B.C., and will erect a large mill, spending $1,000,000 on development.

If a site can be secured, the Cranbrook mill people will erect a plant costing over $100,000 at Kamloops, B.C. In addition, they will also put in a sash and door factory and a casket factory.

The by-law authorizing the lending of $50,000 to the Tudhope Carriage Co. for twenty years, without interest, to assist in rebuilding their factory, recently destroyed by fire, was carried at Orillia by a vote of 763 to 22.

Two United States industries—one an electrical concern doing a business of $50,000 yearly in Canada, and the other a textile manufacturing concern which would employ about 150 hands—desire to establish branch factories at Ottawa.

William Currie & Co. have sold their mill property and timber limits at Charlo, N.B., to the Credit Foncier Canadien, of Providence, R.I. The business will be run as formerly and a large mill will be erected to manufacture spruce.

It is stated that the interests controlling the Berlin Mills property in New Hampshire are planning to instal a print paper mill plant at La Tuque, Que. It is also reported that the International Paper Co. has prepared plans for numerous mills in Canada.

H. S. Holt, president of the Montreal Light, Heat and Power Co., and F. W. Thompson, of Montreal, vice-president and general manager of the Ogilvie Flour Mills Co., are interested in a wire and iron rolling mill proposed to be built at Fort William and on which $500,000 is expected to be spent.

Municipal Undertakings.

A $17,000 waterworks system is suggested for Carlyle, Sask.

Excavation work has been commenced on Cobalt's waterworks system.

A by-law to raise $5,000 for waterworks extension will be voted on by Galt ratepapers on October 16.

New Westminster's waterworks intake pipe will be enlarged to supply Coquitlam and Port Moody with water.

The contract for excavation for water mains in St. John, N.B., was awarded to Robert Short and Peter Arsenault.

Summerland, B.C., council proposes to buy the domestic and irrigation water systems of the Summerland Development Co.

Toronto's city engineer advises that a number of new water mains are necessary for domestic purposes and for fire protection.

Wells & Emmerson received the contract for 3,500 feet of 20-inch spiral riveted pipe for Port Arthur's waterworks intake pipe.

The proposed water systems, to embrace the municipalities of Burnaby, South Vancouver and Point Grey, is estimated to cost $500,000.

The Ottawa city council recently passed a by-law sanctioning the purchase of a site at the east end of the city for a civic incinerator plant.

Tenders were recently opened for the construction of a sewer on 8th Avenue, Rosemount, Montreal. The contract was awarded to Mr. Dennis, $9,982.

City Engineer Ker recommends to the Ottawa Water Committee the establishment of a reservoir with a capacity of 30,000,000 gallons. The cost of the work is estimated at $150,000.

The Toronto Board of Control recently awarded contracts as follows: Sewers—Emerson Avenue, McKnight Co., $1,940; Davenport road, Godson Co., $44,380; Humberside Avenue, Maguire Co., $41; Keele St., Excelsior Co., $300.

At a recent meeting of Coldwater ratepayers it was resolved that the council be asked to have a by-law submitted to the people to decide whether the village will instal a system of fire protection alone, at an approximate cost of $10,000, or a complete waterworks system at an approximate cost of $29,000.

Public Buildings.

The North Ward of Lethbridge is to have a fire hall at once.

St. Thomas is making an effort to secure a Provincial technical school.

Tenders will be received until October 11, for the erection of a school building at Hamilton.

A new pathslogical building for the Montreal General Hospital will be erected at a cost of $50,000.

A by-law to raise $25,000 for the erection of a new school building will be submitted to the Meaford ratepayers.

The Owen Sound Hospital Board is taking steps towards the beginning of the construction of the new wing to the G. & M. Hospital. Plans are now under preparation.

General Superintendent Brown, of the Great Northern Railway, made the definite statement that the company would build a new depot at New Westminster next year.

The new advisory board of St. Andrew's Cathedral, Victoria, have decided to effect improvements and additions to Institute hall, which will involve an expenditure of $25,000.

The Toronto Board of Control having approved of the site purchased by the Board of Education for the new Northwest High School, the work of building will go on at once. Excavations will be begun this fall, and by the opening of the fall term next year, a new $150,000 High School building will be ready for occupancy.

Work has been started on the excavations for the foundation of the first permanent building for the new asylum to be built in Coquitlam, B.C., near Westminster Junction. The building will be an exceptionally large one, and will cost nearly $400,000, and will accommodate 600 patients. Five other buildings in all will be added later, but they may not be completed for some years.

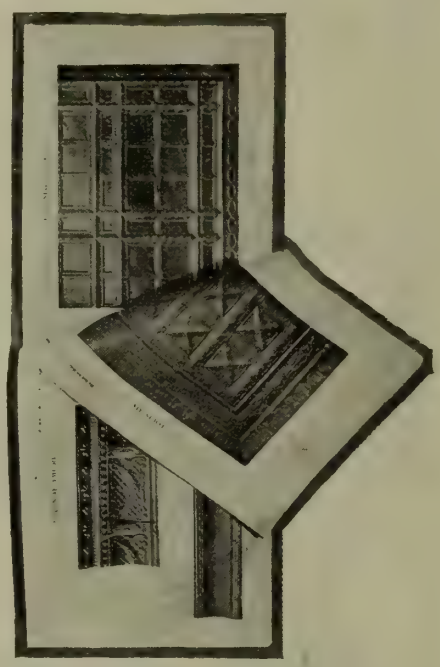
Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.



Gasolene Torches.—Catalogue, No. 15 has been issued by Otto Bernz, 21 South 13th Street, Newark, N.J., illustrating gasolene and oil torches for tinners' and plumbers' use. It also shows other lines of plumbers' specialties, such as metal pots and wrought iron ladles, the concern making these along with closet screws, bolts and washers, sewer cleaners, etc. Those using this class of goods will do well to secure the new catalogue.

Wire Goods Display Suggestions.—The Wire Goods Co., Worcester, Mass., have just issued an interesting booklet, entitled "Display Suggestions." The present booklet is numbered "2," a previous work having been published about two years ago. The booklet contains full-page illustrations of window and interior displays of wire goods, and by means of pictures gives helpful hints to hardwaremen on basement trims, counter displays, shelf shows, post and frame designs and exposition layouts. All these, of course, show the company's wire goods, but even so, they contain many helpful suggestions for the hardwaremen, and show what neat displays can be worked with ordinary utensils.

To Aid Hardwaremen. — Something unique in the way of a booklet is that styled "Co-operation," published by F. W. Bird & Son, Hamilton, Ont., makers of "Paroid Roofing." In reality the booklet tells the story of how Bird & Son will help the retailer to make sales by co-operating with him in advertising Paroid. The firm has a selling and advertising reputation of nearly a century, and are the originators of ready roofing. They help the hardwareman with his mailing list; supply advertising matter in various forms; help with general and local newspaper advertising, window displays and original ideas.

Gurney Stove Price List.—A pocket price list (No. 64) of Oxford stove lines has been issued by The Gurney Foundry Co., Toronto, as a companion to the No. 64 catalogue of stove lines recently put out by the company. It contains in concise form the prices and terms of the many lines of ranges, heaters, furnaces, stoves, gas ranges, carving tables, etc., manufactured by the company, and should be a useful book to those in the trade handling Gurney lines. As well the company is issuing some new literature specially descriptive of this season's goods. One pamphlet is devoted to the 100 series of the Imperial Oxford range; another to the Oxford O.K. range (Gurney's masterpiece); and a third to Helpful Hints concerning heating stoves. The Oxford Golden Nugget, Chancellor Steel Range, Oxford Chancellor and the Oxford Hazel are treated of in separate leaflets; and a revolving cap for chimneys, made of cast iron and set on ball bearings, is a new contrivance for the preservation of the chimney and the helping on of the draft.

Metal Ceilings—The Galt Art Metal Co., Galt, Ont., have a new catalogue, styled "A-3," which is just off the press, and which will be sent to any reader of Hardware and Metal on request. The catalogue introduces many new and original designs as well as several improvements in the mechanical construction of metal ceilings. The company are now introducing to the Canadian trade ceiling material with machine-cut beads. The usual method of producing these beads (or corrugations at the edges of each plate, cornice, border, etc.), is to model them with the design in clay. As the steel dies always warp more or less in cooling, it is a difficult matter to make the different members of the design absolutely true. By a new process, however, which has been used by several American manufacturers, the beads are planed into the steel die, which assures their being mechanically true. Another improvement, which practical ceiling men will appreciate is that in the panelled designs the edges of the plates return to the ceiling line making it unnecessary to strip the ceiling under these joints. The book is 104 pages and cover, very attractively printed, with upwards of 100 engravings illustrating the numerous handsome designs in mouldings and ceilings, which the company are now producing.

Improvement in Metal Ceilings.

Marine Engine Castings for Amateurs. —"The cost of a finished engine bought complete has prevented a great many men from owning a boat" states the "Faultless" booklet issued by The Valley Boat and Engine Co., Baldwinsville, N.Y. The supplying of frames, patterns and material to amateur boat builders and small shops has been the business of this company in the past. To this has now been added the supplying of the engine castings and finished parts. The company guarantee satisfaction and state that any good mechanic can build an engine from their castings. Instructions are given by means of blue prints, and the only tools required to assemble the parts are a wrench, a file and a scraper for the bearings. The booklet contains a number of illustrations—one showing a boat built by an 18-year old boy—and lists of the castings and finished machine parts.

An Effective Hanger. — The Marlin Firearms Co., of New Haven, Conn., is issuing to the trade a new wall hanger, a very artistic work in colors, showing a shooter with gun at shoulder, aiming at a bevy of quail, with the surroundings brought out in detail. The picture is worth a place on the office or den wall, and it is one of the most expensive hangers issued. The painting is by Rousseau, an authority on works of this kind, and he depicts a scene from his own personal experiences.

CATALOGUES WANTED.

The Marshall & McNeill Hardware Co., who have opened a new hardware store in Warner, Alta., would like to receive catalogues from different wholesale hardware houses and hardware manufacturers.

HARDWARE LETTER BOX

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Door checks.—Ingram & Davey, St. Thomas, ask where Rixon Door Checks are made.

Rixon Mfg. Co., New York City, are the makers, the Aikenhead Hardware Co., Toronto, being Canadian agent.—Editor.

Mantels and Grates.—Dr. H. McCay, Kingsville, Ont., asks for the name of some company manufacturing mantels and grates.

The Barton Netting Co., Windsor.—Editor.

Leather Straps.—C. R. Meyers, Stratford, asks what firm at Aylmer, Ont., makes skate straps, canvas coats, etc.

The Draper Co., Aylmer manufacturing leather goods and novelties, is probably referred to.—Editor.

Gasolene Stoves—Stonehouse-Munroe-Zavitz Co., Wallaceburg, ask if there are any gasolene stoves made in Canada.

We know of none manufactured in this country, but the McClary Mfg. Co., London, and the Gurney Foundry Co., Toronto, import them for customers.—Editor.

The Retail Paint Trade

NEW ANTISEPTIC PAINT.

U. S. Consul Norton, writing from Chemnitz, Germany, says that in the warfare which is being waged so persistently against tuberculosis in that country, increased attention is being devoted to paints and washes which may be applied to walls, etc., and which possess in a greater or lesser degree the power of destroying germ life. He gives the following example :

In a recent number of the publications of the German health office, a report appears with very full details regarding the tests applied to the new pigment called vitralin, a highly lustrous paint which can be applied to surfaces with the same ease as ordinary paints, with a basis of white lead, or zinc white. Its chief value is for disinfecting, and it is prepared and sold more specifically for use in rooms, etc., where it is desired to combat pathogenic germs. In this respect it seems to be far in advance of all of the ordinary substances applied to walls, containing lime or lead compounds.

The importance of such an agent, in connection with modern sanitary appliances for destroying the microbes of disease, led the health office to make somewhat exhaustive tests of the germicidal properties of vitralin under varying conditions. The results may be briefly summarized as follows :

When in contact with a vitralin coating, the bacilli of tuberculosis (as found in saliva) are completely destroyed in 3 days. Diphtheria bacilli require 5 hours, typhoid bacilli 8 hours, and those of pus (staphylococci and streptococci) from 6 to 13 hours. On the contrary, no lethal effect could be observed upon the spores of anthrax, even when the contact lasted 30 days, although a distinctly retarding influence upon the development of the spores was noticed. Control experiments carried on simultaneously with surfaces covered with ordinary oil colors, whitewash, etc., showed either no germicidal power or a much less degree of efficacy.

Extent of Disinfecting Properties.

Direct sunlight renders the lethal action much more rapid than when it is carried on in diffused daylight. The material upon which the coating is applied exercises no appreciable effect. The same results were secured when the pigment was spread over glass, porcelain, brick, and wood. The disinfectant property remains for a considerable time in the coating of paint, although after the lapse of a year it was found to be distinctly weaker—i.e., a longer time was required to bring about complete destruction of bacteria.

The investigator came to the conclusion that the specific disinfectant property of vitralin results from the oxidation of the linseed oil which forms an important constituent of this paint, as of most paints. Further, this oxidation is dependent upon the presence of a certain degree of moisture, and, naturally, of oxygen ; and warmth as well as light is an important factor in favoring the formation of the active germicidal agent. This property of vitralin is likewise unaffected by prolonged exposure to powerful antiseptic agents, such as cor-

THE particular dealer we want to get in touch with this time is the man who is tired of handling the kind of paints and varnishes and enamels that don't pay shelf-rent—the dust-catcher kind nobody ever calls for twice, and few people even once. There's news for that dealer in the selling power of FLOORGLAZE (the king of solid-color floor enamels), GRANITINE (the floor finish that wears amazingly) and quite a few other lines of ours that make good.

If that dealer wears your hat it will pay you to ask us questions this very day

Send for sample can of FLOORGLAZE, or GRANITINE

rosive sublimate, formalin, kirsol-sulphuric acid, etc.

The conclusion of the officers of the Imperial Health Office is that vitralin furnishes a highly valuable addition to the weapons employed in combating bacterial disease, and that it can be most advantageously employed in all rooms, etc., where germ life is liberated, consumptives' sanatoria, wards for infectious diseases, and the like.

Attention is called to the fact that the presence of such a wall coating as vitralin does not necessarily supersede the use of the customary disinfection methods now legally obligatory. There is, however, a distinct advantage in having a continuous destruction of disease germs maintained, whenever they come in contact with the walls of an apartment during its temporary occupancy by a person affected by an infectious disease.

PAINT AND OIL MARKETS

MONTREAL.

October 8.—Good weather combined with the bright outlook, and the stimulation of advancing prices in linseed oil and turpentine, have had the effect of giving a marked undercurrent of strength to the paint, oil, and varnish markets. Some very heavy shipments to Ontario and the Northwest are reported, but the demand in the province of Quebec is said to be somewhat quiet.

No changes are announced this week, although both linseed oil and turpentine are very firm. The market in white lead is still open, but no more drastic cutting is noticed. Dealers report a good demand for ready-mixed paints and household specialties are moving well.

TURPENTINE—The advance which was recorded last week still holds good and the market looks to be stiffening. In some circles the present price is considered very high, and there is little desire to put in heavy stocks for the winter, the feeling being to buy for actual requirements only. We quote 80c for single barrels, net 30 days.

LINSEED OIL—Stocks seem to be rapidly disappearing, and it is anticipated that these conditions will result in another advance in prices. We quote: 1 to 4 barrels, in one delivery, raw 66c per gal.; boiled, 69c per gal., net 30 days, f.o.b., Montreal.

GROUND WHITE LEAD—Buying continues very good, some heavy orders being shipped during the week. The cutting, while disturbing the market, has undoubtedly stimulated trade. We quote: Strictly pure about $5.25 to $5.75, according to quality and No. 1 $4.85 to $5.25 f.o.b. Montreal.

RED LEAD—Fall shipments are somewhat belated, and red lead with its allied articles, litharage and orange mineral are scarce on spot and prices are firmer. We quote: Genuine red lead in casks, $4.25; in 100-lb. kegs, $4.75; less quantities at $5.75 per 100-lbs.; No. 1 red lead, casks, $3.75; kegs, $4.25, and smaller quantities, $5.25.

WHITE ZINC—A very encouraging amount of business is being done in white zinc. The market is firm and unchanged. We quote: Dry V.M. Red Seal, 7¼c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white Zinc, ground in oil, pure, 8¼c; No. 1, 7c; No. 2, 5½c.

VARNISHES AND JAPANS — A large turnover is reported in almost all lines. The inquiry is especially good for orange and white shellac, and the prospects look very bright.

PUTTY—Large shipments are being made, and some of the grinders report that it is with difficulty they can cope with the demand which exists at present. We quote: Standard putty, 800 lbs., in casks, $1.75; in 100-lb. drums, $2; bladder putty, 400 lbs., in barrels, $2.15; in 100-lb. cases, $2.25; in 25-lb. tins, $2.15; 12½-lb. tins, $2.35, f.o.b., Montreal.

TORONTO.

October 8.—The market is fairly satisfactory all round, with the exception of the low prices in white lead and the uncertainty of the turpentine situation. Business in paint lines is good and improving as the season advances. No doubt the painting of new buildings, especially dwellings, is being rushed, and this has created a big demand for paint lines; but apart from this there is a steadily increasing sale of general paint goods to hardwaremen all over the province.

The paint trade appears to be prosperous. Dealers are busy and orders are depleting stocks considerably.

The call for white lead this fall has been very great and at present glass stocks are low. Prices locally on all lines remain unchanged. In regard to rosins the prices have not only been maintained, but further advances have taken place in the south. No good reason can be given why this is the case, however, as there is now about ten per cent. more rosin on hand than there was last year at the end of September.

TURPENTINE — The extraordinary wet two weeks are now being followed by more settled weather in the Southern States, and all are anxiously looking for the receipts of the next fortnight which will tell the story of the scrape of gum from which turpentine is made. It has been asserted that the quantity to be expected is much lower than last year for this month, but this is somewhat a matter of speculation. In any event it is not supposed that it will influence the market very materially, and as the winter is approaching the supplies coming forward for the next three months is expected to be limited. Locally there is uncertainty regarding the turpentine situation. On all sides are evidences of firmness, and certaiy to the looker-on higher prices seem to be the only thing in sight. But during the week rumors of cutting have been abroad, some of the prices said to be quoted going as low as 77 cents. On investigation these rumors could not be verified, however. The prices quoted this week have run from 80 to 82 cents a gallon for barrel lots, with the market quotation at 82 cents. It was thought the price would advance early in the week, but the lack of buyers did not appear to make this possible.

LINSEED OIL—The advance made

——after all, no paint like

"English" Liquid Paint

No other Paint can be made on a higher standard—70% pure White Lead, 30% pure Zinc White.

No other Paint in which the only lead used is Brandram's B. B. Genuine, for over one-hundred years the standard of the world.

LACQUERET

For Brightening The Home

THERE is nothing will appeal so forcibly to the proud housewife as a tin of ***Lacqueret***, the translucent lacquer, whose magic touch brightens up old dingy furniture and every kind of woodwork. Its uses in the home are innumerable! Tell your customers what it will do. You can sell ***Lacqueret*** all the time if you recommend it. Send for prices. You cannot fail to handle ***Lacqueret*** with profit.

INTERNATIONAL VARNISH CO., Ltd.

Makers of Fine Varnishes TORONTO Branch of Standard Varnish Works

NEW YORK CHICAGO LONDON BERLIN BRUSSELS

last week to 66c and 69c for raw and boiled oil is maintained locally as well as by the manufacturers, and as the price in Great Britain with duty and freight added to it is still higher than the price to the crushers in Canada there does not seem to be any chance for a reduction in the near future. In fact there is a firmer tone to the market this week.

WHITE LEAD—It was expected that ere this white lead prices would have gone back to the old quotations, as with the firmer tone in turpentine and the advance in oil there was nothing else to do. The prices have not gone back, however, but there is a better and stronger feeling about the prices than was the case a week ago. Business is of fairly good proportions. Corroders report a good inquiry for dry white lead from manufacturers. Prices run from $5.55 to $6.

RED LEAD—The decline in prices last week has not affected trading to any great extent. Demand is reported as of the usual volume. Casks are $4.25, and 100-lb. lots, $4.50 to $4.55.

GLASS—Glass has already this fall advanced a point in Europe and now comes word that a second advance has taken place. This would mean an increase of about 10 per cent. The Belgium makers maintain that last year's prices were ruinous, and now the workers threaten a strike. Stocks here are low and importations may have to be made before December, the time when these importations were expected. In any case future buying will be at a higher figure.

PUTTY—Demand is steady and strong. Prices are unchanged and the market is firm. Bulk putty in casks is at $1.75; 100-lb. drums, $2; and bladders, $2.15 to $2.25.

STAINS AND VARNISHES — The market is unchanged and sales are but fair.

PETROLEUM—Shipments and deliveries are taking up large quantities of stocks and are giving a brisk air to the coal oil business. Prices are unchanged. Prime white coal oil is 13½c; water white, 15½c; and Pratt's astral, 17½c. There is still a fair demand for gasolene at 16½c, and benzine at 15½c.

PAINT NOTES.

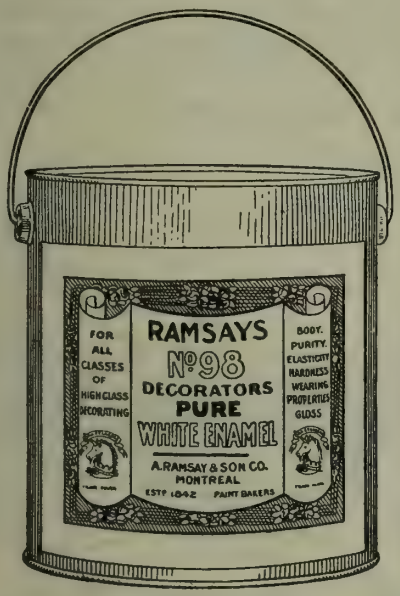
IRONMONGER'S FIFTIETH ANNIVERSARY.

The Ironmonger, published at London, England, celebrated its golden jubilee last month, and its issue of September 4 was devoted to a history of that journal's career. The event is quite unique in the world of trade journals.

The Ironmonger which started out in 1859 in the form of a monthly trade circular by the six Morgan brothers has since developed into the leading European weekly trade paper dealing with ironmongery, engineering and metals, and the success which has fallen to its lot is richly deserved. Hardware and Metal wishes the Ironmonger continued prosperity.

SIMONDS SAWS WIN PRIZE.



The Simonds Mfg. Co., of Fitchburg, Mass., and Chicago, Ill., and Simonds Canada Saw Co., Montreal, Que., with branches at St. John and Vancouver, are to be congratulated on their success in gaining the most coveted prize at the Seattle Exposition, in competition with three other saw firms. Each contestant had specialists before the jury to fully explain any points about the manufacture of their saws, and after actual tests were made the grand prize was awarded to Simonds Saws, second honors being divided equally among the other firms.

ENAMEL FOR THE PAINTER

Haven't you often noticed what a difficult thing it is to get a real good high-grade white Enamel for high-class painters' trade? For years dealers have been obliged to bring in these Enamels from abroad at exorbitant prices and sell at little or no profit.

RAMSAY'S No. 98

changes all that. You have herean enamelunsurpassed by any imported into the country. It is for the Decorators—for high grade work. It is not cheap—that is as cheap things go, but it is cheap for what it claims to be. You should learn about this Decorators' Enamel anyway, in order to be posted. Write us for special booklet on Ramsay's No. 98 Enamel.

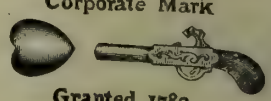
VALUE OF GOOD COPY



Personally, I believe "ads." in trade papers should be made so attractive, so interesting in some way that the merchant as he glances through the trade journal will stop and see what you have to say. The simple announcement that you are in business is not enough. I don't care how prominent a firm is, they should not get the idea they are so big that all they need to do is to reproduce their name on a page in a trade journal and say nothing more. They should do something to make the merchant curious; in fact, somewhat anxious to meet the travelling man you are sending out to represent you.

SUPREME CUTLERY

We Have Doubled Your Market For Roofing

Where previously you have sold one roll of ready roofing you ought now to be easily able to sell two rolls Ruberoid.

For the attractive new Ruberoid IN COLORS has doubled the market for roofing.

Ruberoid in red, green or brown is suitable for the finest home, the costliest public building.

With all the durability of uncolored Ruberoid, these new shades meet the demand which no other ready roofing has ever been able to fill.

And in Ruberoid, whether in colors or plain, you are sure of selling the best there is in roofings.

There are now more than three hundred substitutes for genuine Ruberoid, but Ruberoid is the original and Ruberoid alone has withstood the test of seventeen unbroken years of actual use.

The first roofs of Ruberoid, laid in 1892, still look good for many more years of wear--still weather-tight.

RUBEROID

(Trade Mark Registered)

Ruberoid is sun-proof, rain-proof, snow-proof, cold-proof and weather-proof. It resists acids, gases and fumes.

It is so nearly fireproof that if you drop live coals on a roof of Ruberoid, neither the Ruberoid nor the timbers beneath will take fire.

The secret of these unique properties lies in the Ruberoid gum which we use. Ruberoid gum is our exclusive product. No other maker can use it.

That is why, of three hundred substitutes, no one of them can possibly be so durable, so good, as Ruberoid.

Our international advertising campaign is now in full swing. We are sure to have inquiries for Ruberoid from those who live near you. Be prepared to fill the demand which we create. A postal card will bring our dealer's plan, and will explain how we willingly stand the expense to make sales for you. Address Dealer's Department 92D.

The Sliding Furniture Shoe for Metal Beds

Pat. Feb. 9-09.

For metal beds, round or square posts, these Wishbone Bushing or long steel stems used in connection with Cone Washer, will retain itself centrally and can easily be removed. Made so as to fit any size of post. The ball and socket principle of joint allows Shoe to adjust itself to uneven surfaces, hence the shoe will slide where castors will not roll. Do absolutely no damage to hardwood floors, carpets or matting.

Ask your jobber. If he cannot supply you write us for free circular and discounts.

Eastern Representatives; Coulson and Blaikie, Montreal, Que.
Western Representatives; G. W. Endress, Winnipeg, Man., E. R. Bollert, Vancouver, B. C.

Onward Manufacturing Co., Berlin, Ont. and Menasha, Wis.

Glues, Gelatines, Size, Etc.

When in the market for these lines, send for our quotations.

Or better still, send for them now, and keep them on file.

The GROVE CHEMICAL CO., LTD.

ESTABLISHED 1856 — Appley Bridge, Wigan, Lancs., England

There's no ice so slippery that "*Little Clinchers*" will not carry you over without a fall. They grip the pavement firmly at each step.

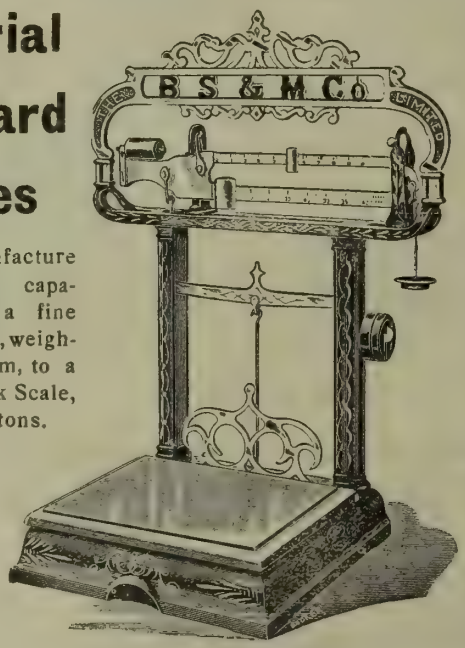
"Little Clinchers"

make icy pavements, roads and hills as safe as the floor in your home. They're adjustable to the heel of your shoe in *half a minute*—no nails, screws, rivets or straps. They're invisible and comfortable.

No need to remove them indoors—simply fold the heel-plate forward, reversing spikes under instep, and the floors and carpets are safe. "*Little Clinchers*" are made of steel, with specially hardened points. If your jobber cannot supply you with these goods, write us.

Smith Hardware Co., Ltd.
4 LEMOINE ST., · MONTREAL

Ford's Auger Bit



is an all round Bit, boring smoothly, and well suited to the finest work. For many difficult jobs it is the only tool that can be used. Give it a trial, and afterwards you will sell only one line of high-grade Bits, and that line will be Ford's.

FORD AUGER BIT CO.,
108 Cabot Street, HOLYOKE, MASS., U.S.A.

Imperial Standard Scales

We manufacture Scales of all capacities from a fine Druggist Scale, weighing one drachm, to a Railway Track Scale, weighing 100 tons.

Write for our illustrated catalog and price list—they will interest you.

IMPERIAL COUNTER SCALE

The Counter Scale shown here is made with Cut-off Lever and has Nickel-plated Doube Brass Beam with Sliding Poises.

Capacity of Beam 50 lbs. Total capacity 200 lbs.

CURRENT MARKET QUOTATIONS.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

MORE "FAVORITE" CHURNS

are sold in Canada than all others combined. Isn't that about the best possible proof that the "Favorite" is known throughout the Dominion as the best churn to buy—and the best for the dealer to sell?

Light, rigid base, roller bearings, convenient, easy drive, bolted trunnions, splendid finish; these are some of the features that have given the "Favorite" its big lead, and that make it the most satisfactory churn for you to handle.

THE FLYER

PATENTED 1909

It means washing with the hard work left out

A Big machine, Big in every way—Big in power, Big in speed, Big in ability to do the work, Big tub with a Big opening, Big seller.

Has simple, strong and accurately machined mechanism seated on steel ball-bearings. Is fitted with a large evenly balanced fly wheel that is easy to start and carries the action over its heaviest load with little effort. The entire working gear is attached to the cover and lifts easily with it. No troublesome connections to make.

NO COMPETITION

The Razor to Sell

IS THE

AutoStrop SAFETY RAZOR

BECAUSE

IT has no competitor

IT is the only self-stropping razor in existence

IT is always sharp and every shave is as good as the first

IT is convenient, nothing taken apart to strop or clean

IT is the most economical to use, being the only razor that does not involve continual expense for new blades

Use the razor yourself so that you will be able to demonstrate it to your customers

You will be satisfied with its service and sale and your customer will be satisfied with his purchase.

Your stock is incomplete without the ***AutoStrop***

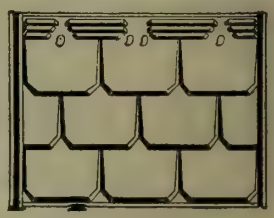
"Good wares make a quick market, and only the BEST will insure complete satisfaction."
—*The Philosopher of Metal Town.*

Most Profitable to Handle— "Metallic" Building Materials

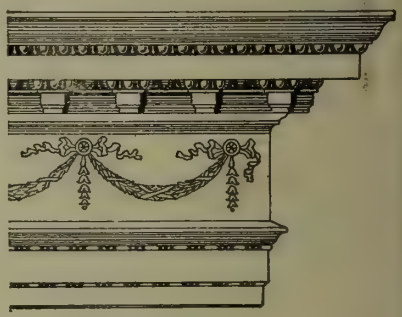
Your profit, your business depends on selling goods that will make SATISFIED, PERMANENT customers—goods that will UPHOLD your BUSINESS REPUTATION. The best quality material and skilled workmanship make for the SUPERIORITY of our "METALLIC" goods. They are the highest grade—have been proven by 25 YEARS OF ACTUAL WEARING TEST.



Eavetrough and Conductor Pipe

Made from the finest quality of galvanized steel, in any shape or style desired—trough either straight or curved to any radius.

Ornamental Conductor Heads and Straps in varied designs to match any style of architecture.



The METALLIC Elbows or Shoes, in either corrugated or plain, are galvanized AFTER being formed into shape—making them absolutely rustproof.

"EASTLAKE" Metallic Shingles

The one perfect steel shingle. The special lock device, which makes the "EASTLAKE" the EASIEST and QUICKEST TO LAY, and ABSOLUTELY WEATHER-TIGHT; the patented countersunk cleat; the clear, bold pattern, so deeply embossed that only the very best material can hold, make "EASTLAKE" the acme of shingle perfection.

Metallic Cornices

"METALLIC" is rapidly displacing wood and stone for cornices and other building decorations. This means more business to you. Watch the new buildings—write us for estimates.

Our "METALLIC" Cornices are made in both sheet copper and heavy galvanized steel, and can be furnished in any design desired. "METALLIC" Cornices are the MOST ARTISTIC and MOST DURABLE that can be placed on any building.

Metallic Ceilings and Walls

How many customers of yours have cracked plaster ceilings in their homes? Suggest "METALLIC" to them. Tell your fellow merchants of the superiority of "METALLIC" for the interior of their stores and offices—how it is FIREPROOF, SANITARY and very artistic. Our METALLIC CEILINGS and WALLS are made from the FINEST QUALITY steel sheets—are very rigid and fit accurately, a permanent interior decoration. Hundreds of handsome embossed designs to select from.

OUR NEW CATALOGUE NO. 70 contains interesting information on Metallic roofing and building materials. Write for it.

We are the oldest and largest sheet metal building material firm in Canada.

POWDER

YES!
It is Good Powder

IN DEMAND NOW

BUY :—

DEAD SHOT SMOKELESS

A POWDER FOR SHOT GUNS

There are many powders that might do when the sun shines and all is serene. But for net results in rain or shine, no powder equals

DEAD SHOT SMOKELESS

It is a powder known to be *stable.*

Use your own judgment in selecting a powder, but don't make judgment until you have tried Dead Shot. It is the greatest combination of *Absolute Quality* ever produced.

Our friends, the trap shooters, have coined a new name,—

"STABILITY DEAD SHOT"

and this leads us to modestly remark that no other powder has shown such a percentage of high scores at the traps. We could say much more, but—why? A booklet of "loads," etc., on request.

Disston quality has made the DISSTON plant grow to Fifty acres since 1840.

How Disston "Bucksaws" Make Customers

This is only one of a list of shapes and styles. See catalogue mentioned below.

YOU can't safely tell an experienced bucksaw user "one bucksaw is like any other." He knows, through actual use, what differences there are. It is because of the absolutely unvarying uniformity of DISSTON Bucksaws that dealers make not one but several sales and profits.

Some of the reasons for the steady increase in the plant of the DISSTONS is the increasing call from shrewd dealers for DISSTON Bucksaws. Pointing to the actual truth about DISSTON Bucksaws wins the customer, with that resulting profit---and it wins him back again, with other resulting profits, for experience with a DISSTON Bucksaw bears out every recommendation you give it.

Show your customer the wood seasoned for several years—the variety of shapes to select from---the styles of blades---the bracings---the varnishing---the weather protection---the ease of handling---the strength ---the qualities for heavy cutting---the absolute rigidity---the fact that in a DISSTON Bucksaw there is positively no lost motion or "give."

Behind every DISSTON Saw, Tool or File you sell there is a profit for you---and after that a steady stream of profits. The highest quality never fails to bring a customer to your shop again.

FREE If you haven't got the latest DISSTON Catalogue, send us a postal. It gives clear and complete descriptions of DISSTON Saws, Tools, Steels and Files, in all the various styles and makes. This new Catalogue may mean a handsome addition to your profits.

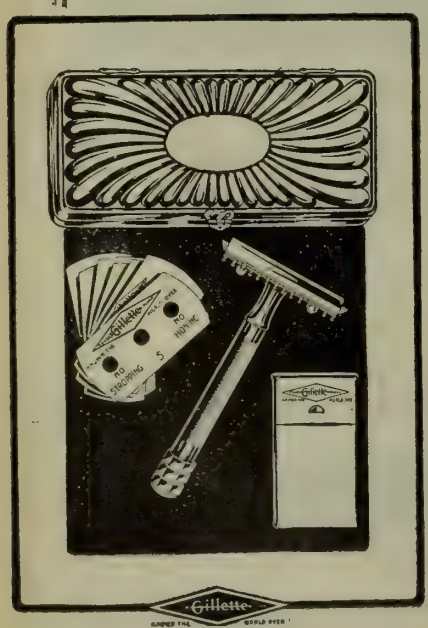
The "Gillette" Dealers' Harvest Is From Now to Christmas

All the year round you display and talk GILLETTES to your customers, and we advertise them to everybody.

All the year round you and other pushing GILLETTE dealers sell razors and blades enough to make it mighty good business, both for yourselves and for us.

But the real harvest time of the year for us both is the next two months.

Everybody will be on the hunt for Christmas gifts. If it's for a man, the all-round most suitable gift in the stores to-day is the GILLETTE Safety Razor. In attractiveness, in every-day usefulness and comfort and in price it exactly fills the bill. The GILLETTE appeals to everybody who is looking for a man's Christmas box—if you just bring it to their notice at the right time.



Display the GILLETTE in your windows and on your counters. With the Standard Set, the new Pocket Editions in their handsome gold and silver plated and gun-metal finished cases, and the GILLETTE signs which you have you can easily arrange most attractive displays—displays that will pay you in hard cash many times over for the work spent on them—displays that will bring you in many a $5 bill that would otherwise have gone to the haberdasher, the dry-goods man, or perhaps the bookseller. For hardware dealers have been starved for a live specialty for men.

All the year round we have been directing buyers to the stores that display Gillettes and Gillette signs. Now is the time to make your displays more prominent than ever.

Do your part and you will surely get your share of the immense business which is bound to be done in GILLETTES this holiday season.

Don't delay your orders. If you have not got in a good stock, send for it at once, for we are already so crowded with orders that we are working night and day to catch up, and booked orders, of course, have the preference.

To those who have ordered, but have not yet received the goods, we wish to offer our sincere apology for the delay, and our assurance that we will ship your order in its turn at the earliest possible moment.

The Gillette Safety Razor Company of Canada, Limited

Office and Factory: 63 St. Alexander St., Montreal

Gillette Safety Razor
NO STROPPING, NO HONING

THERE'S MONEY IN TRAPPING

You can increase your business by dressing your window as illustrated below. The entire cost of reproducing this window will be about $2.00.

Hundreds of boys will see this display and want to trap. They can earn from $10.00 to $25.00 a week trapping before and after school.

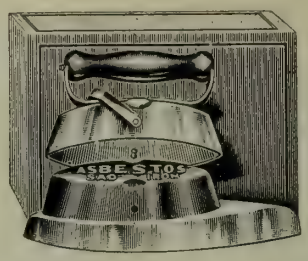
$5,000,000 worth of furs were caught and sold in Canada last season.

Fur prices were never higher than at present:—

Weasel	25c. to 40c. each	Mink	$3.00 to $6.50 each
Muskrat	20c. to 35c. each	Coon	50c. to $1.50 each
Skunk	$1.00 to $2.00 each	Fox	$3.00 to $5.50 each

We will furnish display cards and specifications free.

Be sure to write us for full particulars regarding the dressing of this window.



ONEIDA COMMUNITY, Ltd., Niagara Falls, Ont.

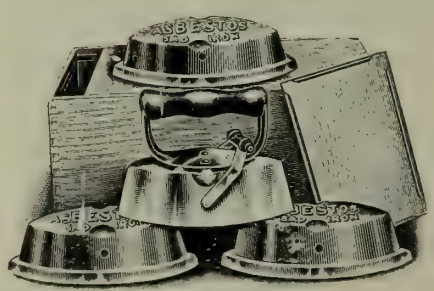
Christmas Suggestions in Asbestos Sad Irons

What could be a more considerate gift for wife or mother than an ironing outfit which will smooth out many a household care?

Anywoman who has a home to look after will appreciate the practical advantages of irons which are hot where they come into contact with the cloth and cool where they come into contact with the hand.

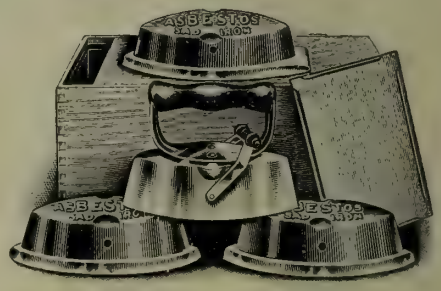
There is real enjoyment in ironing the "Asbestos Way"—the way of comfort, convenience and economy.

No. 50. Flounce Iron.
Does wonders among the ruffles.



No. 570. Asbestos Family Cabinet.
Eminently practical but elaborate enough to make an appropriate gift.

The various sizes and shapes of Asbestos Sad Irons and the combination ironing outfits make splendid gifts for Christmas, birthdays, and weddings.



A neat and useful set can be made up by combining the Flounce Iron with one of the Laundry Sets. The "de luxe" edition of Asbestos Sad Irons is the Family Cabinet—"an iron for every purpose" in an elegant hardwood case.

Put Asbestos Sad Irons on your list of Christmas specials and suggest them to the man or boy who wants a gift that wife or mother will appreciate.

No. 70. Laundry Set.
All pointed irons.

If you wish advertising materials to bring Asbestos Sad Irons to the attention of your customers, write to us. We furnish display cards, folders with your imprint, and newspaper cuts free of all cost to you except duty.

No. 100. Laundry Set.
One square heel iron.

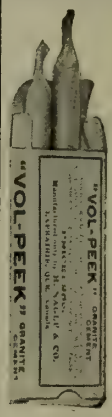
Mensuration for Sheet Metal Workers

By WM. NEUBECKER



All Sheet Metal Workers are aware of the numerous problems arising in finding areas, dimensions and capacities of products turned out from the shop—hence the value of this book, giving the principles of the art of measurements as applied in working ordinary problems in shop practice. It gives the methods for finding the length, areas and volumes of geometrical forms, pipes, etc. Every Mechanic, Shop Foreman and Apprentice should have a copy.

COMMUNITY SILVER

Flower-de-Luce Pattern

A design that looks like Sterling
Can be engraved like Sterling

Coated with a Regular Armor Plate of Pure Silver

which in ordinary use will last a lifetime.

GUARANTEED FOR 25 YEARS

EXTENSIVELY ADVERTISED—EASILY SOLD

Although Community Silver is so much superior to ordinary plated ware, our prices are not excessive; in fact, they are but little more than for best single plate.

All Community silver is neatly packed in cardboard boxes ready for presentation purposes.

See Our Salesmen's Samples for other Attractive Designs.

COLD ROLLED STRIP STEEL

For Deep Drawing, Blanking, Forming, all kinds of Bending. Has Bright Finish for Nickel Plating, Rolled accurate to Gauge. Made in all tempers and in any thickness from .002″ to .250″.

THINK WHAT THIS MEANS!

Considerably over 7,000,000 of our "Pioneer" Safety Razors have been sold in 30 years, and the sales are still increasing.

We recommend our

Forged Blade "Pioneer" Safety Razor

because we know that the extra keen blade of doubly-refined Sheffield Steel is indisputably the best on the market, and has extraordinary wearing qualities.

Is not this the article every hardwareman should handle if he wishes to get and keep the best-class trade?

Always remember that "Aremacdee" is a guarantee of all that is latest and best, and catalogue explains.

The R. McDOUGALL CO.

Galt, Canada LIMITED

THE AYLMER

DOUBLE ACTING HOUSE FORCE PUMP

With Cock Spout and Reversible Handle, has Brass Cylinder, fitted with Brass or Glass Valve Seat. Arranged to drop the water to prevent freezing.

¶ The reversible handle can be placed at any angle, thus making either a right or left hand, or straightaway pump, as desired. It is built on the plan of our submerged Cylinder Well Pump, is double acting, has heavy seamless brass upper and lower cylinder with brass or glass valve seat and expansion plunger bucket. It is compactly built and very powerful. The base is a new and neat design and is attached to the cylinder by means of three heavy cap screws.

The expansion plunger is a feature not found on any other make of pump. By means of the rubber disc in connection with the cone-shaped stem, the leather on the upper plunger can be expanded by means of an ordinary wrench, turning the adjusting nut on top of pump to the left without removing the pump from the well. This enables the user to keep his pump in proper adjustment without the expense of a pump expert.

GURNEY-OXFORD

THE STOVE SIGN OF HIGHEST QUALITY

IMPERIAL-OXFORD WITH RESERVOIR AND HIGH CLOSET

A BUNCH OF SOLID FACTS

Are you open to reason?—if so, listen to this; just a little boost for a reputable stove—The "Imperial-Oxford."—Yes of course the name's familiar—but how? Simply this:—You as the dealer know that when you sell a stove—you sell it—not merely loan it—you don't want it shot back because it won't bake right—that's the point that "riles" the housewife. Well, sir—the Imperial-Oxford Range has got the baking habit down to a science—it simply can't be otherwise—the dividing flue strip does the trick—spreads the heat evenly all over the oven—but that is not all the range is famed for. There's the patent lifting hearth—the round cornered firebox—the new reversible grate—and—and—well you'll have to send for our new catalogue—it will surely interest you. Tell us to send an Imperial Oxford with it.

Hardware Store Business Methods.

Price $1.00

220 Pages, Bound in Cloth.

The authors of the articles in this book are for the most part practical and progressive Hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. NINE of the FORTY subjects discussed are:

Rules and Regulations for the Hardware Store.
The Hardware Buyer.
Good Methods in Stock Taking.
Prices and Catalogues.
Collecting Accounts.
The Merchant and His Employees.
Changing Business Conditions and How to Meet Them.
Profit Figuring System.
Starting in Business.

SEND $1.00 TO-DAY, and the book will be mailed by return.

HARDWARE & METAL, 10 Front Street East, TORONTO

PRESIDENT TAFT'S GOOD EXAMPLE

By A. B. LEVER

PRESIDENT TAFT of the United States believes in trade newspapers. He is such a thorough believer that when he wanted to make an announcement of particular interest to business men of the United States he selected a business man's paper as his medium. It was one of the first acts of his administration.

This is the era of the trade newspaper. At any rate it is the dawn of the era.

Business men the world over are gradually coming to recognize the fact that if they want to reach firms in their own particular line of business the best and most direct method is through the columns of the trade newspaper devoted to their particular interests.

Manufacturers and wholesalers who do not recognize this fact are obviously behind the times. Those who do not catch up are likely to be overtaken and lapped by their more progressive competitors.

This is an age of progressive business methods and those who are not progressive in advertising are like those who prefer to travel by the old fashioned ox team instead of by the swiftly moving express.

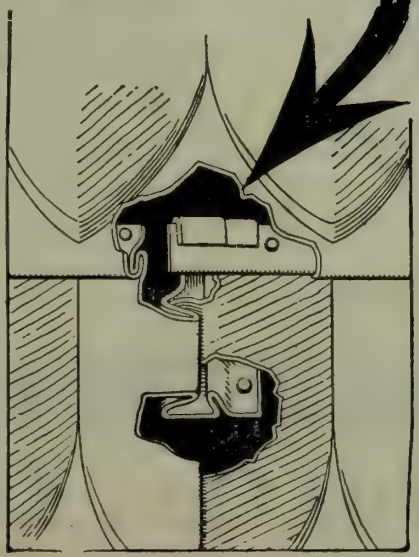
Surely if Mr. Taft from his presidential chair is awake to the importance of addressing business men through the columns of a trade publication, manufacturers and wholesalers should not be less awake to their opportunities.

Just as a well aimed rifle carries the bullet to the bull's eye, so the trade newspaper carries the announcement of the manufacturer direct to the customer whom he desires to reach.

No manufacturer or wholesaler can carry on an effective advertising campaign that does not include the use of the trade newspaper.

"Not the First Shingle but the first Perfect Shingle."

A Shingle of Doubt is a Trouble Forever



Ordinary metal shingles are generally water-tight. The "Galt" is always water-tight. Any practical man can see that in a glance.

When metal shingles leak they leak through the locks, invariably. Water gets in the side-lock and is forced by the storm up past the end-lock through the roof. This point—the intersection of three shingles—in the "Galt" Shingle is protected by our patented "closed-end" shown in the cut below, which positively prevents leakage. Notice the broad, deep, self-draining side-lock and continuous, over-lapping end-locks. They are patented in the "Galt."

This is the shingle with the future and now is the time to get control of it in your locality if you wish to handle it next year. Drop us a card to-day.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

J. W. Harris Rotary Ventilators

THE BEST MEANS FOR INSURING PURE AIR

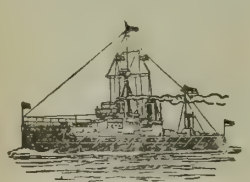
One Testimony:

Montreal, June 7th, 1901
J. W. Harris Mfg. Co., Ltd.,
Montreal

Gentlemen:—

I have been using your "J. W. Harris Rotary Ventilators" on several houses in this city with the best results The tenants of these houses declared that your Ventilators are of great advantage to them.

I also installed two (2) 18-inch on my stable, and I can say that your Ventilators cannot be surpassed by any to take out the sweating or the bad smell in any room.



Yours truly, F. D. MONK,
58 St. Frs. Xavier St.

Write direct for booklet and catalogue to-day. Learn about our system of ventilating. A pleasure to send books.

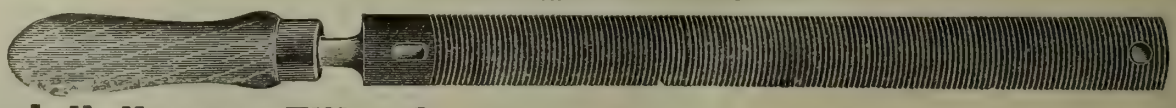
Registered Trade Mark



THE PATENT "DREADNOUGHT" MILLING FILE

Will make a surface on Steel, Brass or anything, that it looks as if it were burnished, after cutting so rapidly that it will astonish you, on Steel or Cast Iron, and then again on Brass or Bronze without apparent loss of cutting quality. This will make you think. It made the British Government think, it made the Krupp Co. think. Made them think that it would pay to use the Dreadnought in every department, and now that they are using them extensively their "Think" has turned to a certainty, that it does pay to use the Dreadnought, and in our own CANADA they are rapidly being adopted by the largest consumers.

JUST THINK:—This file CAN BE RE-SHARPENED MANY TIMES, without drawing the temper, thus making it "absolutely the cheapest file that can be procured anywhere."

JUST THINK:—If you try a sample order and are not perfectly satisfied with the goods, you may return them. We want your business and are determined to satisfy you, if you but give us the chance.

Planning the Christmas Selling Campaign

The Hardware Dealers' Magazine Tells How One Hardwareman Took Stock and Found he was not Getting his Share of the Christmas Trade — Took his Clerks into Conference and Laid Plans to go After Business in a More Systematic Manner—Arranged Stock on Tables and Price Marked the Articles—Then had his Advertising Co-operate with the Displays.

When Mr. Adams, of the John Alexis Adams Hardware store, took a half-hour in September and looked over his Christmas holiday sales of the year before, he was not satisfied either with his sales or his plan of campaign.

There was a lack of originality; a lack of ideas; a lack of push, and certainly a total sum of sales that was not satisfactory.

The rival stores up street, and the rival store down street, seemed from his point of view, to have "got away from him," as say the boys on the street.

"I said then," remarked Mr. Adams to himself, "that I would turn over a new leaf in the next year. This seems a good time to turn it."

As occasion offered during the next few days, he called his young men severally into consultation, and asked each if them to set his brain into operation, in a race with those in his own head and in the heads of their other associates.

"Let us hump ourselves," he said, "and see if we cannot make a big success of this season."

"Of course you appreciate the fact," said William, the head clerk, "that a very large degree of the responsibility rests on yourself in person."

"In what way."

"In the buying. You know the old saying that goods well bought are half sold."

"It's a fool proposition, even if it is old," said Mr. Adams. "There is no sense in it. Goods are not sold, or half sold, or a quarter sold, until they have gone over the counter or out in the wagon, and the cash paid for them. Even then some of them do not stay sold. While the buyer has a great responsibility, he cannot be blamed with the sins of the salesmen, whose business it is to get rid of the goods.

"But I do not underestimate the need of good buying for our holiday stock. I have been looking over the special memorandum prepared by Tom for the goods that can be purchased for winter, and he has a list of Christmas novelties as long as your arm. I will confess that he has scented out a lot of novelties, and found a number of new articles, that I would never have thought of, and that I believe will make good holiday sellers. Thus his industry has vindicated our scheme of assigning to each of you clerks the task of digging out the goods that we may need, or can handle with profit, on any given three months of the year.

"I will see that the store is well stocked with goods that ought to sell. Now, it is up to us to set the wheels in our heads moving, to see what ideas we can grind out, to push the sales and to make a display when the time comes."

A Bid and a Display.

The boys set themselves to work, and the ideas propounded to the proprietor in the next two weeks did not lack in the way of daring novelty and innovation.

A large porportion were rejected as old, time-worn, too costly, not wise for economic reasons, or as likely to leave unpleasant effects afterwards; especially all that took any form of lottery or a game of chance.

"We need the money of our friends," said Mr. Adams. "but not quite enough to leave a bad taste in their mouths after the transaction is over."

One idea, proposed by Dick, was agreed upon as especially good; not because of its newness, for it had no doubt been tried before, but as making a bid and a display at the same time.

The idea was to place at convenient places in the store, about **December 1st,** a number of tables artistically covered, and filled with articles displayed to the best advantage. Each table to be devoted solely to goods for one class of people, and for them only. Over each table to be placed a neatly-printed sign calling attention to the class for whom the goods were designed. The signs to be as follows:

"Christmas Gifts for Boys."
"Christmas Gifts for Girls."
"Christmas Gifts for Young Men."
"Christmas Gifts for Young Women."
"Christmas Gifts for Fathers."
"Christmas iGfts for Mothers."
"Christmas Gifts for the Baby."
"Christmas Gifts for Bachelors."
"Christmas Gifts for Bachelor Girls."
"Christmas Gifts for Wives."
"Christmas Gifts for Husbands."

"My suggestion is that in addition to the regular store force, several bright young women should be engaged temporarily, say one for each four tables. In addition to the salaries paid them, I would advise that the one who records the largest total of sales between December 1st and the night of December 24th (Christmas Eve) should have the promise of a Christmas gift of any one article she may select from the store, at a value not to exceed ten dollars. This will act as an incentive for harder work in connection with the sales.

An Advertising Idea.

"I would also advise that our advertising in the local press should be doubled for the three weeks before Christmas, and that every word of it should be devoted to one especial object —to the education of the people to the fact that the hardware store is equal to the department store, or the jewelry store, as a place in which to buy Christmas goods! I would pound that into the public sense during every day of these three weeks, forgetting our general stock for the time.

"In this pre-Christmas advertising, I would call especial attention to these classified tables. I would take up one table each day, and enumerate a number of articles displayed. Tell the parents what we have for the children. Tell the children what we have for the par-

HOLIDAY TRADE SUGGESTIONS.

Early preparation for the holiday season would lessen the strain of the busy weeks. Buy early and try to sell before the rush.

Ample provision should be made for the safe-keeping of presents bought in advance. Special arrangements must also be made for prompt delivery of goods.

Arrangements for easy communication with the stock-room are advisable. Keep track of stock so that time will not be lost in reordering needed articles.

It is important that, in holiday decorations every precaution should be taken against fire.

As you plan your buying so have your clerks to follow a definite plan in selling the holiday stock. It is a good plan to reward the clerks for good work.

Have a series of holiday advertisements prepared in advance in skeleton form. Also have a schedule drawn up showing what goods should be displayed each week until Christmas. Then receive suggestions as to how the displays should be arranged, a pencil sketch giving an outline to follow. The advertising should deal with the goods shown in the window.

Christmas selling should commence not later than December 1 and from then till Christmas eve, the store staff should be prepared to serve every customer without delay.

Special effort should be made to interest the women and children, Secure their trade and the fathers and brothers will follow the lead.

Decorate the store interior and do what you can to give everything a holiday aspect. It helps in the selling.

ents. Let the young man know what we have for the girls, and vice versa; in short, make a feature of our display, and let the world know that we are proud of it, and that it is worth seeing. Also invite everybody to come in and look at it, even if they have no desire to buy.

"Every article on the table should bear a ticket, giving its price in plain figures. Also make it plain that no matter when the purchase is made, the delivery will be delayed until such a time as the donor may wish."

A Matter of Display Type.

Mr. Adams decided to adopt the table scheme, and to follow the suggestions as to advertising. In providing for the latter, he said to William, who was charged with the responsibility of the advertising department, both newspaper and otherwise:

"I want you to make a special effort this year. Do not wait until the printer's devil stands at your elbow and pushes you for copy. Map out your programme in advance. Take time to do it right. Arrange your story of each day several days ahead. Study each ad. carefully before you send it to the printer, and then drop in and see it in proof. If it does not seem to be a centre-shot, change it.

While your newspaper advertising in the main is very good, William," Mr. Adams added, "I want to repeat one criticism I have made before. You try to crowd too much information into the space you use. Don't put in so many words, and let those you do use, hit the eye as a batter swipes the ball. Display your ideas; display your information; display your arguments, rather than hide them away in small type.

"If I were you, I would also get up a fetching little circular about our Christmas tables, and have one put in every bundle sent out of the store. Ship one into every letter sent to our customers, and have one handed to every person who comes into the store."

Mr. Adams on Novelties.

Mr. Adams' holiday orders have been numerous and of generous proportions, a larger proportion than ever before, consisting of novelties and things out of the run of the regular old-time purchases.

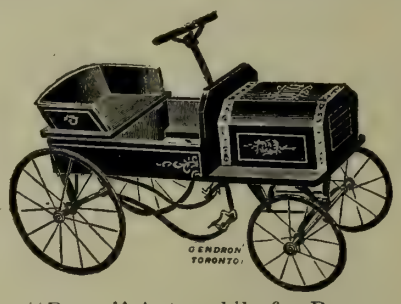
"I am satisfied," he said to his head clerk, who was inclined to criticise some of his purchases. "that the profits in the hardware trade of the future are largely in what you call 'jimcracks.' I have seen too many of these so-called 'notions' earn the title of standards and staples, to be scared by the cry of fads.

"When I was a small boy, and my uncle was running a hardware store over in the county seat, he was advised to have nothing to do with the newly-invented mowing machine, on the ground that it never could be made to work successfully, and would be abandoned as an article of commerce in two years. He took stock in them, and his sons are still selling the machines.

"It was the same with the lamp trade, when kerosene oil made its first appearance. My uncle has often told me of the strenuous advice that was handed out to him by old fogies of 1859 and '60, who declared that nothing on earth could drive fish-oil and tallow out of the market. 'Wait till the oil wells peter out,' they said, 'and then you will get left with a lot of useless lamps on your hands.' The wells are still spouting, so far as I can learn. "I myself can well remember the same arguments about bicyles and electrical supplies, and you yourself, William, can recall what was said about automobile supplies and accessories.

"Never turn down a thing because it is new. I can recall the contempt of an old carpenter when first he saw a ratchet screwdriver. Said he would not use one if given to him. I have sold him several dozen since.

"We must make a push on these novelties, and if we believe in them our customers will."

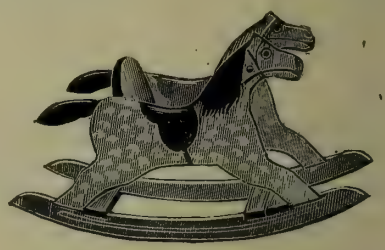


Some Christmas Novelties for Children's Trade

Many Lines, Such as Dolls' Cariages, Toy Automobiles, Wheelbarrows, etc., Usually Found in Book Stores, are Lines Hardwaremen Can Handle to Advantage, Along With Sleds and Skates—A Toy Section of a Sporting Goods Department Suggested.

Hardwaremen who have already made a beginning in catering to the holiday shoppers at Christmas time are every year adding to the stock, as well as extending the number of lines carried, so well satisfied are they with the profits to be made in handling goods suitable for presentation purposes. Indeed, some hardwaremen in the larger centres carry seasonable novelty goods the year round with fair success.

Of course, some forethought is necessary before laying in a stock of holiday goods, and the hardwareman is expected to show judgment in choosing the various articles, taking into consideration his constituency and the needs and vagaries of his customers.



Some articles of a nature that should commend themselves to hardwaremen in both city and country, for sale at Christmas time (and which will also be seasonable at other times in the year) are express wagons, toy automobiles and wheelbarrows for boys, dolls' carriages, etc., for girls, and rockers, etc., for small children, these goods going very well with sleds, which most hardwaremen already carry in stock.

"Racer" Automobile for Boys.

There are so many novelties made for toys. The shoo-fly rockers may not be both boys and girls that it is a wonder more hardwaremen have not up to now done more to try to catch this profitable trade, by establishing a toy section of a sporting goods department, particularly when so many of these novelties fit in so well with a general hardware stock.

Take, for instance, the "Racer" automobile for little boys, which is bound, at a glance, to catch the eye of every boy or girl. These automobiles are made in various grades and sizes. There is the "Elite" for girls, with little doors at each side; the "Special," with upholstered seat, and the "Tandem," with two seats; and all of them with the regulation steering wheel.

"Shoo-fly" Rocker for Children.

Then there are toy wheelbarrows, toy garden barrows and large garden barrows, as well as toy carts of many sizes. These are either house or out-of-doors exactly new, but this year a number of improvements have beaen made to this old reliable line, which should commend them as novelties for the holiday trade. There is the swinging shoo-fly, which has a forward and backward movement, instead of the up-and-down motion of the older style. Another member of this toy family is a hobby horse, with head and reins mounted on stick, and two wheels to keep balance and run smoothly; and for the baby there is the child's swing, painted red, which can be used in the house in winter and placed on the lawn in summer, and when not in use may be folded away.

One of the Gendron's Toy Wheelbarrows.

For the girls, big and little, there is the doll's carriage, which may be had with English-shaped body or in the favorite go-cart style. Some have reed bodies, with or without fancy parasol, and there are some mounted on runners instead of on wheels. The range of these dolls' carriages and cabs number easily 50 grades and sizes. An advantage with these goods, too, is the fact that repair parts may be had at any time. Dolls' cradles, too, are another line that go in connection with this special line for girls.

These are but a few of the many lines of children's goods on the market, but in addition there are boys' velocipides and girls' tricycles; rowing wagons, single, double and tandem; bent rail wagons of wood and steel; buckboards, single and double; dog and goat sulkies; wood and steel express wagons, trucks and delivery carts and wagons; children's furniture in sets and single pieces, and a great variety of sleighs, single and double, mounted on either high or low runners, for the youngest baby or the biggest grown-up. One sleigh for this season's trade is a boy's bob-sleigh with special steering attachment for coasting.

Additional suggestions can be secured by a study of the announcements of manufacturers in the advertising pages of Hardware and Metal.

Begin Christmas Advertising Campaign Early.

Suggestions for Newspaper and Booklet Advertising—Sample Ads. Illustrated—Emphasize the Good Sense Shown in Buying Useful Articles for Presents.

A GIFT SUGGESTION BOOKLET.

A good method of attracting custom to the store is to supplement your newspaper advertising with a small booklet having an attractive cover and containing, in addition to a personal talk signed by the merchant, some pertinent suggestions for presents for various members of the family, following the plan of giving a page of gifts "for father," and similar lists for other members of the family.

Herewith is reproduced a striking cover design, showing a messenger delivering a parcel to a young lady "just in time for Christmas," and as a suggestion for the "personal talk," something like the following might be worked up:

"The searcher for Christmas gifts will find some things at our old store that she

Cover Design for Holiday Booklet.

or he should have on the list. These will be found here in a little better assortment, of dependable quality, in patterns more exclusive and at prices sometimes lower than will be found elsewhere.

"This year we have found room for a number of imported and domestic novelties, mostly of brass and copper, which will interest the Christmas shoppers.

"Our cutlery stock is beyond local comparisons. Its appreciation requires an inspection."

The advice of the local printer can be taken on the size of the page and an effective display for the booklet and the merchant's stock will dictate the number of pages it will take to enumerate his "gift suggestions."

SAMPLE CHRISTMAS GIFT AD.

An important thing to remember when getting up Christmas advertising is that a great many people have only a limited amount of money to spend on Christmas gifts. In many cases people make out a list of persons to whom they have decided to make a gift, and plan to spend a certain amount on each one. The amount in many cases is necessarily a small one. In others, maybe, it is quite large. But the thing for a merchant to do is to tell the people what he can sell them in the way of Christmas presents for certain sums. It might be a very good plan to run some advertising of such a nature. To the person who is worrying about what he or she can possibly buy for fifty cents, it is a great relief to find that there are many handy and useful articles to be obtained at that price.

Success only comes to the man who goes after it.

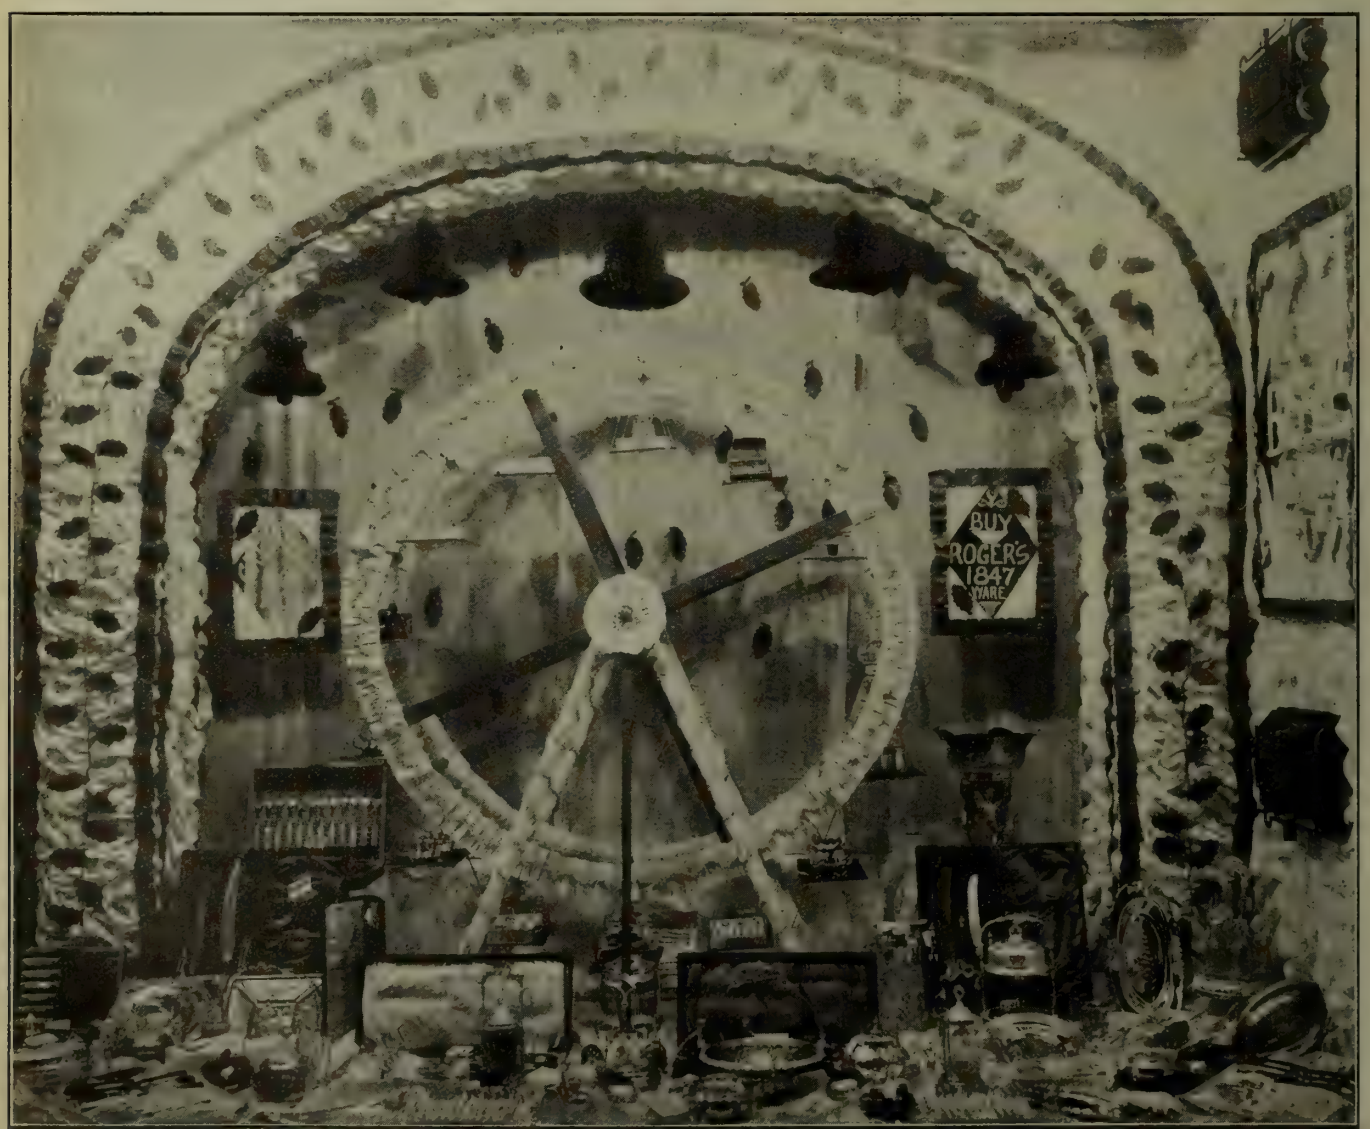
BROWN & SMITH, Hardware Merchants

Corner Main and Broad Streets - BLANKVILLE

Window Display a Big Factor in Holiday Trade



Illustrations of Good Displays Made a Year Ago in Canadian Hardware Stores —Prizes Offered for the Best Displays to be Made This Year—Suggestions to Follow in Planning Displays—The Window Never so Important as During the Christmas Season.

At no season of the year is the hardware store window of greater value to the merchant than in the month preceding Christmas. Most hardwaremen realize this and arrange to have at least one effective display of holiday goods, but. just as the merchant's ad. in the local paper needs changing with every issue of the paper, so is it both advisable and necessary that the window display be changed at least weekly at all seasons of the year, and especially during the interval between Thanksgiving and Christmas.

Canadian hardwaremen are realizing more and more the importance of the window display in their advertising campaign. and each year an improvement is noted in the photographs of Christmas displays sent to Hardware and Metal. A friendly local rivalry is also developing in several Canadian towns and cities, and this cannot but help in raising the standard of hardware window trimming in all parts of Canada, as nothing is so talked about by local townspeople or hardware travelers, as the enterprise of a merchant or clerk in putting together a window display out of the ordinary.

It is the aim of Hardware and Metal to encourage a greater interest in window dressing, and in this issue announcement is made of a number of prizes offered for the best holiday window displays and newspaper advertisements used during the coming holiday season by Canadian hardwaremen. Several window displays arranged by window trimmers in Canadian hardware stores are also shown in this issue, and additional pictures of displays will be reproduced in the next few issues of the paper. In offering prizes for window displays, a division has been made in which hardwaremen and clerks doing business in the larger cities do not compete with those in the smaller towns and villages, a double set of prizes being awarded.

Last year, in the towns under 10,000 population, the winner of first prize was H. Flowers, with Peart Bros., Regina, he arranging a mechanical display, the central features being a large arch and a Ferris wheel connected to a small motor in the basement. The color scheme was green and white, holly and paper bells being also used to complete the setting. The trimmer wisely avoided placing any goods to detract from the wheel, the background and wall being practically free of goods. The display on the floor was well balanced and price-marked and an admirable combination of attrac-

Christmas Window Arranged in December, 1908, by H. Flowers, for Peart Bros., Regina, Sask.

tive and selling qualities. The wheel carried fourteen trays or cars, each carrying samples of silverware or cutlery. A small motor in the basement caused the wheel to revolve at the rate of three times a minute, the belts being invisible from the street. The wheel was kept in motion day and night, and at all hours there were many spectators watching the wheel and studying the display. Peart Bros. give the display credit for moving a lot of goods which otherwise might have been left on their shelves.

First and second prizes in the competition confined to cities over 10,000 population were awarded to Walter S. Bate, with Johnson & Co., Brandon, Man., and Roy C. Gilmour, with J. A. Flett, Vancouver, the former having a neat window in which care was taken not to overload the window, high-class goods being prominently featured. Mr. Gilmour's display was also very tastily arranged, but rather crowded, especially on the floor of the window. A study of the illustrations will be helpful to every window trimmer.

Second prize in the smaller towns competition was awarded to Peter McNaughton, with J. L. Fenn & Sons, of Bracebridge, his window having a dark background, with every article standing out clearly, small price tickets being used. The base of the display was also relieved by steps, on which the goods in the background were raised and the monotony of a flat floor overcome.

In awarding the prizes, the judges considered that a window having features calculated to draw customers to the store, had considerable advantage over

Christmas Window Dressed in December, 1908, by Walter S. Bate, for Johnson & Co., Brandon, Man.

a display without such qualities, although it had good selling power. As a rule, a trimmer who dresses a window to attract attention arranges a companion window in which seasonable stock is displayed and priced in such a manner as to encourage onlookers to enter the store.

Trimming the Christmas window seems to be regarded as a difficult task, to be disposed of in the shortest possible time and with the least amount of work. Those who fall into this error are apt to fill their window with a miscellaneous lot of goods jumbled together in a meaningless manner, and it is not surprising that their windows produce few sales and attract little attention. The small retailer should give as much thought and attention to his Christmas window displays as do the city department stores, and a little time and thought will prove a profitable investment. In planning window displays, the following suggestions may be helpful:

1. Make one of your Christmas windows tell a story immediately understood by the children, and, if possible, use a Christmas scene or something that moves, or simulates life in the window.

2. In arranging the window, do not forget its primary object is to sell goods. Goods shown should be priced, and the invitation given to come inside and examine other lines displayed.

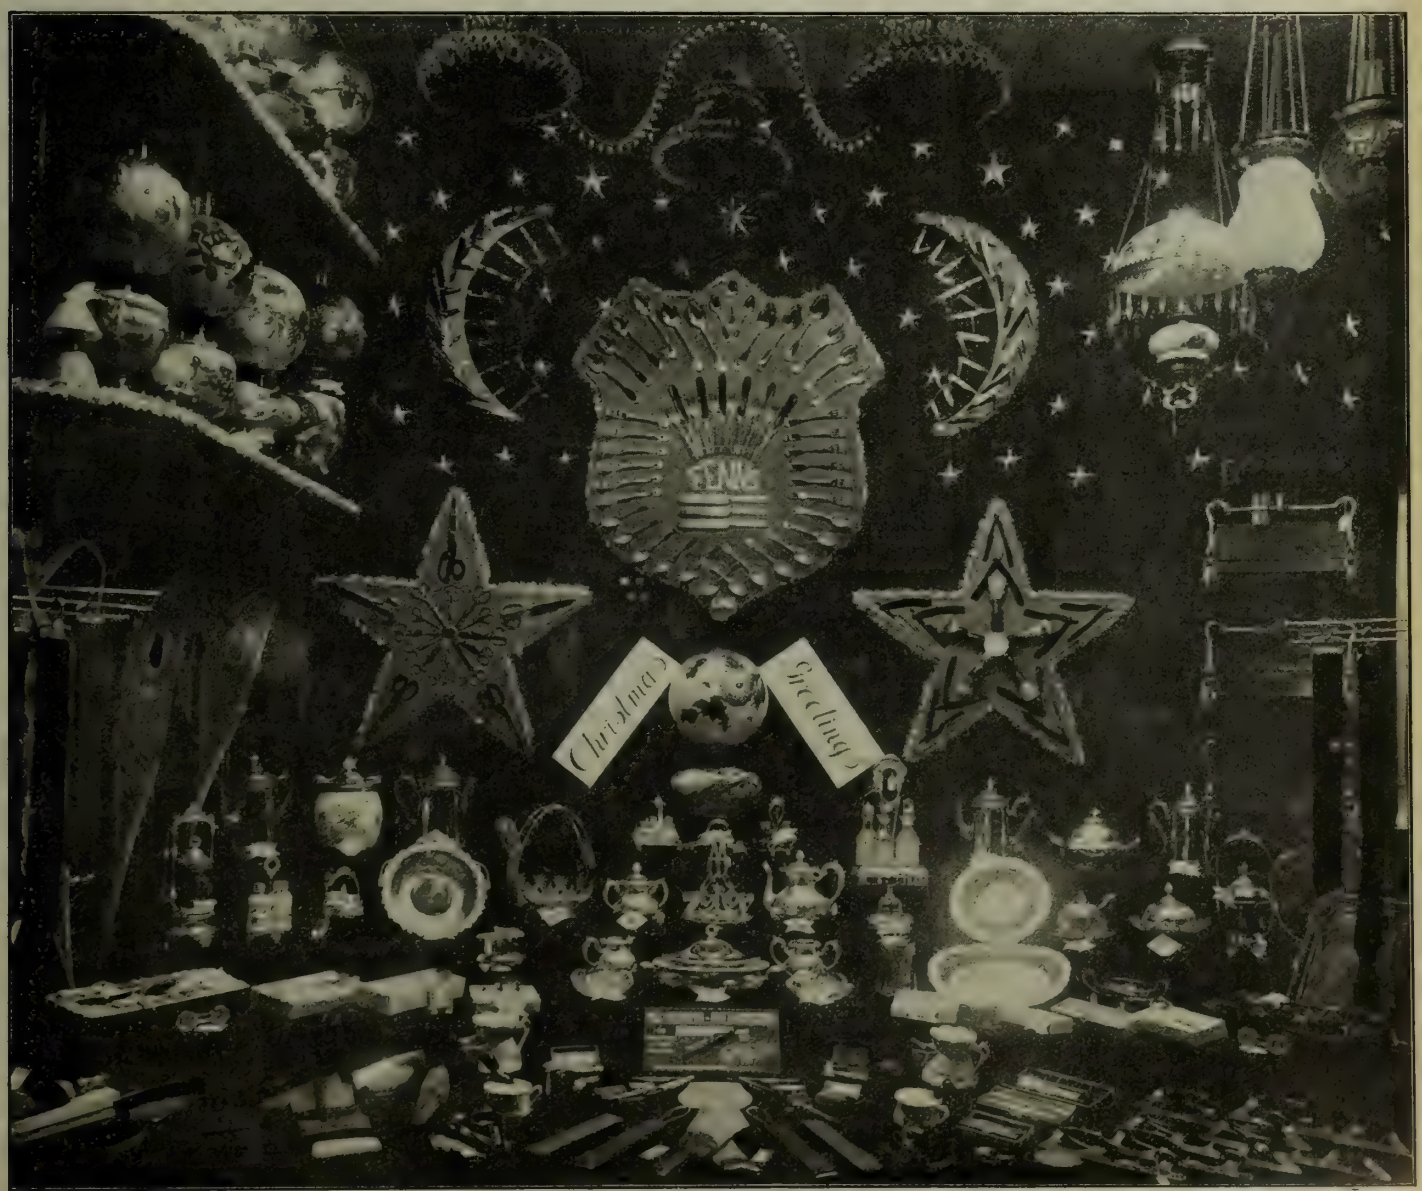
3. Suit your display to the size of the window. Do not overcrowd it. One article, prominently and attractively

Christmas Window Dressed in December, 1908, by Roy C. Gilmour, for J. A. Flett, Vancouver, B.C.

shown, with price tag, in a small window, is more effective than forty miscellaneous articles.

4. House furnishing specialties, such as coffee percolators, bread and cake mixers, lamps, etc., suitable for Christmas gifts, make good window displays and produce a large volume of sales.

5. Change the displays at least once a week.



The above suggestions will be found helpful to sales, of properly executed, as they represent the policy pursued by all progressive and successful retailers.

A GAME TRAPPING SCENE.

At the Buffalo convention of the New York State Retail Hardware Association, the Oneida Community showed a sample display in the form of a trapping scene in the woods, from which the following suggestion is made:

For the base of window, place a small packing case, 16 or 18 inches square, in the back of the window; this box is covered with burlap and built out with excelsior, so that it forms a miniature hill. A piece of stove pipe is hidden under this mound, which is first covered with glue so that dirt and moss will stick to it; this gives the appearance of a muskrat hole. A large mirror is placed about 8 or 10 inches from the front of the hole, with a trail made of dark-colored earth leading to this artificial pool. A No. 1 jump trap is set near the hole on the runway or trail, the chain being fastened to a small stick or bough, which appears to be driven into the ground. An old moss-covered log, 6 or 8 inches in diameter, is laid across the pool, and the balance of the window bed is covered with a light sprinkling of moss, which gives the appearance of a woods. The back of the window is covered with green burlap. Five or six small cedar or spruce trees about 2 or 2½ inches in diameter at the butt and 6 or 8 feet high were fastened up against this. These can be attached to the bed of the window by shaving the butts round and screwing into pipe floor plates. For the front and sides of window, take several halter chains, attaching them together and hanging them 4 or 5 feet above the bed of the window so that you can suspend the different styles and brands of traps that you have in stock. Be sure and display the largest-sized traps that you have, as they attract the attention of everyone passing the window. If you can display some of these traps open, it also helps to attract attention. It is not safe to do this, however, unless the window is closed so that small boys cannot handle the open traps.

The Gillette Safety Razor Co., Montreal, report being behind with orders, notwithstanding that their factory is running overtime. They are apologizing for late deliveries in their advertisements to the trade. This condition of affairs is an undoubted testimonial to the benefit of judicious advertising.

Christmas Window Arranged in Decem ber, 1908, by Peter McNaughton, for J. L. Fenn & Sons, Bracebridge, Ont

Holiday Trade in the Hardware Store

Women More Practical Buyers of Holiday Goods Than Men—Must Make the Hardware Store Attractive to the Women—Encourage Inspection and Help Customers to Select What They Want—Suggestions for Arranging the Stock and Making Window Displays—Plan a Campaign and Follow it Closely—Some Lines Which can be Featured During the Holiday Season.

At one time the average hardware merchant gave little attention to the opportunities for holiday trade in goods outside cutlery and sporting goods, and many still remain blind to the chances for pushing seasonable specialties, but the ever growing number of men who set out with the declared object of capturing some of the trade hitherto taken by the fancy goods stores and the jewelers become more enthusiastic after every venture. They find that the hardware store is, in many respects the best store for the trade and the holiday trade is the most profitable of the year.

This is becoming more apparent as the womenfolk develop as hardware buyers. The husband now leaves his wife to buy those articles which at one time he secured himself. He finds that not only is his wife a keener buyer, but that she always gets what she wants, whereas he very seldom, if the truth were known, brings home the right thing. Nothing pleases a woman better than shopping, and so the husband is satisfied to leave the matter in her hands only thankful that he is relieved of the task. It is the woman who does most of the Christmas buying, and therefore the hardwareman is only encouraging the natural development of his general trade in catering to the holiday demand.

Tool Boxes and Cabinets.

Outside the ordinary stock there are many lines that appeal to the Christmas buyer as being most useful and acceptable presents. For instance, how many amateur carpenters would be more than pleased to receive one of the tool boxes or cabinets which manufacturers now put up with every article carefully selected, and with due attention to what a workman really requires. How often is it the case that a man buys a tool, and then finds that for general work it is not the one that he really requires. But with the tool chests and cabinets now put on the market at prices to suit all pockets this danger is avoided. Then many a mechanic wants a special kind of tool. If the hardware merchant encourages a Christmas trade it gives the wife, or a member of the family, a chance of buying this article as a present, whereas it might not be thought of otherwise.

Cutlery and Silverware.

What better present could be given than a case of carvers or something of the sort, or a razor, safety or otherwise. The hardware store is the recognized medium for cutlery, and with right good reason. Experience has taught the hardwareman a good piece of steel when he sees it, and the buyer can with reliance depend upon the advice of the merchant.

Plated ware, too, has always been sold by the hardwareman, and from plated ware to silverware is but a small step. Why should not the hardwareman be as well able to sell silverware, and as good quality of silverware, too, as the jeweler? The modern hardware store, with its up-to-date fittings, and its general air of refinement and polish, is a different store from that of the earlier days when oils, colors, nails and other ordinary hardware were strewn about in careless confusion to the detriment of a woman's dress. Now silverware is not incongruous in the store. It is displayed in as good a setting, and gets as careful a handling, as in a jeweler's store. There is no reason why the hardware merchant should not extend himself very far into the Christmas trade, and carry lines that are not only valuable from an intrinsic point of view but lines as varied as he chooses to make them. But, of course, it is of no use to have the goods without letting the community know of the fact. Christmas goods will not sell themselves, no matter how choice and well selected they may be. In fact, the more the merchant extends himself on his Christmas stock, the more he should advertise the fact.

Encourage Inspection.

In pushing his Christmas lines the hardwareman should make due provision for the desire always manifested at this time of the year to have a look around before buying. He should not expect every person entering the store to purchase at once, and he should instruct his clerks, while being attentive, not to push the lines too closely when they see that the consumer is simply on a tour of inspection. Rather should the clerk set himself out to display all the goods but not to force a sale, so that the consumer goes away, not only impressed with with the goods, but equally impressed with the courtesy of the clerk. That is a great selling factor. The hardwareman should set himself out to make his store a rendezvous for holiday buyers and to succeed in this, it is well to display the Christmas stock early so that people can be given a chance of inspecting, and of then returning to buy. This is a sort of follow up selling plan which is very important. It must not be forgotten, too, that the first impression made on a person's mind is most likely to hold good. If a consumer sees something in the store that appeals to him as a suitable gift it is a hard matter to make him forget the fact and if the price is right he will return to the store, although he may see similar articles in other places.

The Holiday Setting.

In displaying his Christmas goods the hardwareman must give the proper holiday setting to them. He must make his store redolent of the spirit of the times. Nothing is so disheartening to a customer in going to buy a present to find the store barren of those little signs which bespeak the season. Imagine mothers bring their children to a store for the purpose of making holiday purchases if there is no outward manifestation of signs of the times. Children would not have sufficient enthusiasm to inquire for something that may have struck their fancy, and probably the parent would not become imbued with the necessary interest in the toy department because of these shortcomings. In preparing for the holiday trade the merchant should play upon the importance of holly, evergreen, and other trimmings consistent with the occasion. He should see to it that Santa Claus appears in his windows or interior with offerings for the juvenile sect. In fact, let the store, both outside and in, radiate festivity, and make customers feel that buying and selling is part and parcel of the Christmas fun.

Convert Store Into Bazaar.

The merchant should give his interior as much of a bazaar appearance as possible. He should, for the time being, clear away the heavy stuff, and with extra tables spread out his Christmas goods. With plenty of decorations he can make the interior look very pleasing to the eye, and at night time, if it is possible to have any music, for instance say a piano, and the store be brilliantly lighted, the merchant can crowd his store and incidently reap a good harvest.

It is essential that the merchant should have his store well illuminated, not only the windows but the interior. Even where gas or electricity is not available, so many good oil lamps of exceedingly great power are now on the market—that no difficulty need be experienced in this direction. These lights should be toned down by color globes, or shades of tissue paper. The colors should blend with the color scheme of the decorations as they will make the display more striking, and besides work toward showing the goods up better. If the colors are out of the ordinary they will attract the people. When tissue paper is used, the expense is small, and it permits of changes more often than by the employment of other means for shading. The merchant can

with a little trouble have a change of color every evening. All this of course means labor for the merchant, but it is worth doing. He wants to sell his goods and no trouble should be too great to do this. It must not be forgotten that by making a big display at Christmas he gives his store a prominence that will not be forgotten long after Christmas has gone. By making his store the talk of the town he adds dollars to his after profits.

The Window Display.

Equally as important as the interior are the windows. The windows attract the consumer, while the interior holds them, and makes the purchase. Therefore the windows should demand the greatest care on the part of the merchant. Every point that applies to the interior applied to the windows. They should be essentially "Christmassy" in tone, well illuminated, and the goods carefully displayed. In every window there should be centre piece or background appropriate to the season, and which will catch the eye, and create a pleasing impression. There are no end of clever and attractive ideas which may be easily worked out by any one who possesses ingenuity and skill. Where a store has only two windows, as is usually the case, one may well be given over to the toys, while the other shows a varied assortment of holiday and gift merchandise. A very effective background for a display of toys can easily be made by constructing a background representing a brick wall, with a heavy oaken door swung wide open, revealing a miscellaneous collection of toys falling in profusion through the doorway. The brick wall may bear a legend such as "Opening of Toyland" and a figure of Santa Claus may be posed in one corner, bearing in his hand a large gilt key, with which he is supposed to have unlocked the door. A display of toys may be made in front of this background. If the trimmer is at all handy with a brush a pretty snow scene representing a sleeping village may be painted on a "back drop" or curtain hanging just in front of the background and bordered with icicles, while conventional Christmas trees may be placed in the corners of the background.

Work on a Plan.

In any case, whatever the design, make the background attractive. Evolve something special for the class of goods to be displayed. Take plenty of time and figure out exactly what should be used to display the goods on, put the decisions on paper, and then follow them out. Do not try to make a window display by merely starting to work in a window, and arranging things as they come. Have a fixed plan before the start, think over it well, and decide on the color which will show the goods to the best advantage but have all details carefully planned before the work is begun. This enables the display to be put up in much less time, while doing it neatly and with taste. It is argued that show windows are often too crowded. It is impossible to get too much in a window providing it is arranged properly. The reasons why so many windows appear crowded and unattractive is because the goods are not properly placed, and of all seasons the Christmas season is the time to fill the windows, and impress the beholder with the variety and completeness of the stock carried.

Lines to Carry.

There are two great points which the hardware merchant must follow out in his Christmas campaign. These are variety of stock and the "holiday" character of the store. We have dealt with the latter fully. With regard to the former, the merchant must be his best judge, no hard and fast rule can be followed. His own business intelligence must prompt him, but there are several lines which can be mentioned in which the merchant cannot go very far wrong. From the list given below a desirable selection ought to be made:

Silver, plated ware and cut glass articles.

Chafing dishes, brass kettles, crumb trays, coffee percolaters, call bells and gongs, candlesticks and ornamental brass goods.

Cutlery cabinets, carving sets, table cutlery, berry spoons, bread knives, pocket knives, scissors and shears, scissors in cases.

Razors and safety razors, shaving sets, shaving mirrors, manicure and toilet sets, shaving and military brushes, smoking sets, leather novelties, writing sets, and cameras.

Kitchen ranges, oil or gas heaters, foot warmers, fire place goods, roasting pans, flour bins, aluminum or enameled ware, meat choppers and presses, coffee mills, bread and cake boxes, family scales, bird cages, washing machines, wringers, carpet sweepers, vacuum cleaners, wire door mats and cobbler's sets.

Marble and alarm clocks, cheap lines of watches, thermometers and compasses.

Electrical novelties, pocket lamps, electric irons, bread toasters, etc.

Gas and electric fixtures, fancy lamps, ornamental shades and globes.

Bathroom fixtures, rubber massage brushes, mirrors.

Skates, hockey sticks, snowshoes, toboggans and sleigh bells.

Iron toys, children's table cutlery, dolls' dishes, toy stoves and banks.

Guns and air rifles, thermos bottles, hunting clothing, axes or knives, revolvers, game traps and bags, fishing rods and reels.

Children's sleds and express wagons, coasters, go-carts, child's wheel barrows and dolls' carriages.

Tool chests and cabinets, lathes and equipment for doing fancy metal or wood work.

SELLING GUNS AND AMMUNITION.

The average hardware merchant is of the opinion that his stock of ammunition unless cleaned up every year will deteriorate. While there was some trouble with smokeless brands as made several years ago, it will not apply to the product as turned out by the standard powder mills of to-day. It is, however, well to clean up the stock if possible at least once a year, as any sort of goods become shelf worn, and then are not as salable as the newer goods. Another good reason is that every progressive manufacturer is constantly getting out a better label, making it as attractive as possible and giving the goods a better finish.

Capt. A. H. Hardy, writing in the Iron Age, says he would as soon shoot a shell that had been loaded for five years as one that had been loaded for five months, provided it had not been exposed to extreme dampness or heat. Shot gun ammunition on account of the paper, should be kept in a dry, cool place, and should never be placed on the shelf of an outside wall where it is damp. Although paper shells are supposed to be waterproof, and they are as near as paper can be made, it must not be forgotten that paper will always draw dampness. Dampness often causes the shell to bulge, and the purchaser then compliments the firm in sarcastic terms for sending out such goods, which is not at all the fault of the manufacturer. This applies only to paper loaded shells, and has nothing whatever to do with metallics, better known as rifle and pistol cartridges. This sort of fixed ammunition as loaded at the factory is regarded as absolutely waterproof. Capt. Hardy says he shot cartridges that had laid out all spring in a meadow, where rain had fallen a number of times and did not experience any bad results.

After a firearm of any kind has been shown to a customer, it should always be wiped with an oiled rag, which should be kept in the case for that purpose.

And never put away a gun of any kind that has been shot, it matters not whether once or more times, without cleaning it well and oiling it, winding up by using gun oil or vaseline.

Second-hand guns should not be kept in with stock of new ones, as it gives the former the appearance of a second-hand stock.

If a cork is put in the muzzle of a gun, the clerk may forget to take it out and the first shot will either burst or put a bulge in the barrel.

Many merchants complain about the profit they get out of ammunition, claiming that the manufacturer is too high in price. I have seen some of these same merchants selling .22 short cartridges at 25 cents a hundred and black powder shells at 40 cents a box. Now, it would not matter what they paid for the ammunition; it would be the same thing. There is a reasonable profit in ammunition and it is a stock that turns quickly.

Canadian Wholesale Hardware 11th Convention

Convention Held at Quebec and William Starke Re-elected President—Prominent Men at the Banquet—List of Those Present—Manufacturers and Wholesalers Meet Together in Good Fellowship.

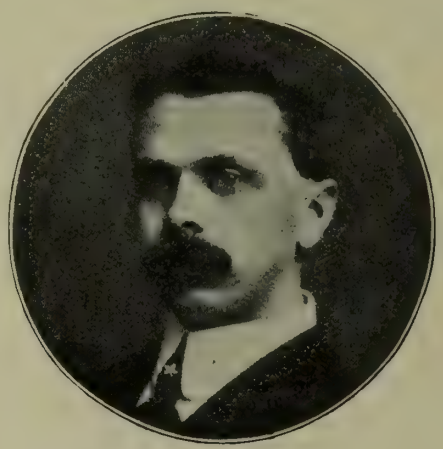
The Eleventh annual convention of the Canadian Wholesale Hardware Association was held in Quebec, Thursday and Friday, October 7 and 8th., the attendance being thoroughly representative and the meetings in every way satisfactory. William Starke, of the Starke, Seybold Co., Montreal, presided. The sessions were held under closed doors owing to the fact that their business was of a private nature.

A magnificent banquet was held on Thursday evening at the Chateau Frontenac, about 50 being in attendance. The decorations were beautiful in every way including a mantle of varigated Autumn Maple Leaves covering the tables in great profusion and interlaced with numerous bouquets of flaming red gladiolas. These were supplemented by plenty of palms and the whole coupled with the dainty candelabra and the Chateau's own beauty made a delightful scene.

Never was there more harmony, never was there a more representative and progressive gathering. The banquet was graced by the distinguished presence of the Lieutenant-Governor, Sir C. A. Pelletier, Sir Lomer Gouin, Premier of the Province, Honorable Sir Francois Langelier, Chief Justice of the Province, while

WM. STARKE, MONTREAL,

Of Starke-Seybold, Limited, Re-elected President of the Canadian Wholesale Hardware Association.



the Honorable Sir George Garreau sent his regrets. In addition, Captain Bernier, the hero of the "Arctic" was present, gaily uniformed with much gold lace and looking as if he had enjoyed his sufferings searching for the North Pole.

Distinguished Visitors Present.

William Starke, the re-elected president, occupied the chair. When the toast to his Majesty had been duly honored—and they were a loyal crowd singing God Save the King most vigorously—the Lieut.-Governor was introduced to the gathering. Owing to his native diffidence he merely bowed his compliments and sat down.

A letter of greetings was read from the Maritime Wholesale Hardware Association signed by A. M. Bell, of Halifax.

The Honorable Justice Sir Francois Langelier then spoke. He complimented the Hardware merchants upon their intelligence and industry and expressed his gratitude for the pleasure of being a

S. H. ALEXANDER, HAMILTON,

Of Wood, Vallance & Co., Elected Vice-president of Canadian Wholesale Hardware Association.

guest at such a splendid banquet. He was warmly received.

Sir Lomer Gouin responded in French to the toast "our guest," and so great was the applause when he arose to speak that it was a long time before he could be heard. On behalf of the Government of Quebec he welcomed the members of the Association who were honoring the grand old city of Quebec by their presence at the Convention. He believed the hardware merchants were important factors in upbuilding the commerce of his province as well as of the whole Dominion. He said the Government of the Province had always encouraged business men and there was a good representation of manufacturers in hardware lines all over Quebec. The Government had encouraged technical schools and had done its duty along the line of developing new territory for minerals (ap-

JAMES HARDY, TORONTO,

Re-elected Secretary-Treasurer for the 'Steenth Time.

plause). He then paid a neat compliment to Captain Bernier, the explorer, whom he styled his illustrious compatriot. He praised the work he had done as an explorer and an Arctic navigator. He understood that a Quebec hardware merchant had fitted out Captain Bernier's steamer. He concluded by a glowing tribute to the commerce of Canada, especially to those men in convention who had contributed to its development. (Loud cheers).

Hardware Travelers for North Pole.

Captain Bernier was then called upon. He was cheered to the echo and assured repeatedly that he was a jolly good fellow, in fact all the other speakers were dimmed into insignificance by the ovation given the explorer. He told briefly how he was lead into the work of exploration and detailed how he annexed territory for Canada. The crowd went wild with enthusiasm when he announced that he had captured 500,000 square miles for Canada. He created a great laugh when he told Sir Lomer Gouin that he ought to go up to the North country and see it for himself. He mentioned that the Chinic Hardware Company, of Quebec City, had provided supplies for the Doctor Cook relief expedition (loud cheers for Chinic). He believed Doctor Cook had found the pole according to

his own observation. The whole assembly arose and gave three cheers for Bernier and the Chinic Hardware Company.

The president in the course of introduction a song which was "O, Canada" said the Chinic Hardware Company had stolen a march on all the others in outfitting Doctor Cook. He asked Captain Bernier if the North Pole was a good place to send hardware travelers. (Great laughter).

Manufacturers' View of Trade.

William McMaster, managing director of the Montreal Rolling Mills, was then called upon. Mr. Starke said in introducing him that he represented a concern that he claimed had made more money out of the Hardware Association than any other. They gave Mr. McMaster a rousing reception calling him "Wully Mac" "Sir William" and a "jolly good fellow."

Mr. McMaster said that the manufacturers of Canada so far as he knew were working in harmony with the jobbers. He was glad to see that business had improved everywhere in Canada and that all trade conditions pointed to a betterment. He complimented the hardwaremen upon the stability of their business. He felt that the hardware trade should join with the manufacturers in looking forward to a greater volume of business in the future. He was glad to see the whole movement of the Association evolving into bigger things. The meeting and the banquet were a credit to the Association in every way.

T. H. Newman, of Caverhill, Learmont & Co., Montreal, and former president of the Association, proposed in an able manner a toast to the Association. He rehearsed briefly the history of that body and complimented the new president, William Starke, on being re-elected for a third term. He referred to the good things in the way of closer trade relationship which had been accomplished by the Association. He felt that it was the duty of the jobbers to get their commercial arms as closely as possible about the necks of the manufacturers and to keep them there. To the younger men growing up in the trade he urged sobriety, honesty and industry and that there was no better trade and no better country than was offered in Canada today. The resources of the Dominion were unlimited. The hardware merchants and manufacturers could all share in a marvelous future. He had the greatest confidence in Canada, in Britain and in all the elements that meant allegiance to the British Empire. He believed that a great heritage awaited the young men of Canada (great applause).

The president again made some joke about the new territory, the North Pole, and he called upon Mr. Chinic, of the good old hardware firm, the Chinic Co.

"Good old Chinic" and "We like Chinic" and several songs greeted the speaker before he could be heard. Mr. Chinic made a complimentary reference to the Association and the honor they had done Quebec, and invited them through his friend Mr. Davie to be their guests on an inspection tour of the Harbor Friday afternoon.

Manufacturers and Jobbers Friendly.

"Sister Associations" was the next toast, the president remarking that they gave little and took much. (applause).

Mr. Maxwell, of Hamilton, Ontario, responded, being compelled to listen for some time to such songs as "See him smiling" "Don't Believe Him," etc., all going to show Mr. Maxwell's popularity with the Crowd. He dwelt upon the importance of Associations in all good business to-day. He referred briefly to the value of co-operations between the manufacturers and the jobbers of Canada.

The president then said he would like W. Wallace Near to tell them why pipe sold at cost. Mr. Near was given a great send-off. He said that he felt he had done enough at the convention sessions to be absolved from any remarks at the banquet. However, he was glad to make the remark that a friendly feeling existed between jobbers and manufacturers. This was a compliment to the intelligence and good common sense of both parties.

The toast to the ladies was responded to by Jas. Peck of the Peck Rolling Mills. He made a humorous reference to Captain Bernier when he asked him to tell the company something about the Esquimaux ladies.

A toast to Hardware and Metal was royally honored and was responded to by the representative present.

The toast to the President, William Starke, was greeted with the greatest cordiality, and testified to the sterling popularity of Billie Starke. It was a long time before Mr. Starke could be heard and he had many assurances that he was a good fellow. He said he loved the work he had done with the Association. He believed they had done a great deal of good. They were improving every year. They were aiming at higher things. He hoped for great things in the future, thanked the Association for the honor they had done him and for the loyal support they had given him in his official duties. (Great applause).

A hearty toast was then drunk to Mr. Hardy, Secretary-treasurer of the Association. "Good Old Hardy" and "He's a Daisy" kept him waiting for sometime. Mr. Hardy responded very briefly, referring especially to the splendid future of Canadian business. He stated that he was especially optimistic regarding the hardware trade.

The dinner was brought to a conclusion by the National anthem and several other songs, including "Alouette," and many other French songs which seemed to capture the western men completely. Those who contributed to the musical portion of the programme were Moise Raymond, and J. A. Gagne accompanied by Professor L. Bessaine.

On Friday morning the delegates were driven to Spencer Wood as guests of the Lieutenant-Governor where a delightful morning was spent.

Election of Officers.

The newly elected officers for the Association were as follows:—

President, William Starke, Starke-Seybold, Limited, Montreal; Vice-President, S. H. Alexander, Wood-Vallance & Co., Hamilton; Secretary-Treasurer, James Hardy, Toronto; Executive Committee, A. Jeanotte, Montreal; A. Prudholme, Montreal; W, J. Lawson, Toronto; S. R. Kennedy, Toronto; and Joseph Lemieux.

Those present at the banquet were: Lieutenant-Governor Pelletier; Sir Francois Langelier; Sir Lomer Gouin; Captain Victor Pelletier, A.D.C.; J. G. Billett; G. E. A. Jones; G. D. Davie; Major T. H. Hetherington; M. Raymond; L. Dessane, J. A. Gagne; Art Lachance, M. P.; T. H. Newman; A. Jeanotte; W. Starke, A. Prudholme; W. McMaster; W. A. C. Hamilton; Geo. A. Childe; T. C. Dexter; W. L. Cummer; W. Shaw; E. N. Chinic; J. E. Lemeiux; V. Lemieux; J. D. Chaplin; J. M. Taylor; J. Hardy; S. H. Alexander; A. F. Hatch; G. Gillies; J. Maxwell; A. Letang; J. Brymer, W. Cummings; J. H. Parkes; J . Peck; R. Haldimand; W .W. Near; H. P. Hubbard; J. R. Terrill; W. J. Ball; C. D. Ten Eyck; J. H. Hanson; H. Hill; Captain Bernier; B. B. Stephenson and C. D. Cliffe (Hardware & Metal).

Jottings From the Note Book.

The Quebec hardwaremen did themselves "proud." Messrs Lemieux and Chinic have every reason to deserve congratulations.

The group of western hardwaremen who came to Montreal Saturday evening were mistaken for a concert company for they kept up a stirring chorus all the way from Quebec to Montreal. John Taylor was the only man that did not sing, he and Mr. Dexter continually exclaiming "louder," but Mr. Alexander was very proud of his double bass.

John Taylor is still the life of all the company where he is and he is always the best of good fellows, whom everybody likes.

William Starke makes an ideal chairman and brightened up all his toasts by apt personal references, which seemed to be exceedingly acceptable to all present. Third time as president is a high honor. Congratulations were due him from every one.

Jas. Hardy is one man in a thousand. He knows how to manage men, and he is the doyen of association and banquet managers. Everybody has the utmost confidence in him in business. Most men are willing to listen to his fine list of good stories.

ENTERING THE JOBBING FIELD.

Hamilton, October 14.—It is rumored that the Alexander Hardware Co., Hamilton, intend going into the jobbing field and will place three or four travelers on the road.

Business Methods of Canadian Hardwaremen

Chatham Jeweler's Novel Advertising Scheme—Do Fall Fairs Help Retail Business?—Novel Window Displays — Guessing Contests at Saskatoon.

A GUESSING CONTEST.

Saskatoon, Oct. 11.—Currie Bros. announce that, as their New Year's gift, they will divide $1,725 among six people who guess nearest the correct number of grains of new, No. 1 northern wheat enclosed in a half-bushel case, which is not to be opened until the morning preceding New Year's Day. The first prize will be $1,000 cash, and the sixth, $40 cash. One guess is given with every dollar's worth of goods purchased.

J. F. Cairns is out with a similar contest. It is called "Cairns' Christmas Box," and contains $1,500 in "cold cash." He has enclosed about half a bushel of No. 1 northern wheat in a sealed box, which will be opened Dec. 24. The best guess will be worth $1,000, and the sixth best $25 in cash. No guesser in either contest may win more than one prize.

It is noted that the announcement made by each of these department stores is worded almost exactly alike, and that the guessing in each case continues up to the day preceding Christmas and New Year's Day. It would appear, therefore, that the announcement as to the number contained in the Cairns' half-bushel at Christmas would be worth something to those guessing on the Currie half-bushel during the week between the two holidays. The fact that Cairns has taken "about half a bushel," while Currie has taken an "exact half-bushel," may, however, point to the kink in the problem.

As if to diversify the guesserfest arranged by the merchants, the Daily Phoenix is pulling off a voting contest—the most popular lady receiving a piano worth $550. There will be five other prizes, the sixth being a $75 watch.

D. G. R.

A SPECIAL STOVE SALE.

Brantford, Oct. 12.—Turnbull & Cutcliffe held a stove sale on Friday and Saturday, which was an unparelleled success. For some time previous, by a liberal use of newspaper publicity and other advertising means, they had advertised this sale, and the result was highly satisfactory. The previous sale tickets were retained on the stoves, ranges, heaters and gas stoves, and a straight discount of 20 per cent. off for cash, and 10 per cent. for credit, on the regular prices was given. The sale was limited to two days, Friday and Saturday, and a big trade was done on these days. They report that the buyers were eager for the higher discount, purchases in most instances being for cash, though a few city purchasers received credit. It is probable that, this sale having been so successful, another will be held shortly. Besides the sales, Turnbull & Cutcliffe report that their stove trade has been much greater this year than in previous years, the hot air furnaces being installed keeping from ten to fifteen men busy all year.

A. W.

A GRAB BAG WINDOW.

Peterboro, Oct. 13.—The Best Hardware Co. have a window display, which, although not particularly attractive in one sense of the word, possesses an advertising value that is obtained from its practical nature. It might be termed a "grab bag," as the entire list of articles may be purchased for $35. There is a medium-sized kitchen coal range, and a complete array of kitchen utensils from a large spoon to a baking bowl. Prominently displayed is a card announcing that the entire outfit may be purchased for $35. The window is sure to attract even the casual observer, and is bound to be of interest to those who are looking for snaps of this kind. The stove is, itself, of the newest pattern, and all the articles that go with it are of everyday use in the household.

H. T.

ATTRACTIVE LANTERN WINDOW.

Brantford, Oct. 12.—A. Ballantyne, hardware and stove dealer, Colborne St., shows a specially attractive window this week, the design of which was furnished by the manufacturers of the "Liberty" lantern. A view of the Liberty Statue; New York harbor, with the New York skyscrapers in the distance, formed the background, from white banners of the national colors, red, white and blue, extending to the windows, forming the sides and top. In the immediate foreground, groups of lanterns were artistically arranged. The Statue of Liberty and the windows of the skyscrapers were formed of transparent tissue paper, and when the electric lights were turned on, and the lanterns lit in the evening, the effect was a very striking one.

A. W.

COPPER GOODS DISPLAYED.

St. John, N.B., Oct. 12.—A seasonable display is being made in the windows of Emerson & Fisher, Germain Street. One window is occupied with a comprehensive assortment of brass and copper coal hods, andirons, shovels, tongs, pokers, fire screens, etc., and the other window shows oil heaters, self-feeders, ranges, etc., of all sizes, and at all prices. With chilly fall winds making people think of their coal bins, the exhibition of heating requisites is very timely.

A window in W. H. Thorne & Co.'s, devoted to brass, copper and nickeled chafing dishes and spirit lamp stoves and accessories, is a gentle reminder to the ladies that the season for hot beverages is at hand, and that afternoon functions are no trouble when these handy articles are a part of their equipment.

W. E. H.

"PAID, WITH THANKS."

Chatham, Oct. 11.—"Paid, Blank & Co.," the hardwareman wrote on the face of the two-months' old account which his customer had just liquidated. Then he added one more word:

"Thanks."

"There's nothing cheaper," he remarked, carelessly, when questioned about it. "I do that with every account that is paid. Really, there is no 'scheme' behind it, nor have I any notion that it will help business; I just do it from force of habit, and did it at the outset because it seemed to come natural to receipt a bill in just that way.

"Nevertheless, I imagine the habit has some trifling effect upon my customers, and if it makes even a few of them feel a little more like coming again, I consider myself well repaid for the very slight amount of extra effort it involves."

LIGHTING WINDOWS AT NIGHT.

Kingston, Oct. 12.—Does the lighting of the windows of the business houses of the city pay? There is at present an agitation on in the city for the lighting of the store fronts.

Three hardware firms, Simmons Bros., Lemmon Bros., and S. J. Horsey, have joined in the store lighting, and they believe that it is a good way to advertise. They say that it places the goods before the people, and that it is of special value just at this time of the year, when people are buying stores and other necessary equipment for the winter. There are a great many people, so it is pointed out, who are unable to see what the merchants have on exhibition in the day-time, and in the evening, when they stroll down the street, they will stop and have a look, providing the store is "lit up."

"As long as the people are on the street, it pays to have your window lit up," is the way a member of the firm of Simmons Bros., hardware store, put the matter. "I believe that we derive a great benefit from the practice; just now, we are pushing along our stoves, and we are able to put them on display in the window. I certainly believe that it is to a merchant's advantage to have his store window 'lit up' at night."

Kingston has four five-cent theatres, a vaudeville house, and a grand opera house, and, according to the opinion expressed by one hardware merchant, these places of amusement help along in the advertising in that they bring out the people at night, and they always stop to look at the store windows. People who would not probably come out are thus attracted.

It is estimated that it will not cost a merchant more than six or eight dollars a year to light his store windows every night. That's pretty cheap advertising.

isn't it? and it's effective advertising, too.

At present the city gives a special rate of six cents a kilowatt for outside display lighting. It is suggested that the six-cent rate should be extended to window lighting, which helps immensely to illuminate a street.

"Let there be light," is an appropriate sign displayed in the window of Woods' Fair, in Princess Street.

DO FAIRS HELP BUSINESS?

Guelph, Oct. 11—The writer rather expected retail merchants to uphold the Fall Fair idea and express opinion to the effect that a good Fall Fair was a good thing for the town generally, and for the retail merchant in particular, but such was not the tenor of the replies he received from most of them.

"I wouldn't say it does the town any harm," said one hardware man. "In fact I have no doubt the town is brighter and more businesslike as the result of the holding of a Fall Fair once a year, but I can't see where it benefits the retail merchant directly, or to any noticeable extent indirectly."

"There's no way, at least as far as I can see, in which a fall fair benefits the retail merchant," said Charles Penfold of Penfold Bros. "It's not a business getting institution, particularly at least not as far as the hardware business is concerned, and the hardware trade is only one of the several that cater to the wants of rural customers."

"Last week was fair week," said another well known merchant, "and the result was that we had one of the quietest Saturdays of the whole year.

"Farmers don't buy things they don't need as a general rule, and if a farmer needs a pair of hinges, or if his wife has told him she needs a can of baking powder or caddy of tea, it doesn't follow, by any means, that because he's in town three times a week he buys three caddies of tea or three pairs of hinges," was the way one retailer sized up the situation. "He might buy three drinks when he's in town three times, but we don't have bars in connection with stores nowadays.

"No, I can't say that I see any great benefits to be derived from a Fall Fair, for a city merchant," agreed another merchant. "We pay our subscription the same as the rest of them, and have our exhibit in the fair building, but we really can't see where it benefits us to any extent."

These impressions seemed to be general with the merchants of Guelph. They wouldn't all say they thought so in so many words, and very few of them wished to be quoted as saying so, but at the same time they were pretty generally of the opinion that the Fall Fair was not much of an asset to the merchant, at least they couldn't see any results from it in the way of increased activity in trade. H.S.N.

A JEWELER'S NOVEL AD.

Chatham, Oct. 14.—An advertising stunt adaptable to almost any line of business was pulled off by a local jewelry firm at the recent fall fair here.

It was announced well beforehand that a Mysterious Man representing the firm would be on the fair grounds each day, and that to the first person identifying him and addressing him in certain set words the man would deliver an order entitling the recipient to a $25 gold watch, free.

For purposes of identification there was published in the local press for several days before the fair a rear view of the unknown's head and shoulders. This also appeared together with full particulars of the scheme and other advertising matter on advertising cards which were freely distributed, particularly on fair days. A vital condition of the contest was that the person identifying the mysterious man should address him in these words: "You are the man advertising von Gunten's Keystone Watch." Otherwise, the written order entitling the finder to the $25. watch would not be handed over, the mysterious man giving no sign as to his identity.

Identification occurred the second day of the fair. In the meantime a large proportion of the men, young and old, in attendance, had been greeted with the cryptic words, while an equally large proportion, both men and women, seem to have been seeking the mysterious man. Full particulars as to the winner and the manner in which he was located, together with a face view, were published the next day.

Evidently von Gunten Bros. regard the scheme as a good one for advertising purposes since this is the second year they have put it in operation.

CANVASS THE HOTEL MEN.

The Onward Manufacturing Co., Berlin, Ont., have recently equipped the following hotels with their sliding furniture shoes: Iroquois hotel, Toronto; Hotel Cecil and Windsor hotel, Ottawa; Flanigan House, Saskatoon, and Francis hotel, Victoria, B.C. They are urging hardware merchants to secure samples of the shoes and canvass their hotelkeepers for a full equipment for beds, pianos, tables, etc. They are furnishing a transfer post card to retailers for advertising the furniture shoes on their show windows.

Another line that retailers can take up to advantage with hotelkeepers is the new enamel lavatory manufactured by the Steel Trough and Machine Co., which gives running water without installing plumbing. Every hotelkeeper will be interested in this proposition and it will also be a big seller in country houses, etc. Several hotels in Ontario have already installed the lavatory and an order for six was received this week for an Edmonton hotel.

A PROFITABLE HOLIDAY LINE.

A retail hardwareman in northern Ontario, writing to W. F. McIntosh, manufacturers agent, 28 Toronto Street, Toronto, stated that he could not see his way clear to stock a line of coffee percolators, chafing dishes, etc., as he could not compete with the prices quoted in a catalogue issued by a leading retail jewelery house in Toronto.

An investigation, however, showed that in only one line was the margin of profit low, this being a coffee percolator used as a "leader" by the catalogue house. Even on it, however, there was a margin of about 20 per cent. for the retailer selling at the same price in his store as the catalogue house sells at in Toronto.

The goods in question are manufactured by the Buffalo Manufacturing Co., for whom Mr. McIntosh is Canadian agent, and they are sold f.o.b. Buffalo. Figuring out half a dozen other styles of percolators, kettles and chafing dishes, it was found that the retail hardwareman could pay freight and duty and have a margin of from 40 to 70 per cent by quoting the same prices as the Toronto jeweler gives in his catalogue.

Many hardwaremen have already added brass and nickel plated ware to their list of holiday specialties and the incident referred to should encourage others to look into the proposition as this class of goods make a good showing and encourage women buyers to look to the hardware store for everything they require in house furnishings.

NEW HARDWARE JOBBING HOUSE.

Dominion Hardware, Ltd., is the name of a new hardware company which proposes to do a wholesale and retail business with headquarters in Toronto. They were granted a charter last week by the Ontario Government authorizing them to "manufacture, buy, sell and deal in hardware, metals, oils, varnishes, builders' supplies, mantels, tiles, grates, implements, machinery and other materials forming the stock-in-trade of a wholesale or retail hardware merchant." The company also propose to deal in sporting goods, and in the construction of public works, such as railways, wharfs, warehouses, etc. The capitalization is placed at $100,000. The provisional directors named are Melville Alphonso Smith, James Reginald Saye, and Thos. Edward Milburn, Toronto.

F. E. Brown, solicitor for the new company, stated that the company was "a bona fide concern with men of capital behind it, who would be ready to make a statement shortly." He was not at liberty to divulge the names of these men, but he did say that the names set out in the application for incorporation were "dummies."

Of the other names mentioned in the charter application Mr. Saye is assistant-manager of the King Edward Hotel; Chas. Leonard Weisner is a manufacturers' agent, representing the Canadian National Fireproof Co.; and Jos. McLellan Moore, of Durham, Ont., is a bookkeeper.

Although no verification could be obtained up to the time of going to press it is rumored that Jno. Brooks, late of Brooks-Sanford Co., and T. S. Hobbs, of Hobbs Hardware Co., London, are interested in the new company.

PHOTOGRAPH WINDOW DISPLAYS.

Every window trimmer who goes to the trouble of preparing a special display should have a photograph taken of it. Indeed it will pay every clerk devoting attention to window dressing to own a camera and learn how to use it.

What better recommendation, for instance, can a clerk have when applying for a situation than a few photos of good windows he has dressed, as a clerk having a knowledge of window trimming is recognized as one who must know the art of salesmanship pretty well.

Experience has proven that the best results can be obtained by photographing by electric light, provided the window is properly lighted, and making a long exposure gauged according to the power of the lens and the class or color of goods to be photographed. A window with sharp, distinct contrasts, or one containing light colored goods, does not need as long an exposure as a display of dark colored goods, or one without sharp contrasts of light and shade.

A fifteen-minute exposure is enough for the average well-lighted window. A poorly lighted window, or one containing dark merchandise, will require a longer exposure—twenty to thirty minutes is not unusual. During all this time the camera is exposed people can pass to and fro in front of the camera without spoiling the photograph, provided they do not stand in one place for any length of time.

Sometimes the top of the window is lighted much more strongly than the bottom of it, so that the photographs always come dark at the bottom. This can usually be avoided by placing two or three electric lights in the bottom of the window (extensions can be run from some of the sockets in the window), and so shielding them as not to shone directly into the camera. No light should shine directly into the camera.

It is well to remember that the window must be lighted more strongly than any objects across the street, otherwise these foreign objects will be reflected unless the screen is used.

A long exosure cannot be taken if there is even the faintest wind blowing, for the slightest shaking of the camera will blur the photograph.

RAILROAD BUYING A BAROMETER.

No better indication of the prosperity of a country can be found than in the equipment buying of its railroads. When the corporations are launching out into fresh rolling stock, and are providing for increased traffic then there can be no doubt that the trade barometer is favorable. But if the buying is shut down, as was the case last year, then there is no doubt as to the conditions being unfavorable. If railroad economizing tends further to depress trade, railroad liberality has the opposite effect. Not only does it mean that money will be circulating more freely, but that others are encouraged by the action of men who are recognized as leading guides of trade prospects. The increased buying of the railroads in the States this year has had much to do with the tremendous strides in recovery that the country is now making, and in the same way although not to such a relative extent—as Canada did not slump so much—the better purchasing of our railroads helped on the progress of the Dominion.

For some time now our railroads have been buying heavily, confident in the prosperity wave that has arrived and anxious to be prepared for further improvement. The rolling stock has been greatly added to during the summer and the winter is to be no exception. The C.P.R. are making extensive preparations at their Angus shops, Montreal, to prepare for next year's traffic. They have commenced by placing an order for 15 freight engines and three passenger engines of the Pacific type. Upwards of 150 passenger cars are also to be renovated, and eight new sleepers constructed. A record winter of work is anticipated at the Angus shops, and it is evident that apart from the benefit of this money circulating we have the satisfaction of knowing that much heavier traffic is expected next year.

The Grand Trunk and Grand Trunk Pacific are also making strenuous arrangements as to equipment. During the past four months they have added to their rolling stock at the rate of about $1,000,000 a month, while orders for new engines and cars have now been given which will ensure an even greater rate of progress during the balance of the year. Locomotives and cars are continually arriving and by next year great improvements will have been made to the rolling stock. During the past week the Grand Trunk Pacific completed its line between Fort William and Winnipeg, the line being now complete from Lake Superior to Edmonton.

Nor is the Canadian Northern one whit behind. Before the end of 1909 that road will have increased its equipment by 25 locomotives, 1,950 box cars, 500 flat cars, 125 stock cars, 40 cabooses, 16 baggage and mail cars and 15 passenger cars, every one of which will have been built in Canada. The Ontario division of the road will build during this winter a line to Ottawa, giving thereby a through line between Toronto and Quebec ; and the bridging of the gap between Sudbury and Port Arthur (now under construction) will connect the eastern and western divisions, and give the Canadian Northern entrance to the larger centres of the country. West from Edmonton the same line is surveying a route that will take it to New Westminster, so that it is but a matter of months until the third transcontinental railway will connect the Atlantic seaboard with the Pacific.

There cannot be much doubt as to the confidence of the railroads in the future business conditions of the country. The most sceptical can take heart when the shrewd business men controlling these interests make preparations for a greater strain on their rolling stock, for there is this evident fact that unless the country is prosperous, traffic cannot be.

INTERESTING LEGAL DECISION.

The extent to which a merchant can recover damages from his predecessor for failure to carry out a covenant not to resume business within a specified area during a specified time is dealt with in an appeal judgment just handed down by the divisional court at Toronto.

In the suit of Townsend vs. Rumball the parties are local hardwaremen. The plaintiff (Townsend) brought action to recover $500 damages for alleged breach of contract by the defendants (Rumball et al). Townsend purchased from Rumball part of a hardware business in the village of Harrow, and Rumball covenanted in consideration of such purchase not to carry on the business of hardware and tin merchants, etc., in Harrow or within five miles thereof for ten years from the time of purchase. The sum of $500 was agreed upon as liquidated damages for a breach of this covenant.

The defence was that the $500 was not actual liquidated damages, but, on

the contrary, formed a penalty, from which they asked to be relieved. At the trial judgment was given in favor of Townsend for $500 as liquidated damages, and costs.

The divisional court allowed Rumball's appeal and cut down the amount of damages from $500 as fixed by the trial court to the nominal sum of $5 on the ground that the former amount was, as claimed by Rumball, a penalty and did not represent the actual amount of damages incurred in consequence of breach of the covenant. The costs were fixed on the county court scale. An injunction was, however, granted restraining further breaches of the agreement.

LET NOVA SCOTIA MERCHANTS BE ON THE ALERT

In some provinces of the Dominion many are wondering why they cannot get as cheap school books as may be secured in Ontario. Those who have made a study of the matter, however, possess the knowledge why Ontario readers are supplied at such low prices, and no surprise will be expressed when it is realized the vast amount of advertising the company which publishes the books receives. It simply means that the T. Eaton Co. can afford to print the school books at a figure stated by experts to be less than cost, and charge the loss to the "advertising expense" account.

And this is money well expended. For every school-book published for use in Ontario public schools bears the imprint of the T. Eaton Co. Not only that, but the publishers have the privilege—and are known to be making use of it—of enclosing advertising matter with enquiries from parties sending for school-books. This has been shown to be a fact in a previous issue of this paper. It simply means that the legislature of Ontario, unconsciously, no doubt, has been the means of placing in the hands of a large mail-order house more power to draw from every district in Ontario the wealth that should be expended among merchants of those districts.

The direct consequence is that the retail merchants in Ontario who handle a considerable portion of school-book supplies are taken an unfair advantage of. The contract has the effect of taking the sale of school books out of the hands of the general stores of Ontario, and of bringing almost every home into contact with the mail-order house. It affects every class of merchant in the province.

It is interesting to note in this connection that in Manitoba, the Government of that province has recently awarded the contract for a series of readers to a regular publishing firm, not to a mail-order house, and not at departmental store prices. No doubt the Government of that province could have secured just as favorable terms as Ontario. Previous to the time of the awarding of the contract, however, the retail merchants held meetings and passed resolutions urging the Government of Manitoba not to place the contract with a mail-order house, at the same time pointing out the unfair methods of competition and the injury to business generally, which would result should Manitoba follow the example of Ontario.

Nova Scotia is the next province to be considered. An effort is being made to secure cheap school books for that province, in view of the low prices in Ontario, and unless the retail merchants there begin early to point out to the Government the undesirable consequences of giving such a contract to a mail-order house, they will be up against the same difficulty as is now experienced by Ontario merchants.

No time should be lost in following the example of Manitoba. Let the merchants of Nova Scotia unite at once and proclaim their rights; for it is an acknowledged fact that the retail merchant is the back-bone of any community, and that once his influence decreases the standing and importance of the community does likewise.

It does not seem probable that the T. Eaton Co. would accept such a contract as it did in Ontario, if it were going to lose money. There is no other object in sight but that the contract was signed and carried out for the advertising it contained. That the successful contractors for the Ontario readers have attained their object would seem to be fairly well demonstrated by the fact, that we do not hear of their publishing or offering to publish other school books at cut rate prices. The close touch with the people and their homes is sufficiently well obtained through circulating a series of readers bearing their trade mark, without their establishment incurring any further losses through supplying cheap books for the whole of the school course.

Nova Scotia merchants are therefore advised to be on the alert. Quick and decisive steps should be taken to see that no mail-order house that will use "cheapness" as a blind to circulate its advertising literature among the homes of the province, is given the contract.

PRIZES FOR HOLIDAY ADS. AND WINDOW DISPLAYS

With a view to encouraging a greater interest in holiday advertising by special Christmas displays, Hardware and Metal again offers prizes for a Holiday Window Dressing Contest. Following last year's precedent, contestants will be divided into two classes:

For the best selling window display shown in (1) a city over 10,000 population, and (2) in towns and villages under 10,000 population.

Prizes for Window Displays.

In each case there will be three prizes as follows: 1st, $5 in cash; 2nd and 3rd, copies of "Hardware Window Dressing" (cloth bound, $2.50),—making in all six prizes totalling in value to $20.

To enter the contest send clear photo of one or more Christmas windows, with a description and the name of the person who arranged the display. Photos must be mailed to us by December 31.

Ad. Writing Contest.

Most hardware merchants use increased newspaper space during the Christmas season with a view to booming holiday trade. We want to get copies of these advertisements.

The advertisement submitted should be about Christmas goods sold through hardware stores, such as cutlery, silverware, sporting goods, lamps, stoves, carpet sweepers, household goods or other holiday lines. All that is necessary is to forward one or more clippings from your local paper to us, with the name of the writer of the advertisement, and the name of the paper it was clipped from.

The award will be made by an advertising specialist and will be announced, with a reproduction of the prize ad., shortly after the close of the contest. All entries should be mailed not later than December 31.

Prizes for Best Ads.

A prize of $5 cash is offered for the best newspaper advertisement as described and another prize of $5 cash will be awarded to the merchant or clerk sending the best holiday booklet advertising holiday gifts purchasable in his hardware store. With the ad. or booklet send a description of any special selling plans or display features used during the holiday season.

Address: "The Editor," Hardware and Metal, 10 Front Street East, Toronto

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 82.

MARKETS IN BRIEF.

Montreal.

Tin—Cut of ½c.
Copper—Cut of ¼c.
Linseed Oil—Advance of 2c.
Iron Pipe—Advance in all sizes.

Toronto.

Iron and Galvanized Pipe—Up about 5 per cent.
Linseed Oil—Advanced 2c.
Pig Iron—Advanced 50c.

MONTREAL.

October 15.—Trading has been very active this week, and jobbers report every prospect of a continuance. Much more confidence is manifested by users, and what makes the position all the stronger is that the smaller interests, although buying heavier, are not putting by any stocks. Everything they order is going out at once. The larger users have not much time now before the close of navigation, and who have not provided for the winter are doing so as speedily as possible. There is every indication that prices generally will be much higher next year, and good buying now will probably mean the saving of much money later on.

Despite the good volume of trade, prices have been affected by the sagging in the primary markets. Tin has been cut ½c for ordinary jobbing lots, while copper is easier again, and quotations are now around 14c. Both these metals in the primary markets have been very disappointing. It was thought that a bullish movement was in force some days back, owing to better consumption, but the heavy stocks of copper and the record production were too much for this metal, and tin seems to have been affected in a sympathetic way. Allowances can be made for the speculative character of tin, but copper is very disappointing. There is no doubt that the heavy production is a millstone around the neck of this metal, and recovery is uncertain.

Only the great progress in iron and steel in the States has kept the markets up to the point they are at present. There was a record rate of pigiron production last month, and present indications are that the rate will be more than maintained. With this signal indication of a nation's prosperity there is always hope, of course, for a steady revival in the other metals. Spelter, owing to its galvanizing connection, is a good seller, and keeps firm in price. Lead is still weak and uncertain.

PIG IRON—There is a very good tone locally in imported pig, despite the fall in Cleveland warrants. Stiff prices are maintained, and heavy contracts are still being placed for delivery before the close of navigation, the last boat leaving the Old Country in the early days of November. Provision is now being made by holders for the filling of the warehouses for winter consumption. Canadian furnaces are full up with orders, at firm prices. The figures as to the pig iron production in the States for September caused some surprise, although it was expected that the record had been very closely touched. The month, however, showed record figures and October promises to do more than maintain the rate. The inquiry for finished steel is still very great, and the mills are getting behindhand in deliveries. The improvement is a wonderful indication of the great way in which the country has recovered itself. Cleveland warrants have fallen to 51 shillings and sixpence, and the speculative tone in the Old Country is very weak. Still conditions over there are better than these indications seem to show.

TIN—Trading has been very active. The smaller users have been buying freely, and using up every bit of metal that they purchase. The tone of the market is good, despite the weakness in figures produced by the drop in the primary markets. With a cut of ½c, we now quote jobbing lots at 32½c. Inquiries are good, and the decline may induce more buying. The sagging in the English tin market seems to be due more than anything else to sympathy with the copper situation. So long as consumption is on the quiet side in both metals so long will the one influence the other.

COPPER—With the sagging in the primary markets, copper has been again shaded ¼c, and we now quote jobbing prices around 14c. Trade has been very good, and despite the sagging in prices the market has a firm tone. Copper is proving very disappointing in the primary markets, and a much stronger consumption is being kept back by the weakness of the markets. The statistics for September make very poor showing. The rate of production was maintained, with an increase of over 16 million pounds in domestic stock. This, combined with the gain in European stocks, makes the known holdings of the metal over 343 million pounds. When it is considered that any stiff improvement in copper will bring this metal to the market it can be seen that the consumption will have to be pretty strong to cope with it. There is no doubt that production should be restricted.

SPELTER—There is no change in spelter. The local trade is very good, and the price of $5.75 is well maintained. The English market remains firm under the control of the syndicate, and the strong demand from galvanizers. St. Louis remains firm.

LEAD—Imported lead is unchanged at $3.60, with Trail at $3.50. The demand is better than it was, and good orders have gone through during the week. The English market is not so strong again.

SCRAP—The scrap market is unchanged, with buying about the same strength as last week. We quote: Heavy copper and wire, lb. 11c; heavy red brass, 10c; light brass. 6¼c; tea lead, 2¼c; heavy lead, 2½c; scrap zinc, 3c; No. 1 wrought iron, $11; machinery cast scrap, $14; malleable, $12; miscellaneous steel, $6.

TORONTO.

October 15.—The whole metal market shows a distinct advance over last week. Pig iron keeps advancing, a conservative estimate noting a higher price by about 50 cents per ton over last issue. The other metals are unchanged in price, but they are both active and firm. The proposed steel plant at Vancouver is to be much larger than at first estimated, and may represent an outlay of nearly $3,000,000. There is a probability of this new concern entering a second steel trust, connected as it is with the Irondale, Wash., plant. The promoters expect to trade not only in the industrial centres of the west, but to push for business in the Orient, Australia and the west coast of South America. In the west alone (both Canada and the western States) it is said some $18,000,000 was paid out last year in freight on eastern iron and steel, the rate being about $18 a ton. This will be a big advantage to the new western steel trust.

PIG IRON—Sales continue excellent. The demand is simply enormous compared with a year ago. Production, too, is making new records both in Canada and across the border. In the U.S. all previous records in pig iron production have been broken and the output is still increasing, the rate now being about 30,000,000 tons a year. Port Arthur iron is finding ready sale in the east, many Ontario foundries having taken fair quantities since the beginning of the month. The Dominion Iron and Steel plant is too busy making rails that they have no pig iron for sale; and large buyers are almost begging iron of the Hamilton furnace. Midland, too, reports very big business. With it all pig iron in Canada shows some advanced prices. Roughly these are about 50 cents higher than last week, and nearly a total of $4 a ton higher than six weeks ago, with the end said to be not yet. Prices for to-day f.o.b. Toronto are Midland, $22; Clarence, $21; and Summerlee, $23; other irons in about the same ratio.

COPPER—Values are steady. Stocks are still large. Business is active with prices unchanged and a non-interference of speculation. Lake ingots are at 14c and casting ingots at 14½c. The feeling in regard to copper is better than it was last week.

LEAD—Trading is good, with prices steady and unchanged from last week. Imported is $3.65 and domestic is $3.55. The outlook is hopeful.

TIN—There is rather more inquiry for tin this week, and this has tended to firm up the market. Locally, the quotation is at 32½c and the situation is fairly strong although reported easier outside.

SPELTER—Excellent demand exists for this metal and the markets here and in the U.S. are strong. The quotation is still at $5.75 and is firm at that figure. London reports a higher price.

SHEETS AND PLATES—An enormous business has been done of late in sheets and plates, and the good trading continues. Orders for supplies for the balance of the year and for the early weeks of 1910 call for a very large volume of these two lines. Prices are unchanged, but very firm, Some advances have been made across the border, and while they do not immediately concern this country's trade, they have a tendency to strengthen the situation.

OLD MATERIALS—Scrap iron and steel are back to the high water mark, and demand for these two old lines is very great both in western Ontario and in the U.S. The other old materials show strength, but not to the same extent as iron and steel. Prices paid by dealers are as follows: Heavy copper wire, 11¼c; copper bottoms, 10½c; heavy red brass, 10¼c; heavy yellow brass, 8¾c; light brass, 6½c; tea lead, 2½c; heavy lead, 3c; scrap zinc, 3½c; No. 1 wrought iron, $11; machinery cast scrap, No. 1, $15 to $16; stove plate, $13; malleable and steel, $8; old rubbers, 9c.

HARDWARE MARKETS

MONTREAL.

October 15.—Trade is extremely brisk. The Northwest has all along been improving, but the east has not shown such a relative good improvement. Trade has picked up splendidly, however, in this latter direction, and jobbers generally are more than satisfied with the aggregate volume of business. The shipping departments are exceedingly busy as orders are of a very general character, and are wanted at once—an indication both of developing consumption, and of light stocks.

Delivery is getting harder to obtain in some lines, notably locks and files, and before the year is out it would seem that many other lines will be showing shortage. With the firming of prices all the way round, it behooves merchants to look after their future requirements carefully, for the men who purchase wisely these coming days will reap a great benefit.

No changes are announced locally with the exception of an advance in iron pipe, due to the stiffness in raw material and the strong demand. No change has been made in bolts, although the indications are that an advance is likely at any moment. The markets are firm all the way round, and the tone is exceedingly bright.

Orders, now, are of a sorting up character except in some lines of lumbermen's supplies. Guns and ammunition continue to move well, likewise hockey sticks, pucks, skates, snowshoes and toboggans. Nails are in very strong demand, and it will not be surprising if the market sees some changes. Kitchen utensils are in strong demand, especially articles for cleaning such as carpet sweepers, brushes, brooms, mops, and window cleaners. The demand for stoves and ranges has improved although the weather is still very warm. Good sorting orders have been received for lamps, burners, cow ties and stable outfits.

BUILDERS' HARDWARE—The advance last week seems to have checked the demand slightly, but it will be only for a short time as stocks in dealers' hands are very light. With delivery behind hand in many lines, jobbers find it very difficult to make up promptly the general orders coming in. The market is very stiff, and we quote: Lock sets (inside) $4 per doz. and up, lock sets (outside) $13.20 and up, common rim locks $1.10 per doz., porcelain knobs $1.10 per dozen, sash cords, 30c.

FALLS LINES—Sorting orders are of a much heavier character especially from the east. The demand seems to have received a strong stimulation and merchants are wanting the stuff at once. Weather strip, ice shovels, sleigh bells, sleigh heaters, burners, lanterns, cow ties, are prominent. There is a strong movement in household utensils, especially carpet sweepers, scrubbing brushes, washing machines, wringers, and other cleaning goods. Enamelware is still in strong demand in the Northwest, where the stocks must have been very low. Tinware is also in strong request.

CUTLERY AND SILVERWARE—With the approach of the Christmas season, cutlery silverware, and plated ware are commencing to move in a very active way. Trade seems to have opened earlier than is usually the case, and merchants are evidently determined to make a good showing. Carvers in cases, table cutlery, table spoons, berry spoons, pickle frames, table kettles, are commencing to move. There is also a growing demand for safety and other razors, manicure sets, etc.

SPORTING GOODS—Guns and ammunition are still prominent movers. Hockey sticks are in strong demand, as well as pucks, skates, straps, and snowshoes. Winter lines have opened out very well, and supply houses are satisfied with the prospects. Gymnastic lines are in fair demand, and there has been a stimulation in revolvers for indoor shooting.

MINERS' SUPPLIES—The market is firm, with a steady demand, especially in picks and blasting powder. With much railway construction work going on good sorting orders are coming in for hammers, picks and concrete mixers. We quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—The market is very firm in tone, but no change has yet been announced. Orders are showing gratifying strength. Nails continue to be in very strong demand, and under these conditions the market should firm up. We quote: Discounts on carriage bolts, ⅜ and smaller, 70;, machine bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—Like bolts, nuts and nails, there is a strong demand for screws, and the market is very firm. We quote: 85 and 10 off for flat and round head bright; 75 and 10 off for flat head brass, and 70 and 10 for round head brass.

LUMBERMEN'S SUPPLIES — A strong improvement is shown in lumbermen's supplies, some heavy orders being dispatched during the week. Camp supplies are also showing stimulation. The market is firm and unchanged. We quote: Cant hooks, $12 a dozen and up; axes, $6.50 a dozen and up; axe handles, $1.15 and up; cross-cut saws (inferior) 25c per foot and up; better grades 43c per foot and up; axe wedges, 25c a doz. and up.

SHOVELS—The demand is steady, not only locally, but from outside points. The market is firm, and we quote: First and second grades of spades, 60 and 2½; 3rd and 4th, 50 and 2½; scoops, 1st and 2nd grades, 50 and 5; 3rd and 4th, 45 and 5.

STOVES AND RANGES—Despite the continuance of the warm weather an improvement is noticed in stoves and ranges. The market is firm, and with the advance in raw material prices are stiff. Oil heaters and cookers are in equally good call. Coal hods, pokers, ash sifters, etc., are also good sellers.

WIRE—There is a fair movement in wire, especially plain lines. No further price changes are announced, and we quote: Barb wire, car lots, mixed, $2.50; small lots, $2.55; plain twist, car lots, $2.80; small, $2.85. Galvanized wire, No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots, f.o.b., Montreal. Coiled spring fencing, $2 30; straight and mixed car lots. and $2.35 small lots. Plain wire, bright, annealed and annealed and oiled, $2.30 base.

IRON PIPE—The advance in raw material and the heavy demand have resulted in iron pipe being raised. This has been expected for some time. Discounts now are, ¼-in. black, 63; galvanized, 48; ⅜ black, 59; galvanized, 44; ½ black, 69; galvanized, 59; ¾-in. to 4-in. black, 71½; galvanized, 61½.

TORONTO.

October 15.—Good business is continuing in the hardware trade, and the general tone of the market is firm. While orders are moderate and scattered compared with the past several weeks, current sales represent a much broader demand than at this time a year ago. Pipe

is the only line showing a change this week; that line increasing quotations by about 5 per cent. There is a likelihood that screws will go up next week, owing to the increased price of raw material. Rods have gone up in price across the border this week, but no change has yet occurred here. Quotations of bright wire goods have also gone up in the United States, following the general line of advances in all manufactured metal goods.

The present demand is for seasonable goods—rifles and ammunition among sporting goods; platedware, especially spoons and forks, for the house; fence wire; builders' hardware and tools; nails; lamps, chimneys, stoves and heating lines. There is certainly stimulation in the hardware trade this year.

BUILDERS' HARDWARE—There is a pressing demand locally for this line of hardware, the sales running particularly to door sets for new houses getting their finishing touches. The grade of goods called for is higher than has generally been the case in late years. The advance in locks, knobs, keys, etc., has acted as a stimulant to better buying. Window fasteners, sash weights and sash cord have sold well this week, as also have butts and door hinges.

TOOLS—Keeping pace with builders' hardware is the demand for builders' tools. The crying need for carpenters in Toronto and some of the other larger centres of the province, as well as plasterers, bricklayers, tilers and metal men, has brought about an unusually strong call for almost every article used by builders. The individual sales run rather to separate articles than to sets, no doubt because of the near approach of winter. All prices are firm at last week's advances.

FALL LINES—Farmers are yet buying pretty extensively judging by the shipments going to country hardwaremen. The advance in harvest tools has made possible some more active buying in that line, though of late the line was somewhat lagging. Stable goods and fittings keep up in steady demand, and wire fencing is fair. Building and roofing papers of various makes are very good sellers just now, both in country and city, the paper being used quite extensively for repairing, as well as on new houses. Staple shelf goods are steadily active. All lines are unchanged in price, and the market is firm.

SCREWS—The prices which have been ruling for some weeks now are very firm this week on a rumor that prices may be advanced in a few days, probably next week. The increased price of raw material is given as a foundation of the rumored price change, though no person interviewed would say one word either way as to the accuracy of the report. As yet the discounts on flat head wood screws are: Bright and steel, 85 and 10; brass, 75 and 10; bronze, 70 and 10. Round heads are: Bright and steel, 80 and 10; brass, 70 and 10; bronze, 65 and 10.

HEAVY GOODS—Pipe prices have gone up this week, the increase amounting to (roughly) 5 per cent. on most lines. 1-in. black is $4.70 per hundred feet, instead of $4.54, and 4-in. size is $30.78, instead of $29.70. Galvanized pipe, too, shows an equal advance, 1-in. is now $6.35, whereas it was $6.19, and 4-in. is $41.58, instead of $40.50. The smaller sizes of pipe have been scarce all over the country for several months past and the advance on these sizes was expected. Rods have gone up $2.50 a ton in the United States, making a total advance of $4.50 within the past three months. The advance has not yet affected Toronto prices, but the situation is very strong. Nails are in big demand, but that is only a repetition of the condition of this commodity all summer. Blacksmiths' tools and forges are inquired for frequently.

HOUSEHOLD GOODS— Sales continue good. There have been some splendid orders placed for platedware this week, especially for spoons and forks. Cutlery is showing improvement, and a few of the larger hardwaremen in the city are showing cut glass and brass goods as suggestions for Christmas. Enamelware and tinware are still sought after. Kitchenware has the call at present.

SPORTING GOODS—Loaded cartridges and shells, together with rifles, are the leading sporting lines this week. There have been sporting camping outfits sold, too, but these have gone out in limited numbers to parties preparing for the shooting season. Football goods are the next best line, but demand is rather weak.

HARDWARE TRADE GOSSIP

Ontario.

C. Frank Ready, Toronto, has taken a position in the hardware store of R. Hawkins, Smith's Falls.

W. Gordon, of the Steel Trough and Machine Co., Tweed, Ont., was in Toronto this week on business.

The tender of the Barnes Hardware Co., at $2,222, was accepted for installing the plumbing and heating in the Port Arthur car barns.

J. Walton Peart, St. Mary's, who recently went south for his health, writes from Louisville, Kentucky, that he is getting on famously and will return home in about two weeks' time.

The brick work of the new Geo. Taylor Hardware Co.'s store at Cobalt, is rapidly nearing completion, and the contractors hope to have the building completed and ready for occupancy by the end of October.

Lyle Mills, of Waterford, has assumed the management of McMurtry's hardware store at St. Thomas. Before leaving Waterford a number of the young men of the town presented Mr. Mills with a traveling case.

Peleg Howland, president of H. S. Howland & Sons, Toronto, states that the two great things which impressed him most on his recent western trip were the splendid harvest being garnered in the Prairie Provinces, betokening another year of prosperity for the people in the west, and the remarkable growth of Vancouver, which has doubled in population since Mr. Howland's last visit there four years ago.

A. W. Humphries & Son, Parkhill, have on hand contracts for installing the plumbing in the new post office there, the residence of Rev. Father Foster, at Mt. Carmel, and the residence of S. E. Couzens, Parkhill. Their workmen are this week putting the galvanized iron cornice work and roof on the new Government buildings in that town.

H. J. Morden, Colborne, secured the following heating contracts last week: A No. 30 Kelsey generator for the Hotel Alexandra, Wellington; a No. 16 for A. D. Campbell, Wellington; a No. 30 for the Hotel Bowman, Bowmanville; a No. 16 for J. S. Cornelius, Cobourg, and a No. 30 for the High School, Beaverton. He recently sold two—one No. 30 and one No. 24—for Warkworth school, a seven-room building. The school contracts also include ventilating systems.

Quebec.

J. C. Paquette, hardwareman, Sherbrooke, Que., has assigned.

A. P. Gosselin, St. Alexandre, Que., has been on a visit to Montreal.

N. Curry, of the Rhodes-Curry Co., Amherst, has been on a visit to Montreal.

It is announced that the Pennsylvania Steel Co., Pa., are to tender for work in connection with the Quebec bridge.

W. J. Hall, manufacturers' agent, of Montreal, is on a trip to the Maritime Provinces.

D. Roskam, of the Ever Ready Safety Razor Co., Montreal, is on a business trip to the Pacific.

The Mount Royal Color & Varnish Co., Montreal, are erecting a factory on Dorchester Street East.

Thierry Mallet, general manager of Revillion Freres, Montreal, has returned from an inspection tour in Hudson's Bay.

A. M. Bell, a former president of the Maritime Board of Trade, was a caller at the Montreal office of Hardware and Metal.

W. T. Hood, accountant for the Record Foundry Co., Montreal, is setting up in business for himself, as accountant and auditor.

F. S. Lefebvre, representing the Gillette Safety Razor Co., left this week on his Christmas trip through the Eastern Townships.

A. D. Williamson, of Vickers, Sons & Maxim, London and Sheffield, is on a trip to Canada and the United States. He stopped some time in Montreal taking in the sights.

John M. Taylor, of Taylor, Forbes Co., called upon the Montreal hardware trade on his return from the hardware dinner at Quebec.

L. P. Beaulne, Hawkesbury, Ont.; J. James, of James & Reid, Perth; A. Herman, of Herman & Dover, Chalk River, called upon the Montreal hardware trade.

C. D. Ten Eyck, of the American Fork & Hoe Co., and the Maple Leaf Harvest Tool Co., stopped in Montreal on his way back from the hardware dinner in Quebec.

Albert Spalding, of A. G. Spalding & Bros., whose Canadian headquarters are located in Montreal, is being boomed as Senator in the place of Senator Flint, Los Angeles, Cal.

Douglas G. White, of the firm of Geo. A. White & Son, Trenton, Ont., is in the Royal Victoria Hospital, Montreal, undergoing an operation for a dislocated cartilage of the knee joint. This was the result of what was considered a minor accident received some 13 months ago.

J. H. Alexander, of Wood, Vallance & Co., Hamilton; T. C. Dexter, H. S. Howland, Sons & Co., Toronto; H. P. Hubbard, E. C. Atkins & Co., Hamilton, and A. F. Hatch, Canada Steel Goods Co., Hamilton, paid a visit to the Canada Paint Co., Montreal, on their way to the hardware dinner at Quebec.

Norman McGillis is now representing Frothingham & Workman, Montreal, in Ontario, east of Napanee, taking the ground formerly covered by W. Craig, who is no longer with the company. Mr. McGillis has had long experience in the hardware trade, and knows the Ontario ground as he formerly covered it for Frothingham & Workman.

Robert Munro, of the Canada Paint Co., Montreal, has been giving evidence before the Canadian-West Indian Trade Relations Commission at Montreal, as to the possibilities of bettering the trade relations between this country and the islands. Mr. Munro said his firm was too busy at home at present to attempt to work up West Indian Trade.

The Thos. Robertson Hockey Club, Montreal, held its annual meeting last week. The team will be practically the same as won the championship of the Commercial league last season. J. R. Wilson was elected hon. president, J. M. Robertson and S. R. Brewer, hon. vice-presidents, J. W. Buckle, president; John Wilson, vice-president; T. Robertson, treasurer, and John Johnson, captain.

Western Canada.

L. Gully & Co., hardwareman and furniture dealers, at Vegreville, Alta, have assigned.

Smart & Cornell, hardwaremen, at Edmonton, are succeeded by G. A. Smart & Co.

J. E. Riley's hardware store at Winnipeg was damaged by fire last week. The premises and stock were insured.

The Moose Jaw Stove Co. is a new concern, which will make a straw-burning stove. A plant will be built at Moose Jaw.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

The Shear Gazette.—J. Wiss & Sons Co,. Newark, N.J., issue the "Shear Gazette," gotten out in four-page form, newspaper size and style. In the top corners appears "All the Shear News That's Fit to Print" and "Business Forecast—Fine Fall Trade." The heading of the first column is "It's Shear Nonsense" and then follows a brief talk about the "Wiss" Shears. The next heading is "Seen in the Window" and is devoted to the window displays of dealers, their importance and what the company furnish the dealer to make up such display. Views of the things the concern furnishes for window displays are given, also illustrations of outfits of scissors and shears, razor display cases, also a large number of electros for newspaper advertising, which are furnished free.

"Three-Flue" Base Burner.—The McClary Mfg. Co., London, have issued to the stove trade and stove buying public in booklet form a "Treatise on the 'three-flue' famous base burner," their 1909 model heater. The stove derives its name from its three exposed flues, which are the basis of its heating success. The claims of this heater are that these flues radiate six times the heat of the ordinary base burner, and the drafts are such that the fire can be regulated scientifically. The front mica door has two catches, insuring against the escape of gas. All the nickeled parts are impervious to dampness and moisture and are removeable, as also is the fire pot. The "Three-Flue" is one of the "400 Famous Series."

HARDWARE LETTER BOX

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Wooden Weather Strip.—A. Latham, Moose Jaw, Sask., asks for a practical wooden weather strip for doors.

Most Canadian jobbers sell the wood and felt strip made by G. W. Bosley & Co., Chicago, it having the largest sale on this market. There are also several metal weather strips, made particularly for doors, the cost of which is greater than the wooden type.—Editor.

Family Grist Mills.—I. L. Cooke, Coboconk, Ont., asks where he can buy a family grist mill to turn by hand.

There is nothing of this kind on the market. J. Fleury & Son, Aurora, Ont., make a small power burr mill for grinding meal. The poorer people in the Southern States use small hand coffee mills for grinding corn and grain, for grinding meal and manage to secure a

Winnipeg Heaters.—W. A. Matthews, Cannington, Ont., asks where he can procure the "Winnipeg heater."

The agents for this heater in Canada are the Nineteen Hundred Washer Co., 357 Yonge Street, Toronto.—Editor.

Mantels and Grates.—J. Rumball, Niagara Falls South, asks for the names of firms handling wood mantels and grates.

Barten Netting Co., Windsor; Canada Plate Glass and Mantels, Toronto; Rice Lewis & Sons, Toronto.—Editor.

Cider Presses.—Dakin Bros.,, Digby, N.S., want the names of manufacturers of cider-making machinery.

The London Foundry Co., London.—Editor.

ROWE SANITARY LAVATORIES.

The Steel Trough and Machine Co. Tweed, Ont., have secured the exclusive right to sell and manufacture in Canada, the Rowe Sanitary Lavatory, a running water lavatory, which does not require plumbing connections. The device is novel and ought to be sold in large numbers by hardwaremen to summer cottagers, country hotels colleges and village and farm houses, retailing at $18 complete. It consists of a

A Lavatory Without Plumbing.

pedestal lavatory of galvanized iron, enameled inside and out, the basin of which rests on a hollow stand having a capacity of five gallons of water. The supply of water is carried in a galvanized iron tank hung on the wall, the front of the quartered oak frame being fitted with a plate glass mirror. By turning a tap, therefore, water runs into the basin and by pulling a plug the basin empties into the pedestal, which can be emptied daily if needed. The lavatory is fitted with nickel-plated towel racks, soap and tumbler holder, pipe and faucet, and is so simple that by inserting half a dozen screws, the lavatory can be placed into position or changed to another part of the room. It is a washstand, bowl, pitcher, slop jar and mirror all in one, and has had enormous sale in the United States. Illustrated pamphlets will be sent on request.

Trade Gossip from Canada's Eastern Provinces

St. John to Get Big Cement Industry — Nova Scotia Retail Merchants' Association Organized—One of the Chief Objects to be the Establishment of the Cash System.

ST. JOHN.

October 13.—At a special meeting of the city council held last week it was decided to accept the offer made by David Craig, of Boston, for a lease of certain city lots at Greenhead, on the St. John river, for the erection of a plant for the manufacture of concrete houses and other goods. Mr. Craig will pay $850 a year rental, and his lease will run for 14 years.

Mr. Craig stated that he did not intend to manufacture cement alone. His industry will turn out concrete houses, of which only one-eighth part is cement. At the outset he will buy the cement required, but intends eventually to make enough, at least, for his own use. The conrete houses, Mr. Craig says, are manufactured in parts and shipped to the purchaser, who can have them put together without skilled labor.

The Craig manhole cover is another invention that will be manufactured. This cover obviates all leakage of surface water through manholes. The Craig pressure seal, or convoluted joint, is the principle of their construction. This type of manhole is at present used in Boston. The Craig pressure seal or convoluted joint is also used in the construction of dry docks.

Another patent to be manufactured is a steel tire for automobiles, to take the place of the rubber tires now in use. These steel tires, by means of springs, have the resiliency of rubber, are easily attached, last longer and sell at about half the cost of rubber tires. Among other inventions that will be turned out are several sanitary improvements, and a number of improved appliances for engines and boilers.

Mr. Craig has been connected with the plumbing trade for many years. He is a native of St. John, having been born here in 1864. At the present time he is president of the Master Plumbers' Association of Boston, and chairman of the legislative committee of that association. In 1905 he was president of the National Association of Master Plumbers of the United States, and is now chairman of the sanitary committee of the association. He has been one of the civil service examiners of Massachusetts for plumbing inspectors since 1898, and is a member of the State Association of Boards of Health, and a member of the Massachusetts Charitable Mechanic Association. He is also a member of the board of directors of the Boston North End plumbing school, and lecturer for the school on the theory of plumbing, since 1898.

The Nepisiquit Lumber Co., composed of some of the wealthiest lumbermen of the United States, closed a deal last week, whereby they take over the control of the extensive properties of the Adams, Burns Co., of Bathurst. The purchase includes all the lumber, crown lands and milling properties, as well as the wharves and stores at Bathurst village. The price paid is said to have been several hundred thousand dollars. A large and modern lumber mill is to be erected in place of the present buildings and it is also possible that a pulp mill may be established.

A joint committee, appointed by the city and county councils, has been appointed to report on a project for erecting a new building for the city, county, local government and court offices.

Clarence B. Allan, the Water Street hardware merchant, who, with his wife, has been on an extended trip to the Pacific coast, returned home last week.

Horatio N. Coates, of the wholesale hardware firm of S. Hayward Company, of this city, was married last week to Miss Iva M. Roach. The staff of the S. Hayward Co. presented them with a handsome quartered-oak china cabinet.

J. H. Plummer, head of the Dominion Iron & Steel Co., passed through St. John last week, en route to Sydney. In an interview, Mr. Plummer stated that he did not think there was any likelihood of a merger of steel interests. He stated that new coke ovens were being built at Sydney at a cost of a quarter of a million dollars.

The St. John Hardware Merchants' Association met on Monday evening, October 4, for the first time since the holiday season. The last previous meeting was in May. From now on, during the winter months, the association will meet each month on the first Monday evening.

The president, John A. McAvity, was in the chair at the last meeting, with W. S. Clark secretary. Routine matters were discussed and arrangements made for an early meeting of the price committee to consider any changes that might be deemed advisable.

Business during the summer is generally reported to have been very satisfactory. W. S. H.

HALIFAX.

Oct. 8.—Representative business men from all over the province met here last week, and formed what is to be known as the Retail Merchants' Association, of Nova Scotia. The store-keepers present represented nearly all lines of business, and there were about fifty in attendance. The objects of the new organization are to improve the conditions of the retail merchants throughout the province, particularly in the matter of purchasing goods direct from the manufactures when possible, and also to reduce the transportation charges. Perhaps the most important aim of the association is to inaugurate the cash system for the retail merchants of Nova Scotia. The objects of the association as set forth by the special committee and adopted, were as follows:—

First. To deal with weights and measures of goods, as we are lead to believe that there is a great amount of injustice done to the retailers and consumers in this way, and it shall be the duty of all member of the said asociation to report to the secretary any cases of shortage, with the names of the parties responsible.

Second. To enquire into telephone rates, which we find exorbitant in some districts; we consider this a matter in which we may have to ask special legislation.

Third. To enquire into the matter of parcel post business, as it affects retail trade.

Fourth. To ask the Government to hold the manufacturer responsible for the adulteration of goods instead of the retailer.

Fifth. To ask the Government to make a uniform rate of bank discount not exceeding six per cent., in view of the fact the interest paid is only three per cent.

Sixth. To advocate the consolidation of the transportation companies in order to reduce the freight rates.

Seventh. To prevent the retailing of goods by wholesale houses; all such cases to be reported to the secretary.

Eighth. To reduce the cost of purchasing goods by limiting the expensive travelling salesman system.

Ninth. To encourage the purchase of everything made in the Dominion from the manufacturer direct.

Tenth. To establish a universal cash system in selling goods.

Among questions, the discussion of which was recommended by the chairman in a practical opening address, were the following:—

Wholesalers selling goods to consumers at wholesale prices.

Buying goods ahead the cause of 75 per cent. of the failures.

Must buy goods direct.

Refuse to buy from jobbers maintaining combine prices.

Weights and measures.

Telephone rates.

Parcel post.

The day of special lines passing.

The middleman must go.

Tariff commission.

Adulterated goods.

Bank discounts.

Railways rates.

Nearly one hundred letters from merchants in sympathy with the movement, but who were unable to be present, were read, and they signified their intention of becoming members of the association. Officers were elected and meetings will be held at central points on the call of the president, C. H. Clements, of Port Medway.

Interesting Trade Items Gathered in Ontario

Brantford Merchants Locating in New Stores—Thieves Enter Kingston Store—New Retail Store at Cobalt—Peterboro Firm to Enter Wholesale Field.

OTTAWA.

An interesting test of a newly invented explosive was made at the quarries of the Portland Cement Company, near Hull, on Saturday afternoon. This is the invention of H. G. Nicoll and Jos. Matchett, of New York City, and the trial on Saturday was the first public test held. It is known as the "Twentieth Century Non-Freezing Explosive" and it is claimed that from the standpoint of an explosive it is equally as good as dynamite; but that it far excels the latter in that it can be handled with safety by anyone and under any weather conditions. It was to demonstrate this assertion that the tests were held. In all there were twenty-four discharges. The first series of four were to show that the new invention will explode under water; the second to show that it will work equally as well as dynamite; and the third to prove that even in a frozen condition it will explode. Those who witnessed the tests were much interested, as these were considered quite successful.

KINGSTON.

October 12.—Thieves secured an entrance to the hardware store of S. J. Horsey, and made off with some of the cutlery. The cutlery cases were the first attacked and nothing but the best of razors, penknives, knives and forks, scissors, spoons, etc., were taken. The cash drawer was also ransacked, but only a few coppers and stamps were secured.

The fire and light committee opened tenders for rubber goods, for the members of the fire departmen'. The Gutta Percha Rubber Company, of Toronto, put in the lowest tender, and it was accepted, as follows: Seven pairs of rubber boots, $38.50; five rubber coats, $30; one pair of rubber gloves, $3; four caps, $2; total, $73.50. Several local dealers tendered, but their tenders were considerably higher than the one accepted.

McKelvey & Birch, are making a special display advertisement this week in the local papers, booming the mittens they have for polishing stoves, shoes and furniture. "They are good ones, and sell at 10c," reads the ad.

E. G. B.

PETERBORO.

October 13.—The Peterboro Hardware Co. have a window advertisement that has drawn the attention of hundreds since it was put in on Saturday night last. It is a live raccoon caught near Rice Lake and being a natural curiosity to city people it proved a great drawing card especially to the Saturday night crowds who thronged in front of the window three and four deep. There is a pole with a perch on top and as Mr. Coon frequently climed to this lofty resting place, the bystanders were amused and instructed by the animal's agility.

It has been learned that the Peterboro Co. propose erecting a warehouse on George St. near the C.P.R. station which will enable them to carry on a wholesale business which it has been stated they intend to do. It will be on the lot adjoining that of the Kinnear warehouse and will be quite a large building. Plans have been prepared for a C.P.R. siding into the property and while a representative of the company would not state definitely their intentions it is practically assured that the work will be carried out.

H. T.

BRANTFORD.

October, 4.—John Bishop & Son are pushing their fall paint trade, their west window this week containing matter calculated to cause the average householder to consider its merits. Local dealers report that the paint trade has been very brisk, not only during the summer months, but also throughout the fall, and reports indicate that this year's sales will far exceed previous season's.

Leonard Bishop, of Bishop & Son, has left to take up a course in the Toronto Royal School of Cavalry, to qualify for a lieutenancy in the newly organized 25th Brant County Dragoons.

Local military men state that a new armory for the 25th Brant County Dragoons will be erected on the old Buck Stove Works property next spring.

The Bank of Hamilton will erect a new bank building at Paris.

Turnbull & Cutcliffe are pushing their stove trade at present, running a half-page ad. in the local papers. They announce a sale of stoves for Friday and Saturday, when they will give a discount of 20 p.c. off for cash sales, and 10 p.c. on credit sales.

The Cockshutt Plow Company will build another extension of 50x100 feet to the iron storage department, while other additions are planned.

Reference was made at the city council meeting on Monday evening to an item in last week's Hardware and Metal re the need of better fire protection for Brantford factories, saying that such an article knocked the town. Fire Chief Lewis, however, recently said that the present six inch main on Elgin Street would be useless in the event of a big outbreak, as if two hydrants were used there would not be sufficient water to carry the stream. It is probable that the matter will be taken up by the council.

October 10.—Brantford hardwaremen have not gone in for advertising displays at the fall fairs in the surrounding district this year, but one showing at Burford, which was the big fair of the district. They state that the results were not commensurate with the time, labor and money expended.

J. F. Schultz, for some years manager of Schultz Bros., contractors and builders, of this city, will in the future take up his residence in Toronto.

C. J. Mitchell, sporting goods dealer, has taken up his new quarters in the recently erected three-storey building in Darling street.

Plans have been prepared for a new Y.M.C.A. building on Darling street, to cost approximately $50,000.

The brickwork on the new Union Realty Co.'s building on Dalhousie street is now progressing favorably, and Watt & Squire, local hardware dealers, are expecting to remove into their new quarters some time before Christmas.

With Thanksgiving only two weeks off, local hardware men are preparing special windows for the occasion. Watt & Squire, as usual, propose to have some novelty in their west window.

Telephone City Stoves are announcing a special sale of stoves for next week, parlor stoves especially being reduced.

The local school board is considering the question of increased accommodation, as every school is much over-crowded. It is thought that one or two schools will have to be erected early next year to cope with the difficulty.

A. W.

COBALT.

October 13.—H. J. Marshall, for nine years with the Ecclestone Hardware Co., Bracebridge, and J. F. Gilmour, also of Bracebridge, though not previously connected with the hardware trade, will open a hardware store at Cobalt on October 20, trading under the name of Gilmour & Marshall.

Both Mr. Gilmour and Mr. Marshall were in Toronto this week placing their opening orders for hardware and paints. Arch. McGregor, of Lewis Bros., secured the order for hardware.

TORONTO.

October 13.—The assets of the Queen City Plate Glass and Mirror Co., Toronto, which recently went into liquidation, have been bought by Albert I. Forster, accountant of that company, and a charter has just been granted by the Ontario government authorizing the formation of a new company under the title of the Queen City Glass Co. The capital of this new concern is placed at $40,000, and besides Mr. Forster, the provincial directors include Edward Chas. Bee, manager of the old company and Wm. Thos. Sparrow, foreman in the works.

The new company will carry on business along the lines of the old company, dealing in glass and glassware of all kinds, with practically the same officers.

J. O. H.

Godden & Bray, hardwaremen, 2185 Queen Street East, are succeeded in business by Bray Bros.

David Thomson, hardwareman and tinsmith, Toronto, has retired from business.

Hodson & Payne, 584 Bloor Street West, Toronto, have dissolved partnership, and the business will be continued by O. M. Hodson, under his own name. The store is one of the best fitted up in the residential section of the city, and Mr. Hodson reports trade as having been splendid from the commencement two months ago.

OWEN SOUND.

Oct. 12.—The Western Foundry Co., Wingham, have purchased the wagon and horse of J. W. Van Norman, who was recently fined for peddling stoves without a license, although Van Norman is still acting as a manager for the company. They say they will carry on the peddling business without a license as they are manufacturers. The fine amounted to $20 for each wagon.

The Town of Owen Sound are erecting a new chimney for the electric light plant. The new chimney when erected will be 120 feet high. The present one in use is only 70 feet in height. The contract was awarded to C. A. Lethbridge.

At a meeting of the street naming committe last night it was decided to recommend the awarding of the contract for street signs to Creeper & Griffin, hardware merchants, and for house numbers, to Thos. R. Weir, of Stratford. These recommendations will probably be adopted at the next council meeting. No contract has been placed yet. The number of street signs required will be 900, and 10,000 numbers will be required.

Owen Sound stands unique amongst Canadian towns in that it is probably the first town to totally discard all the street names, which have marked its thoroughfares since its incorporation, nearly 60 years ago, and adopt numbers. All the streets running north and south under this by-law become avenues, and number east and west from the River Sydenham, which divides the town. The streets running east and west are numbered consecutively from the southerly limit of the town and where divided by the river and harbor are designated east and west. The house numbering will be by the block system. The adoption of the postoffice department of postal delivery in Owen Sound made it necessary to place street names and house numbers. This would involve the changing of over fifty names to avoid in some places two or three streets with the same name. As all the streets run at right angles, the adoption of the numbering system in Owen Sound is a comparatively easy one to make. G.T.C.

CHATHAM.

Oct. 11—"This is the biggest gas range and heater season we ever had," remarked Ed. Wanless, of the J. C. Wanless hardware store this afternoon. "Gas stoves and ranges are moving out very rapidly." He added that people were getting wise to the fact that it is cheaper to buy a gas heater than to use gas appliances fitted into a base burner. The fuel saving in using a gas heater he estimated at from 25 to 35 per cent.

Only a few firms here are paying much attention to electrical work, the "independents" being handicapped to a certain extent by the fact that the Chatham Gas & Electric Light Co., which supplies the current, has on several occasions advertised wiring and fixtures at actual cost, for the purpose of securing new customers for electric light. Nevertheless, Jas. L. Watt & Sons, plumbers, have enjoyed a large and growing business along this line in the city, and have done considerable work in adjoining towns.

The city council has at last taken steps toward the inauguration of a plumbing inspection system. A by-law is to be introduced providing for inspection. The proposed inspector is David Holmes, the present Sanitary Officer, a small addition being made to his present salary to cover the new work. In some quarters the opinion is expressed that a practical plumber should have been appointed, though the feeling is that the city is hardly in a financial position to secure such a man for the work.

Ridgetown has been invaded by gas stove agents, in anticipation of the expected arival of natural gas next month. They are doing a brisk business. Local gasfitters are also very busy.

James Samson, who has been clerking in the Samson hardware store at Blenheim during the summer, has left to take up the study of medicine at Ann Arbor, Mich.

Frank Rogers, of Detroit, has been doing some plumbing work for J. W. Fleming & Son, Blenheim.

W. E. P.

News From the Prairie and British Columbia

Vancouver Merchant Sells 42 Ranges as a Result of a Demonstration—Rich Mineral Discovery on British Columbia Coast—Big Building Record Being Made at Victoria.

VANCOUVER.

October 9.—General business in hardware is very satisfactory. The fall season, as far as weather is concerned, has been better this year, following the intermittent summer, and building and other operations are continued longer than usual, being practically uninterupted so far by rain. The result is that trade has kept fine. The district tributary to Vancouver is growing so rapidly anyway that the seasons do not bring such a big difference as some years ago.

The value of the permits for the week reached $108,712, a total of 37 having been issued. Only one ran into five figures, one for $21,000 for a brick building on Davie street for Mrs. M. Hood.

Morgan & Elkins, who kept a plumbing shop on Gore avenue, have dissolved partnership, the business now being carried on by Mr. Morgan.

The Vancouver Engineering Works has installed a new complete plant for the production of steel castings, having adopted the surface blown bessemer process for making the steel. It has the advantage over the open hearth process of giving sounder castings, with fewer blow-holes and other imperfections. This will obviate in a large measure the necessity of having to send to eastern Canada and the United States for steel castings, and will be appreciated especially in the mining and sawmilling industries, as well as by those who have manufacturing machinery which requires something stronger than cast-iron in certain situations. As the company will now be able to use steel to a far greater extent in the construction of its logging engines, these machines will be placed in a class by themselves.

As a result of the demonstration last week in the store of J. A. Flett & Co., in Mount Pleasant, sales were made of 42 malleable ranges.

The baseball experts of Wood, Vallance & Leggat and the McLennan, McFeely companies engaged in a battle last Saturday afternoon, the employees of the latter firm winning by a score of eight to two.

Col. T. H. Tracy, of this city, formerly city engineer of Vancouver, has returned from Nanaimo where he supervised the instalation of the water system, whereby water is brought twelve miles into the city. The system is now in operation, and is running successfully. It cost about $100,000.

Down town business houses in Vancouver will soon have a lower rate of insurance. For some time past, appraisers have been at work, and the matter will be further discussed at the next meeting of the fire underwriters. An effort will be made to try and bring the new rates into force about the first of the year. To get relief from the payment of heavy rates, many firms have installed sprinkling apparatus, among these being McLennan, McFeely & Co.

A find of telluride gold on Valdez Island, 140 miles from Vancouver up the coast, will be of direct benefit to this city. This vein runs from $500 to $1,000 a ton. It is not this find so much as the fact that high grade gold-copper ore is found in large quantities on the Island, that makes the prospects so bright. Experienced mining men declare that there will be a bigger camp on Valdez Island than at Rossland, the ore not only being richer but is remarkably self-fluxing, as well as having direct and cheap transportation to coast smelters.

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises should not fail to use the Want Ad. Advertisement page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere who is looking for just such a proposition as you have to offer.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

Price $1.00, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East Toronto.

This discovery will give an impetus to coast mining, which has been developing rapidly.

It is beginning to look as it British Columbia is to have a steel industry. G. M. Gibbs and G. S. Faulkner, of this city, have returned from Seattle where they had a conference with Jas. A. Moore, who is head of the Irondale Steel Company, and H. E. Law, of San Francisco, who is also largely interested. The result is the formation of the Western Steel Corporation, with a capital of $20,000,000, and headquarters at Seattle. The new company will take over the Irondale works and intends to start operations shortly in British Columbia. In this province there are known deposits of iron, assaying 66 per cent. and within easy reach of tide-water, one large deposit being right on the sea. With progress such as the present, it should not be long before an iron industry is established here.

When Hon. Wm. Templeman was in the city this week on his way to Ottawa, he was interviewed by a deputation, including Robert Irving, Louis Pratt and J. A. Whitter, of Nelson, who made representations in favor of federal aid to establish the zinc industry on a sound commercial footing. It was suggested that tests of zinc bearing ores under government auspices might prove a solution. Many of the low grade mines in the interior have zinc values, and if these can be recovered, it will materially assist the industry in that part of the province.

The Wallace shipbuilding yards at North Vancouver are constructing a sternwheel steamer for the Brooks-Scanlon-O'Brien company, for use in its lumbering operations on the Fraser river. The engines and machinery will be installed by the Schaake Machine Works, of New Westminster.

Mr. Paterson, of the Fairview Hardware Company, Vancouver, has taken the adjoining store and now has nice progressive looking premises.

Following up its success with autos in the fire department, the city is also favorably considering the installation of an auto scavenging wagon. Its cost will be $8,000 a year, while its maintenance charges are estimated at over $1,000, but it will do the work of five carts, which cost $5,000 for equipment and $10,000 for annual operation.

R. B. B.

WINNIPEG.

Oct. 12.—The local trade is active just now in stoves and paints. In line of paints the finishing products are moving extensively, varnishes and floor oils are in the lead, the weather being too cold for heavy paint in the outside work. Retailers are very busy in the heater stove trade, small hall and individual room heaters are on display everywhere, and in some stores the windows are made quite attractive with these lines. The kitchen stove and range trade has revived greatly in the city, due to the many new houses being erected this season.

Last week brought a milder change in the temperature, which resulted in creating a stir in the window glass trade. Up until the present contractors have not been doing much in this line, due to the continued mild weather, and also to the fact that the carpenters' strike had delayed the preparation of buildings for the glass. Last week most of the carpenters returned to work, and most of the buildings were in condition when the cold wave set in. The first day of the cold, local retailers received on an average, orders for glass for four houses each, and ever since the orders have continued heavy. The demand is largest for ordinary house glass, but many stores are putting in plates.

Several representatives of the Winnipeg Centennial Committee left the city on October 11, on a tour of the provinces of Alberta and British Columbia, in the interests of the proposed fair of 1912. The committee purposes also to interview the members of the Governments of each province with a view to receiving financial support from those bodies.

Local wholesalers and retailers are anxious that the management should endeavor to receive as much financial support as possible from outside sources, in order that the business in the city should not suffer in the task of financing the great event.

An interesting report comes to the city, that at a city council meeting in Regina, the inspector of water pipes, T. S. Griffiths, stated that 112 out of 222 pipes had been rejected by him. There were 83 pipes out of the 222, which he recommended as serviceable, and suggested their acceptance in a reduction of $4 or $5 on the ton. The council decided not to accept pipes that were not strictly up to the specifications.

L. C. H.

SASKATOON.

October 11. — While J. F. Cairns, head of Saskatoon's departmental head of one of Saskatoon's departmental stores, was riding in his automobile from Saskatoon to Dundurn, Sask., recently, the machine became stalled in a mass of straw which had been thrown into a low, sandy approach to a railway crossing. The straw took fire, supposedly from the exhaust of the auto, and in a few minutes a $3,000 machine was destroyed. Mr. Cairns and his party escaped injury.

D. G. R.

VERNON.

October 2.—R. Ford, of this city, has secured the contract for the erection of the handsome building for the Bank of Montreal at Armstrong, to cost $12,000. Armstrong & Caldwell, of Armstrong, have the contract for the plumbing and heating.

The plans of the Coteau Power Company for the construction of a tramline eastward from Vernon through a fruit-growing section are maturing rapidly. The company has the backing of English capitalists and will develop the power of Shuswap Falls, 25 miles from Vernon. It is stated that there is sufficient power at this point to electrify the entire Okanagan Valley. R. B. B.

October 9.—W. R. Megaw has started work on an addition to his store. The new structure will be of cement blocks, 75x130 feet, two storeys in height, and when completed will be one of the finest hardware stores in the interior of the province.

NEW WESTMINSTER.

October 9.—Tenders are being called for the doubling of the capacity of the shops of the B.C. Electric Railway Company in this city. These shops were established some years ago, but with the many extensions to the company's system on the mainland and Vancouver Island, the output is not nearly enough to meet the demand. The new buildings will be of corrugated iron over frame. The successful tenderer will be asked to commence work at once and rush it to completion, as rolling stock is now being bought from manufacturers in the east.

R. B.

KAMLOOPS.

Octobr 2.—Fred A. Wood, representing the Gamewell fire alarm system, is here giving figures and particulars. The fire alarm system here is antiquated and wholly inadequate, and the council intends to install a modern apparatus.

VICTORIA.

October 7.—If figures tell anything, this year is undoubtedly Victoria's growing time. The total value of building permits for September was $140,935, as compared with $53,630 for the same period of last year. The total value for the nine months is $1,443,205, as against $813,250 of last year.

The Grand Trunk Pacific Railway Co. have started preliminary work on the new wharf and sheds to be built on their recently-acquired waterfront property. Surveyors are at work taking levels and soundings have been made as to depth of water, etc. The new work will cost about $50,000.

Hardwaremen, those who sell guns and cartridges, have been doing considerable trade during the past week, hunting season having just come in. Several hardware dealers are making good displays of hunting goods.

Wm. Bownass is moving his stock of hardware into his new store and building on Broad Street. When fitted and arranged, this will make one of the most attractive hardware stores in the city.

W. B. C.

NEW COMPANIES.

Tuttle & Bailey Mfg. Co., Bridgeburg, Ont.; capital, $40,000; to manufacture and deal in heating and ventilating supplies. Incorporators, C. H. Tuttle, Englewood, N.J.; J. H. Bailey, Brooklyn, and Robt. Kelting, Chicago.

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook — Hardware Quotations Corrected by Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Oct. 14.—Wholesalers and jobbers everywhere report orders small and rather few just now. The decreased output, however, is being recompensed by good collections from merchants everywhere in the west, which goes to show that money is free and that there is more in the bank. Wholesalers are particularly anxious that retailers should not overstock at this time of the year. It is best for all concerned that shipments should be moderate.

The continued period of beautiful weather has tended to maintain the builders' hardware business period longer than usual. Screws, lock sets and hinges have been going out freely; locks, particularly, are very firm in price, advances having been made in some quarters. The gun trade has quite subsided, while ammunition is still in demand in limited quantities. Enamelware, chains, sheet metals, stoves and skates are the leading lines this week. Sheet metal prices are slightly lower, due to the heavy stocks that are on the market. Linseed oil has again advanced 2c per gallon.

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.80 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base, plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12 $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

HORSESHOES — "M R M" and "Bell" iron. No. 0 to 1, $4.50; No. 2 and larger, $4.25; snowshoes, No. 0 to No. 1, $4.75; No. 2 and larger, $4.50; steel, No. 0 to 1, $4.85; No. 2 and larger, $4.60; featherweight, $6.

HORSE NAILS—"MRM" cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75 10, 11 and 12, $2.65 in 25-lb. boxes.

WIRE NAILS—$2.80 Winnipeg and $2.35 Fort William.

CUT NAILS — $2.90 per keg base; pressed spikes, $3.30 base, usual extras.

SCREWS—Flat head, iron, 80, 10, 10, and 10 per cent.; brass, 75 per cent.; round head, iron 80 per cent; brass, 70 per cent.; coach, 67½ per cent.

BOLTS—Carriage ⅜ and smaller, 65 per cent.; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55 per cent. copper; No. 7, 29c; 8, 29½c; and over, 45; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots 3; stove bolts, 77½.

RIVETS AND BURRS—Iron rivets, 55 per cent. Copper, No. 7 29c; 3, 29½c; 9, 30½c; 10, 31¾c; 12 34c. Copper burrs, No. 7, 39c; 8, 40c; 10, 43c; 12, 46c. Copper rivets and burrs; No. 8, 30½c; 10, 33c per lb.

HARVEST TOOLS—50, 10 and 5 per cent.

AXE HANDLES—Turned, s.g. hickory, $3.15; No. 1, $1.90; 2, $1.60; octagon, extra, $2.30; 1, $1.60.

AUGUR BITS — "Irwin" bits 47½; other lines, 75 per cent.

BLOCKS—Steel, 45; wood, 60 per cent.

HINGES—Light T and strap, 65 per cent.

HOOKS — Brush, heavy, per dozen, $8.75; grass, $1.70.

FILES — American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

STOVE PIPES—6-inch, $8.69; 7-inch, $9.31.

TINWARE, Etc. — Pressed, retinned and plain, 75 and 2½; pieced 30; japaned ware, 35; Famous enamelled ware, 50; Imperial, 60, one coat, 60; Premier, 50; Colonial, 60; Royal 60; Victoria, 45; White, 70 and 5; Diamond, 50; Granite, 60 per cent.

GALVANIZED WARE—Pails, 40 and 5 per cent. Other galvanized lines, 37½ per cent.

LOGGING CHAINS—5-16, $5.50; ⅜, $5; 7-16, $4.70.

SHOVELS—Discounts on No. 1, 60 and 2½ per cent.; No. 2, No. 3, No. 4, 50 and 2½ per cent.; No. 1 scoops, 50 and 5 per cent.; all other grades 45 and 5 per cent.; fifty cents per dozen net is added to equalize eastern freights.

SOLDER—20c per lb.

LANTERNS—Cold blast, per doz., $7; painted, $3; galvanized, $4.10; 26, $3.35 roofing, 28, $3.45 and $4.45. Crimped, coppered, $9; dash, $9.

ROPE—Sisal, 9½; pure manila, 11¼; British manila, 10c; lath yarn, 9¼c.

CORRUGATED IRON AND ROOFING, Etc.—Corrugated iron, 28 gauge, $4; pressed standing seamed roofing, 28, painted, $3.20; galvanized, $4; 26, $3.55 and $4.35.

BAR IRON—Bar iron, $2.35; Swedish iron, $4.75; sleigh shoe steel, $2.50; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $13.

PIG LEAD—$5. Lead pipe, $6.

SHEET ZINC—Casks, $7.00; broken lots, $8.

COPPER—Planished copper, 31½c per lb.; tinned, 24c.

IRON PIPE—Black pipe, ¼ in., $2.45; ⅜, $2.75; ⅛, $3.30; ¾, $3.90; 1, $5.65; 1¼, $7.70; 1½, $9.25; 2, $12.35; 2½ $20; 3, $26.50; 4, $38; 4½, $50; 5, $48.50; 6, $62.50. Galvanized: ¼ in., $3.40; ⅜, $3.70; ½, $4; ¾, $5.20; 1, $7.50; 1¼, $10.20; 1½, $12.50; 2, $16.60; 2½, $30.

FITTINGS — Wrought couplings, 60; nipples, 75; malleable fittings, 25; bushings and unions, 60.

GALVANIZED IRON — Apollo. 16-gauge, $3.90; 18, $3.95; 20, $4; 22 and 24, $4.10; 26, $4.30; 28, $4.70; 30-gauge or 10¾-oz., $4.90; Queen's Head, 20. $4.10; 24, $4.30; 26, $4.70; 28, $4.90.

TIN PLATES—I.C. charcoal, 20 x 28, full box, $9; ½ box, $4.75; IX. full box, $11, ¼ box, $5.75; IXX., full box, $13.50; ½ box, $7.

TERNE PLATES—I.C. plates, $8.50.

CANADA PLATES — Half polish, 6 and 7-inch, $3.10; 8-inch, $3.35; full polish, 6 and 7-inch, $3.85; 8-inch, $4.10.

LUBRICATING OILS—600 W. cylinders, 80c; Maple Leaf cylinder, $1 per gal., 700 A. cylinder, 75c; Sterling cylinder, 55c; Perfection cylinder, 45c; Capital cylinder, 60 and 55c; Solar red engine, 32; Atlantic red engine, 30c; Eldorado castor, heavy, 28c; medium, 28c; Ruddy harvester, 30c; standard gas engine oil, 36c; Renown engine 38c.

PETROLEUM AND GASOLENE — Silver Star, in bbls., per gal., 19c; Pemoline 25c; Sunlight, 21c; case $2.35; Family Safety, 24c; Search Light, 22c; Sterling Light, 24; Silverlight, 21; engine gasolene, 24c; Acme Lamp, 32; White Lily, 23; Royal, 22½c.

PAINTS AND OILS — White lead, pure, $6 to $6.50, according to brand; bladder putty, in bbls., $2.50; in kegs, $2.55; turpentine, bbl. lots, 85c per gal. linseed oil, raw, 73c; boiled, 3c per gal. advance on this price.

Edmonton Quotations.

BARB WIRE—$4 per 100 lbs.; plain twist wire, $4.25; brt. wire staples, $4; poultry netting, 50 per cent.

HORSESHOES — MRM and "Bell," $5 base.

HORSE NAILS — MRM., new cold process—No. 3, $4.50; 4, $4; 5, $3.75 6, $3.50; 7, $3.25; 8, $3.05; 9, $2.95; 10, 11 and 12, $2.85 in 25-lb. boxes. Less than 25-lb. boxes add 1c per lb.

WIRE NAILS—$3.45 base.

SCREWS — Flat head, bright, 85; brass, 75; round head, bright, 75 and 10; brass, 70 per cent.

BOLTS—Carriage, 3-16 and ¼, 60 per cent; 5-16 and ⅜, 4-inch and shorter, 55 per cent.; ⅜ (longer than 4-inch), 50 per cent.; 7-16 and up, 45 per cent; machine, ⅜ and under, 55 per cent.; 7-16 and over, 45 per cent; plow, 45 and 5 per cent; stove, 70 per cent.

SHOVELS — First grade, $10.50; fourth grade, $7.60 per dozens.

HARVEST TOOLS—50-10 per cent.

BRUSH HOOKS—$9 per dozen.

LANTERNS—No. 2 cold blast, $7.50 per dozen.

FILES—Arcade or Eagle, 70-10-5 per cent.

SOLDER—20c per lb.

WRINGERS—Royal Can., $38 dozen.

CHURNS—45 per cent.

ROPE — Sisal, 11c per lb.; British manila, 12c; pure manalia, 15c.

BUILDING PAPER—PLAIN, 58c per roll; tarred, 78c per roll.

LINSEED OIL—Boiled, 80c; raw, 77c per gal. in barrel lots.

Gray's Perfect
Blue Print Patterns
For Sheet Metal Work

The growing demand for these patterns proves their accuracy and time-saving features. They are made full size, on heavy blue print paper. The largest patterns can be transferred on metal in *two* minutes.

ELBOW PATTERNS
Made in two sets.

SET A—Comprising 80 patterns, developed on a sheet of 24x68 inches sizes ranging from 1 to 20 inches, in two, three, four and five pieces. Price, $1.50

SET B—Comprising 80 patterns, developed on a sheet of 24x68 inches, sizes ranging from 20 to 40 inches. Price, $1.50

SETS A and B together, 160 patterns, with chart showing all the angles and degrees of same. Price - - $3.00

Information regarding Skylight Patterns, Metal Window Patterns and Miscellaneous Patterns will be given on application to

Sell a Seasonable Specialty.

It pays to handle Sherwin-Williams Stove Pipe and Iron Enamel right now. Fall is the time that people get out their old pipe and brush it up for the winter. A coat of this finish will often make it unnecessary for the home owner to buy new pipe.

SHERWIN-WILLIAMS
STOVE PIPE AND IRON ENAMEL

gives a durable lustre on stove pipe, grates and other similar surfaces. It will not smoke or burn when properly applied, and it will stand any degree of heat without losing its lustre or cracking. Its superior finish and protective qualities make it a specialty for which there is a great demand.

It pays in every way to sell Sherwin-Williams Products. They satisfy every want of your trade.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

The Witness Publishing Co., Montreal, will rebuild at once.

The Peterborough Lumber Co., opened their new mill last week.

The Cudahy Packing Co., will build a $17,000 factory at Toronto.

The Walters Axe Co. are building an addition to their plant at Hull.

The National Drug Co., will possibly erect a new building at Vancouver.

The General Shoe and Machinery Co., Quebec, propose erecting a branch factory at Hull.

A branch factory of the Steel Shoe Co., of Racine, Wis., will be established at Toronto shortly.

The Thompson-Macdonald Co., Cobourg, will erect a new building of three storeys next to their present premises.

The Imperial Auto Co., have purchased a site at Toronto on which they intend to erect a large building immediately.

The Burton Saw Works have secured a site of ten acres at Burnaby, and will move their plant there from Vancouver.

A by-law granting J. W. Ford $10,000 to erect a flour mill and elevator at Swift Current, was carried by the ratepayers.

The Provincial Steel Works Co., Brighton, Ont., are considering plans for the enlargment of their plant by the erection of a 100-foot addition.

The Alberta Pacific Elevator Co., propose erecting four elevators at Vancouver, each capable of holding 250,000 bushels of grain. This company already owns 90 elevators and warehouses in Western Canada.

A machine and locomotive works to cost $300,000 will be running in Vancouver within six months, according to the plans of the Sumner Iron Works Co., of Everett, Wash., whose officials have closed a deal whereby they have acquired 30 acres of land in Burnaby.

A great structural steel works and a great shipbuilding yard and drydocks in which will be built 600-foot steel leviathans for the traffic of the great lakes are two industrial plants proposed to be built in Toronto within the next year or two, by the men who now constitute the Polson Iron Works.

Municipal Undertakings.

Work has commenced on Hull's waterworks extensions.

J. & T. Riley have been given the contract for sewers at St. Catharines at $830.

On October 18 a by-law will be voted on at Arcola, Sask., to issue $15,000 waterworks debentures.

Portage la Prairie ratepayers will shortly vote on a by-law to raise $17,500 for waterworks.

The Montreal roads committee is asking for $50,000 for another section of the Sherbrooke street sewer.

The by-law authorizing the installation of a municipal water system has been passed by the Trail, B.C. ratepayers.

On October 18, Galt ratepayers will vote on a by-law to raise $5,000 by debentures for the extension of the waterworks system.

The Perth, Ont., town council have awarded the contract for sewer work to Mr. Haggarty, of Brockville, Ont., for the sum of $3,400.

The municipality of St. Pierre (Montreal) has awarded the contract for the laying of sewers for the amount of $61,000 to J. Henault.

At a recent meeting of the St. Catharines City Council the necessity of another waterworks main from the reservoir to the city was discussed.

Tenders addressed to O. Ellwood, will be received until October 18 for the furnishing of material and laying of 18-inch cast iron water mains for London's waterworks system.

It is expected that tenders for the proposed new septic tank and filter for the Cobalt disposal plant will be called for shortly, though work on these will not start until next spring.

At a recent meeting of the Montreal Road Committee, tenders were opened for the construction of a sewer on Eighth avenue, Rosemount. The contract was awarded to Mr. Denis at $9,982.

Public Buildings.

A $13,000 high school will be built at Yorkton, Sask.

The erection of an isolation hospital at Stratford is under discussion.

The Toronto Board of Education will erect a $40,000 school on Avenue Road, that city.

Plans have been approved for the $1,500,000 extension to the C.P.R. Windsor station at Montreal.

Land has been purchased in Hastings townsite (Vancouver) with a view to the erection of an isolation hospital.

A site has been purchased at Regina by Whitmore Brothers, upon which they will at once proceed to erect a theatre.

It is learned that work on the new $100,000 hospital to be erected by the Grey Nuns at Regina, will be commenced as soon as the trunk sewer is down.

J. E. Coulter, Woodstock, has been awarded the contract for the erection of the Hamilton Carnegie library. The amount of the tender was $8,590. Work will be commenced this fall.

It is proposed to have a new and modern market on a new site at Brantford and to have new Government and city buildings combined on the present market square. The latter is estimated to cost $250,000.

The Board of Trustees of the General and Marine Hospital, Owen Sound, has decided to build an addition to their institution. The annex will cost between $12,000 and $15,000, and will double the present accommodation.

The congregation of Bonar Presbyterian Church, Toronto, authorized an architect to draw up plans for a church to cost $40,000, with a seating capacity of 1,000. Work upon the new edifice is expected to commence early next spring and the building to be completed in a year's time.

General Building Notes.

F. L. Dixon will erect a dwelling at Sydney for F. J. Hardison. Cost, $3,500.

The British Columbia Garage Co. has purchased a lot at Vancouver and will erect a large building.

The Glouchester street convent Ottawa, have purchased the adjoining property and will make extensive alterations.

Theo. Daoust, Montreal, has prepared plans for the erection of a private residence in Three Rivers for H. Goudin.

Hogle & Davis, Montreal, have prepared plans and are inviting tenders for the erection of a residence at Ste. Agathe for Mortimer Davis.

The contract for the foundation of the new St. Micheal's convent, Winnipeg, which will cost $50,000, was awarded to A. E. Bullock, of Brandon.

A syndicate of British and Toronto capitalists have purchased 350 acres just outside the latter city. The intention is to lay the property out in avenues and squares for high class residences.

Recent building permits at Hamilton include: Mills & Hutton, brick addition to Y.M.C.A. building, $37,000; C. R. Reed, brick building, $2,000; F. J. Rastrick & Son, brick dwelling, $2,500; Munro & Mead, brick house, $2,500.

Railway Development.

A party of G. T. P. engineers is in the district about Duck Lake locating a line from Watrous to Prince Albert.

The construction of the National Transcontinental railway north of Lake Nepigon is being rushed to a finish.

A company is being organized to build and operate a street railway in Lethbridge and connect it with Royal View and other towns in the near vicinity.

The contract for extending the railway right of way along the front of the town site at Prince Rupert, has been awarded to Foley, Welch & Stewart. The contract calls for the expenditure of over $500,000. Sub-contracts have been awarded to Angus Stewart and V. W. Smith & Co.

Surveys are being made for a Great Northern line to run from Brandon to Regina, connecting the Great Northern line known as the Brandon, Saskatchewan and Hudson Bay, and the line chartered to run from Minot, N.D., to Regina. Construction will be started before the end of the year.

Cutting Pattern in the Tin Shop

Readers of Hardware and Metal are Requested to Make Use of this Department—Questions Regarding Patterns Will be Answered by Experts—Discussion is Also Invited on Any Matter pertaining to the Tin Shop.

Let Fig. 1 be the article. The first step is to draw a circle equal to full size of main pipe (Fig. 2), which will represent the plan view. Space off this circle into any number of equal parts, in this case 4, to represent the branches, and mark these sections "a b d e." It is of chief importance that one of these divisions should be in the position a o b in the partial plan as indicated, in order that the axis of ones of the branches may be shown in its true length in the elevation.

Pattern for 5 Way Y Branch.

The vertical centre line is next drawn and must pass through centre of large circle at point o. At any convenient point on this line draw a line at the desired angle to serve as the centre or axis of the branch. Draw "e f" at right angles to this line just found, equal to diameter of end of branch. Next lay out on "e f" the profile of half full view of opening, and space off this half circle into any number of equal parts, viz., the points thus formed are brought down to the line "e f" as shown at "A." Next draw at "Ba" half view of same size as at "A" with the same number of spaces. Draw lines from these points to the left and intersect them with lines dropped down from points located on "c f" producing at "F" a fore shortened plan view of opening in end of branch. Draw lines from points "a" and "b" on large circle tangent to this fore shortened plan, as "a7" and "b7."

The quarter plan shown at "C" is taken and in order that the projection of the mitre line may be indicated in the elevation, another full view; as shown at "d" is drawn. Next draw the horizontal line "c g" dividing the plan into two equal halves.

Of the six spaces required for lower base, three of them are located on the outside of plan, as at "8, 10, 12 and 14." The remaining three on the outline of plan at "c" as "2, 4, 6 and 8" the same points being shown at "d" in elevation.

Draw lines from point on quarter plan "C" to mitre line showing "2, 4, 6 and 8," and from these points project lines to the elevation and interect them with lines projected from quarter plan "d" in elevation, trace a curved line through these intersecting lines producing the mitre line in elevation. It is now possible to represent the remaining sides of the triangles in the plan and elevation and lines may be drawn between the sucessive points as may be seen in those views, thus "2 to 3," "3 to 4" and in a like manner connect points in elevation with similar lines. These points on "e f" are projected to the right of elevation, and as may be seen indicated in diagram of tringles as "3, 5, 7, 9, 11, and 13." Lines are also projected to right of mitre line in elevation producing the bare lines of triangles in diagram as "2, 4, 6 and 8." The line "1-2" in plan is shown in its full length in elevation so no triangle is needed. The next line "2-3" in plan is placed on line "2" in diagram of triangles and a line drawn from point "3" on vertical line forming the triangle "2-2-3." The remaining triangles are determined in a similar manner, thus "3 to 4" on plan is placed on base line "4" in diagram of triangles, and a line drawn to "3" on the vertical line shown.

Now to construct pattern, draw a line as "1 to 2" at "E" (Fig. 3), making it the same length as the corresponding numbered line in elevation, which is there shown in its true height. Next with point "I," as a centre and with radius equal to the distance "1-3" in profile at "A" describe an arc of indefinite length, afterward intersecting this arc at "3" with an arc described from "2," as a centre and radius equal to line "2 to 3" in diagram of triangles. Next take "2" as centre, and a radius equal to "2-4" in outline of plan at "C" describe an arc as shown, as "4" in pattern. Take distance "3-4" in plan, place it on line "4" in diagram and connecting with point "3" on vertical line thus giving the true length of line "3-4" in elevation, using this distance as a radius and "3" in pattern as a centre, describe an arc intersecting arc "4."

The remaining triangles are found in exactly similar manner, and may be laid off on either side of centre line "1-2."

One pattern is all that is required providing the branches are all the one size and angle. If they are different all that is necessary is to lay out a separate plan and elevation for each branch, always using the same mitre line.

W. M. M.

A large boarding residence for E. J. Rochon, Winnipeg, will be built at Fort William.

Plans for the erection of a convent building for the Franciscan Order, at Three Rivers are completed and tenders are invited for the erection of same by Daoust & Lafont, architects, Three Rivers.

The Retail Paint Trade

PAINT AT XMAS TIME.

In making out his plans for his Christmas display the hardware merchant need not neglect his paint department. Even if paints do not come under the category of presents, there is no reason why the merchant should not take advantage of the season to push his lines. It is necessary continually to impress upon the minds of consumers the absolute need of using paints.

The dealer can make good use of the fact that homes should be bright and cheerful at Christmas time, and that there is no better means of securing this than by means of paint, stains and enamels. "Brighten up for Christmas as one brightens up for spring," should be his cry, and let the home be as gay with fresh paint, stain, enamel, etc., as with evergreens and mottoes.

The merchant should advise his customers to make their furniture look more worthy of the family gatherings likely to be held. He can exhibit a chair that has been in use with some portion of it freshly varished showing how the article has been improved by the use of a small tin of varnish. A stained stove pipe brightened up in part by aluminum paint would also be very forceful. The same thing applies to the use of enamel for the bath tub.

In fact, the merchant can make good use of the season for advertising his paint specialties. The paint department perhaps more than any other department needs to be continually advertised. People are prone to put off the buying of paint, although they may be well aware of its necessity. They must be saved in spite of themselves, and this can only be done by continually preaching the doctrine of paint. With the sale of tool chests and cabinets for Christmas gifts the dealer should be able to push stains and varnishes. A carpenter wants stain as much as he does tools, and a tin or two of stain and varnish would render his equipment complete.

The hardware dealer can see from this that the old theory that paints, etc. can only be pushed at certain times of the year is entirely at fault. The sale of paint can be made all the year round, and the dealer who is at all energetic will miss no opportunity of pushing his lines. Paint tins are a clean line to handle. Even therefore at Christmas time when the store may be given largely over to articles which need careful handling, the selling of paint specialties can be done without any fear of spoiling other goods. Push the stains and enamels this Christmas period and harp on the fact that Christmas in a shoddy home is a Christmas spoiled.

The assets of Edward Limoges, painter and dealer in wall papers, Ottawa, who failed recently, are to be sold on October 19.

PAINT AND OIL MARKETS

MONTREAL.

October 16.—A healthy demand is reported from all quarters, with every sign of a continuance of the consumption. No line is especially prominent, the call being evenly distributed. Ground white lead, however, shows signs of sagging. Ready-mixed paints are selling well, and there is an improvement in those household specialties which are usually in strong demand at the holiday time of the year.

The market has not been affected by any strong fluctuation, and with the exception of linseed oil, which has advanced 1c, prices are steady and unchanged.

TURPENTINE—There is a diversity of opinion amongst the jobbers regarding the price of turpentine, some contending that the present figure of 80c for single barrels is far too low, but it would seem that stocks locally are too heavy to obtain the higher prices secured in Toronto. At any rate, there is no change this week, especially in view of the moderate inquiry.

LINSEED OIL — Anticipations expressed in these columns last week have been realized, and the market has advanced 2c per gal. This advance has not checked sales to any noticeable extent. Stocks are in good shape, and being shipped in splendid order. We now quote: 1 to 4 barrels, in one delivery, raw, 68c per gal.; boiled, 71c per gal.; net 30 days, f.o.b., Montreal.

GROUND WHITE LEAD—The flurry in the demand which was experienced when the market dropped, seems to have subsided. Speculation is absent, and buyers are content to purchase in moderate lots only. No concessions, apparently, are being given to buyers of large quantities. We quote: Strictly pure, about $5.25 to $5.75, according to quality, and No. 1 $4.85 to $5.25, f.o.b. Montreal.

RED LEAD—There is a fair inquiry for red lead. It is thought that a heavy demand will be experienced during the coming winter, and manufacturers are laying in liberal stocks. We quote:—Genuine red lead in casks, $4.25; in 100-lb. kegs, $4.75; less quantities at $5.75 per 100 lbs.; No. 1 red lead, casks, $3.75; kegs, $4.25, and smaller quantities, $5.25,

WHITE ZINC—The prevailing demand for colonial effects is stimulating the call for white zinc, and good business is reported. We quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5½c.

VARNISHES AND JAPANS — The fall is usually the time when varnishes and japans are shipped freely, and the present season is no exception to the rule. Most satisfactory trade is being done in all lines, particularly household varnish.

PUTTY—Putty is meeting with a seasonable demand and grinders are satisfied with the output. We quote: Standard putty, 800 lbs., in casks, $1.75; in 100-lb. drums, $2; bladder putty, 400 lbs., in barrels, $2.15; in 100-lb. cases, $2.25; in 25-lb. tins, $2.15; 12½-lb. tins, $2.35, f.o.b., Montreal.

TORONTO.

October 15.—There is just the slightest perceptible indication of an easing off of demand in the paint market this week. Business continues steady, but the orders are not calling for such large quantities. Country trading is good at the moment, and it is the city wherein the easing off is noticeable. Not that there is any let-up in the work, either, for every night the daily papers are printing "painters wanted" advertisements.

Turpentine is about the same as last week. The market has advanced slightly, but orders may be placed at the old figures still. White lead is unchanged. Linseed oil made two one-cent advances since last issue, and glass stocks are getting low. No new developments are noted, and prices are pretty firmly held all around.

LINSEED OIL—There has been an advance in linseed oil of two cents per gallon, owing to the prices that are now having to be paid for flaxseed all over the world. Seed quoted in Great Britain from Calcutta is higher now than it has been for many months with no indication of sufficient quantity coming forward to make any change in this department. The local price advanced one cent on Saturday last and another cent on Tuesday, making the ruling quotations at present 68c and 71c for raw and boiled oil respectively in barrel lots. Five barrel lots are one cent cheaper.

TURPENTINE—For two days last week there was a slight decline in turpentine at the southern ports but a demand sprang up at the reduced price and an advance immediately took place, since which time the price has been very firm. The receipts for the two weeks are reported very light and the scrape of gum indicates that there will be a considerable decrease in production for the closing up of the year. The factors who supply the men in the woods with funds say that the scrape this year is considerably smaller than last year and that this will be more evident in November than it is in October. Added to this there has been another storm prevailing on the southern coasts, which will probably mean a further advance in the price of turpentine for the next few days. Receipts so far this year are 50,000 bbls. less than the same period last year. The local market has gone up to 83c for single barrels, though two houses continue to quote their last week's figures—80c and 81c. Demand is light. Opinion seems to prevail here that southern prices are too high. There can be no doubt, however, that the turpentine situation is much stronger all over the country.

White Lead

At the present time the white lead situation is interesting.

We are the only firm in Canada who corrode and grind white lead, in addition to making Varnish, Dry Colors, Paints, Enamels, etc., etc.

Our white lead proposition is naturally the very best.

We will be pleased to send you full information and prices on

MURESCO

THE
BEST
WALL FINISH.

When you see that subdued, flat, velvety appearance on walls and ceilings which is so much admired, you may be sure it has been produced by "MURESCO." This preparation has many features to recommend it. It is easily applied. One coat, as a rule, is sufficient to obtain the best results. It is economical, as it will take 30 % more water than any other similar preparation, and it will not peel, rub off or crack. Are YOU carrying MURESCO ?

Send for Prices and Colour Cards.

LACQUERET

THE BRIGHTENER OF THE HOME

This wonderful preparation is neither paint, enamel or varnish, but a transparent lacquer, which beautifies and preserves the dingiest and oldest furniture, and brightens up every kind of woodwork.

Lacqueret has a thousand and one uses in the home, and will sell all the time if you will only tell the women folk about it.

Ask about our Dealer-Helper-Selling Plan.

INTERNATIONAL VARNISH CO., Ltd.

Makers of Fine Varnishes **TORONTO** **Branch of Standard Varnish Works**

NEW YORK **CHICAGO** **LONDON** **BERLIN** **BRUSSELS**

WHITE LEAD—The range of prices still run from $5.55 to $6, and the advance prices movement seems to be further away, hardwaremen believing that present prices are sufficiently high. The movement in lead is good, though there is not the volume of lead moving now that there was six weeks ago. Still the sales of lead in oil are satisfactory and are in keeping with former years at this season.

RED LEAD—Prices are unchanged. Casks are $4.25 and 100-lb. lots range from $4.50 to $4.55. There is some inquiry for futures.

GLASS—Stocks locally are reported to be low, some jobbers stating that they have no glass. No importations have been made as yet, though some are expected next month, when it is anticipated that prices will advance 10 per cent.

PUTTY—There is a good steady demand for putty, which while it has not advanced prices has made the market very firm. Bulk putty in casks is $1.75; 100-lb. drums, $2; and bladders, $2.15 to $2.25.

STAINS AND VARNISHES—The demand is not so strong for these lines now that the cooler weather days are here. Prices remain at the usual quotations.

PETROLEUM—Coal oil is a splendid seller these days, and many country hardwaremen are stocking up for the winter. Prices are steady, though unchanged from last week. Prime white is 13½c; water white, 15½c, and Pratt's astral 17½c. There is yet a fair call for gasoline and benzine.

NEW PAINT TRAVELERS.

The death of E. E. Bouchard, who represented Brandram-Henderson, Montreal, in the Eastern Townships, has necessitated several changes in the traveling staff of the company. The south shore of the St. Lawrence is now being covered by E. W. Charlton, who has been with the firm ever since they started in Montreal in 1897. Gaston Lemoine has been moved from the City of Montreal to the Eastern Townships, while Fred Markum, one of the boys from the head office, is filling the place vacated by G. Lemoine.

G. LEMOINE, MONTREAL,
Representing Brandram-Henderson, Ltd., in the Eastern Townships.

F. MARKUM, MONTREAL,
Representing Brandram-Henderson, Ltd., in Montreal City.

PAINT NOTES.

J. P. Daoust & Co., painters, Montreal, have dissolved.

A liquidator has been appointed for E. J. Bernard, Ltd., painters, Quebec.

The British-American Paint Co., Victoria, has purchased a factory and warehouse site at Vancouver, where it is the intention to manufacture paints on a large scale.

WASHABLE WATER COLOR PAINT.

Washable painting in water colors can be executed by mixing the pigments with plaster, a fusible salt, a suitable glaze, and an acidulated solution of gelatine. The paste thus formed is applied like paint and, after it is dry, is hardened by heating the painted objects. The following proportions and method are recommended:

Ten parts of glue are dissolved in 100 parts of hot water containing a little acetic or other acid. After this solution has cooled it is rubbed up with 5 parts of plaster, 5 parts of soda, potash or borax, 30 parts of lead oxide or zinc white, and the necessary quantity of the water color pigment desired. The coating, when dry, is heated by means of an alcohol or other smokeless flame. The finished coating resembles enamel. It is not affected by rain or heat and may be lacquered without difficulty.

Vancouver's city council is considering the building of a new city hall.

THE CANADA PAINT COMPANY LTD

ENAMEL FOR THE PAINTER

Haven't you often noticed what a difficult thing it is to get a real good high-grade white Enamel for high-class painters' trade? For years dealers have been obliged to bring in these Enamels from abroad at exorbitant prices and sell at little or no profit.

RAMSAY'S No. 98

changes all that. You have herean enamelunsurpassed by any imported into the country. It is for the Decorators—for high grade work. It is not cheap—that is as cheap things go, but it is cheap for what it claims to be. You should learn about this Decorators' Enamel anyway, in order to be posted. Write us for special booklet on Ramsay's No. 98 Enamel.

HAMILTON (22 Calibre) RIFLES

Money Makers

Models 27 and 027

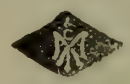
Prices $2.00 and $2.25

We Specialize on Boys' Rifles

We build our rifles under patents exclusively our own and confidently claim to make the best rifle ever built for the money.

MODEL No. 27 is an efficient sporting rifle, with hammer action, of few parts and exceedingly simple, using 22 calibre short or long cartridges. The barrel is bronze, rifled and steel jacketed, finished in blue black gun finish. Breaks down for loading and ejecting shells. Flat stock and forearm of gun of gum wood. A beautiful model, symmetrical and well balanced. Barrel is 16 inches long, length of rifle over all, 30 inches. **Price $2.00.**

MODEL No. 027 is exactly like No. 27, except the stock and forearm, which are of genuine walnut, turned and beautifully finished. **Price $2.25.**



Other models are Nos. 15 at $2.00, 19 at $2.50 and 23 at $3.50, each a winner in its class.

Our continuous advertising in the boys' papers will bring the business to you, as every boy will want one and you should have a stock on hand. **Write for catalogue and net trade prices.**

THE HAMILTON RIFLE CO., Box 202, PLYMOUTH, MICH., U.S.A.

Crowbars, 3½ cents per lb.

TRADE B MARK **Amatite ROOFING**

"Easy to sell because consumers want a Roofing that needs no Painting."

IF *you* do not sell Amatite Roofing in your territory soon somebody else will, because there is a constantly increasing pressure from the consumer.

We are spending $100.000 on advertising annually to make this demand.

We are teaching the consumer to demand a roofing *that does not need painting.* The day of the "Paint-me-often-oids" is past. People everywhere are asking for the roofing with a *mineral surface* which will need no care.

Amatite costs no more than roofings that need continual painting. The customer gets 100% more value in a dollar spent on Amatite than on any of the old-fashioned so-called "rubber" or "gum" roofs. Send along your order.

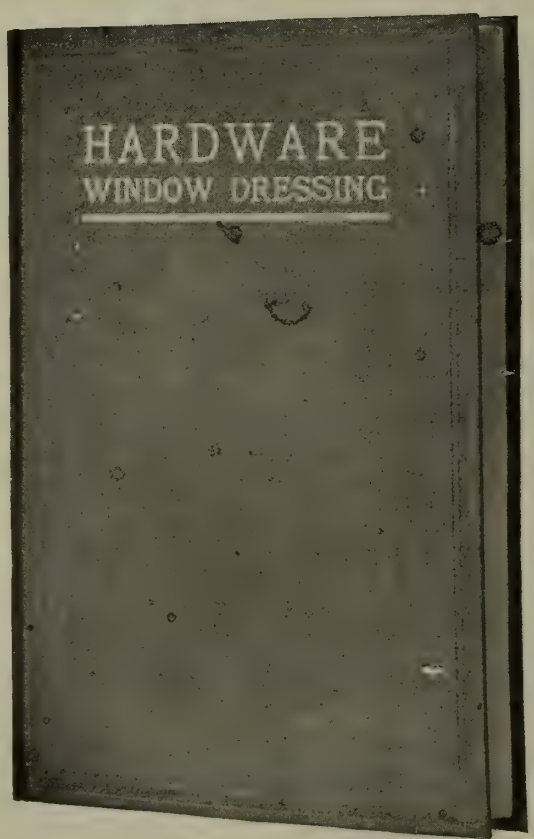
THE FLYER

PATENTED 1909

It means washing with the hard work left out



¶ A Big machine, Big in every way—Big in power, Big in speed, Big in ability to do the work, Big tub with a Big opening, Big seller.

Has simple, strong and accurately machined mechanism seated on steel ball-bearings. Is fitted with a large evenly balanced fly wheel that is easy to start and carries the action over its heaviest load with little effort. The entire working gear is attached to the cover and lifts easily with it. No troublesome connections to make.

NORTH BROS. MFG. CO., - Philadelphia, Pa., U.S.A.

"The fireproof age means sheet metal taking the place of wood—more money for you."
—The Philosopher of Metal Town.

Fireproof Lathing

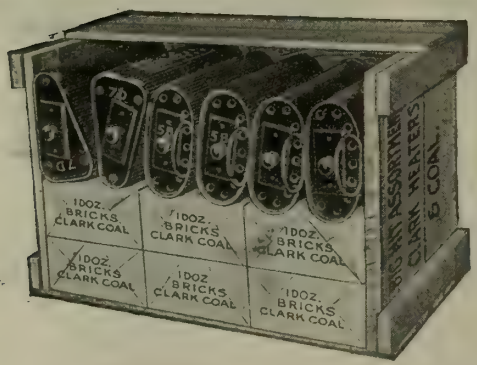
Get after the Architects and Contractors in your town. Convince them of the economical, durable and fireproof qualities of the "HAYES" Steel Lath. Suggest using it in the contemplated new buildings. It means big business for you. We will give you estimate of complete cost of lathing for any building—you get the measurements.

Absolutely fireproof is the aim in building now-a-days. Steel must be used in place of wood.

The "HAYES" Patent METALLIC LATH

is made from the finest sheet steel. It is easier and quicker to erect, being made in large sheets and requires 50% less mortar than any other lathing. The flanges on the "Hayes" Lathing grip the plaster firmly. This, together with the extra stiffness of the "Hayes" Lath, makes a rigid wall, unequalled in any other method of hollow wall construction. The "Hayes" Metallic Lath is used extensively as a backing for decorative tiled fronts, columns, etc. It is a firm, lasting basis upon which to lay the cement.

We Manufacture—
Metallic Rock Faced Siding, "Eastlake" and "Empire" Steel Shingles, Metallic Ceilings and Walls, Cornices, Finials, Ventilators, Skylights, Conductor Pipe, Eavetrough, Corrugated Iron, "Impervia" Fireproof Glass Windows and Doors, and a general line of Architectural Sheet Metal Goods.



We will send you full information and suggestions for its many uses if you will write us.

Sell Clark Heaters and Coal

Here's the "BIG HIT" Assortment

2 Leader Heaters
2 No. 5B Heaters
2 No. 7D Heaters

6 Dozen Clark Fuel Brickettes (Best Grade)

Some of these heaters you can sell as low as $1.20 and make a good profit.

The Proposition to Dealers is Mighty Interesting

Its a proposition that means ready sales and liberal profits.

Everyone who drives or owns a carriage, wagon, sleigh, automobile—any kind of vehicle—needs them. Everybody traveling in cold weather needs them. The need is known—the demand is positive—It's for the dealer to supply the product and pocket the profits.

Clark Heaters and Clark Coal sell wherever displayed. The wonderful compactness, the unique principe of heat distribution, the neat appearance, the low price—all are factors that make Clark Heaters the unchallenged leaders.

Our guarantee goes with each, and the guarantee protects the dealer and the consumer.

And the coal is just such another proposition. To **prove conclusively** that it's better than other fuel, we give a guarantee, **with each brickette,** that it will give 25 per cent more heat than any other heater fuel made.

DEALERS——ACT NOW

The season is on. Send for the "Big Hit" assortment and add more dollars to your profit. Send to your jobber. Put a heater just inside your store—where customers can **feel** the goodness of it. "Warm them up" to the necessity of buying from **you.** We'll help.

Graham Nails Are the Best.

Disston quality has made the DISSTON plant grow to Fifty acres since 1840.

How Disston "Bucksaws" Make Customers

This is only one of a list of shapes and styles. See catalogue mentioned below.

YOU can't safely tell an experienced bucksaw user "one make of bucksaw is like any other." He knows, through actual use, what differences there are. It is because of the absolutely unvarying uniformity of DISSTON Bucksaws that dealers make not one but SEVERAL sales and profits.

Some of the reasons for the steady increase in the plant of the DISSTONS is the increasing call from shrewd dealers for DISSTON Bucksaws. Pointing to the actual truth about DISSTON Bucksaws wins the customer, with that resulting profit---and it wins him back again, with other resulting profits, for experience with a DISSTON Bucksaw bears out every recommendation you give it.

Show your customer the wood seasoned for several years—the variety of shapes to select from---the styles of blades---the bracings---the varnishing---the weather protection---the ease of handling---the strength ---the qualities for heavy cutting---the absolute rigidity---the fact that in a DISSTON Bucksaw there is positively no lost motion or "give."

Behind every DISSTON Saw, Tool or File you sell there is a profit for you---and after that a steady stream of profits. The highest quality never fails to bring a customer to your shop again.

FREE If you haven't got the latest DISSTON Catalogue, send us a postal. It gives clear and complete descriptions of DISSTON Saws, Tools, Steels and Files, in all the various styles and makes. This new Catalogue may mean a handsome addition to your profits.

No. 70 Breast Drill

Manufactured by

Ryall Tool Company, Montreal, Canada

RYALL TOOL CO. Breast Drill is carefully designed and proportioned, durable, easy working and strong.

FRAME—Finished in black and yellow enamel.

HANDLES—Polished Hardwood.

BREAST PLATE—Adjustable to any position.

GEARS—All gear teeth cut from solid metal, and the small pinions from rolled steel bars. Double gears equalize the bearing.

CHUCK—Nickel-plated, with knurled sleeve, holding round or square shank drills. Two (2) pairs of jaws supplied with each drill.

LEVEL—Is set in perfect alignment with the chuck and handle, which enables the drill to be held true. It is set in solid iron where it can be seen while in use, and is protected from all but intentional injury.

SPEEDS—Two speeds, one approximately three times faster than the other, readily changed to fast or slow by turning the knurled nut on the frame marked "F" and "S", at the same time turning the large gear slowly so the clutch may drop in.

SPINDLE—Runs in case-hardened, anti-friction cone bearing.

Length: 16 inches over all. Weight: 61 lbs. per doz.
Packed one drill only in a linen reinforced cardboard box.

The GROVE CHEMICAL CO., LTD.

ESTABLISHED 1856 Appley Bridge, Wigan, Lancs., England

THE RETAILER classes the houses who advertise in his trade papers as the most progressive in their line—the houses out hard after business, appreciative when they get it, and always trying to give a little better service than anyone else.

THE NEW

"BLUE BELLE" WASHER

is rapidly gaining the favor of those who prefer a machine of the "rubber" type. The clothes are held against the lower rubbers by the upper board, which turns in one direction while the tub revolves in the opposite direction. This makes quick work of the washing—and is a distinct "Blue Belle" feature. Base and wringer-stand are light, strong and handy.

The "BLUE BELLE" Wringer has no equal among Canadian-made or imported machines. Rolls guaranteed for five years.

The two "Blue Belles" make a splendid selling combination.

CONGO

"NEVER-LEAK" ROOFING

CONGO is a roofing that is made and sold in handy rolls all ready to lay. Nails, cement and caps in sufficient quantity are packed inside so that there is nothing else to buy. The caps are galvanized iron instead of the usual tin and so they do not rust. Ordinary caps soon rust and become useless. Leaks and trouble result.

Any man can lay Congo Roofing. It demands no special skill or experience.

Congo is applicable to any building and to any kind of roof, although it will give best results on sloping roofs. It can be laid on farm buildings right over old shingles; it is so tough that the rough surface will not hurt it. It can be used on factories and the fumes of coal smoke will do it no damage.

Congo suits every purpose and every purse, because it is made in three grades, namely: 1-ply, 2-ply and 3-ply. The 3-ply is guaranteed for 10 years. The guarantee is a real *guarantee*, and does not require a lawyer to enforce it for you. It consists of an Insurance Bond issued by the National Surety Company and is enclosed with each roll of Congo Roofing ready to be filled out and sent in for registration.

Samples of Congo and new booklet mailed free on request.

This cut illustrates only one of our popular styles of "DOMINION SPECIAL" Field Fence.

Our Fence is strictly a Canadian Product, as we draw and GALVANIZE our own wire, and, therefore, guarantee every rod of it

Prospects for next Spring's Fence Trade are exceptionaly bright, therefore it would be to your advantage to stock early our "DOMINION SPECIAL" Field Fence. Write us.

Dominion Wire Manufacturing Co., Ltd., Montreal

THE

Dillon Hinge Stay Fence

is the BEST, because it will give under pressure without bending the stays, the hinge stay being a joint in the upright at every strand wire.

Its attractions are the quality of wire, hinge in the stays and prices. It is no dearer than an inferior fence.

The R. McDOUGALL CO.

Galt, Canada LIMITED

THE AYLMER

DOUBLE ACTING HOUSE FORCE PUMP

With Cock Spout and Reversible Handle, has Brass Cylinder, fitted with Brass or Glass Valve Seat. Arranged to drop the water to prevent freezing.

The reversible handle can be placed at any angle, thus making either a right or left hand, or straightaway pump, as desired. It is built on the plan of our submerged Cylinder Well Pump, is double acting, has heavy seamless brass upper and lower cylinder with brass or glass valve seat and expansion plunger bucket. It is compactly built and very powerful. The base is a new and neat design and is attached to the cylinder by means of three heavy cap screws.

The expansion plunger is a feature not found on any other make of pump. By means of the rubber disc in connection with the cone-shaped stem, the leather on the upper plunger can be expanded by means of an ordinary wrench, turning the adjusting nut on top of pump to the left without removing the pump from the well. This enables the user to keep his pump in proper adjustment without the expense of a pump expert.

Mensuration for Sheet Metal Workers

By WM. NEUBECKER

All Sheet Metal Workers are aware of the numerous problems arising in finding areas, dimensions and capacities of products turned out from the shop—hence the value of this book, giving the principles of the art of measurements as applied in working ordinary problems in shop practice. It gives the methods for finding the length, areas and volumes of geometrical forms, pipes, etc. Every Mechanic, Shop Foreman and Apprentice should have a copy.

—PERHAPS—

You want a good heater.

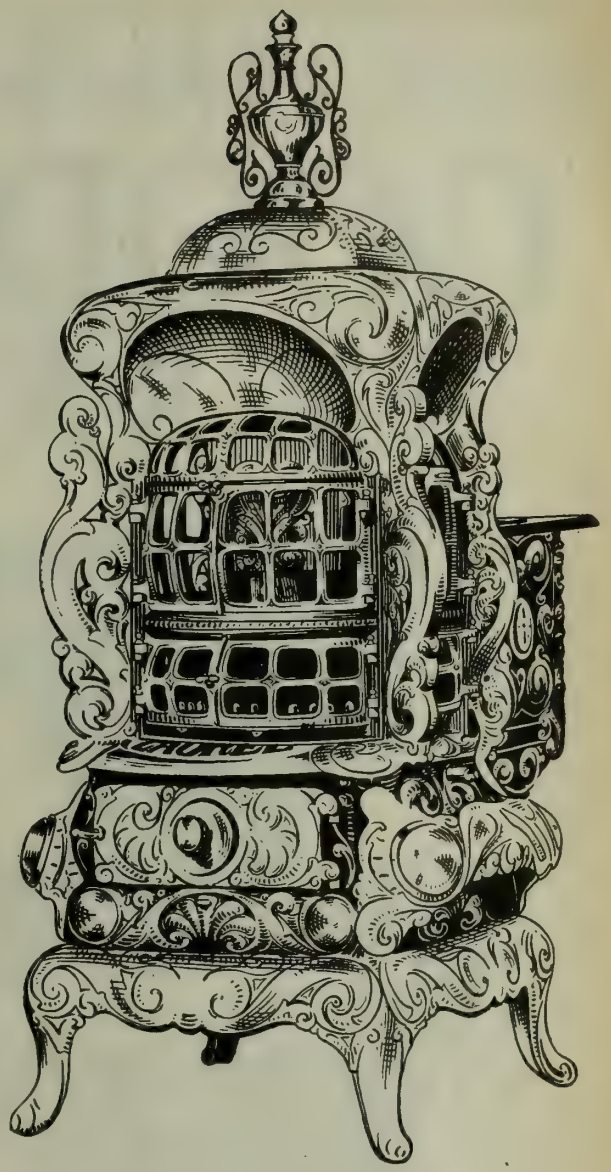
An up-to-date, high-class Famous Base Burner might answer your requirement.

This is the new 1909 model "Famous" Base Burner.

How do you like it?

This heater has three exposed flues, an improvement that increases the heating power fifty per cent.

THE 400 SERIES



London, Toronto, Montreal, Winnipeg,

McCLARY'S

Vancouver, St. John, N.B., Hamilton, Calgary.

HERE'S--

THE BASE BURNER THAT "TALKS"!

Sounds "Spooky"—don't it, but nevertheless it's literally true. The "Art Laurel" Baseburner actually speaks for itself—Seems like hiring a first class salesman—well! that's what really happens. All you have to do is, give the "Art Laurel" a fair show, deck it out in all its grandeur, don't leave any parts off—Give it stage room, so that everybody can see it—Then watch it play on your customers. It's a born actor and beautiful to behold—back of all that, it always plays its part well. Wins the applause of merchant and customer alike—immensely popular in every sphere—a permanent favorite.

FLUE CONSTRUCTION

That's the big feature in an "Art Laurel" baseburner. The illustration that precedes this paragraph shows the flue system in this heater; note the splendid radiation, no sharp turns, no flue strips, the products of combustion pass easily and freely in one undivided sheet in one direction only—round the pitted bottom. The pitted bottom increases the radiating surface of the main bottom. The hot air circulating flue is not only a channel for heating the air ordinarily confined by the base, it also takes the cold air from the floor at the centre of the main bottom, passing it to the back flue, and then to top of jacket in one strong column absolutely surrounded by fire surface.

U.S. Jobbers and Manufacturers Meet at Atlantic City

Fifteenth Annual Meeting of Hardware Jobbers and Seventeenth of Hardware Manufacturers—Canadians Present at Meeting—President's Address Indicates Strength and Outlines Benefits Derived From Association Work—Banquet to Dr. Cook—Address on Price Maintenance.

Reported by H. T. Hunter.

The fifteenth annual convention of the National Hardware Association and the seventeenth convention of the American Hardware Manufacturers' Associated were held at Atlantic City, N. J., last week, October 13-16.

The Canadian Wholesale Hardware Association for some years past has been represented by the president or vice-president and the genial secretary, J. Hardy. This year, however, both president Starke, of Montreal, and secretary Hardy, of Toronto, were indisposed and unable to be present. This year's convention, however, was the largest in point of attendance and the most successful, according to the opinions expressed by the officers in the history of the two associations.

Canadian Delegation.

S. R. Kennedy, Kennedy Hardware Co., Toronto, and Gordon Seybold, Starke-Seybole Co., Montreal, arrived the first day. They were introduced at the opening meeting by president Dudley who said they all regretted their old friend Mr. Hardy was unable to be present but they were glad to welcome two members of the Canadian Association and to extend to them an invitation to attend all their business sessions. Messrs. Kennedy and Seybold replied briefly, expressing the pleasure it was to them to meet so many old friends in the hardware trade. They appreciated the courtesy extended to them in inviting them to attend their meetings and would be glad to take advantage of this as they had come to listen and learn and they had no doubt they would be greatly benefited.

A. E. Gilverson, of Rice Lewis & Son, and his wife, arrived the second day of the convention and remained till the end of the week, when he left for New York City where he intended spending a week before returning to Toronto. H. G. Wright, of E. T. Wright & Co., arrived in Atlantic City a few days previous to the opening of the convention with the intention of resting up for a couple of weeks. The first day of the convention, however, Mr. Wright discovered he had a number of hardware friends in the United States and he was soon wearing a badge and taking advantage of the various social gatherings arranged for by the two associations.

The President's Address.

President Dudley referred first to the improved condition in the business world since they met together a year ago in Memphis, Tenn., and particularly since their last meeting at Atlantic City which was in October 1907, in the very worst part of the panic. While business conditions during the past year had not been entirely satisfactory there had been such a marked improvement in the past few months that it was a matter for congratulation. The improvement has gathered strength and momentum till to-day the business outlook did not present a cloud on the horizon.

The "tillers of the soil," who constituted the basis of prosperity in this country, were certainly enjoying a season of good fortune, peace and plenty. They were harvesting this year more than an average crop and were marketing it at prices far above those of previous years, thus making it exceedingly profitable. The large increase in exports and imports of our country indicated a return of active business conditions. The time for retrenchment, restriction and limited effort was behind them and they could look with confidence to the future. Renewed activity was now noticeable in every department of the hardware trade.

Benefits of Association Work.

He believed members gave the association due credit for the helping hand which it had extended the trade during these troublous times: the great advantages of being organized and in close touch with the manufacturers had enabled them to quickly disseminate valuable information and conservative advice, thus preventing demoralization in prices on many lines of goods. The benefits of their work in preventing a general demoralized condition were not confined to their membership and the jobbing trade alone, but extended to all branches of the business, embracing both manufacturers and retailers.

The object of the association, as set forth in its constitution and by-laws was to create more cordial relations between each other as jobbers, and between their members and the manufacturers and their customers, the retail merchants of the country. They constantly had this foundation stone of organization uppermost in mind.

He referred to the great change that had taken place in the past fifteen years in the way goods were marketed. Then ordinary consumers were frequently quoted jobbers' prices on very small lots, but through the educational influence of their various associations trade was now running to a greater degree than ever through its natural channels. This he claimed was in the best interests of all branches of trade as they had proven beyond peradventure of a doubt that goods could be placed in the hands of the consumer at a lower price when the manufacturer recognized the proper avenue of distribution.

Resale Prices.

In conclusion he stated there were many questions which would come up for discussion before them but probably the most important was the fixing of resale prices. Their association had never made any price agreement and probably never would but he would throw out a suggestion to manufacturers that they would probably realize that the solving of the question of the perpetuation of their good names would depend in a large measure on the efforts which they would put forth to make the sale of their goods profitable to both jobber and retailer.

A very interesting paper was read at one of the lgter sessions on the question of "Price Maintenance," by R. E. Shanahan, of Bissell Carpet Sweeper Co., Grand Rapids, Mich., which is reproduced on the following page.

Future Outlook.

One of the most interesting discussions at the convention was on the subject "The Future: Is the Prosperity of Former Years Approaching?" Robert Garland, President of the American Hardware Manufacturers' Association was the first speaker. He stated that in his home city in Pittsburg nearly all the great iron and steel mills were practically running on the old time basis.

Based on demand entirely prices were gradually but slowly readjusting themselves. There were no indications of a boom and he hoped there would be no such a thing as a runaway market. He might say, however, that the day before he left Pittsburg one large manufacturer had told him he had asked for one hundred cars and he had only been able to get fifty. This was a sign of the times and he predicted there would not be such quick deliveries during the next year as they had been able to give during the past eighteen months. He regretted the appointment of a "Tariff Board" as it would tend to create a feeling of uncertainty which was not conducive to their plants doing the maximum amount of business as manufacturers would not extend their plants unless they were convinced of the stability of present conditions. From all accounts however, they had nothing to fear at present as their efforts would for some time be along the lines of international problems. To sum up he would say business was good and was getting constantly better. What they wanted was good business at fair prices, no boom and no runaway market.

R. R. Williams, editor of the Iron Age, and S. Norwell, of Norwell-Shanleigh, St. Louis, spoke in the same confident tone regarding the prospects for business in 1910.

The Banquet.

The annual banquet took the form this year of a testimonial banquet to Dr. Cook, the discoverer of the North Pole.

Dr. Cook on being introduced by toastmaker Dudley received a great ovation which showed clearly there was no doubt in the minds of those present as to who was the first man to find the "Big Nail."

At the outset Dr. Cook stated that the hardware industry was represented at the pole as it was in every walk of life where work and brains count for

success. The amount of hardware on their sleds, however, did not promise a very big business return for the future. There were ice plates or shoes for the sleds, guns, knives, hatchets, lamps, aluminum pails, cups, spoons, a complete list, weighing only twenty-five pounds, but without it the pole would have been impossible. To those gentlemen, some of whom were present who manufactured such articles was due a part of the credit and honor of success.

Dr. Cook then gave a detailed account of his trip to the pole which was listened to with intense interest by every one of the seven hundred members who were present.

ADDRESS ON PRICE MAINTENANCE.

The address delivered at the Atlantic City convention by R. E. Shanahan, treasurer of the Bissell Carpet Sweeper Co., Grand Rapids, Mich., referred to in the foregoing report, is as follows:—

My talk to you will necessarily be brief, and as we say that advertising is not literature, so the treatment of a business topic may wisely be couched in plain phrase and not raised to the dignity of oratory. Candidly speaking, if I should attempt a serious oration, I am afraid I would be in the position of the man who was called upon to make an after-dinner speech, and who said something like this: "My friends, it is alleged that according to the Darwinian theory, it took the monkey four thousand years to evolve into man. Now, if I should attempt a speech, I would show you how man can make a monkey of himself in five minutes."

From my point of view, the policy of price maintenance or restricted prices, is so broad in scope, so far-reaching in beneficent results, as to be worthy of the thoughtful consideration and earnest support of every manufacturer, jobber and retailer in this country. From an ethical standpoint, price maintenance typifies one of the best moral elements in the conduct of business; it is fundamentally sound in principle and preeminently just and beneficent in practice, fostering and stimulating as it does the best ideals in commercial life; promoting character in business, and securing to its devotees the confidence of the public, which is in itself a valuable commercial asset.

Entitled to Fair Profit.

There are certain inevitable laws in trade that affect in common the manufacturer, the jobber and retailer, and price maintenance recognizes the basic principle of commercial justice and equity, namely: that the manufacturer, jobber and retailer, in the process of distribution, are entitled to a fair living profit in the sale of any commodity. Experience has taught, and I believe you will all bear me out in this statement, that the maintenance of prices will more nearly insure the maintenance of the quality of an article, than any other factor contributing to its sale. Not only will the maintenance of prices insure the high quality of an article, but also its very permanence on the market as well. A hardware merchant of my own city, told me some time ago that price cutting, to his knowledge, had driven from the market many an article of hardware of the highest merit; and the reason for this is perfectly obvious.

In the beginning I said there were certain inevitable laws of trade that affect in common the manufacturer, jobber and retailer, and that work out with mathematical certainty; and one of these is that the article that is placed on the market without the stipulation that it must be sold at uniform prices, both wholesale and retail, will in a short time be retailed at such low prices as to destroy all profit in its sale, thus killing the demand for it with both jobber and retailer, leaving open to the manufacturer as a last hopeless course the lowering of his prices, which means the deterioration of the quality of the product; and so it seems to me that it can be logically maintained that price cutting is demoralizing from beginning to end, working detriment, disappointment and loss to all concerned—manufacturers, jobbers, retailers and consumers.

In order to expound the practical application of a sound, rigidly enforced system of price maintenance, I hope I may be pardoned for using in the main the Bissell Carpet Sweeper Co. as an exponent of this principle, for as I have never been conected with any other business, for accuracy of detail I must necesarily confine myself to what I know about the policy of price maintenance as exemplified in our business.

When the Bissell sweeper was introduced on the market thirty-three years ago, the policy of price maintenance, of fixed wholesale and retail prices, same to be rigidly enforced, was practically unknown, especially in connection with the sweeper business. No manufacturer of carpet sweepers except ourselves (until within the last few years, when they have been forced to follow our lead) ever conceived the idea of establishing fixed retail prices on his goods; and what has been the result? Except that an intelligent presentation of this subject demands a reference to our competitors and their business policy, I would not make such reference at this time; therefore, I trust I may be pardoned for making comparison to more clearly convey to you the things that lie at the bottom of this question, and that will serve to make clear the effect of price maintenance upon a business.

Carpet sweepers were manufactured and marketed long before the introduction of the Bissell, but the policy of our competitors from the beginning to the present time has been to seek recognition through the offering of lower prices, totally disregarding the retail prices with the result that their product has been sold at any price suiting the whim of the dealer, killing the profit for every other merchant handling the goods, and finally, doing the inevitable; killing the demand for the goods thus loosely marketed.

I want to emphasize here that it must not be assumed that our competitors have been men of mediocre ability, with limited capital, thus accounting for any little success we have had. On the contrary, we have had competitors made up of the ablest business men in our own and other cities, backed by vastly more capital than ourselves; but their failure to obtain prominence in the business was due primarily to two things; first, they have never made the carpet sweeper an exclusive line of manufacture, and secondly, their selling policy has from our point of view been greatly imperfect.

Considering that we have had competition all the time we have been in business, that our competitors in many instances have been men of unquestioned ability, and pronounced successes in other lines, and that they have had in many instances more capital than ourselves to prosecute their business; that they always claimed to have a superior product to ours; always offered it at a lower price than ours; what should be the reasonable conclusion as to the causes that have made the Bissell sweeper the recognized leader throughout the world? Simply this: With the beginning of our organization we established our business on a sound system of price maintenance, and saw to it that our prices were strictly enforced. The best proof I can give you as to the vital force and far-reaching effect of price maintenance in our business, supplemented by strong, consistent advertising, is to say that we are to-day manufacturing and marketing fully seventy-five to eighty per cent. of the entire world's consumption of carpet sweepers. The foregoing statement is not made boastfully or egotistically, nor is it intended to show the brilliancy of our organization. What is intended is to demonstrate to you through facts and figures what I conceive to be the power of a well-defined price maintenance policy supported by strong advertising.

Price Maintenance Complex Subject.

And now I take it that a brief outline of our methods of price maintenance will be of interest to you. As we sell the jobber as well as the retailer, you will appreciate the task of maintaining our prices is more complex and difficult of accomplishment than if we passed our goods through but one channel of distribution. It should be gratifying to any maufacturer contemplating the adoption of a price maintenance policy when I tell you that we have no great difficulty in obtaining the co-operation of both jobbers and retailers in the strict maintenance of our price. It is true that in the beginning, when the policy of restricting prices had been little advocated, and when it was not generally understood, many dealers felt that it

was a direct invastion of personal liberty and a positive usurpation of the dealer's prerogative to attempt to tell him the price at which he must sell a piece of merchandise, which he had bought and paid for. We have had many interesting as well as amusing experiences in the promulgation of price maintenance. A few years ago one of our customers in a remote western city informed us that one of his competitors, a sturdy German, was cutting the price on our goods, earnestly requesting us to have it corrected at once. We immediately wrote the recalcitrant merchant, and his Teutonic blood was deeply aroused, and his reply was as follows: "Gentlemen, I bot them schweepers, and d'are mine, unt I sell them at any brice I blease, or gif dem away, or eat em; now what you say?" We replied that, however, it might distress his alimentary canal, derange his digestive machinery, or test his fealty to Fletcherism, we could offer no valid objection to his eating the sweepers, nor could we consistently object to his giving them away; but that when it came to selling them at cut prices we did interpose most emphatic objection, and that we hoped to have his early assurance that our fixed retail prices would be strictly maintained. Not hearing from him for some little time, we wrote again, and here was his reply: "Gentlemen, You t'ink you can dictate to me; I tell you I gif away every one of dem damn schweepers." And here the incident closed.

Mark the change of sentiment on price maintenance: To-day we are having the loyal support and co-operation of all the best jobbing and retail trade in this and foreign countries; and right here I want to say that in my judgment there never was in the history of merchandising a more opportune moment to inaugurate a price maintenance policy than the present.

Price Maintenance Growing.

Price maintenance has been adopted by so many manufacturers during the past few years, and the principle has been so productive of good results and has been approved so generally by the best jobbing and retail trade of the world, that I would strongly urge and recommend to any manufacturer who is producing an article of quality, protected by either patent or trademark, to lose no time in adopting a policy of restricted prices, as far as this is possible in the conduct of his business.

This is the most wonderful age of merchandising that the world has ever seen; never was competition as keen as it is to-day; never did the conduct of business demand a higher order of talent than to-day; and so it seems to me the policy of price maintenance should appeal to every manufacturer who can possibly adopt it, for its value to a business has been so many times demonstrated as to make it hardly debatable. Of course, it is a fact with which you are all entirely familiar, that the ideal condition necessary to the successful carrying out of a price maintenance policy is to have the article thus sold protected by patent or trademark. Personally I am so thoroughly imbued with the benefits accruing from a policy of uniform prices, and knowing as I do what a small percentage of jobbers or retailers are disposed to cut prices, if I were manufacturing an article not protected by patent, I would still surround the sale of my commodity with a well-defined scheme of restricted prices, appealing to the best business judgment of the jobbers and retailers of the country to secure their co-operation in the maintenance of my prices. I would supplement this with a campaign of advertising that would create a demand for my product, and by constantly pointing out to the jobber and retailer the profits to be secured by co-operation, in the maintenance of my prices, I would count upon results that are not obtainable when an article is sold on a haphazard-plan, with no well defined selling policy back of it

A carefully devised and rigidly enforced policy of price maintenance means lots of thought and hard work, but once it is properly launched the work becomes comparatively easy, and the benefits accruing more than compensate for the labor expended.

Legal Aspect of the Problem.

To demonstrate how thoroughly the trade now understand that the manufacturer of a patented article has the legal right to fix the price on his commodity, we have never once been obliged to go into the courts in this country to enforce the maintenance of our prices, and only a few cases have arisen where a dealer even threatened to cut our prices and take the matter to the courts in defiance of our policy. A few years ago one of the largest department stores in Buffalo threatened to go into the courts in opposition to our policy and spend $10,000 if necessary to defeat us; but after they took time to investigate with their attorneys they concluded it was best not to go into litigation, and to-day they are one of our best customers in Buffalo, and are selling our goods at correct prices. Only recently one of the largest department stores in Chicago threatened to cut our prices on our regular line of goods if we would not agree to brand the goods specially for them, they to cut oh the special brands. We discused the question with them on the broadest lines we could command, politely refusing to accede to their request, and giving them to understand that we would defend our policy of fixed prices to the last ditch, with the result that they receded from their position, and will continue to sell our goods and maintain our prices.

There have been some notable decisions during the past few years sustaining the right of the manufacturer of a patented article to fix the price on his commodity.

We had occasion some time ago to proceed against an English merchant for cutting our prices, and the court granted us an injunction, and the decision of the English justice was most sweeping in the recognition it gave to the right of the manufacturer of a patented article to fix the price on his commodity. Justice Wills, of the English court, in summing up the case, stated as follows: "The sale of a patented article carries with it the right to use it in any way that the purchaser chooses to use it, unless he knows of restrictions. If he knows of restrictions and they are brought to his mind at the time of sale he is bound by them. He is bound by them on this principle: The patentee has the sole right of using and selling the articles, and he may prevent anybody from dealing with them at all. Inasmuch as he has the right to prevent people from using them or dealing in them at all, he has the right to do the lesser thing, that is to say, impose his own conditions. It does not matter how unreasonable or how absurd the conditions are: it does not matter what they are; if he says at the time the purchaser proposes to buy. Mind, I only give you this license on this condition, and the purchaser is free to take it or leave it as he likes; if he takes it, he must be bound by the conditions. This seems to be common sense, and not depend on any patent law or any other particular law."

Decisions in American Courts.

The Ingersoll watch people, who maintain a policy of restricted prices, have had numerous decisions in their favor. The two most notable decisions that I recall, and which have occurred recently, sustaining the right of the manufacturer of a patented article to fix his price, are those of the Victor Talking Machine Co. vs. The Fair, and the Dover Manufacturing Co. vs. The Fair. These cases were fought bitterly and carried to the Supreme Court, decisions being rendered favorable to the manufacturers.

In all the decisions that have thus far been rendered, the courts have made it perfectly clear that when the Government grants a patent it intends to do something more for the patentee than to merely give him the exclusive right to make and vend his invention for a limited term of years. The only object that the Government has in granting patents is to stimulate invention for the general good, and there can be no stimulus to invention unless the inventor is able to enjoy some profit from his invention. If he cannot fix the price on his commodity, and if every jobber and dealer can cut the price, thus killing the demand for the article, it is evident that the patenntee would be robbed of his profits, the very thing the Government expects him to enjoy when his patent was granted.

And now a word in regard to the effect of price maintenance, on other lines. Consider the commercial standing of such

products as the Knox and Dunlap hats; consider the prestige of the E. & W. collar—through their price maintenance policy. A notable example of the virtue of this policy is shown in our own city through the present status of the Macey Co. A few years ago this business was established by Fred Macey, a young man of unusual ability, but who in his ambition gave more thought to building up a business rapidly than safeguarding it through a carefully devised selling policy. Although Mr. Macey was a most skillful advertiser, and although he made most marvelous strides within a short period in building up a business, things did not go right, and finally, when Mr. Macey died, Mr. Wernicke, the so-called father of the sectional bookcase idea, was called to take the management of the business, and in his reorganization of this business he put into effect price maintenance, and has rigidly adhered to this policy, with the result that while the business was in bad shape when he took hold of it, it is to-day in the healthiest kind of a condition, the preferred stock paying 6 per cent. and the common stock paying 10 per cent.

Policy of Price Maintenance Must Work Both Ways.

The policy of price maintenance, to be fairly and honestly carried out, entails upon the manufacturer the same obligations to strictly maintain prices as it does upon the jobber or retailer. A salesman of ours would no more think of taking an order at a cut price than of sending in his resignation. A manufacturer advocating price maintenance must practice what he preaches; he must kept faith with the jobbers, and never take an order, however, tempting, at cut prices. This policy has won for us the confidence and co-operation of the best jobbing trade in this country, and I can say in all candor that the time is past when we ever hear of a jobber cutting our prices. Price cutting is a species of commercial debauchery that rests upon the relentless doctrine of the survival of the fittest, upon the narrow, cold-blooded principle that merchandising is a sort of commercial warfare; that "all's fair in war," and "the devil take the hindmost." Price cutting lowers the commercial standing of the manufacturer, jobber or retailer who practices it, destroys profits, breeds distrust, fosters prevarication, forfeits confidence, and, finally, robs the consumer by debasing the quality of the commodities upon which prices are cut, if not actually driving many of them from the market.

Motive of Price Cutters Bad.

When you analyze it, the motive of the price cutter is always bad. Did you ever happen to notice that he usually selects an article for cutting that is well-known and well advertised. He knows that the general public are better acquainted with such an article, and he figures that by selling such a well-known article at a cut price it will give the impression to the buying public that he is selling all other commodities at equally reduced prices. Whenever we run on to a commercial freebooter of this class, who attempts to cut the price on our product, we invariably give him the opportunity of a limited number of rounds or a finish fight, as he may prefer.

In contradistinction to the blighting effect of price cutting, price maintenance is in harmony with the soundest principles in business to-day. The manufacturer, jobber or retailer conducting his business under a broad, equitable system of uniform prices, commands confidence and respect and establishes for a business that fine personality that we all prize so much in the individual.

British Columbia Hardware Association Quarterly Meeting

(Special Correspondence to Hardware and Metal.)

Vancouver, Oct. 16.—The quarterly meeting of the B. C. Hardware Association on Tuesday evening last was one of the most enthusiastic for some time. W. C. Stearman, president, was in the chair, and the attendance was larger than usual, showing the interest that is being taken in the organization, and which speaks well for its success. One of the principal matters taken up was the importance of hardware dealers patronizing local wholesale houses, instead of giving orders to representatives of eastern houses, who had no establishments in the west. It was pointed out that the resident jobbers were the people who were assisting in building up the city, and all progress meant more business to the retailer. If orders were given to eastern travelers, Vancouver reaped no good, whereas if local jobbers were patronized, the trade remained in the city. As it now is, drummers from eastern hardware houses get a very large share of the business, and with times as good as they are here in the trade, it is not difficult to land. The members of the Association are strongly in favor of giving business to resident wholesalers. If this course is maintained it will force eastern houses, if they wish to retain the trade, to establish on the coast and receive the trade as one of the community.

Another point discussed was that there should be a certain honor among those in the association. This is not to apply merely in the matter of maintaining the price schedule, but to be particular in keeping the secretary advised on any and all points that may arise, and which are of mutual interest. The secretary cannot make the association, and the good accruing is in proportion to the interest taken by the individual member. An endeavor was made to impress on the members the importance of reporting any customer who failed to make payments on account and who started in to run another bill elsewhere. While this was one point, others were discussed informally, the talk indicating that some good results should follow. Dealers in interior towns will be asked to cooperate, even if not members of the association.

Members of the association have considerable objection to make in the matter of freight rates. In a general way, the wholesale dealers here labor under the disadvantage of discrimination by the C.P.R. in favor of the eastern dealer, but one or two instances have a personal application. For example, the rate on wire is 95 cents per 100 pounds, and on nails 65 cents per 100 pounds, yet on wire skewers, which are of the same material, only cut into short lengths, the rate is $3.10. The reason

Where Ontario Hardwaremen will gather next February. The farthermost building is the Tecumseh House, London, opposite the G.T.R. depot; next is the Hobbs Hardware Co.'s jobbing house, and the one on the right is the City Hall on the second floor of which a trade exhibition will be held.

given by the C.P.R. for this is that no "skewers" are mentioned in the printed schedule, and because of that the first-class rate has to be charged. "It is about as smooth a hold-up as one ever was up against," a shipper remarked, "and the only way to overcome it is for the shipper to class it himself as wire nails, which would not be entirely wrong, or simply wire. Why, at that rate of charging, the railway company has only to leave half the names of lines of goods off the list, and then they will be able to charge full rates on most of the merchandise shipped out." R. B. B.

RETAIL HARDWARE EXECUTIVE MEETING.

The executive committee of the Ontario Retail Hardware Association is called to meet at Toronto on Thanksgiving Day, Monday, Oct. 25, 1.30 p.m., at the new Mossop hotel, Yonge Street.

Arrangements for the fifth annual convention to be held at London on Feb. 8, 9, 10 and 11, 1910, are well under way and final action on many matters will be taken at this meeting.

In connection with the convention a trade exhibition will be held, the City Hall auditorium having been divided off into 33 spaces, about half of which have been already alloted to last year's exhibitors. Other firms will be given a chance to secure space after the Thanksgiving Day meeting. It has been suggested that the exhibit hall be thrown open to the public one evening and that the exhibitors form a permanent committee to work with the association executive in conducting the "hardware show" each year.

The matter of Mutual Fire Insurance will also be an important subject for discussion at Monday's meeting.

On Monday evening the members of the executive and the Toronto members of the association will have dinner together at Orr's restaurant, Richmond Street east, a talk on trade subjects following the dinner. J. S. Willoughby, Cookstown, has been making a canvass of the city retailers during the present week and it is felt that enough Toronto hardwaremen are now members to warrant the formation of a local association.

COMMENTS ON LAW SUIT.

J. Rumball, Niagara Falls South, writes that the reference to the law suit of Turnbull vs. Rumbafl in Hardware and Metal of October 16 did not explain fully his side of the case. It will be remembered that $500 damages were awarded Mr. Townsend, but on an appeal being made the damages were reduced to the nominal sum of $5. Mr. Rumball writes as follows:

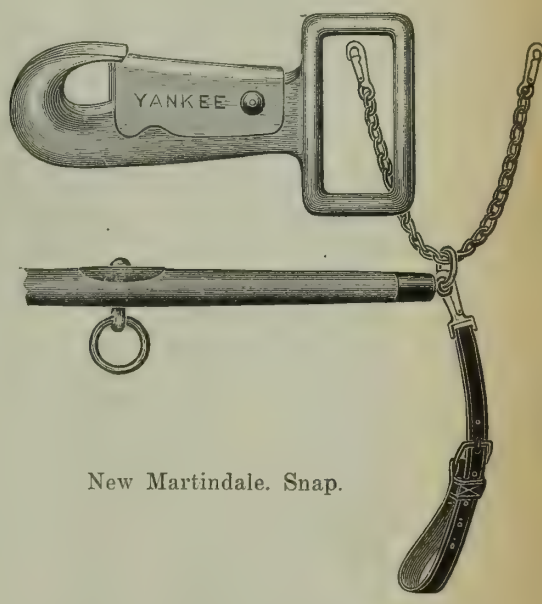
"I sold to Townsend & Co., Harrow, part of my hardware stock, but retaining $2,000 worth, expecting to move to the northwest. I covenanted for $500 not to sell any of the balance of my stock to anyone not already in the hardware business. In the stock I retained I had about $1,500 worth of carriage hardware goods, not usually stocked in hardware stores. I got a chance to dispose of this junk to a carriage hardware blacksmith in Harrow. As the agreement did not specify what kind of hardware firms I was not to sell to, I considered, and have not changed my mind, that it was not a breach of the agreement, as Mr. Smasac, whom I sold to, buys from wholesale carriage hardware jobbers and retails to the farmers. In selling this junk to Smasac the regular hardware store at Harrow did not sustain a cent's worth of damage.

"Lewis Perriss, who is now conducting a hardware business in Harrow, and who was responsible for the action was nearly a year before the trial working on evidence, but found nothing but the one sale I had made.

"As your article was somewhat a reflection on my honor as a business man I will be grateful if you will give space to this explanation."

J. RUMBALL.
Niagara Falls South, Oct. 19, 1909.

HARDWARE STORE BURNED.



The store of H. G. F. Dreyer, Blind River, was destroyed by fire Oct. 13, the only thing saved being a typewriter on which Mr. Dreyer wrote Hardware and Metal the following day, forwarding $2 for another year's subscription. Mr. Dreyer writes: "Next to us was a French restaurant and at half past three this morning this building took fire. The occupants escaped merely in their night robes, and so quickly did the fire spread that before the firemen had the water on, our building was in flames from end to end. The loss will be between $5,000 and $6,000, covered by $3,500 insurance. As it is difficult to obtain a suitable building here for some time, and as the adjuster has not arrived, we are not decided as yet what to do."

IMPROVED MOP AND DUSTER.

Tarbox Bros, rear 274 Dundas Street, Toronto, have just put on the market an improved mop stick, duster and window washer, which ought to be a big seller to housewives. It will, in the opinion of Mr. Tarbox, change an ordinary selling line to a fast moving article. The mop stick part of the device, which has already won favor, has a handle longer than a broom, with a lever near the top of the handle, regulating the opening and shutting of the jaws of the mop holder, the spring being very strong. This has now been supplemented by a metal form over which a cheesecloth duster is spread and locked in by another piece of metal, formed in such a manner that the spring wire jaws of the mop stick can grip the duster in any one of half a dozen ways, this being of special advantage in making it possible to dust behind a piano, under a lounge, behind pictures, along a moulding, etc., without the usual discomfort of crawling or climbing into various positions. As a tool for polishing hardwood flooring it also excels. Circulars describing the new duster wil be sent on request.

NEW MARTINDALE SNAP.

The Covert Mfg. Co., Troy, N.Y., are well-known for the variety of attachments they manufacture for harness, one of their latest improvements in this line being illustrated herewith. The main objects and advantages of this snap are. First—The loop is placed at the same angle as the hook, and not at right angles thereto, as in the case with the regular loop harness snap. This is to allow it to be snapped into the neck yoke ring, which is more convenient and saves great wear on the strap. Second—A martingale made in this way will wear four times as long as when made the old way, as it cannot slide and chafe on the yoke. Third—It is more convenient than slipping the strap over the end of the yoke. Fourth—Enough leather is saved in making up to pay for the snap. Fifth—When unharnessing it can be snapped in the hame ring, and thus hold the strap secure. This martingale snap is made with a brass lever spring the safety and durability of which is readily appreciated, as the rivet passes through the steel cap or tongue, the spring and the snap, thus securely fastening both the cap and spring so they will remain in-

New Martindale. Snap.

tact and unimpaired as long as the snap lasts. These snaps are also made with a screw and roller so they can be readily attached to the martingale straps that are already made up.

ANOTHER CEMENT MERGER.

A big merger, which will include only the three Owen Sound cement mills is being planned. The three mills represent an investment of nearly a million dollars, and as they have been idle all summer the directors are getting together on a scheme to consolidate three plants into one big mill, with a capacity of 4,000 to 5,000 barrels a day. The companies interested are the Sun Cement Co., the Imperial Cement Co., and the Grey and Bruce Cement Co. It is proposed to sell the sites and buildings of two of the corporations and enlarge the third and equip it for the manufacture of rock cement.

Business Methods of Canadian Hardwaremen

Suggestions as to Methods of Collecting Accounts — Securing Business From Young Married Couples—How a Store Stenographer Can Help—Special Saturday Sales—Advertising Ideas of Various Merchants.

HUNTING WINDOW AT CALGARY.

Calgary, Oct. 11.—A window display which attracted a lot of attention here at the opening of the shooting season recently was the hunting scene shown in the accompanying illustration.

The Comer Hardware Co., who made the display, have a fine large window which they utilized to good advantage although the photo does not do justice to that part of the display on the floor of the window. A tent was erected at one end and near it was placed the figure of a hunter, a camp stool and a stack of rifles being also near at hand. On the floor there were two pools of water with decoy ducks floating around and in the background behind the bushes a painted scene represented a large lake, or, to use western terminology, a "slough."

The window was well arranged and not overdone, hunting coats being hung at the back, store signs appearing among the trees and a fence of cartridge boxes and shells being assembled at the edge of the sod in the front of the window.

G. W.

Hunting Scene in Window of the Comer Hardware Company, Calgary.

SPECIAL SATURDAY SALES.

Brantford, Oct. 18.—"Plenty of publicity, with frequent change of 'bargain day' windows," is given as the basis of the success of the Saturday sales of Watt & Squire. "We use a two column ad. every Friday evening in both local papers, giving a list of 'leaders' in lines so varied that there is sure to be something to suit every requirement. These 'leaders' are all seasonable," said the junior partner, "and there is a splendid demand for them, and for Saturdays we have to have extra help. For instance this week our leaders are 5 and 6-foot stepladders at 53c and 69c each, the regular value being 65 and 75c each, and we have disposed of a large number. Then we had a special in mechanics' tools, and other useful lines. Of course, the results were that not only were the special goods sold, but in most instances the buyers saw something else which they needed, and added sales resulted. All the special goods are plainly priced and this helps the clerks a lot, they being kept up to the hustling point by the customers, who are enabled thus to say, 'I'll take one of those step-ladders and a saucepan, that will be 73c., will it not?' and the sale is transacted in the minimum of time. We are now taking stock, so as to be ready when our fine new store is completed," he concluded.

A. W.

PANEL FOR HALLOWE'EN WINDOW.

Toronto, Oct. 20.—The accompanying sketch shows a panel used as the background of a local hardware store window, and as it may be interesting to readers of Hardware and Metal, we forward it for their benefit.

The goods shown in the window are fall sporting goods, air guns, etc., and the panel is catching the eyes of the younger generation and will probably help in popularizing the store with them.

W. R.

GOOD HUNTING SEASON AD.

Moose Jaw, Oct. 15.—Arthur Latham, who has a hardware and sporting goods store here, adopted a practical method of securing the trade of hunters, at the opening of the present shooting season.

Mr. Latham inserted a full page ad. (16 x 21 inches) in a local paper, and devoted about half the space to a review of the laws governing the shooting of game and fowl in Saskatchewan. As wil be seen in the reduced reproduction herewith, the "close" and "open" season are given, penalties are named and a summary of other features of the law are also outlined. The ad. was also used as a poster, and an offer was made to supply extra copies to any who desired same for reference.

While the lines advertised were mostly ones on which prices are seldom quoted, some of the space could have been used to advantage in naming special

Panel for Hallowe'en Window Background used in a Toronto Store.

prices calculated to draw trade to the store. G. W.

PAY YOUR BILLS PROMPTLY.

London, October, 19.—In conversing with a small but prosperous hardwareman in this city recently, he made the remark that many merchants wonder at the credit he had. "Well, the secret of it is," he said, "that though my capital was very small to begin with, I always paid my bills promptly. In this way I established a line of credit which has enabled me to expand to my present business." B. C.

SPECIAL HARVEST SALE.

Reference was made in Hardware and Metal, of Oct. 2, to the intention of the Rossburn Hardware Co., of getting out a store paper to advertise their store and endeavor to head off mail order competition, there being no local paper there.

The store paper has been issued, it being four pages 7¼ x 9½ inches in size, the first page announcing a "Special Harvest Sacrifice Sale," for 30 days beginning Oct. 2, and special "pullers" announced were offers to customers as follows:—

"Any person bringing this folder to the store and purchasing $1 worth of goods is entitled to any article in south window to the value of 25 cents. Don't miss this offer."

"With every range sold during demonstration to be made, week beginning Oct. 18, we will give a fine set of cooking utensils, valued at $5."

The first page advertised enamelware and ranges, the second (reproduced herewith), kitchen utensils, the third ranges, heaters, stoves and sewing machines, and the fourth, "seasonable gifts," such as silverware, cutlery, shaving supplies, and fall goods such as axes, crosscut saws and lanterns.

The folder ought to be productive of much trade, it being well printed by the Stovel Co., Winnipeg, and both illustrations and typesetting are done in attractive style. The cuts are not too large, a fault too often seen in folders of this kind, and the copy writer has used splendid judgment in copying the departmental store method of giving a brief description of each article and quoting prices in plain figures.

The folder is the work of George M. Watson, of the Rossburn Hardware Co., and if it can be criticised at all, it is for the lack of an opening "talk," of a heart-to-heart nature, between merchant and customers. Such opening paragraphs should be written in the same style the merchant uses in conversation over the counter. An appeal should be made to help build up home enterprises, which are paying local taxes, supporting schools and churches, and helping to build roads, etc., and an invitation should be given to compare prices given with any quoted in other stores or catalogues.

A cheap man is a poor investment.

Encouragement often does more good than finding fault.

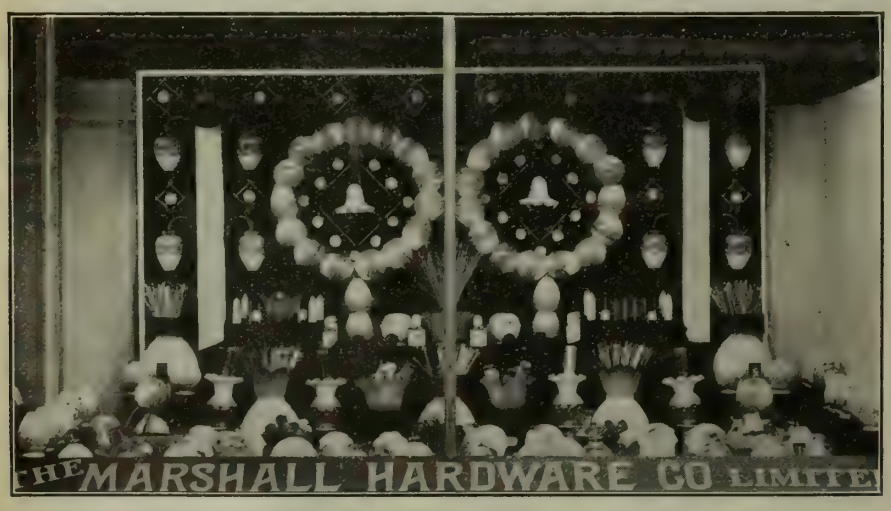
Electric Supplies and Gas Lighting Goods

Lighting Fixtures and Electric Specialties Good Lines to Push During Holiday Season—Some of the New Goods on the Market—Very Attractive Lighting Goods Window.



In preparing for his Christmas trade the hardwareman has an exceptionally good opportunity to push his electrical department, or to start one. As the great medium for the sale of lamps he is well fitted to supply these accessories which are needed when electric lighting is used. Electrical power stations are springing up with mushroom rapidity. Districts that at one time seemed far remote from the possibilities of electric lighting are now being, or shortly will be, supplied with the current, while many large plants are supplying their own force. It is well, therefore, for the progressive hardwareman to consider this growing demand for electrical fittings, and be early in the field to supply it. The development of electric and gas light has hit the oil lamp sale in some districts very heavily, and while the lamp trade can still be pushed as the field is large, hardwaremen should not neglect to recoup themselves by trying to provide for the new demand. For instance he can supply lamps, shades, fixtures, cutouts, wiring, screws, etc., just as well as he can gas mantles, burners, lamps, chimneys and wicks. He must conform to the trend of the trade, and if electric light is in his district, or is coming there, then he must be first in the field with the necessary supplies.

Electric Specialties.

Again there is the question of those electric specialties which are undoubtedly the prerogative of the hardwareman, we mean electrical flat irons, water heaters, vacuum cleaners, lighters and so on. These are commodities which he can sell better than any other merchant, and when electricity is once established in a district it is astonishing the demand that is created for articles and competition is not keen. The merchant who, therefore, makes his store the headquarters for electrical supplies, gets in on the ground floor from the first.

Again, even if electrical power has not yet entered the district, the merchant can prepare for that day, which will assuredly come sooner or later, by making a good display of electrical novelties, such as pocket lamps, etc. By having a good showing he can give his store an electrical touch as it were which will stand him in good stead when electric lighting does come. Besides the Christmas trade is worth catering for alone, and what better seller can there be than an electrical novelty or toy. Thus the hardwareman is killing two birds with one stone. He is encouraging his holiday demand by showing good sellers, he is reaping a good margin of profit, and over and above he is giving his store an advertisement in an electrical way that will not be forgotten when the time comes for electrical lighting.

Those merchants who are already in a district where electric power is used should make a strong bid for the supply trade that has grown up with it. There is always a demand for one thing or another. Lamps are continually changing, new shades are wanted, fixings become soiled and need renewing and so on. Undoubtedly there is a good field for the hardwareman who likes to set himself out to secure it. An electrical supply house, pure and simple, needs a very large district to support itself, whereas a hardwareman is not so situated. Except, therefore, in the large communities where electrical supply houses can alone exist, the hardwareman is the best man for the trade.

Fine Lighting Goods Window Dressed by Herbert S. Doan, for the Marshall Hardware Co., Medicine Hat, Alberta.

these practical appliances that are now being driven by the power to the lasting relief of the housewife. There is a good margin of profit on most of these

New Portable Bracket.

A great acvantage of electric lighting is the ease by which a lamp can be moved about and by means of various forms of brackets which have come into use. There is no need now to sit in a bad light owing to the electrical fixture being some distance away. A new portable adjustable electric light bracket has been introduced on the Canadian market by the Dominion

"Williams" Portable Adjustable Bracket.

Utility Company, Montreal. This bracket, which is called the "Wiliams," is made up of three telescopic tubes, which when closed measure 17 inches in length, and when fully extended 38 inches. The bracket contains four universal joints, which enable the operator to obtain any desirable adjustment without the use of thumb nuts or screws ; these joints holding their tension at any position. To carry the "Williams" bracket, a clamp is supplied which can be fastened to a desk, table, piano or chair, enabling the operator to gain a position at which he can work with great degree of comfort. In the house, business office, hospital, or factory the bracket is extremely useful. The Manufacturers' Salse Co., Birks Building, Montreal, are the selling agents.

Lighting Goods in Window.

One of the best displays of gas lighting supplies Hardware and Metal has seen is that arranged by Herbert S. Doan, of the Marshall Hardware Co., Medicine Hat, Alberta, and reproduced in the accompanying illustration.

The back of this gas globe display is black sateen with edged moulding of white. The small squares at the top and sides are mantle posts with a mantle in the centre. The two cirlces of globes in centre are pink and white, while on the upright pillars, blue and white globes are hung. Wax tapers are placed in large gas globes to represent plants in jardineers.

The window was brightly illuminated at night and the artistic arrangement drew a great deal of attention and materially helped the sale of gas lighting goods.

Trade Improving in the Mother Country

More Business Doing With Canada—Tin Plates Never More Active—Some Remarkable Signs of Trade Revival.

From Hardware and Metal's Special Correspondent.

Sheffield, Oct. 14.—Trade prospects are brighter now than they have been for very many months. A feeling of confidence has overspread the country, and business is moving along. The full force of the improvement has not by any means manifested itself, but there are indications in the shape of more night shifts, fewer unemployed, and a brisk inquiry.

At present the most active departments are those devoted to Admiralty work. The Government has given out orders with a liberal hand, and armour plate mills are busier than they have been for over a year. Every firm which makes projectiles is doing well in those departments, and the orders include, not only those from the British Government, but from foreign powers, including the Japanese. The gun departments are very active, and one firm alone has enough work on hand to last two years. But it is the general steel branches where a few more fillips are needed before the big machinery of the industry moves along with the speed generated in a period of boom.

After a bad time such as we have passed through, a restart into activity is all the more difficult, because of the progression which has been made in equipment. Modern plant does the work quicker, and bigger works need big orders, so that it is not surprising that a bigger volume of trade is needed to satisfy the increased productive capacity of up-to-date and enlarged works.

A Remarkable Feat.

It is remarkable what can be done even in times of trade depression. An instance is forthcoming from the east end of Sheffield, where Wm. Cooke & Co., who are known well in Canada as makers of steel wire ropes and bar iron, are just completing the largest wire rod mill in Great Britain, and have booked enough orders to keep the whole of the plant running night and day for six months. Such a feat has not been accomplished in Sheffield previously. It is a high tribute to the business capacity of the Managing Director, Thomas Wilkinson.

Another company has been formed in Sheffield to manufacture wire ropes, but the site of the proposed works is still under cultivation.

The Ivory Trade.

The last public sales of ivory showed that prices are still advancing, and it is asserted with confidence that ivory will never be cheaper; the price will advance at each auction. There seems no reason to hope for prices to be regulated, so as to enable Sheffield cutters to produce ivory handles at rates anywhere near those of fifteen years ago, when the output of ivory knives was at least five times as great as it is to-day.

Other branches of the ivory trade, especially the pianoforte key cutters, whose requirements are always increasing, are able to pay prices quite out of the reach of Sheffield cutters.

America, which 25 years ago took very little "raw" ivory, now takes a very large proportion of the world's supply, and Germany, notwithstanding the total loss of the United States as a market for "cut" ivory, takes increasing quantitites of the ivory brought forward. Very little of the more expensive ivory comes to Sheffield; only the lowest priced is within reach for cutlery. The handles are quite as good for wear, but have not the fine, even grain and color of the more expensive kinds of ivory. The best firms sell ivory knives at very little profit, in order to find work for the men who still continue to uphold the reputation of Sheffield as unequalled.

The Patents Act.

The Patents Act has been in force a little over a year, and it is estimated that the twenty-four foreign firms who have established works in this country, have spent close upon half a million pounds.

Sheffield has not attracted many; the choice has fallen on places near the seaboard, in the neighborhood of Liverpool and London. Readers of Hardware and Metal will recollect that the Act compels the foreign manufacturer who holds a patent in this country to come here to work it. If he does not, then an application can be made for the revocation of the patent. American, German and French firms have thought it advisable to establish works here.

A Big Order.

An order from the Buenos Ayres Western Railway, has been placed with a Darlington firm, for 500 40-ton, all-steel bogie freight wagons. A part of the work has been sub-let to Sheffield manufacurers.

In the railway material branches, there is plenty of room for improvement. The British railway companies are still economising to an extraordinary extent, but it is pretty certain that after holding off for such a very long time, it will soon become imperatively necessary to give out orders of fairly big volume. Improving trade, will, of course, increase the traffic receipts, and then the railway directors will loosen their purse strings.

The Tin Plate Trade.

News of the strike in the tin plate trade in America is read with interest here. No enquiries have yet been received in South Wales for tinplates for American home consumption.

The trade in South Wales is exceedingly flourishing, and it is difficult to keep some of the mills going, owing to the scarcity of tinplaters. Never in the history of the trade has there been such a demand for millmen. Some firms state their order books are full to the end of the year.

Exports on the Up-grade.

One of the most gratifying features of the Board of Trade returns is the growing trade between Great Britain and Canada.

In August last, Canada took from us hardware of the value of £3,881, compared with £3,797 in August of last year, and £4,344 in August of 1907. The total for the eight months was £39,463, over £14,000 greater than the £25,385 of the first eight months of 1908, and nearly as high as the total of £41,366 in the corresponding period of 1907, when trade was in a boom state.

Cutlery totalled £9,005 in August last, compared with £4,851 in August, 1908, and £9,213 in August, 1907. In the eight months Canada took £55,767, compared with £45,776 in the corresponding period of 1908, and £71,555 in the corresponding period of 1907.

The weight of unwrought tin sent to Canada in August was 60 tons, compared with 26 tons in August, 1908, and 85 tons in August, 1907. The total for the year up to the end of August far exceeds other years. It reached 632 tons, compared with 384 tons in 1908, and 438 tons in 1907.

Of pig lead, and manufactures of pig lead, Canada took 474 tons in August last, compared with 136 tons in August, 1908, and 350 tons in August, 1907. The total for the eight months is not quite so satisfactory. It reached 2,724 tons, compared with 2,373 tons in the corresponding period of last year, and 3,828 tons in the corresponding period of 1907.

In steel, trade with the Dominion is also very satisfactory. The weight sent in August last, was 1,203 tons in steel bars, angles, rods and shapes or sections. In August, 1908, the total was only 852 tons, but in August, 1907, it reached 1,711 tons. During the eight months of the present year, the total sent was 11,533 tons, well ahead of the 8,469 tons of the first eight months of 1908, but behind the total of 17,814 tons in the corresponding period of 1907.

Altogether the results as disclosed by the Board of Trade returns are very satisfactory, and show that in comparison with other markets of the world, Canada is bracketed with the best.

PUBLISHED EVERY SATURDAY.

MAKE YOUR COLLECTIONS NOW.

This year's harvest has been a bountiful one. The farmers have money, and that means that there is money in circulation through all the channels of business.

Now is the time for the merchant to collect what is due for merchandise supplied on account. There are many demands upon the farmer and the laborer for his money after the harvest and if the merchant is to secure what is rightfully due him he must go after his money and see that he gets it.

Every merchant should get his credit accounts checked and posted up to date without delay. If he has notes on account due, he should present them for payment and insist upon a settlement. If he has merely outstanding credit accounts on his books, now is the time for him to see that his collections are made.

DEARER WINDOW GLASS LIKELY.

The uncertain condition which has maintained in the Canadian sheet glass trade throughout the present year bids fair to disappear. For two years past the European window glass manufacturers have been very scarce of orders, with the result that lower and lower prices were made, until the dealers in Canada seemed to feel, in consequence, that they themselves must get rid of their stocks at any price, and this decline was further accelerated by the quietness of trade in the larger centres.

The European window glass manufacturers' syndicate was materially strengthened in August last, since which time there have been two sharp advances in price. At present the Canadian importers have had considerable difficulty in getting deliveries, and this, in conjunction with the good demand, is stiffening up the price. Stocks in possession of the retailers are comparatively light, which is also the case with the stocks in jobbers' warehouses. Window glass is moving very freely at the present time and there seems to be every prospect that in view of the excellent demand higher prices will rule.

CAPITAL TIED UP IN IDLE STOCK.

It is a generally conceded fact that the average merchant in the smaller cities and larger towns does not look after the idle goods in his stock as closely as he should.

How many small dealers are there that could not go through their stocks and pick out inactive goods, a few here and a few there, small in individual amounts, but in the aggregate amounting to hundreds of dollars, that are neither bringing returns in sales or profits. These goods are inventoried year after year, at first cost, when they should not be counted as assets at all, their value having gradually faded away until they should properly be classed as liabilities.

Carried-over goods can reasonably be estimated as deteriorating in value one-third each year. Not only is there a loss in quality, but the value of the article has been tied up for twelve months without earning a cent. It has thereby eaten away one-third of itself and after the third year it has practically disappeared as an asset in determining the profits of the business.

In the case of articles that change in fashion from season to season the deterioration is even greater, and in closing out past season's goods of this character the question of cost should be lightly considered in comparison with the quick disposal of the goods. The money thus released and put to use in buying active goods that can be turned over and over during the year at a good percentage of profit, will more than counterbalance the loss sustained in promptly closing out the undesirable stock.

BROOM-CORN STILL ADVANCING.

Latest advices indicate that there is no sign of the weakening of the broom-corn market. The crop is short in many of the States from which the supply is secured by broom manufacturers both in Canada and in the United States, and as a Chicago broker in writing to a Canadian manufacturer puts it, the market is liable to go up to 15 and 20 cents per pound. This would bring the price of broom corn from $85 to $300 and $400 per ton.

In Oklahoma state the crop was very short, being burnt up by excessive heat. In other states somewhat similar conditions exist and the farmers who see the price soaring are naturally reluctant about selling. This has prevented manufacturers from getting hold of the supplies they require and has a tendency to force the smaller factories which have been accustomed to purchase in small quantities out of business—at least temporarily.

At the present time, therefore, for anything like a decent broom the retail price will be from 50 cents up. The normal price was 35 cents. In fact manufacturers have had to eliminate some lines of broom altogether as they are not able to obtain the necessary material.

With no indications, therefore, of a weaker market in broom-corn, it is difficult to predict to what prices brooms may go before the situation is alleviated.

HELP PROTECT THE GAME.

Every dealer in guns and ammunition should be an earnest worker in the cause of game protection, through policy, if for no other and higher reason. He should feel as closely interested in the enforcement of a close season for fur and feather, as in the organization of a new gun club, with a big membership list—and every member a regular customer.

Find them where you will, sporting goods dealers are so placed, in constant contact with men who hunt and men who fish, that they can do very efficient service in a missionary way, and without any apparent desire to meddle with or influence the individual beliefs of their customers. It is superfluous to observe that field sports must lose their popularity when there is no winged or four-footed game to pursue, or that angling will literally become "dry work" in the possible event of their no longer being game fish to take the hook.

No true sportsman, it may be argued, will shoot a mother bird in the midst of her fledgling brood, or hound deer in mid-summer, or dynamite a trout stream. But, unfortunately, the patrons of sportings goods stores do not all come within this category. The sportsman instinct may be inherent in all, but it is sometimes undeveloped and requires accentuation.

Every city, every town, no matter how small, should have its regularly organized association for the protection of game, and dealers should bestir themselves to this end, even by so doing they antagonize the close season shooters and the fishermen who nightly drag the streams with seines of illegal mesh. There is small profit in the sale of goods to such people.

RETAILERS LIABLE UNDER SECRET COMMISSION ACT

Some time ago The Canadian Grocer gave publicity to the new Secret Commissions Act, which has created a good deal of interest and discussion all over Canada.

Since that time doubts have arisen in the minds of some that this Act did not refer to ordinary business transactions, but only to Government business where secret commissions were given to members of the civil service. In fact, an "alleged" retailer conveyed a message by phone to the effect that the Act did not at all refer to business transactions between a wholesale and retail merchant. He had made investigations he claimed and had discovered that the Act only referred to transactions in the civil service, as it had been copied from an English Act which was only intended for that purpose. He further promised to soon be able to prove that his contentions were correct, but up to the present Hardware and Metal has heard nothing more from him.

Hardware and Metal pointed out at the time that the Act was a copy of the English Act and that it was introduced on account of the secret rebates exposed in the investigation of the Marine Department of the civil service in one of the provinces, for the purpose of preventing such occurrences in future, but, we understand, first passed in England to prevent buyers going to London getting a secret commission from the houses they bought from while in the employ of the houses for whom they bought.

Since that time Hardware and Metal has made definite enquiries and has learned that the Secret Commissions Act refers to ordinary business transactions as well as to the civil service.

In reply to a query, the following letter from the Clerk of the Parliaments, Ottawa, gives a brief history of the bill:

"It was introduced into the Commons on 1st February, 1909. Passed by House of Commons, 23rd February; received by the Senate on 2nd March; amended by Senate on 24th March; returned to Senate with amendments agreed to 21st April; assented to 19th May."

The amendment referred to is the principal feature of the bill which makes it general in its application. It reads:

> Every person who is a party or knowingly privy to any offence under this Act shall be guilty of such offence and shall be liable upon conviction to punishment hereinbefore provided for by this section.

This, according to the best of authorities, makes the retail merchant just as liable as a traveler or wholesale house guilty of a breach of the Act.

There is apparently, therefore, little truth in the assertion of the "retailer" that the Secret Commissions Act did not refer to him or to wholesale houses and their travelers.

BUYING STOVE REPAIRS.

The following interesting letter has been received on the subject of buying repair parts for stoves and ranges. It is reproduced in full in the hope that the suggestions made will result in the saving of annoyance and delay to both manufacturer and retailer, following the inaccurate ordering of supplies. The letter follows:

> Editor Hardware and Metal,—At this season of the year when all stove dealers and manufacturers are over-taxed with the filling of orders, especially for stove repairs, lots of time and expense and unnecessary delay could be saved if every one would see that a very definite description is given of each repair piece required.
>
> Sometimes we are asked to furnish repairs when the information is very vague and confusing, and then it is necessary to do a lot of guessing in order to hurry shipments—as time is quite a factor with cold weather coming on. And then the guessing is very likely to be done wrong, and the customer is exasperated at not only the wrong shipment but still the further delay.
>
> If every user and dealer would only be sure to give exact information all this annoyance and dissatisfaction could be easily obviated.
>
> In ordering stove repairs it is necessary to give the manufacturer's name, the name of the stove—the style number—the size number and the date (if any appears) and then the trade name for the piece wanted, and in the event of being uncertain of the trade name, a good description of the part should be given, and, if possible, a rough sketch of the piece required.
>
> Having been through the mill, it has occurred to the writer that a little said through the columns of your paper, which reaches every stove dealer in Canada, would be very timely.
>
> A SUBSCRIBER.
>
> West Toronto, Oct. 18, 1909.

It will be remembered that in July last Hardware and Metal drew attention to a uniform system of numbering stove repair parts in use in the western States. The adoption of such a system by Canadian stove manufacturers would aid in simplifying this worrysome trade problem.

TAKE CARE OF BANK ACCOUNT.

In speaking to a prominent banker of Montreal who handles a great many retailers' accounts, he said that the average man does not realize how many enquiries are made regarding his business standing. If he did, he would not take the chances with his credit that so many do.

It very often means that, on the bank's report, a man is compelled to pay cash for any goods he may buy, when, by the exercise of a little care, he would have had sufficient credit for any purchases he desired to make. Talk to your banker at the first good opportunity and keep in touch with him.

TRADE NEWSPAPER'S SILVER JUBILEE.

The Bookseller and Stationer, of Toronto, with its September number celebrated its silver jubilee, having envolved out of Books and Notions, started by J. J. Dyas, of Toronto, during the month of August, 1884. Year by year the journal taken over in 1888 by the MacLean Publishing Company, gained in strength, usefulness and influence until now in its twenty-fifth year it may compare itself with the best book and stationery trade journals in America. This is due as much to the editorial management as to the enterprise of its publishers.

Since its establishment Bookseller and Stationer has been in charge of several editors, and it is, in fact, worth noting that each of these men have achieved distinction in the work he has since taken up. After the acquisition of the paper by the MacLean Publishing Company, the first editor was C. A. C. Jennings, who was in charge until the summer of 1892. Mr. Jennings is now one of the editors of the Toronto Mail and Empire. Following him for three years was John A. Cooper, M.A., who resigned in 1895 to accept the editorship of the Canadian Magazine, and is now the managing editor of the Canadian Courier. After him the paper was under the editorial control of Frank Smith, who is to-day financial editor of the Toronto News. His successor was Dr. A. H. U. Colquhoun, M.A., LL.D., now Deputy Minister of Education of the Province of Ontario. In 1902 the present editor, W. A. Craick, succeeded Dr. Colquhoun, and has ever since been in charge.

In the name of the book trade of the United States, we offer congratulations, coupled with the wish that our contemporary may enjoy many more years of usefulness and prosperity.—From Publisher's Weekly.

The world is made up largely of also rans.

You can always tell a hard drinker by his mug.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

Wire Nails—Now $2.25 to $2.35.
Cut Nails—Now $2.40 base.
Plain Wire, Bright Annealed, etc.—5c advance.
Wire Staples—Bright and galvanized, 5c advance.
Linseed Oil—4c advance.

Toronto.

Linseed Oil—Up 4c gallon.
Nails (wire and cut)—Advanced 10c keg.
Hay Wire—Up 10c.
Stovepipe Wire—Advanced 5 p.c.
Staples—Up 5c per 100 lbs.

MONTREAL.

October 22.—There is a very good feeling in the metal trade over the volume of business done, and as one jobber remarked if the year finishes at the present rate there will be no kick coming. Naturally at this time there is a stimulation in orders as users load themselves up prior to the close of navigation. Orders, therefore, are beginning to show the end-of-the-season rush, and good consignments are now going out. All metals have been in request, but the biggest demand seems to have been in sheets and spelter.

First hands report an easing off, so far as orders for this year's delivery are concerned, but they are busy in carrying out old contracts. Warehouses are beginning to fill up a little, although the bulk of the store stuff will not be laid down until later. With the heavier winter freights, the close of navigation means much more to Montreal than it does to other sections of the country.

No change is reported in quotations. The fluctuations in tin in London have not affected quotations here, while copper is steady. Spelter is very firm. A good deal of interest is centred in the St. Louis market where the metal has passed the $6 mark.

Pig iron and steel stand out very firm, helped by the situation in the States. A lull is announced in the markets across the border and this is welcomed as it will help to steady conditions after the record rate of the past few months. The soundness of the markets lies in the fact that there is no accumulation of stock, either of pig iron or of steel.

PIG IRON—Busy scenes are being enacted at the port, delivery in pig iron being rushed through. There is not much time to waste now, and first hands have to look after their store requirements as well as getting off the contracts. With the improvement in Cleveland warrants, the tone of the market is firmer again. Canadian prices are firming up under the sympathetic influence of the United States market, and of full order sheets. Home operations are being developed as in the Drummond iron range in New Brunswick, where some three hundred men will eventually be employed. The deposits there are stated to be of great extent. Bathurst will be the permanent shipping port of the range by means of the extension of the railway. The company intend not only to ship to its several smelting plants, but to the European markets as well. The U. S. markets are reported a little quieter, and this is welcomed, as mills are sold up to the end of the year. The Old Country markets show improvement, with Cleveland warrants at 51 shillings and ninepence, an advance of threepence on last figures.

TIN—Despite fluctuations in the English market local quotations are unchanged, and we continue to quote 32½c for jobbing lots. Trade is very good, and inquiries, as is usual at this time, seem closer to the market. Some good business is expected before inland navigation closes. The English market has been uncertain. The heavy tin operations in the States, where there are a larger number of tin plates mills running than at any time in the past six years, except in the fall of 1906, are having a good effect, but on the other hand there is the bearish influence of rather heavy visible supplies. On the whole prospects look favorable for a stronger market.

COPPER—Copper is firmer at 14c than it has been for many weeks at the higher figures then obtaining. The decline seems to have stimulated trade, and this with the natural inclination to order more freely at this time of the year makes the situation look more favorable. Inquiries are good, and on the whole satisfactory trade is being done. There seems to be a diversity of opinion as to the position of copper in the primary markets, although it is extremely difficult for those with bullish views to color off the increase of stocks both in Europe and America. The English market has been showing better strength, but New York has weakened which is somewhat singular. As a rule the latter market is only to eager to follow any sympathetic help from the Old Country. This, therefore, does not look particularly healthy. Still the general fine condition of trade across the border is always something to be calculated on to improve matters. Some excitement has been caused by the reported finding of valuable deposits of copper at Lake Mesmakenda about 90 miles from Sudbury, Ont. This is hardly the time, however, to exploit copper.

SPELTER—Spelter continues to be a good seller at the firm price of $5.75. The galvanizing interests are taking large consignments which shows the good state of trade in the manufacturing way. The English market keeps unchanged, but St. Louis has gone ahead and passed the $6 mark. The galvanizing trade in the States are good buyers, while supplies are concentrated in very strong hands.

LEAD—Lead is unchanged at $3.60, with trail at $3.50. Trade shows improvement, but there is not much character to the market. The English market has been keeping stronger. There is, however, too much lead in sight to help conditions much.

SCRAP—The scrap market is a little more brisk, and some heavier buying has been noticed. There is no decided change in quotations. We quote: Heavy copper and wire, lb. 11c.; heavy red brass, 10c; light brass, 6½c; tea lead, 2½c; heavy lead, 2½c; scrap zinc, 3c; No. 1 wrought iron, $11; machinery cast scrap, $14; malleable, $12; miscellaneous steel, $6.

TORONTO.

October 22.—Iron and steel orders are still at the high-water mark, and the visible supply of these metals is somewhat small. The big demand at present for iron and steel and their manufactured products came rather suddenly and producers have been taken unawares, though furnaces were opened as conditions warranted. They have not been opened sufficiently fast, however, to keep up a fair surplus of stock, and buyers are purchasing in pretty large volume. The other metals are steady with the markets a little on the easy side. Sheets and plates and old iron and steel lines are active, recent sales showing some splendid business.

PIG IRON—So far as pig iron is concerned the year 1909 will exceed in volume of production and business done the predictions of even four months ago. At the present rate of production the year will end with a showing very little lower than the record 1907 year. With the increasing trade being done by the older houses, new manufacturers using pig iron are entering the field. While many of these larger novices propose opening up in sections outside Toronto district, and even outside the province, local metal houses expect to do some business indirectly, if not directly, with these concerns. Anyway the rumors alone have stimulated business by increasing the size of the orders. The anticipated advent of British ship-building concerns into Canada has greatly strengthened the industrial situation, and the enlargement of the Sydney plant with the entry of an U. S. and an English iron and steel making concerns at the Pacific Coast, has tended to broaden our horizon. The Canada Foundry Co. here has a half-million-dollar contract for the Dominion Steel Co.'s enlargement work, and the new National Iron Co., which recently secured a site at Ashbridge's Bay, has this week received a pipe contract from Toronto civic authorities. Both these companies are expected to buy largely of pig iron. Prices, while firmer are unchanged from last week. Midland is still at $22; Clarence, $21; Summerlee, $23; and Cleveland, $21.75. There is a rush just now by importing houses to get in large stocks before the close of navigation.

COPPER—This metal is steady and fairly active, with quotations unchanged, for lake and casting ingots 14c and 14½c being asked. Production is still going on at a tremendous rate, and a further increase, though a moderately gradual one, is expected as new mines swing into line and the older companies increase their capacity. Considering the comparison

between production and use, copper is holding its own very well indeed, and it is well that fluctuations are not great, as there is more stability given the industrial situation all over the continent.

LEAD—This metal is active and firm in price, at $3.65 for imported, and $3.55 for domestic.

SHEETS AND PLATES—Business in great volume is still being done. The market is firm at the ruling quotations.

TIN—Steady and unchanged is tin this week. The quotation remains at 32½c. There is no particular outstanding feature to the market.

SPELTER—There is a decidedly firmer aspect to spelter, both locally and on the outside markets. The situation here is strong with prices firm, due to the very active trading being done.

OLD MATERIALS — Old iron and steel are exceedingly brisk. Local traders are getting rid of these metals stocked outside for the past two years. Prices continue firm. Scrap zinc is higher by about 15c a hundred. The prices paid by dealers for stocks are: Heavy copper wire, 11¼c; copper bottoms, 10½c; heavy red brass, 10¼c; heavy yellow brass, 8¾c; light brass, 6½c; tea lead, 2½c; heavy lead, 3c; scrap zinc, 3¾c; No. 1 wrought iron, $11; machinery cast scrap, No. 1, $15 to $16; stove plate, $13; malleable and steel, $8; old rubbers, 9c.

HARDWARE MARKETS

MONTREAL.

October 22.—As we anticipated last week, nails have advanced. Wire ones instead of being quoted at $2.15, are now ranging from between $2.25 to $2.35, while cut nails are $2.40. Merchants who ordered heavily on the old price are well pleased with themselves. Plain wire and bright, annealed, and annealed and oiled have advanced 5c, and are now $2.35 base, while staples are up 5c, being, bright $2.60 and gal. $2.85. These changes were not unsuspected, and as the market is firming all the way round, merchants should look carefully after their requirements, if they wish to be on the right side of the fence.

With the approach of the close of general navigation the volume of business naturally increases. There is more anxiety on the part of dealers to get their goods quickly, and this has the effect of making the shipping departments of the jobbing houses very busy. Booking is not very much in evidence, but sorting up orders are heavier, and of a very diverse character.

The east is now buying well, and the whole country is showing a good consumtive demand.

Seasonable lines are moving strongly, but probably the greatest activity exists in cutlery, silver and plated ware, skates and hockey sticks, nails, bolts and nuts. Weather strips, snow shovels, and sleigh bells are moving well. Stoves and ranges have been stimulated by the more seasonable weather. Altogether there is a very bright tone all the way round.

BUILDERS' HARDWARE—The demand has improved again, and some very satisfactory orders have come in. They have been of a very assorted character, showing the lightness of stocks in dealers' hands. We continue to quote: Lock sets (inside) $4 per doz. and up, lock sets (outside) $13.20 and up, common rim locks $1.10 per doz., porcelain knobs $1.10 per dozen, sash cords, 30c.

FALL LINES—Seasonable lines are moving well, especially weather strip, snow shovels, sleigh bells, cow ties, and other stable and barn requisites. Good sorting up orders have been received in burners, lanterns and chimneys. Household utensils are continuing to be prominent, and carpet sweepers, wringers, washers, sad irons, bread makers, brooms and pails are in strong call. Tinware and granite ware are moving freely. In fact, this may be said of all lines.

CUTLERY, SILVER AND PLATED WARE—These lines are new amongst the most prominent sellers. Orders are much heavier, especially in cutlery, and the general trend all over the country is to extend the Christmas stock. The lines mostly called for seem to be carvers in cases, table cutlery, table spoons, berry spoons, pickle frames, and table kettles.

SPORTING GOODS—Skates and hockey sticks are very much in demand, and good consignments are being shipped. Guns and ammunition are not quite so prominent, but that is not altogether unexpected, after the recent heavy demand. Snowshoes, toboggans, and sleds are moving freely. In fact, all the winter sporting lines have felt the influence of the recent colder weather.

MINERS' SUPPLIES—There is not much character to the demand, but fair sorting orders are going out. Railroad supplies are somewhat quieter. We quote: Miners' picks, 16½ a pound; prospectors' hammers, 16½c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—The market is very firm under the strengthening of prices all the way round. No change, however, is announced, and we quote: Discounts on carriage bolts, ¾ and smaller, 70; machine bolts, ⅞ and smaller, 70; machine bolts, ⅞ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

NAILS—As we anticipated last week, wire nails have advanced and instead of being $2.15 are now quoted from between $2.25 to $2.35. Cut nails are also now $2.40. The demand is very heavy, and if the drain continues, and it will in all probability, there may be a stortage before long. Merchants should watch the situation carefully.

SCREWS—The market is very firm, but no change has been announced. The demand is good for all sizes. We quote: 85 and 10 off for flat and round head bright; 75 and 10 off for flat head brass, and 70 and 10 for round head brass.

LUMBERMEN'S SUPPLIES — The demand is now very good, and most satisfactory shipments are being made. Camp supplies are also in good request. We quote: Cant hooks, $12 a dozen and up; axes, $6.50 a dozen and up; axe handles, $1.15 and up; cross-cut saws (inferior) 25c per foot and up; better grades 43c per foot and up; axe wedges, 25c a doz. and up.

SHOVELS—There is not much character to the market. The demand is steady at unchanged prices. We quote: First and second grades of spades, 60 and 2½; 3rd and 4th, 50 and 2½; scoops, 1st and 2nd grades, 50 and 5; 3rd and 4th, 45 and 5.

STOVES AND RANGES—The colder weather has stimulated the sale of stoves and ranges, and supply houses are more satisfied with the trade doing. The market is very firm, and confident. Oil heaters and cookers are likewise showing improvement.

WIRE—Plain wire, bright, annealed, and annealed and oiled have advanced 5c, and are now $2.35 base. Staples have advanced 5c, and are now—bright, $2.60 and galvanized, $2.85. Other lines are unchanged, and we quote: Barb wire, car lots, mixed, $2.50; small lots, $2.55; plain twist, car lots, $2.80; small, $2.85. Galvanized wire, No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots, f.o.b., Montreal. Coiled spring fencing, $2.30; straight and mixed car lots, and $2.35 small lots. Plain wire, bright, annealed and annealed and oiled, $2.35 base. Staples, bright, $2.60; gal., $2.85.

IRON PIPE—The advance last week does not seem to have checked the demand very much, and good orders have been received during the week. The difficulty in obtaining delivery in some sizes is naturally more marked than ever. We quote: Discounts ¼-in. black, 63; galvanized, 48; ⅜ black, 59; galvanized, 44; ½ black, 69; galvanized, 59; ¾-in. to 4-in. black, 71½; galvanized, 61½.

TORONTO.

October 22.—The outstanding feature in the hardware situation this week is the advances which have taken place in various kinds of wire and nails. Roughly there is a $1 a ton increase on wire and staples and $2 a ton on nails, both wire and cut. All other commodities remain at last week's quotations.

The movement in hardware holds brisk, especially late fall goods and early winter lines. The western trade is taking up builders' hardware in good shape, some big orders having recently been placed. Toronto still keeps up a

brisk trade in this line. Structural steel also is enlarging its boundaries and orders come from scattered sections. Country trade is active and hardwaremen in the smaller centres report collections generally good.

SPORTING GOODS — Rifles are the most wantable articles in demand just now, a number of hardwaremen handling sporting goods stating that this season so far is better than last year. Loaded cartridges and shells are prominent sellers, too, as in fact are all hunting goods, particularly knives, belts, caps and coats. Camping outfits are going out more exclusively to parties of hunters. Football supplies are moving fairly well.

WIRE—With the recent advance in rods and other manufactured iron and steel lines, both in the U. S. and in Canada there has come about as a natural sequence an advance in the products of these lines. In general the advances on wire and staples amount to $1 a ton, and on the products of wire an advance of $2 a ton. Hay wire in coils is now at a $2.35 base, f.o.b., Toronto, instead of $2.30. Smooth steel wire has also gone up 5 cents to $2.35. Stove pipe wire has gone up 5 per cent., the discount now being 10 p.c. straight instead of 10 and 5. Staples have increased 5 cents per hundred pounds, bright staples are now $2.60, and galvanized are $2.85.

NAILS—Both wire and cut nails have advanced about $2 a ton. Following the lead of wire, wire nails went up 10 cents a keg on all sizes. The base price is now $2.40 for cut and $2.35 for wire nails. The cut nail advance is a sympathetic one, the higher price following a day after the increase of wire nail quotations.

SEASONABLE LINES—Late fall and early winter goods have the call. Shovels of all kinds are especially brisk now, from the snow shovel to the post-hole variety. Picks also are good sellers. Sleigh bells, scrapers, cow ties, lanters and barn goods generally are in splendid demand. Some cobbler's outfits have been sent to country points, as also have plenty of bucksaws, and some cant hooks, snowshoes, pumps, loading blocks, tongs, wedges, and registers for hot air furnaces. Stoves and heating and lighting lines with all their accessories are very active this month.

BUILDERS' HARDWARE—Western Canada is coming forward with some good orders for this line of hardware. The local situation has not at all lessened in demand. All kinds of locks in sets and singly, as well as hinges, fasteners, knobs, catches, etc., are freely bought up. Metal shingles, cornices, ceilings and walls are also in demand, as are the many kinds of ready roofing and building paper. Metal ventilators, etc., are selling well. In conjunction with this line of hardware builders' tools are active and firm. Saws, drills, screw drivers, reamers, planes and hammers are in fine demand.

CHRISTMAS GOODS — Sales are light as yet, though cutlery is fairly brisk. Inquiry is good and leads one to expect a splendid selling season shortly. Razors, both safeties and the old-fashioned kind are increasing in sales, and case and cabinet cutlery sets are shown in variety as are also ladies' companions. Scissors and pocket knives look well in the samples shown. Children's goods for winter in sleighs, skates, hockey sticks, iron toys and house toys are plentiful and should prove profitable lines to handle. Silverware and plated-ware, as well as brass goods in the shape of percolaters, kettles, candlesticks, etc., are beginning to be displayed in the city hardware stores.

HOUSEHOLD GOODS—Sad irons are beginning to induce buying. Meat and food choppers, stuffers and fruit presses are selling well as are, too, all enamelware, tinware and galvanized-ware lines, particularly for kitchen use. House-cleaning goods have gone out in fairly good proportions, though the recent rise in broom prices has held up orders somewhat, many hardwaremen preferring to wait and see if lower quotations will be offered later on.

HEAVY GOODS—Structural iron is being ordered in small lots from various sections of the country, showing a disposition of this line to oust wood. Pipe, rod, bar and rod iron are very active, more especially in some small sizes. Screws have not yet advanced and while manufacturers are holding their prices firm the local market during the past two days is not so strong, though with the advance in nails it may be that screws will soon follow.

U. S. IRON TRADE.

Cleveland, O., Oct. 21.—The Iron Trade Review says : Freight car buying by the railroads which had not been of prominence in the market for a number of weeks past, has been resumed vigorously, and more than 8,000 cars have been placed the past week. The prospects before car builders are reported as excellent, and some of the largest systems of the country are expected to make large additions to the purchases of cars recently closed. The need of an increased supply of rolling stock is daily becoming more apparent to railroad officials, and in some quarters, notably in the coke regions, the scarcity of suitable cars has already been felt in the impeded movement of freight. Buying into next year is now under way in rails, bars, shapes, plates, tin plate, sheets and wire products, but generally contracts are being accepted cautiously and with discrimination. Line pipe has again been advanced $2 a ton.

U. S. METAL MARKETS.

New York, Oct. 21.—"The Iron Age" says : New business going on the books of the large steel companies is very heavy and the problem of securing a sufficient supply of raw materials to take care of it is still present. Partly, no doubt, because the trade is growing used to the pace, there is less excitement than was apparent in September. Yet with some producers of pig iron, sales for the first half of October have been greater than for that portion of September, when fear of a runaway market was greatest.

Satisfaction is expressed that the talk of pig iron importations—and it is largely talk thus far—has acted as a check upon the advance. The buying of pig iron has kept up in the past week, and has included same liberal orders from foundries, chiefly for delivery in the first quarter and first half of 1910. Bessemer pig iron has advanced to $19, at Mahoning and Shenango Valley furnace, under buying for the first quarter of next year. The scarcity of billets is acute. Considerably higher prices are named for delivery next year.

In finished material the pressure upon the mills is increasing in some lines. As an indication of the remarkable demand upon bar mills is the fact that one important producer of twisted bars for concrete has shipped more of that product in 1909 than in both 1907 and 1908.

METAL NOTES.

The Quebec Scrap Metal Co., Quebec, have dissolved.

The Vancouver Engineering Works have installed a complete and up-to-date plant for the production of steel castings. The "surface blown Bessemer" process is used.

The Irondale Steel Co., of Ifondale, Wash., and the proposed steel plant at Vancouver will be merged into a new corporation to be known as the Western Steel Corporation, with an authorized capital of $20,000,000.

The Dominion Iron and Steel Co.'s plant at Sydney is overtaxed at present with orders, and they have been compelled to turn over some of their work to the Nova Scotia Steel Co.

The steel steamer Canadian brought down to Port Stanley last week from Port Arthur, 750 tons of pig iron for distribution among the different foundries in western Ontario. This is the first arrival of pig iron from the west received at Port Stanley.

The net gain in active furnaces in the U.S. in September was 18 and the weekly capacity of the 299 furnaces in operation October 1 was 564,885 tons, or at the rate of above 29,750,000 tons a year, counting charcoal iron at about 1,000 tons a day, a new record.

The output of iron for the year ended June 30 last at the Soo furnaces, as compared with the previous year, was as follows: Pig iron, 1907-8, 135,852 tons; 1908-9, 130,268; rails (Bessemer) 117,697, and 126,733; rails (open hearth) 25,321 and 31,732.

The world's production of nickel last year is estimated at 12,800 metric tons, as compared with 14,100 metric tons in the previous year. The maximum recorded production was 14,300 metric tons in 1906. Of the total rather more than half is produced in Europe and the remainder in America, principally from the Lake Superior section of Ontario.

ZINC MINING TO PAY BETTER.

William A. Clark, Jr., son of former Senator Clark, of Montana, announces that he has at last proved that zinc can be extracted from zinc ores in such quantities that the zinc industry will be revolutionized and foreign competition eliminated from the United States. Comparing the present price of copper, 12 cents, with that of zinc extracted by the new process, Mr. Clark said the value of zinc to the miner already amounts to 20 cents.

HARDWARE TRADE GOSSIP

Ontario.

Wm. Field, hardware merchant, College Street, Toronto, is in Calgary.

K. R. Cameron, hardware merchant, Dundas Street, Toronto, is in bed ill.

Robert Mulhall, Ottawa, sold thirteen ranges one day last week. He isn't superstitious and says he will do it again any day—Friday not excepted.

Boys playing with matches caused a $1,500 fire in the yards of the Gartshore-Thompson Foundry Co., Hamilton, last week, where 200 tons of hay was stored.

W. L. Cummer, managing director of the Dowswell Manufacturing Company, Hamilton, was a caller at the Toronto office of Hardware and Metal on Tuesday.

The National Mfg. Co., Orillia, which manufactures and sells through its agencies steel ranges, stoves, cream separators, etc., have bought new show rooms at Stratford.

Donald McGregor Campbell, manager of Tweeddale & Co.'s hardware store, Fredericton, N.B., was married at St. Mary's, Ont., early last week to Miss Z. J. Burtt, of that place.

The nickling department of the Guelph Stove Co., has had to work over time of late in order to catch up with their orders, many of which come from the eastern and lower provinces.

W. McBrien, of the McBrien Manufacturing Company, Toronto, is in Cleveland this week purchasing some nail making machinery for their new plant. He expects to visit Pittsburg and New York before returning home.

The shareholders of the Tobin Arms Mfg. Co., Woodstock, have elected H. A. Little, president; Frank M. Tobin, vice-president and general manager; L. W. Sovereign, secretary-treasurer, and E. W. Nesbitt, A. J. McIntosh and W. J. Taylor, directors.

G. F. Steele and Reg. F. Scott, of Forest, have taken possession this week, of the hardware stock of Jackson & Yorke, Parkhill, and are adding a complete stock of shelf hardware to the stock on hand. Both these young men have had several years' experience in the hardware business.

Quebec.

Gordon Seybold, of Starke-Seybold, Montreal, is in New York.

The assets of J. C. Paquette, hardwareman, Sherbrooke, have been sold.

The assets of Provost & Baigne, hardware merchants, Montreal, have been sold.

Allen Dods, of P. D. Dods & Co., Montreal, is on a holiday at Saranac Lake.

Alex. Gibb, manufacturers' agent, Montreal, has gone to New York on a visit.

H. K. S. Hemming, of the Hemming Mfg. Co., Montreal, is on a trip to New York.

Archie Macfarlane, manufacturers' agent, Montreal, has returned from a business trip to the Pacific Coast.

A. M. Thompson, of B. & S. H. Thompson, Birmingham, was introduced on Montreal 'change by F. Wilkinson.

The sheet lead mills of the James Robertson Company, Montreal, are again in operation after the recent fire.

M. J. McLaughlin of the United States Steel Products Export Co., Montreal, is on a trip to Detroit and other western points.

A. E. Hanna, of the Dominion Wire Manufacturing Co., Montreal, has been admitted to membership on the Montreal Board of Trade.

C. C. Ballantyne, managing director of the Sherwin-Williams Co., Montreal, has resigned as a director of both the Canadian Rubber Co. and the Canadian Consolidated Rubber Co.

C. C. Ballantyne, managing director of the Sherwin-Williams Co., Montreal, and a member of the Board of Harbor Commissioners, has resigned as a director of both the Canadian Rubber Co., and the Canadian Consolidated Rubber Co.

W. S. Howe, formerly advertising manager and in charge of the small tool department of the Canadian-Fairbanks Co., Montreal, has become associated with the S. A. Woods Machine Co., Planer specialists, Boston. Mr. Howe was formerly with the S. A. Woods Machine Co. for about ten years.

Art. Ross, of Peel Street, Montreal, who secured the puck in the hockey game last winter, between the Wanderers and Ottawa, which decided the possession of the Stanley cup, has had it handsomely mounted with a silver shield commemorating the occasion and has presented it to the Ottawa club the winners of the game.

Western Canada.

Arthur Hayr, of Hayr Bros., hardware merchants, Lethbridge, was married to Miss S. C. Davis on Tuesday of last week.

An unexpected explosion of gas in the basement of J. T. Brock & Co.'s hardware and tinshop, at Lumsden, Sask., one day last week resulted in almost destroying the building from the outburst of flames immediately following. The windows were blown out by the force of the explosion. The damage amounted to about $2,000, fully insured.

HARDWARE PATENTS.

The following is a list of Canadian patents issued by the Patent Office on Oct. 1, 1909, relating to hardware and metal, and furnished by Fetherstonhaugh & Co., 5 Elgin St., Ottawa:

120747. W. V. Ellis, Huntingdon, Pa., rests and lifting levers.

120753. A. W. Paterson, San Francisco, wrenches.

120 825. G. J. Dallison, Ottawa, Ont., cranking handles.

120896. D. F. McDonnell, Mineral, Wash., nut locks.

120899. P. Nelson, Fortuna, Cal., combined bread cabinets and cutting knives.

120902. W. E. Parkinson, Crown Point, Ind., boiler flue fasteners.

120906. G. L. Rice, Wright, Iowa, brackets.

120916. C. Smart, Hendrum, Minn., gang plows.

120946 F. Hatchman, St. Paul, Minn. wrenches.

120949. J. Boulieu, Sault St. Marie, Mich., wrenches.

120961. H. L. Staley, Martinsville, Ind., Oscillatory Rotary Gearing.

120964. J. F. S. McWhorter, Riverton, N.J., cotter keys.

121022. C. H. Covey, Marietta, Ohio, nut locks.

121038. J. H. Ham, Brantford, hinges.

HARDWARE LETTER BOX

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Acetyline Brass Fixtures. — W. H. Turnbull & Son, Scotland, Ont., ask where they can buy brass fixtures for acetyline gas work.

These goods may be had from the James Morrison Brass Mfg Co., 93 Adelaide Street West, Toronto, and the Rochester Lamp Co., 105 Church Street, Toronto.—Editor.

HUNTING SCENE IN WINDOW.

An effective hunting scene shown in a Pacific Coast hardware store last fall was made up with a rail fence and the figure of a man in hunter's costume as the central features. Inside the fence was a tree with the familiar sign, "No Hunting Allowed," and a small pool of water surrounded by thick underbrush, amongst which could be seen pheasants and other wood fowl. The hunter carried a rifle in his hand and was in the act of crawling through an opening in the fence. A strip 18 inches wide and the full length of the window was left along the front for the display of hunting-knives, revolvers, shells, duck calls, etc., while rifles and shot-guns were shown on a rack at the right end of the display. The birds were borrowed from a taxidermist.

FOR BUSY MEN.

One of the shortest and simplest methods known for calculating interest is to multiply the principal by the number of days and divide as follows:—

For 4 per cent., divide by 90.
For 5 per cent., divide by 72.
For 6 per cent., divide by 60.
For 7 per cent., divide by 52.
For 8 per cent., divide by 45.
Then point off four decimal places.

For instance, to find interest on $360 for 92 days at 8 per cent., multiply $360 by 92, and divide by 45, and point off four decimal places. The result is $7.36.

The average user of a .22 rifle will run a dry rag through his rifle and maybe apply a few drops of oil and think it is clean. A rifle barrel should first be wiped with a wet rag, then with three dry ones. A coat of oil should then be applied and later vaseline.

Trade Gossip from Canada's Eastern Provinces

Industrial Development at Sydney—St. John Hoping to Secure Shipbuilding Plant and Sugar Refinery—Presentation to Montreal Manufacturer.

ST. JOHN.

October 21.—The board of trade, city council and business men generally have for several days been discussing the reports that St. John has been selected as a site for a big shipbuilding plant and dry dock, and on every hand expressions of satisfaction are heard over the probability of such an enterprise being started here. Probable sites at Courtney Bay and on the west side are being talked of and the board of trade has appointed a committee, consisting of the President, Vice-President and W. H. Thorne, of W. H. Thorne & Co., to act with the city council in presenting St. John's advantages before any representatives of shipbuilding firms who might come here to look over the ground.

F. C. Durant, of New York, who some time ago made a proposition to the city for the establishment of a sugar refinery here, is again in the city. He is accompanied by M. H. Day, of Montreal, and is endeavoring to get concessions for the industry. Mr. Durant has been looking over sites at St. Andrews and has been offered attractive inducements to locate his plant there. The matter is not yet decided.

F. S. Walker, plumber, Germain St., purchased at auction last week the ferry steamer Quangandy, which was sold by the city.

W. E. H.

HALIFAX.

October 18.—The year 1910 promises to be a period of marked industrial development in Sydney. A company subsidiary to the Sydney Cement Company has been formed and has already commenced construction upon a plant for the manufacture of brick from blast furnace slag cement, and this industry will be a producer by the first of the year, or possibly at an earlier date.

The Dominion Tar and Chemical Co. are increasing their plant to the extent of about seventy-five per cent. or nearly double their present capacity, with a view to taking care of the crude by-products, the result of the expansion at the Steel plant.

The Dominion Iron and Steel Company have just closed a contract with the Canada Foundry Company, of Toronto, for the construction of an additional blast furnace (complete) an extension to the Bessemer plant, and two five hundred ton open hearth furnaces, (complete) of a new type, and for the carrying out of a new process in the making of open hearth steel. This contract involves the expenditure of over half a million dollars. Hitherto all the company's furnaces have been constructed by a Pittsburg firm. Besides this contract the Steel Company will immediately proceed with the construction of an additional rod mill, two merchant mills, and a fourth mill (not named) for the production of finished material. The construction of an additional 125 by-product coke ovens is now well under way. The company have also upon the ground, in bond, a plate mill, which they are prepared to place in operation at once and which will provide the material for steel shipbuilding.

Several other industrial ventures are on the tapis and, taking everything into consideration, the coming year promises an era of development in Cape Breton that will eclipse all previous records in the eastern part of the province.

The National Rolling Mills Company, a million dollar proposition, is also assuming shape, and active operations may be started about the first of the year.

The Steel Company have also decided to operate their pumping station at the Sydney River dam by electric power transmitted from their own plant.

J. H.

MONTREAL.

October 20.—It is not often that the head of a firm is remembered on his birthday by his staff, and yet this was the somewhat unique experience of Arno A. Bittues, managing director of the Gillette Safety Razor Co., of Canada, Montreal. On Saturday last Mr. Bittues was waited upon by a deputation and presented with a handsome kit bag, and told in a few words by Superintendent Peterson that the staff wished to remember his birthday. The recipient was taken by surprise, but that he was very delighted by this signal proof of the harmony existing between the management and the staff, could be understood from his little speech of thanks. Since the opening of the factory Mr. Bittues has been very happy in his relations with the staff, and the entire force have worked together with remarkable success.

F. Orr Lewis, president of Lewis Bros., Montreal, has returned from a lengthy stay in the Old Country. Mr. Lewis states that Canada's credit stands higher than ever over there, the reason being that a greater knowledge of this country and its resources had been gained. British financiers, or their agents, had been visiting Canada in great numbers. They had studied her problems, and had recognized that within the next few years Canada would have to spend immense sums for the development of her resources, and the perfecting of her waterways. They know that the country has great possibilities and vast resources. They have the money, and are glad to invest it.

ARNO A. BITTUES, MONTREAL,

Managing Director Gillette Safety Razor Company, of Canada.

SOME OF THE MONTREAL ROLLING MILLS STAFF.

G. D. Clewes, A. J. Wood, J. C. Jones, Ross McMaster (Assistant General Manager), H. T. Diplock, A. H. Hough, and Wm. Moseley.

Interesting Trade Items Gathered in Ontario

Brantford Merchants Stop Exhibiting at Local Fairs—Chatham Merchants Subject to a New Form of Graft—Moose Exhibited by Toronto Hardware Store—Hardware Store at Owen Sound Changes Hands.

KINGSTON.

October 20.—At a joint meeting of the city council and the board of trade, it was decided to inaugurate a more aggressive policy towards the securing of new industries for the city.

Alderman "Harry" Angrove, of Angrove Bros., sporting goods, has been asked by his friends to become a candidate for the mayor's chair for 1910. Ald. Angrove has been a member of the council for six years, and has been a good representative.

The Crescent Wire and Iron Works has turned out a special line of office baskets, which should bring forth a ready sale. The company is making special mention of them in the local papers, a fine cut of the baskets being shown with the advertisement. This firm is turning out a fine line of wire goods of all kinds. E. G. B.

TORONTO.

October 21.—A. E. Kemp, of the Kemp Mfg. Co., and Peleg Howland, of H. S. Howland, Sons & Co., have been appointed by the Toronto Board of Trade delegates to Ottawa in regard to deepening the Welland Canal.

The officers and shareholders at Aikenhead Hardware, Ltd., on Friday evening last waited upon their president, Thomas Edward Aikenhead, and his wife at their home in Markham Street, the occasion being their silver wedding, and presented them with a handsome silver tea service. The address and presentation were made by S. T. Sheppard, the secretary of the company. Mr. and Mrs. Aikenhead were taken completely by surprise. Mr. Aikenhead expressed in fitting terms his appreciation of the gift. A pltasant evening was enjoyed by those present.

A mammoth moose weighing 1,200 pounds is being exhibited this week in the doorway of Rice Lewis & Sons' store, on King Street, and is proving a great drawing-card to the display of hunting goods in the east window, and incidentally a big advertisement for the Winchester rifle. The moose was brought down with a single shot by C. Price Green of the C.N.O.Ry., and is one of the largest specimens ever brought to Toronto. The display is one of the best business attractions in the down town section of Toronto in recent years. There are spectators before the display all day long. J. O. H.

BRANTFORD.

October 19.—A gasolene plowing engine, just manufactured by the Goold, Shapley & Muir Co., was tested on Friday, and proved to be very satisfactory. The firm will push this line, with a view to large trade in the west.

Howie & Feely are conducting a sale of graniteware again this week. They state that their previous sales were very successful.

The plans for the new Y.M.C.A. building have been revised, and the general secretary states that the proposed new building will cost about $100,000. The plumbing contract will be a large one, and local plumbers will make a bid for the trade.

Local hardwaremen read with much interest the opinions of Guelph hardware dealers re the displays at fall fairs. This year saw no local stove or hardware dealers exhibit at any of the fall fairs in this district. "It is a waste of money to do so, for it does not reach the consumer individually, the children generally getting loaded up with booklets and other advertising matter, which, on reaching home, are usually consigned to the woodbox to light the fire with. Besides, the labor and time of the employes are usually to much taken up at this time of the year, instaling furnaces and ranges, so that it is not only non-productive of results, but is actually a drag," said one local dealer. "We prefer to reach out after the individual, and by a heart-to-heart talk succeed where a booklet would be seed sowed on rocks."

A. W.

OWEN SOUND.

October 19.—The hardware and plumbing business of McCorkindale & Hall, East Second Ave., Owen Sound, has been purchased by R. Morran & Son, of this town. They are stocking up with a full supply of shelf and heavy hardware, the opening order for shelf and heavy hardware being placed with D. H. Howden & Co., London. R. Morran & Son are going in strongly for plumbing, heating and gasfitting, as soon as necessary alterations are completed. Earl Morran was clerk with R. P. Butchart & Bro., before going into the new business.

Figures have been submitted to the town council for the construction of the proposed dry dock at this port. The estimate was prepared by R. McDonald, C.E., who places the cost approximately at $225,000. The plans and estimates will be forwarded to the department at Ottawa, with a view of having the undertaking given the statutory subsidy by the Dominion Government. W. P. Telford, ex-M.P., has been working persistently on this proposition. The Polson Company, of Toronto, who formerly operated the steel shipbuilding plant at this port, have offered to enter into a working arrangement in connection with the dock, and the Town of Owen Sound will, no doubt, vote substantial financial support for the scheme. G. T. C.

WINDSOR.

October 19.—In the fall of 1906 the Lufkin Rule Company, Saginaw, Mich., with branches in New York and London, England, on account of their increasing Canadian trade, purchased the brick factory building formerly occupied by the Peninsular Tool Company on Caron Avenue in this city, with about 400 ft. of ground fronting on the same avenue, and proceeded to manufacture all kinds of measuring tapes and measuring rules in this building.

The venture was a success and on May 15, 1908, a Canadian company was organized to carry on this business. The company is known as the Lufkin Rule Company of Canada, and on the above date secured a charter under the Ontario corporative act. The business from its inception grew to a remarkable extent, and early this year the new company began the construction of an additional factory building fronting on Caron Avenue one hundred and sixty feet in length and containing basement and two floors, with electric elevators, and equipped with all modern conveniences. The building is now nearing completion and new machinery is being installed. This new building, in addition to the old one, gives the company ample facilities for taking care of their growing business. The officers of the company are: Fred Buck, president; Theo. Huss, secretary and treasurer; Edwin Russell, superintendent; J. A. Hossack, sales manager.

Mr. Russell is an Englishman by birth and first resided in Ontario before becoming connected with the Saginaw concern. In addition to his administrative ability he displayed a rare mechanical knowledge that well fitted him for his appointment to take charge of the Windsor factory. He has taken up his

New Plant of Lufkin Rule Co., Now Nearing Completion at Windsor.

permanent residence here and is a welcome addition to our rapidly-increasing population.

Mr. Hossack was formerly Canadian representative of a large manufacturing concern in Birmingham, England, before taking charge of the sales department. His residence is in Toronto, although he very frequently visits the factory at Windsor.

The new portion of the factory is 160 by 41, while the "L," or original premises, is 100 by 30 feet. There is also a power plant, 40 by 50, equipped with boiler, engine and electric generators.

In the basement of the new building the etching, nickel-plating and polishing work will be done. The main floor will be devoted to leather work, assembling of parts and shipping. The second floor will be taken up with the manufacture of woven tapes.

In the old building machine and metal work will be done, as well as the manufacture of hickory board and log rules and steel tapes. The main office will be in the front corner on the ground floor.

This firm turns out three different kinds of rules—steel, brass and wood—and manufactures cotton, linen, metallic steel and bronze tapes.

The contractors on the new building were: Brickwork, Thompson Bros.; carpentering, George Haugh; plumbing, J. E. Purser & Son; roofing and tinning, P. Dresch.

When the new building is completed in about a month's time fifty men will be employed. W. W.

CHATHAM.

Oct. 19.—Chatham merchants of late have been experiencing a new scheme in the way of levying tribute upon the mercantile fraternity.

This fall a couple of schools in this vicinity are holding corn fairs under the auspices of the Ontario Corn Growers' Association. Straightway the people in control canvassed the merchants of the Maple City for prizes to be offered at these fairs.

President A. D. Westman, of the local Merchants' Association, was among those approached, and flatly declined to contribute anything, though it is understood that in one case the promoters went so far as to threaten him with the loss of a substantial plumbing job. A few merchants contributed, but they seem to have been all outside the regular association membership.

President Westman brought the matter before the merchants at their meeting last week when he was warmly congratulated upon his stand and the merchants unanimously declared that contributions of this nature came under the ban of the association, the members of which some time ago decided that they would not contribute prizes of any sort. W. E. P.

News From the Prairie and British Columbia

American Concern May Locate at Vancouver — English Firm May Establish Iron Works on Vancouver Island—Good Condition of Trade Reported at Calgary — Winnipeg Merchants Turn Business Away.

CALGARY.

October 18.—It is the unanimous opinion of the hardware merchants of this city that business in their line for the past season has been exceptionally good, and reports would indicate that the outlook for the future is very promising. Jobbers are uniformly busy, and they have the satisfaction of knowing that the volume up to now is much better than for the same period of any of the past years. The ideal weather that has been experienced throughout the province this year has certainly aided trade.

The building outlook is extremely promising. Every contractor in the city is busy with new work, and hardly able to handle repair work, so that several who curtailed contracting are getting this class of work. The activity in building continues, and many fine dwellings are being erected throughout the city. Among the business blocks that are being built is a fine one for W. R. Hull. The building will be modern throughout, of six storeys in height, and will be mostly used for offices. Building permits have been issued for September to the amount of $280,000.

Work has been very brisk during the summer in the erection of different elevators. The principal companies here are the Alberta Pacific, the National Elevator, the Cumming Elevator, the West Coast Grain, and the Globe Elevator Co., whose head office is at Chicago, so Calgary is becoming as famous for elevators as Fort William.

The total sales of Bow Valley irrigated lands up to the end of September this year show five acres sold for every acre disposed of during the same period last year.

A. M. Marshall, president of the Marshall-Wells Hardware Company, Duluth, and Mr. Annis, vice-president of the same company, and manager of the different Canadian branches, and Mr. Marshall, Jr., who is also connected with the firm, who are on a trip through the western provinces, were visitors here this week. The party were greatly impressed with the industrial and commercial enterprise of this city.

Prospects for this city in particular never looked brighter, and nothing can stop the forward movement and the splendid impetus that has been obtained in all lines of business—particularly hardware. A. R. A.

VANCOUVER.

October 16.—The Jordan-Wells Railway Supply Company, American manufacturers of innumerable patent devices made necessary by improved methods of transportation, are credited with seeking a location in New Westminster. It is understood a deal for a site is pending with a firm of Vancouver realty dealers.

Permits were issued during the past week to the value of $160,500, the largest being for a $30,000 apartment house for J. V. and George E. Lightheart. R. B. B.

VICTORIA.

October 14.—Donald M. McGregor, representative of the Middlesbrough Steel Strip Co., Middlesbrough, England, is in the city. Mr. McGregor has been making investigations into the iron and coal properties of the island, with a view to the establishment of a branch steel works on Vancouver Island. No definite place has been decided upon to erect the works, though the company has purchased some property near Victoria.

The contract for the completion of the Alberni branch of the E. & N. Ry. has been secured by the Calgary firm of Janse, McDonell & Timothy.

The contract for building the new Convent school at Ladysmith has been awarded to John Avery of Victoria. Concrete blocks are to be used in the construction of the new building, which will be three storeys in height, 82 feet long by 47 feet wide.

The city council are to purchase a hose tower to cost $600, together with other needed fire fighting apparatus.

The Oak Bay municipal council are calling for tenders for the laying of water mains. W. B. C.

WINNIPEG.

October 19.—It is very evident that the matter of advertising is not given much concern among retail hardware dealers of this city. There is a tendency for all merchants to be reticent in this regard, but in these days we are seeing a revival among retailers in the matter of publicity. Just why the hardware merchant should be more slow to enter the advertising arena than some other merchants is not easily explained. The grocer has the goods that appeal to the appetite. The furrier can appeal to the man or woman who shivers in the cold. The clothier can attract the well-dressed man through the ad. columns of the press. These are all advertising and profiting by it, why are not more of the hardware merchants? Have they not got the goods? Must they take a secondary place among retailers, because they cannot develop trade by means of publicity? This is surely not true. Every retail hardware merchant has goods which appeal to all kinds of people. The department stores advertise extensively and the hardware lines are constantly kept before the public. This fact is known, yet retailers will stand idly by and watch their own custom diminishing, and make no attempt at publicity. They actually see those who advertise take away their business, and they don't know why. Merchants must advertise. It is a part of the trades life in this age. Why should not every merchant, who has

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises should not fail to use the Want Ad. Advertisement page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere who is looking for just such a proposition as you have to offer.

TAYLOR-FORBES COMPANY LIMITED, Head Office, Works and Foundries, Guelph. Largest manufacturers of hardware in Canada. (tf)

THOUSANDS OF DOLLARS go astray in the mails every year. You should therefore insure against a possible loss by sending your remittances by Dominion Express Company Money Orders and Foreign Drafts. If delayed, lost or stolen, a refund will be promptly arranged or a new Money Order issued without further charge. The Dominion Express Company also transfers money by telegraph and cable, and buys and sells Foreign Money. If you want to send money to any part of the world the Dominion Express Company will be pleased to accommodate you. Hundreds of agencies throughout Canada. (tf)

WANTED—A splendid opportunity for dealers to handle the best combination Duplicating, Addressing and Office Printing Machine on the market. Exclusive territory. Send name and address, giving occupation and references, to the Canadian Writerpress Co., Ltd., 33 John Street S., Hamilton, Ontario. (tf)

MISCELLANEOUS

COUNTER CHECK BOOKS—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using—we'll send you prices that will interest you. Our holder with patent carbon attachment will interest you—there's nothing like it on the market. That's why we sell so many. All kind of supplies for Binders and Monthly Account Systems. Business Systems Limited, Manufacturing Stationers, Toronto.

CASH AND PACKAGE CARRIERS.—20 years' experience inventing and building modern store service appliances. Our guarantee.—We will instal a system of our Carriers in your store; you use them ten days, and if you do not find that they give you better and quicker service than any other wire carriers, pneumatic tubes, cable carriers or cash registers, we will remove them at our expense. Write for catalog and testimonials from reliable houses using our carriers. The Gipe Carrier Co., 99 Ontario Street, Toronto, Canada. (tf)

INSTAL an Otis-Fensom Hand-Power Elevator. Costs only $70. Merchants and other business men can turn a second-story lumber room into a properly equipped warehouse, leaving ground-floor unhampered by reserve stock, packing cases, etc. When power is available, we suggest a belt driven elevator operated by motor or line shaft. Write for catalogue containing illustrations of the different kinds of elevators we handle. Otis-Fensom Co., 1401, Traders' Bank Building, Toronto. (tf)

IF YOU ARE A GOOD SALESMAN and can furnish satisfactory references we can place an attractive proposition before you whereby you can buil'd up a permanent income. Give full particulars of experience and how you are now employed. Enclose references. Box 319, HARDWARE AND METAL, Toronto

SILENT SALESMEN as represented by your show cases and fittings work all the time, show all the goods, and make sales unaided. Efficient display half sells any article, and our illustrated catalogue has points of interest in this direction for every merchant Write for it to-day. Dominion Office and Store Fittings Co., Ltd., Dept. E, London, Ont. (tf)

SIR GILBERT PARKER is to the fore again with his latest book entitled "Northern Lights." It pictures the life of that portion of our country upon which all eyes are now turned. The stories portray conditions in the Great West before and after the effects of modern civilization and treat the subject with a master-hand. For sale at all bookstores. Cloth bound, illustrated, $1.50. The Copp, Clark Co., Limited, Publishers, Toronto. (tf)

THE "Kalamazoo" Loose Leaf Binder is the only binder with a flexible back. There are no exposed metal parts to injure the desk. It is a book, not a box; and will hold firmly ten sheets or a thousand sheets—just as many as you actually require and no more. The book is stronger than any other, the alignment perfect, the sheets lie close to the desk, and the writing surface is flat. Booklet on request. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

THE NATIONAL CASH REGISTER COMPANY guarantee to sell a better Register for less money than any other house on earth. We can prove it. Make us. The National Cash Register Co., 285 Yonge St., Toronto.

WHEN buying bookcases insist on having the best in the market—"Macey Sectional Bookcases." Carried in stock by all up-to-date furniture dealers. Illustrated booklet sent free on request. Canada Furniture Manufacturers, Ltd. General offices, Woodstock, Ont. (tf)

YOUR CHEQUE CAN'T BE RAISED to any amount above that which you intend to cover if you use the PROTECTOGRAPH. This device stamps a line such as "Not over ten dollars, $10," with acid proof, indelible ink which penetrates right through the fibre of the paper. This device is being used by 90% of the Banks of Canada and the United States, as well as the treasuries of both countries. Write for full particulars and price. W. E. Parker & Co., Sole Canadian Agents, 37 Yonge Arcade, Toronto, Ontario.

SITUATIONS VACANT

WANTED—Hardware salesman for retail store; must be good stock keeper. Write, stating age and experience and salary expected. None but first-class stock keeper need apply. Apply Box 904, HARDWARE AND METAL, Toronto. (44)

stoves, brushes and cutlery to sell, tell the public about them?

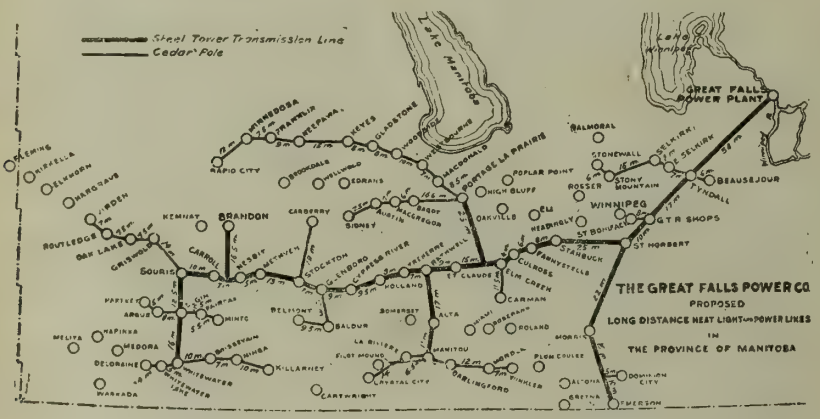
Owing to the increasing popularity of fire-place mantles, retailers everywhere should endeavor to carry these lines. The movement is very heavy in mantels for gas, electric and coal grates, and more retailers could handle them. The writer happened to be in a retail hardware store a few days ago, when a young married couple entered, and asked to see some oak mantles and fixtures. They were politely told that, "we do not handle them, sorry."

H. E. Sharpe, since 1881 manager of the Imperial Oil Co. in the west, died at his home here on October 17. Mr. Sharpe was born in Middlesex County, Ontario, in 1841.

J. E. Thomas, late manager of the System Store of this city, has opened up a manufacturers' agency on Bannatyne Avenue. The lines which he is handling chiefly are furnaces, which he equips and instals. The demand for heating is so great at present that hot air furnace work is occupying his entire attention. Toward spring Mr. Thomas may be controling several important agencies.

Bert Lennox, of the Lennox Hardware Co., has been compelled to give all his time of late to the plumbing and heating end of the business.

James Lawrence, manager of the Ashdown retail store, left the city for Chicago, a few days ago, on a pleasure trip. He will return next week. During his absence, W. J. Elsie is in charge of the store.



L. C. H.

MANITOBA POWER LINE.

The extent of the exploitation of electrical power throughout Manitoba by the Great Falls Power Co., and the cities and towns that are included in the scheme, can be understood by the accompanying map.

The extent of the available power at Great Falls, on the Winnipeg river, is conservatively computed at 250,000 horsepower, and negotiations are now pending with every municipality on the route for the service.

Upon completion of these negotiations the Great Falls Power Co. announce that work will be begun so that the transmission of electrical power will be an accomplished fact in 1911, two years from the present summer.

Proposed Long Distance Heat, Light and Power Lines in Manitoba.

CAMP STOVES IN WEST.

A heater which is peculiar to the west is the cylinder-shaped wood stove. It is surprising the great number of these that are in demand at the various winter quarters of lumber camps, construction camp stations, etc. It is admirably adapted to campers and lumbermen's needs. The shelves on the sides may be changed for cooking purposes or for warming the feet. Many retailers are handling them and everywhere they are moving well.

WARREN CO.'S NEW FACTORY.

So great has been the demand of late for the Hubbard patent portable steel bakers' ovens that the makers of them, the Warren Mfg. Co., for the past twenty years located at 90 York Street, Toronto, have been compelled to erect newer and larger premises to take care of the increasing orders. The new factory is located at 782 King Street west, and it is essentially a modern plant in every respect, being fully equipped with the latest electrical appliances, one of them a machine for driving rivets, which is interesting to watch at work. The heavy machinery is installed in the basement; the office occupies the front part of the first floor, with workshop behind, and the showrooms take up the second floor.

The Hubbard oven has features distinctively its own. It has a brick sole. The warm air flues receive the heat indirectly from the stoves, thus causing an even heat distribution throughout. The flues are of heavy steel, and the fire-pot is a sectional cast-iron one. At present this oven is enjoying an immense popularity in the west. The fuel used to heat these ovens may be either coal, wood or gas, and they have the advantage of being built on sanitary principles. Hot-water boiler connecconnections may also be had. As well as Hubbard ovens the Warren company carry a complete stock of bakers' supplies and cake and bread tins.

PROTECTION AGAINST LIGHTNING

Sheet metal as a protection against lightning is said to have proved itself in Kansas. While many buildings in that State are destroyed by lightning, it is said that few of the tall sheet metal covered grain elevators are burned. An explanation of this is thought to lie in the fact that the sheet metal and the nails and bolts with which it is fastened provide a good conducting substance through which the lightning finds quick release. In the average grain elevator besides the metal covering there are innumerable metal points, chiefly galvanized nails, which tend to dissipate the electric energy. The question of lightning protection has undergone a gradual transition from the time when one or two upward pointing conductors were thought sufficient to a period when such devices were regarded of no avail whatever until finally experts advocated a regular cage-like protection, hidden or exposed over the roof and sides of the building.

A MODERN HAMLET'S SOLILOQUY.

To send, or not to send—that is the question:—
Whether 'tis better to keep the goods,
And so make sure of what is in possession,
Or to let them go, and run the risk of payment?
To send—to part with—perchance to lose!
Ay, there's the rub.
For once the goods are gone
What skill can charm them back,
Or get the cash from slippery debtors?
What will be done when th' account falls due?
Will cash be paid; or e'en post-dated cheque?
Or promise to remit be quickly made
To be as soon forgotten?
And then reminders much like Thunar's blows,
Softly at first; though each with added force.
Yet no response—silent as a shadow—
Ne'er a stiver, nor soothing plea for "time."
Will then "A Meeting" end suspense? —and hope!
If packed, forsooth, with doting relatives,
Bent on proving claims for borrowed money;
Yet solaced by a shilling in the pound!
And theat lean pittance fast in lawyer's grip;—
Leaving us nought but sad experience.
Yet sell we must,
And selling, trust,
That some, some day,
May something pay.

—J. C. Burleigh.

The contract for the Old Folks' Home, to be erected at Middle Church (Winnipeg) has been awarded to S. Brynjolfsson & Co., at a figure in the neighborhood of $25,000.

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook — Hardware Quotations Corrected by Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Oct. 22.—Wholesalers report orders more of a sorting character this week than usual. Few retailers anywhere are stocking just now except it may be in Christmas lines. Cutlery and fancy table goods are moving just now very lively. The movement in stoves has all along been heavy, and they are still going out and will continue to do so for many weeks, in large quantities. Lanterns and weather strip are prominently in demand, while in household goods such as scrubbing brushes and carpet sweepers the output is heavy. Skates and hockey sticks are going out freely to every part of the west just now, and wholesalers everywhere are rushed in these departments. The market on bolts and screws is stronger while manufacturers have made an advance on iron and galvanized pipe. It is reported that wholesalers will make an advance of 3 to 5 per cent. on the following quotations on pipe. We quote an advance of 5 cents on annealed and bright iron wire. Wire nails are also very firm and they may advance. Turpentine has been firm for some time and we quote it at 90 cents to-day.

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.85 base; oiled, 10c extra; bright iron, $3.15 base; brass spring wire, 29c base, plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12 $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

HORSESHOES — "M R M" and "Bell" iron. No. 0 to 1, $4.50; No. 2 and larger, $4.25; snowshoes, No. 0 to No. 1, $4.75; No. 2 and larger, $4.50; steel, No. 0 to 1, $4.85; No. 2 and larger, $4.60; featherweight, $6.

HORSE NAILS—"MRM" cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75 10, 11 and 12, $2.65 in 25-lb. boxes.

A Sherwin-Williams Agency is the Biggest Business Asset You Can Have.

A Sherwin-Williams Agency does more than put a line of high quality paints and varnishes on your shelves—though that is important. It gives you the close co-operation of the largest paint and varnish makers in the world in building up business; the best and most extensive paint and varnish advertising in the Dominion; the prestige of the Sherwin-Williams quality, and the splendid profits all of these working together bring.

A Sherwin-Williams Agency, in short, is the biggest business asset you can have, because it means representing the best in paints and varnishes and helping your other lines through the reputation S-W. carries with it.

We would be pleased to present our proposition in full. Write us.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

A project is on foot to establish a broom factory at Nelson, B.C.

The new Thunder Bay elevator at Port Arthur is in readiness to receive grain.

The C. P. R. may erect another grain elevator on the harbor front at Montreal.

St. Thomas city council have granted permission to Darrach Brothers to erect a laundry building.

The Quebec and St. Maurice Industrial Co. will erect a small pulp mill at La Tuque, Que.

C. B. Russell, Worcester, Mass., is negotiating for the erection of a tack factory at Morrisburg.

D. C. Knapp, grain dealer of N. Dakota, intends to build a large elevator at Shellbrook, Sask.

The Canada Fibre Co. is the name of a new company floated in Moose Jaw for the purpose of manufacturing binder twine.

C. E. Deakin has commenced the erection of a new office and factory building for Babcock & Wilcox, in Westmount.

The Winnipeg Safe Works have purchased a site close to their present property, where they intend to build a new warehouse.

The Dominion Power & Transmission Co., Hamilton, has secured a permit for a fireproof cement car building to cost $25,000.

The new King Edward concentrator at Cobalt is ready to start operations as soon as power from the Montreal River is available.

An English syndicate has been looking at property along the river front at Levis with a view to the construction of docks and immense cattle yards.

New Westminster will, in all probability, be the site of a plant to be erected by the Western Steel Corporation, of which James A. Moore, of Seattle, is president.

Arnoldi & Law, of San Francisco, have been negotiating with a special committee of the Victoria council as to the establishment of a large steel and iron plant in that vicinity.

The Provincial Steel Co., Cobourg, has put on a night shift to enable them to put through a rush order for the Intercolonial Railway. A shunting engine has just been added to the plant.

The third furnace at the smelter of the British Columbia Copper Co., Phoenix, B.C., was blown in last week and the management expect to be treating close to 2,000 tons of ore per day.

A steel plant is to be established on the west coast of Vancouver Island, not a great distance from Victoria, by the Middlesbrough Steel & Strip Co., a prominent steel firm of the Yorkshire steel centre.

Portage la Prairie ratepayers have approved a by-law granting the Western Radiators, Ltd., a fixed assessment of 20 years. The company will immediately proceed with the erection and equipment of a large plant.

Property on Burrard Inlet has been bought by a Vancouver syndicate for the erection of a sugar refinery. The purchasers include J. W. Stewart, of Kelly, Douglas & Co., railway contractors, and E. F. McFeely, wholesale hardware merchant.

The Dominion Iron and Steel Co., Sydney, has completed plans for the new blast furnace that is to be erected as part of the expansion scheme. The company also contemplate the construction of a second rod mill, two merchant mills, and a fourth mill for finished products.

Another large sawmill will shortly be erected at New Westminster by the Westminster Mill Co., a short distance further up the river from the shingle mill which they now have under construction on the North arm. The new mill will cut about 70,000 feet daily and employ 100 men.

The Harland & Wolff shipbuilding firm from Newcastle-on-Tyne, working in conjunction with the C.P.R., have acquired a large area of land at Levis at which drydocks, ship-repairing and building plants would be constructed this coming spring for the purpose of building Canada's new navy.

A merger has been formed of the Canada Car Co. and the Dominion Car and Foundry Co. of Montreal, and the Rhodes-Curry Co. of Nova Scotia, all leading manufacturers of railroad cars. The Canada Car Co. is capitalized at $3,000,000, and the Rhodes-Curry Co. also at $3,000,000.

The Canadian capitalists, who compose the Canadian Shipbuilding and Drydock Co., are in negotiation with one of the English firms with a view to the establishment of a plant at Montreal. The Canadian capitalists interested are M. J. O'Brien, J. A. O'Brien and J. E. Roy. The British firm concerned is understood to be Vickers, Maxim & Son.

The demolition of the Victoria Pier and the erection of a new concrete landing almost along the whole waterfront will be the undertaking of the Montreal Harbor Commissioners as soon as they get the loan of $18,000,000 promised them by the Dominion Government. Huge improvements are contemplated all along the line.

A Canadian carriage manufacturing merger is being planned in Montreal, to include the E. N. Heney Co., which is at present completing a large plant at De Lorimier, Que., the Tudhope Carriage Co., Orillia, the Canada Carriage Co., Brockville, and the Munro & MacIntosh Carriage Co., Alexandria, Ont. The capitalization of the new company will be about $5,000,000.

There are good prospects of Parry Sound securing a branch factory of the Guelph Patent Cask Company, of Wolverine, Mich., whose head office is at London, Eng. The company manufacture a certain kind of barrel which is used by the English Government. They are an old established firm and have decided to come to Canada to operate. They would employ 100 hands.

Municipal Undertakings.

The money by-law for waterworks at Nanaimo was passed.

Weston, Ont., will expend $57,000 for the construction of a waterworks system.

A by-law to issue $7,000 waterworks debentures has been carried by the ratepayers of Markdale, Ont.

The tender of Carriere & Wilson for the excavations of the Hull waterworks extension, at $22,000, has been accepted.

L. C. McDonald, Grand Forks, B.C., has ben awarded contract by New Westminster to supply steel piping for the new municipal reservoir, at $218,527.

There is a probability of a waterworks system for Lumsden, Sask., early next year. There is said to be an unlimited supply of water on the hillsides on the north side of the town.

The reconstruction of the entire sewerage system in the central section of Vancouver was forecast by the expressions of opinion given at a board of works meeting recently.

Tenders will be received until November for furnishing 3,000 feet of riveted tapered steel pipe ; also 1,782 lineal feet 60-in. reinforced concrete pipe for the out-fall sewer at Toronto.

By a practically unanimous vote the ratepayers in Richmond municipality have decided that Lulu island is to have the Vancouver water system extended through that district.

The provincial board of health of Manitoba has recommended that the Clifton Street sewer, which the City of Winnipeg proposes to construct to empty into the Assiniboine river, be proceeded with.

The Ottawa civic waterworks committee has authorized the city engineer to go ahead with the work of laying the new clear or drinking water pipe from the end of the new aqueduct to the intake at Nepean Bay. It will be about a mile in length, will be 42 inches inside diameter and will cost about $64,000. Tenders for the pipe will be called for at once.

Vancouver ratepayers will vote on October 23, on by-laws aggregating more than one million dollars for civic enterprises. For the waterworks requirements, $400,000 is asked. This amount is made up of the following items: Capilano Creek system, $10,500; Seymour Creek system, $130,000: reservoirs and connections, $16,500; general extensions and distributions, $243,000.

The council of Exeter, Ont., have adopted the report and plans prepared by F. W. Farncomb, of London, for a system of waterworks, which for the present will be for fire service only. The estimated cost is $25,000. This will include a pumping plant with a capacity of half a million gallons a day, a main along Main Street, with provision for future extensions, also an elevated storage tank, with sufficient capacity for two days' supply for the town. The present supply will be drawn from the river.

The waterworks by-law was passed at South Vancouver by a large majority. The amount was $225,000 to provide for laying of distribution pipes throughout the municipality. Tenders will be invited within the next month for:—(1) Trench excavating; (2) wood stave pipe;

HAND-MADE

HOCKEY STICKS

Our hand-made hockey stick has for years been the favorite with the leading amateur and professional players and its superiority is acknowledged. We use nothing but the finest selected and thoroughly seasoned rock-elm in its making and guarantee every stick perfect. IVER JOHNSON

SAFETY AUTOMATIC REVOLVERS

OUR CLAIM of *Absolute Safety* made good—we have never learned of a single accidental discharge.

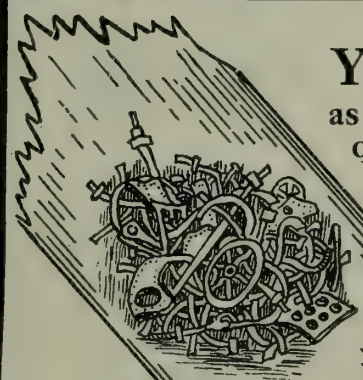
This means that you can't harm yourself or others by striking an Iver Johnson hammer on the drawer of desk or bureau, catching the trigger on your pocket, accidentally dropping it or striking it. Prove it—

Hammer the Hammer

Make any test you please. There can be but one result. You will be convinced of its absolute safety. The revolver *can't* go off until you pull the trigger.

Makes Good on Claims and Makes Good Profits

The advertising of Iver Johnson Revolvers covers the whole field—big magazines and sporting publications. All inquiries are referred to the dealer—never handled by mail where the dealer will supply.



Iver Johnson Revolvers are not premium goods—never sold to "catalogue houses"—distributed through the trade only.

Send for Dealer's Catalogue and give your Jobber an Order.

Railway Development.

John E. Stewart and Hon. A. B. Donworth are interested in a plan to build an electric railway from Hartland to Foreston, N.B.

The Edmonton Radial Railway Co. expects to place contracts within the next six months for constructing 10 miles of single and double track.

The plans of the Coteau Power Co. call for the construction of a tramline eastward from Vernon through the fruit growing section of British Columbia.

The Canadian Western Railway have decided upon a line into Calgary. The railway wil cross the High river, and the company expects to have the line completed in two years.

The Port Arthur council is considering the formation of a company to work in conjunction with the municipal street railway system and build electric lines through the townships of Oliver and Shuniah.

A syndicate headed by J. A. Moore, Seattle, will build 17 miles of railway in the vicinity of Prince Rupert, to export products. A bridge will be built over to Lena Island, where wharfs and bunkers will be constructed.

The last spike was driven last week in the 1,500 mile Winnipeg-Fort William section of the National Transcontinental, near Wabigoon river. It is not likely, however, that the section will be opened for traffic of any kind before next spring.

The railway between Meaford and Owen Sound will be built by the town of Owen Sound. The Government subsidy of $96,000 is available and the G.T.R. offers to lease it a a yearly rental of 40 per cent. of the receipts.

Another large contract on the Transcontinental has been taken over by O'Brien, Fowler & McDougall, within the past few days. This latest contract is for the building of a stretch of two hundred miles of the road north of Nepigon.

The new station that the B. C. Electric Railway is shortly to construct at New Westminster to replace the present building is planned to be one of the finest buildings in the city. The station is to be two stories in height, but it will be built substantially, and in such a manner as to allow of two more stories being added, when necessary.

New Companies.

The Armstrong Supply Co., Hamilton; capital, $40,000; to deal in building materials, sewer pipe and cement. Incorporators, Chas. Armstrong, Z. M. Armstrong and C. K. Armstrong, Hamilton.

Allan Hills Edge Tool Co., Galt; capital, $100,000; to manufacture machinery, hardware, tools and implements. Incorporators, Allan Hills, Sheffeld, Eng.; J. W. Porteous, Galt, and E. T. Malone, Toronto.

The Thorp Varnish Co., Montreal; capital, $20,000; to manufacture and sell (wholesale and retail) varnishes, oils, colors and paints. Incorporators, F. H. Markey, W. W. Skinner and G. G. Hyde, Montreal.

Golden Gate Mfg. Co., Montreal; capital, $225,000; to manufacture gas and gasolene, steam and electric engines; hardware; glassware; iron founders, etc. Incorporators, W. C. Savage and G. L. Savage, New York City, and W. A. Olmstead, Montreal.

Canadian Ferrosteel Co., Bridgeburg, Ont.; capital, $40,000; to produce and deal in all kinds of heating and ventilating apparatus and supplies, as well as ornamental articles of brass, bronze, iron and steel. Incorporators, A. E. Menke, Geo. Austin, and Jno. McCoy, all of Cleveland, Ohio.

USE OF CEMENT INCREASING.

The demand for Portland cement in Canada has increased remarkably during the last five years. In 1904 the total consumption of Partland cement in the Dominion was 1,694,988 barrels, of which 784,630 barrels were imported. In 1908 the consumption, notwithstanding the general industrial depression, was 3,133, 338 barrels and no less than 3,495,361 barrels were manufactured in Canada.

The increase is not abnormal nor due to merely local causes. In 1888, it is estimated that less than 200,000 barrels of cement were manufactured on the North American continent; and the enormous growth of the business is shown by the fact that approximately 55,000,000 barrels were produced. The manufacture of Portland cement commenced in Canada in 1888, but until 1904 the importations into Canada of the foreign product exceeded the Canadian production.

The report of John McLeish, Chief of the Division of Mineral Resources and Statistics of the Department of Mines, Canada, on the production of cement in Canada, during 1908, furnishes the following comparative statement:

Calendar Year.	Canadian Manufactured. Barrels.	Canadian Consumed. Barrels.	Foreign imported into Canada. Barrels.	Total consumed in Canada. Barrels.
1904	908,990	910,358	748,630	1,694,988
1905	1,541,568	1,346,548	917,558	2,264,106
1906	2,152,562	2,119,764	666,931	2,785,695
1907	2,491,513	2,436,093	672,630	3,108,723
1908	3,495,961	2,665,289	469,049	3,134,338

Great as has been the development of the Portland cement industry in Canada since 1904, it is only reasonable to assume that this growth will be continued. The enormous public works in progress and in contemplation, including railways, canals, bridges, harbor improvements, wharves, pavements, building foundations, etc., will render necessary an increased production.

FRANCE PROHIBITS WHITE LEAD.

The labor unions of France recently petitioned the Congress to prohibit the use of white lead in paint, alleging that it was very injurious to health. The Congress referred the question to a special committee, which made a thorough investigation of the subject in 86 of the 88 departments of France, as well as in Algeria and Tunis, and reported that of 194 journeymen painters who were sick in the hospitals investigated in 1904 only 27 were sick from diseases caused by the use of white lead. The report said: "The committee has not been able to discover any of the ravages from the use of white lead attributed to it by the labor unions. The death rate among house painters is very low, averaging only 1 in every 7,000 or 8,000 painters." The report declared that the mortality among house painters was large only where there was an excessive use of alcohol.

The bill to prohibit the use of white lead introduced in 1906 was defeated, but another bill for the same purpose was introduced at once. It was enacted by the lower house of the French Congress in 1907 and was discussed in the Senate and by joint committee from time to time until July 13, 1909, when it became law.

The point upon which the two houses differed was whether an indemnity should be allowed to manufacturers of white lead for damages they might sustain from the loss of a market for the goods they had on hand. The law as finally passed prohibits the use of white lead in painting of buildings, inside or outside, after the expiration of three years. It is calculated that within that time the manufacturers will be able to dispose of their product on hand so that no loss will accrue.

SEARS RETIRES WITH $25,000,000.

Richard W. Sears, founder of the great mail-order house of Sears, Roebuck & Co., has announced his retirement from active business. He has amassed a fortune in the past seventeen years, it is said, of $25,000,000.

He began his business career when a telegraph operator in the Northwest by buying watches and selling them to railroad men on approval. After opening an office in Minneapolis his business became so successful that he gradually added other lines and made enough money to establish himself in general mail order business in Chicago. The business has gradually grown until it is said the annual sales reach $50,000,000. A few years ago it was incorporated for $40,000,000.

The Retail Paint Trade

DISPLAYING PAINT.

It is a moot point whether hardwaremen pay as much attention to the location of their paint department as they should. Of course where oil and colors are concerned it is well for these articles to be away from the front of the store, but with ready mixed paints the case is quite different. Here you appeal to another class of customers—customers who are more influenced by outside influences. A painter in buying oils and colors is not particular where he buys them, whether they are placed at the back of the store or in the cellar, so long as he can see that he is getting what he wants. An attractive display of these staples will not influence the sale. But not so ready mixed paints.

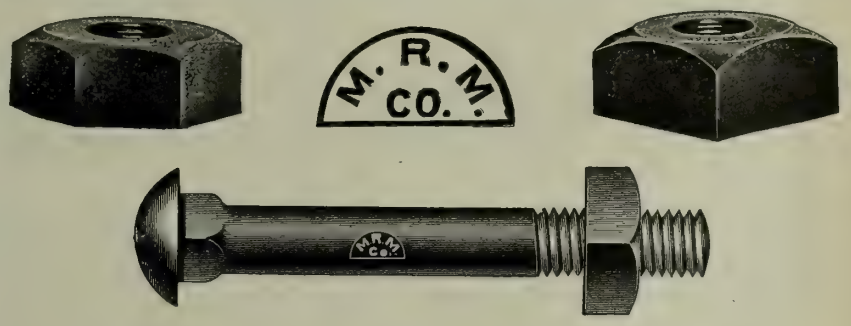
Customers for the "canned" goods have to be coaxed. Their attention needs to be directed to the merits of paints, and one of the best means of doing this is by thrusting paints continually before their notice. Customers on entering the store should be confronted with many evidences that a good paint stock is carried. Artistic hangers should be placed in prominent positions, and above all the paint stock itself should be well in front with plenty of light thrown across the goods.

Paint tins with their different labels are far from being unattractive, and the different colors catch the eye as readily as silverware. Besides, the merchant, by displaying his paints prominently, shows that he is well pleased with this department; that he is making a good thing out of it, and that as a natural sequence if the customer does not buy, the latter is missing a chance that other customers are willing to accept. The influence of the other man is largely felt in the paint demand. If a customer thinks that a lot of other people are buying paint then he is much more keen on purchasing than if he thought the reverse was the case. Therefore it is wise to place the paint department in such a location that every customer must feel convinced that the merchant is selling his tins like hot cakes.

Besides paint is associated with brightness. The great selling point of paint is its wonderful ability to brighten up, and therefore it is absurd to place the goods in a dark part of the store where one could not associate brightness with them under any consideration. This is a special point to remember now that with the shortening days, artificial illumination has more to be depended upon. It may be that so far as window light is concerned the paint is well placed, but that when artificial illumination is needed there is no fixture near, and the department consequently is in a shadow. How can the merchant expect to sell his paints, if the tins are in semi-darkness. There must be plenty of light, both natural and artificial, where the paint department is concerned.

The Canadian Northern Railway guarantee to build a railway to Lanark, from their Toronto-Ottawa line.

Don't Get "Notions" About



Floorglaze

Please don't get the notion that FLOORGLAZE is good only for floors. FLOORGLAZE is a solid-color floor-enamel with all the elasticity of good paint, and more; and that has a dozen uses about the house, indoors and out. It's so advertised for you that it can't help selling once; and its own quality sells it again to the same people—and their neighbors. FLOORGLAZE is the kind of goods that strike you as about right for your store.

PAINT AND OIL MARKETS

TORONTO

October 22.—Without being rushed with orders the paint trade is this week experiencing good business. Sorting-up of general paint lines covers the situation, with a demand for glass and interior decorating goods. There is a good movement in varnishes, and brushes are in fair demand. Purchasers of oil and turpentine have been holding back and now buying is being done at the higher prices ruling, though no large quantities of either are going out.

Oil is the only line that has increased its quotation. Last Saturday the price of oil advanced 1 cents. The high figures asked for oil and turpentine are evidently not in sympathy with increased business, but there appears to be no alternative in sight, as it is likely that prices on both these lines will go still higher, some jobbers saying we may soon see dollar turpentine. The scarcity of glass is bringing the jobbers round to doing the friendly action, the various houses helping out in the filling of orders. Lead prices are unchanged, but rumors say they may be fixed up and advanced any time now.

The rosin market remains stationary. The higher grades of extraordinary light colors are a little easier in price but the medium grades including "G," "F," "E" and "D" are all held very firm. There were said to be over 10,000 barrels of rosin shipped from Savannah during the past week.

LINSEED OIL — Another advance in oil is noted this week. The advance amounting to 4 cents per gallon, making the selling price locally for single barrels of raw 72 cents and for boiled 75 cents. There is a further advance in the price of flaxseed, amounting to about 10 shillings per quarter higher for Calcutta seed in Great Britain than it was a year ago. At the present quotation for linseed oil at Liverpool it would cost to import it to Toronto from 1 cent to 1½ cents per gallon more than the price for single barrels of Canadian oil.

TURPENTINE—The market locally has undergone no change. The average price for turpentine at Savannah for the week has been about ½ cent per gallon less than the week previous. A correspondent at Savannah says, "We thought last week's receipts of turpentine were small but this week they are still less notwithstanding that there is a possibility of a better demand. There are several thousand barrels of turpentine being loaded on foreign steamers and the stock of turpentine will probably show a decrease the coming week so that an advance might take place any day." The local quotation remains at 83 cents for single barrels, though some is yet being sold at 81 cents. Trading is light.

WHITE LEAD—Trade of a satisfactory volume is said to be done in white lead, both dry and in oil. Prices are unchanged, ranging from $5.55 to $6 according to grade and brand. Rumor states that a coming together of lead interests is probable and that prices will go back to the old figures. However, it does not appear likely that any advance will be made within the next week or ten days, if at all, because there is a strong tendency among the trade to keep quotations where they are.

RED LEAD—Casks at $4.25 and 100-lb. lots $4.50 to $4.55, continue to be the local market quotations for this line Conditions are unchanged from last week. Trading is fair.

GLASS—This is probably the strongest line in paint goods selling at present. Demand is splendid, so much so that stocks here are very low. Jobbers are helping one another out in the filling of orders. Some houses are advancing quotations, but this is not general. The higher prices abroad will undoubtedly raise the figures asked here when importations come in, as they must within a few weeks' time.

PUTTY—Like glass, putty is selling well just now. Prices are firm, though remaining at last week's figures. Casks of bulk putty are $1.75 ; 100-lb. drums, $2 ; and bladders, $2.15 to $2.25.

STAINS AND VARNISHES—There is some stir in these and all the other household lines. In fact, paint goods for interior work are rather brisk just at present. Orders while not large are general and cover a multiplicity of lines —alum, glue, floor wax, lacquers, furniture polish, rosin, etc. Prices are fairly firm.

PETROLEUM—Steady and continued good business is being done in coal oil at unchanged figures. Prime white is 13½c. ; water white is 15½c. ; and Pratt's astral is 17½c.

MONTREAL.

October 22.—With the exception of the uncertainty which prevails in reference to the ground white lead, the market conditions are extremely satisfactory. Some excitement has been caused by a sharp advance in linseed oil, and there has been a great deal of hurrying round by those who were short to replenish their stocks for fear of another advance. Orders have come in freely in most of the lines. Varnishes and japans are in active demand, and ready mixed paints are still showing a strong movement.

TURPENTINE—The market may be said to be in very good shape, and while the disposition still exists to advance the price 1 or 2c per gallon, holders of good round lots are content with their present margin of profit, and no change is recorded. No speculation in buying exists, the call simply being of a hand-to-mouth character. We continue to quote 80c for single barrels.

LINSEED OIL—A further advance is recorded. Cables arriving from the Old Country state a shortage for immediate requirements. All offers, it is reported, have been withdrawn, and as stocks locally are not any too plentiful quotations naturally, in sympathy with the strength displayed in the primary markets, have been advanced 4c. We now quote : 1 to 4 barrels, in one delivery, raw, 72c per gal.; boiled, 75c per gal.; net 30 days, f.o.b., Montreal.

GROUND WHITE LEAD—The feeling seems to exist in many quarters that with the absence of fluctuations in the lead market and the advance in linseed oil, both naturally prime factors in ground white lead, present quotations are at rock bottom. The market, therefore, is steadier, and with orders coming in freely no decided change is reported in quotations. Strictly pure,

White Lead

At the present time the white lead situation is interesting.

We are the only firm in Canada who corrode and grind white lead, in addition to making Varnish, Dry Colors, Paints, Enamels, etc., etc.

Our white lead proposition is naturally the very best.

Benjamin Moore & Co., Limited
West Toronto, Canada
New York Chicago Cleveland

ELASTICA NO. 2

You will be wanting

for interior decorative work a varnish which will produce a brilliant and permanent finish, and for this purpose there is nothing quite so good as Elastica No. 2.

For the finest trim work it is specially recommended, and is noted for its extreme paleness and durability. It dries dust-free in from seven to nine hours.

See that this popular line is on your shelves.

INTERNATIONAL VARNISH CO., Ltd.
Makers of Fine Varnishes TORONTO, Can. Branch of Standard Varnish Works
NEW YORK CHICAGO LONDON BERLIN BRUSSELS

about $5.25 to $5.75, according to quality, and No. 1 $4.85 to $5.25 f.o.b., Montreal.

RED LEAD—A stronger volume of business is reported, and the market is unchanged at: Genuine red lead in casks, $4.25; in 100-lb. kegs, $4.75; less quantities at $5.75 per 100 lbs.; No. 1 red lead, casks, $3.75; kegs, $4.25, and smaller quantities, $5.25.

WHITE ZINC—The call for white zinc has fallen off slightly. The market is, however, firm and unchanged. We quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5½c.

VARNISHES AND JAPANS—Quick drying varnishes, hard oil finishes, and shellacs are experiencing a healthy call. With linseed oil advancing, it is thought that cheap grades of varnish will be marked up 5 or 10c per gal. For the time being, however, quotations remain unchanged, there being naturally no disposition to shade prices for round lots.

PUTTY—The demand is very healthy, and grinders are working at satisfactory pressure. We quote: Standard putty, 800 lbs., in casks, $1.75; in 100-lb. drums, $2; bladder putty, 400 lbs., in barrels, $2.15; in 100-lb. cases, $2-25; in 25-lb. tins, $2.15; 12½-lb. tins, $2.35, f.o.b., Montreal.

PAINT NOTES.

H. L. Robinson, painter, Galt, has assigned.

Thom & Co., Portage la Prairie, Man., have the contract for painting the Western Radiators factory now building at that place.

Hutchison, Wood & Miller, Montreal, have awarded to Church, Ross & Co., the contract for the erection of a storage building for the Canada Linseed Oil Mills, at that place.

C. C. Ballentyne, managing director of the Sherwin-Williams Co., Montreal, has resigned as a director of both the Canadian Rubber Co. and the Canadian Consolidated Rubber Co.

CANADIAN MICA INDUSTRY.

The mica industry that has been dormant in the Gatineau district for several years back is likely to be rejuvenated and placed on a greater scale than ever. For three years the mines of amber mica that meant employment to hundreds of workers and kept two trimming shops busy in Hull, have been shut down, a fact that meant an enormous loss to employes and that kept at least $25,000 worth of machinery idle.

Now, United States consumers, who during the days of the depression curtailed their orders to such an extent that the mines had to close, have been making enquiries of all the mica mine owners around Hull, with a view of giving extensive orders. Fortin & Gravelle, of Hull, and the Gatineau Valley Mica Co. are among those preparing to recommence operations.

The shut-down was caused when the United States consumers three years ago ceased to place orders for small mica, they requiring only the large kind. The mine owners saw that to have the small stuff lying on their hands would mean a loss to them on the working. But the buyers refused to reconsider their decision and the mine men felt there was no other course for them but to close.

It came as a pleasant shock to them, after the business had been sleeping so long, to discover the other day that there was a chance of its awakening. The United States people after tiding over the business depression found themselves entirely out of mica. They apparently have come to the conclusion that it were wiser to take the small stuff along with the large and have accordingly opened negotiations. There is the black mica of Dakota and quite a quantity of mica comes from India, but it is a recognized fact that Quebec produces the finest amber mica in the world.

J. N. Fortin is optimistic in the opinion that if the mines get running once again they would not soon have the same cause for closing as was given them three years ago. "At our trimming shop in Hull," he said, "we give employment to fifty girls, whilst we keep a great number of men going in the mines, which are about seven miles out of Hull. The American firms seem to have very serious intentions of again doing business with us."

ADDITION TO DISSTON PLANT.

The Disston Saw Co. have just completed the first of a group of new additions to their already huge plant at Tacony, Pa. This latest addition is a complete machine shop, with equipment to duplicate the largest machinery found anywhere in the great 50-acre plant. The new building is 180 feet long, by 80 feet wide, the walls being mostly constructed of glass framing, which makes the interior as bright as daylight in every corner. The Disston management's experience that the best class of workmanship is gained where the comfort of the workmen is attended to is evinced in not a few details. A Sturtevant heating and ventilating plant keeps the atmosphere clean and fresh, never permitting it to go below a temperature of seventy degrees, even when the thermometer outside registrs zero. In the basement, a men's room is completely equipped with individual metal lockers, modern toilet arrangements, and washstands. Capping the full length of the roof is a monster electric sign, six-foot letters forming "Disston Saws," which is visible at night for miles up and down the Delaware in New Jersey, and over Tacony. Over the office on the first floor will be a reading room. Here the standard mechanical journals and trade papers are provided for the use of the men.

Keep guns for rent by themselves and do not allow the renter to use black powder; semi-smokeless with the lubricated ball is the best for the rifle barrel, and the rifle will not need cleaning during the entire day, if the bore is not in a rusted condition. Any bullet not greased will do the rifle barrel harm. To prolong the life of a rifle barrel and maintain accuracy use a lubricated bullet.

CEE-PEE-CO

ENAMEL FOR THE PAINTER

Haven't you often noticed what a difficult thing it is to get a real good high-grade white Enamel for high-class painters' trade? For years dealers have been obliged to bring in these Enamels from abroad at exorbitant prices and sell at little or no profit.

RAMSAY'S No. 98

changes all that. You have herean enamelunsurpassed by any imported into the country. It is for the Decorators—for high grade work. It is not cheap—that is as cheap things go, but it is cheap for what it claims to be. You should learn about this Decorators' Enamel anyway, in order to be posted. Write us for special booklet on Ramsay's No. 98 Enamel.

A. RAMSAY & SON CO.

YOU KNOW —— WE KNOW —— THEY KNOW

ALABASTINE

THE MOST POPULAR THE MOST SALEABLE

WALL COATING

You do not need to spend time and energy talking it up and introducing it.
You carry a full assortment, it sells itself, and we advertise and sell it for you.
It pleases the eye for color and the artistic sense.
Is ready for use by simply adding COLD WATER.
Anyone can get beautiful work with it by following the simple directions printed on each package.
It is permanent, sanitary and antiseptic. Can be re-coated, coat on coat.
It will not moulder and decay, or rub off.
There is nothing else on the market, whether mixed in boiling or cold water, which will produce the permanent results or soft, beautiful tints peculiar to Alabastine.
It is not a kalsomine that has to be washed and scraped off before you can redecorate.
Order direct or through your nearest jobber.

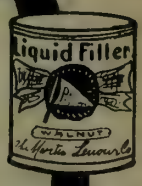
THE ALABASTINE CO., Paris, Ont.
Patentees and Manufacturers

SELL *the* KIND *that* SELLS

It's mighty poor business to load up your shelves with a great collection of every kind of paint, just so you can say, "I have any kind, color, and mixture of paint you might ask for." That's not only poor business policy but that makes business poor—and makes *you* poor too.

No—the best way is to select only a few staple kinds of one standard make and sell them.

Every Dealer in Canada Knows



MARTIN-SENOUR PAINTS

So Lets Think This Thing Out Right Now

How many of the eight shown on this page do you think are likely to be wanted by your customers during the next few months? How many—Six? All right—send us an order for the six kinds you want and we will ship them at once together with a good lot of advertising cards, etc. to help remind customers they need to do some painting.

Every one of the eight displayed here are quick sellers—every one. They are now in demand.

SHRP-SHAVR SAFETY RAZOR

25c.

There is no better razor sold at ANY PRICE

We do it to Sell our Blades

Sold under a positive guarantee. Your money back if you want it.

Shrp-Shavr Razor Co

Smith Hardware Co., Limited
2 & 4 Lemoine Street
Montreal, Canada

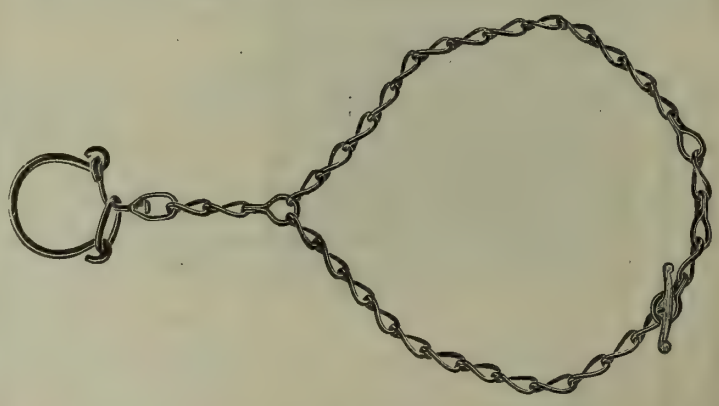
We sell it at 25c. to create a quick and large market FOR OUR BLADES because we make the BEST blade. In fact, "it's all in OUR BLADES." The profit to the retailer as well as to the manufacturer is in the continuous sale of blades.

The frame or blade-holder is beautifully SILVER PLATED, and the adjustment is absolutely correct. It fits the face. The blade can be adjusted or released instantly. But you don't shave with a razor frame whether it costs $5.00 or 25c., the blade is the thing.

Our proposition is a revelation and revolution in safety razor selling. The SHRP-SHAVR is the ORIGINAL 25c. RAZOR.

HOW TO FREE HIGH HALLS OF DUST-WEBS

Really Completed



Our new FLOOR-POLISHING and DUSTING PAD is a striking complement to the

Ideal-Duster-Mop-Stick

It attracts and GRIPS the customer on sight. When exposed in a window display it practically exclaims:—"*Here I am, see what I can do and how I do it.* Don't bother the clerk—he is busy—just watch me—I polish or dust your floors, over and under the furniture, stoves, and do all manner of stunts, saving you from climbing and stooping—take me home at 25c retail." Mop section 35c. 5½ feet extension 15c. Complete 75c.

CURRENT MARKET QUOTATIONS.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

Ask Yourself These Questions:

Do You Want

—a clerk

—a partner

—to buy a business

—to sell your own business

—to sell some old fixtures in order that you may get some new ones

—to buy or sell a set of tinsmith's tools

—a second-hand typewriter

—a desk

—more money in your business

—to buy a silent salesman

—to secure a side line

Try a Want Ad. in Hardware and Metal.

It costs little.
It works quickly.
It brings results.

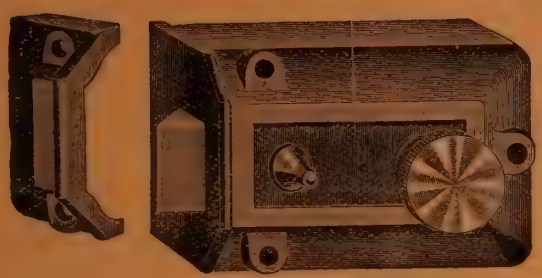
The Enviable Reputation

Earned by

Still's Axe Handles

has been built up chiefly by attention to two details:—

1. Care in the selection and seasoning of the wood.
2. Skill in the shaping and balancing of the handle.



As a genuine satisfaction-giving line, Still's Handles have no superior and very few equals. The prices will interest you.

Don't Wait for Something to Turn Up. Try a "WANT AD."

"Maxwell" Hardware Specialties

Are known and appreciated in thousands of homes throughout Canada. Dealers find them active, steady sellers, particularly as new and improved types are continually being brought out.

The Latest is the

"Champion High Speed" Washer

This is really a "Puritan" tub and dolly-board, with a new "momentum" driving mechanism. Working the upright lever starts the dolly-board and also the heavy balance wheel, which revolves several times for every stroke of the lever. The momentum of this heavy wheel keeps the dolly-board running smoothly, and makes the "Champion" very quick and easy working.

The "Puritan" Motor Washer

takes all the work out of wash-day. Tap water runs it, in nearly every case at no expense to the user. The motor is simply, strongly made, and is far less liable to get out of order than other water motors. Works on a pressure of 35 pounds up.

The "Blue Belle" Wringer

has no equal either in Canadian or imported machines. Has ball bearings, enclosed gears, swivel tub attachment, five year guaranteed rolls, and is extra well finished.

The New "Royal Mangle"

is a thoroughly up-to-date machine which we have recently placed on the market. Splendidly made throughout and highly finished. A most useful machine in large families, boarding houses and hotels.

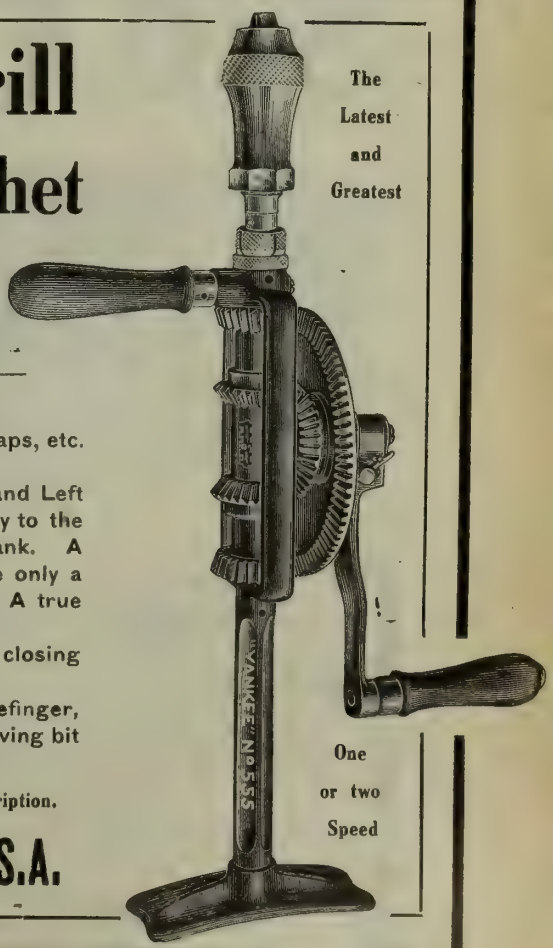
"YANKEE" Breast Drill with Automatic Double Ratchet Adjustable Ball Bearings

Notice the little shifter between the gears :—



Notch 1—gives you a plain drill.
Notch 2—A Left Hand Ratchet for removing taps, etc.
Notch 3 - A Right Hand Ratchet.
Notch 4—An Automatic, Alternating Right and Left Hand Ratchet, the bit turning continually to the right regardless of the motion of the crank. A great advantage at close quarters where only a short throw of crank can be obtained. A true time saver.
Notch 5—Locks drill for opening and closing chuck.
Lever A—Change of speed with forefinger, without releasing hold on crank or removing bit from hole.

Get After the Merchants in Your Town

Do you know that our Metallic Ceilings and Walls are the most sanitary and artistic interior coverings a merchant can have in his store? They prevent the dust and dirt falling—a continual nuisance with plaster and wooden ceilings—and add so much to the appearance of the store—so many varied, artistic designs suitable for any class of business to select from.

Further, our Metallic Ceilings and Walls are fire and moisture proof and will greatly reduce insurance rates. They are very economical—in fact will last a lifetime. We use only the highest grade steel plate—every design being carefully and deeply stamped—absolutely no bulging—the best metallic ceiling on the market.

Get after this business—convince your fellow merchants of the many advantages of Metallic Ceilings and Walls, and then send measurements of their stores for estimates.

We are manufacturers of Eastlake Metallic Shingles, Metallic Siding, Lath, Cornices, Skylights, Ventilators, Finials, Pressed Zinc Ornaments, Eavetrough, Conductor Pipe, and Fireproof Windows and Doors.

Sell Clark Heaters and Coal

Here's the "BIG HIT" Assortment

2 Leader Heaters
2 No. 5B Heaters
2 No. 7D Heaters

6 Dozen Clark Fuel Brickettes (Best Grade)

Some of these heaters you can sell as low as $1.20 and make a good profit.

The Proposition to Dealers is Mighty Interesting

Its a proposition that means ready sales and liberal profits.

Everyone who drives or owns a carriage, wagon, sleigh, automobile—any kind of vehicle—needs them. Everybody traveling in cold weather needs them. The need is known—the demand is positive—It's for the dealer to supply the product and pocket the profits.

Clark Heaters and Clark Coal sell wherever displayed. The wonderful compactness, the unique principe of heat distribution, the neat appearance, the low price—all are factors that make Clark Heaters the unchallenged leaders.

Our guarantee goes with each, and the guarantee protects the dealer and the consumer.

And the coal is just such another proposition. To **prove conclusively** that it's better than other fuel, we give a guarantee, **with each brickette,** that it will give 25 per cent more heat than any other heater fuel made.

DEALERS——ACT NOW

The season is on. Send for the "Big Hit" assortment and add more dollars to your profit. Send to your jobber. Put a heater just inside your store—where customers can **feel** the goodness of it. "Warm them up" to the necessity of buying from **you.** We'll help.

Wholesale Hardware and Iron Merchants

Montreal : : : : : Canada

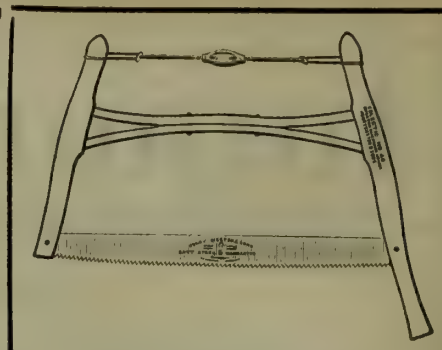
Important Notice

The rapid improvement in general business and increasing cost of raw materials is beginning to affect a number of staple lines, to the extent that manufacturers are asking more for their goods. We are obliged to announce that an increase has been made in the price of

Graham Nails

which have been sold from the beginning on a very close margin and are among the first to feel the changed conditions. Under no circumstances will we "take it out of the goods" by lowering the standard of quality, and in announcing a new Price Schedule we emphasize more fully than ever our determination to keep Graham Nails up to their well-known reputation as regards strength and finish.

H. S. Howland, Sons & Co., Limited



Wholesale Hardware Merchants,

We Ship Promptly. **TORONTO** **Our Prices are Right.**

Graham Nails are the Best.

Disston quality has made the DISSTON plant grow to Fifty acres since 1840.

How Disston "Bucksaws" Make Customers

This is only one of a list of shapes and styles. See catalogue mentioned below.

YOU can't safely tell an experienced bucksaw user "one make of bucksaw is like any other." He knows, through actual use, what differences there are. It is because of the absolutely unvarying uniformity of DISSTON Bucksaws that dealers make not one but SEVERAL sales and profits.

Some of the reasons for the steady increase in the plant of the DISSTONS is the increasing call from shrewd dealers for DISSTON Bucksaws. Pointing to the actual truth about DISSTON Bucksaws wins the customer, with that resulting profit---and it wins him back again, with other resulting profits, for experience with a DISSTON Bucksaw bears out every recommendation you give it.

Show your customer the wood seasoned for several years—the variety of shapes to select from---the styles of blades---the bracings---the varnishing---the weather protection---the ease of handling---the strength ---the qualities for heavy cutting---the absolute rigidity---the fact that in a DISSTON Bucksaw there is positively no lost motion or "give."

Behind every DISSTON Saw, Tool or File you sell there is a profit for you---and after that a steady stream of profits. The highest quality never fails to bring a customer to your shop again.

FREE If you haven't got the latest DISSTON Catalogue, send us a postal. It gives clear and complete descriptions of DISSTON Saws, Tools, Steels and Files, in all the various styles and makes. This new Catalogue may mean a handsome addition to your profits.

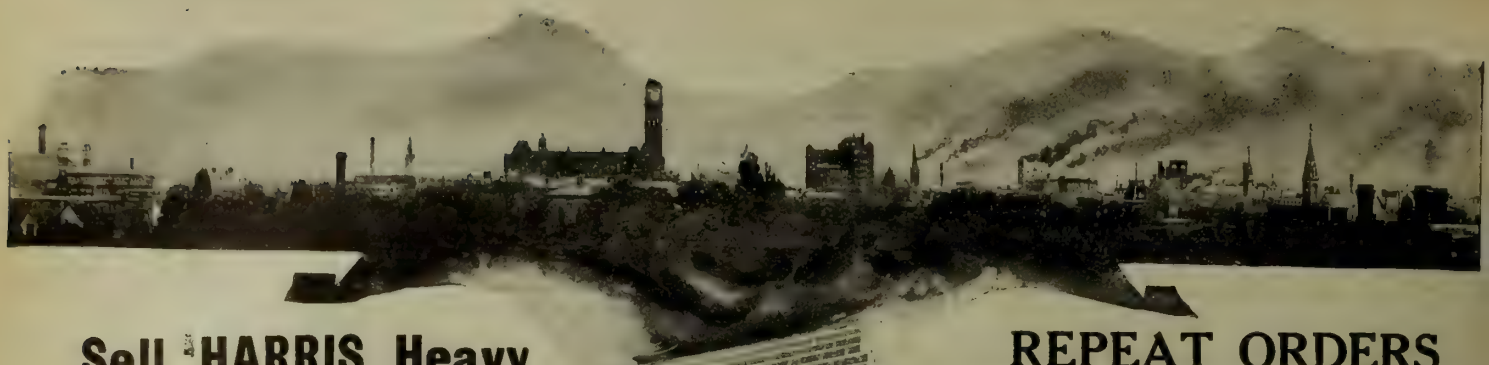
What's Doing in Skates?

The Ladies' Automobile Skate is something new—something exclusive. It is positively the only specially made ladies' skate on sale to-day. The Auto. is much lighter than any other made and is richly finished and daintily designed. The blade is of the rocker design but is only gently curved upwards at the ends, permitting a firm footing with rocker enough to lend itself to fancy skating. $2.50.

The big feature in men's skates is the "Automobile" Model "C." Model C is made with an aluminum top and a blade of nickel steel—it is ounces lighter than any other in the catalogue of the world's skates. The "Automobile" is the ideal hockey skate. Guaranteed. Price, $5.00. This skate is supplied in straight or rounded end blades.

The new skate the "Arctic Special" has taken every other skate into camp on the price, $1.50. It is manufactured from the very best of selected steel with specially constructed toe and heel plate. A spendid design for hockey purposes or for rink skating.

EXAMINE THESE SKATES BEFORE PURCHASING ANY OTHER:



Automobile Skates
Models C. B. and A.
"Ladies' Auto"
"Arctic Special"
Klondyke
Yukon
Cycle *Models 25 and 5*

All our skates are manufactured from the best of drawn steel, nickel steel being used entirely in the higher grades. Aluminum alloy tops are employed in model "C" of the Automobile Skate to obtain an exclusive lightness in weight. Model "C" is really the strongest featherweight made anywhere.

R-gist-red Trade Mark

THE PATENT "DREADNOUGHT" MILLING FILE

Will make a surface on Steel, Brass or anything, that it looks as if it were burnished, after cutting so rapidly that it will astonish you, on Steel or Cast Iron, and then again on Brass or Bronze without apparent loss of cutting quality. This will make you think. It made the British Government think, it made the Krupp Co. think. Made them think that it would pay to use the Dreadnought in every department, and now that they are using them extensively, their "Think" has turned to a certainty, that it does pay to use the Dreadnought, and in our own CANADA they are rapidly being adopted by the largest consumers.
JUST THINK:—This file CAN BE RE-SHARPENED MANY TIMES, without drawing the temper, thus making it "absolutely the cheapest file that can be procured anywhere."
JUST THINK:—If you try a sample order and are not perfectly satisfied with the goods, you may return them. We want your business and are determined to satisfy you, if you but give us the chance

VALUE OF GOOD COPY

Personally, I believe "ads." in trade papers should be made so attractive, so interesting in some way that the merchant as he glances through the trade journal will stop and see what you have to say. The simple announcement that you are in business is not enough. I don't care how prominent a firm is, they should not get the idea they are so big that all they need to do is to reproduce their name on a page in a trade journal and say nothing more. They should do something to make the merchant curious; in fact, somewhat anxious to meet the travelling man you are sending out to represent you.

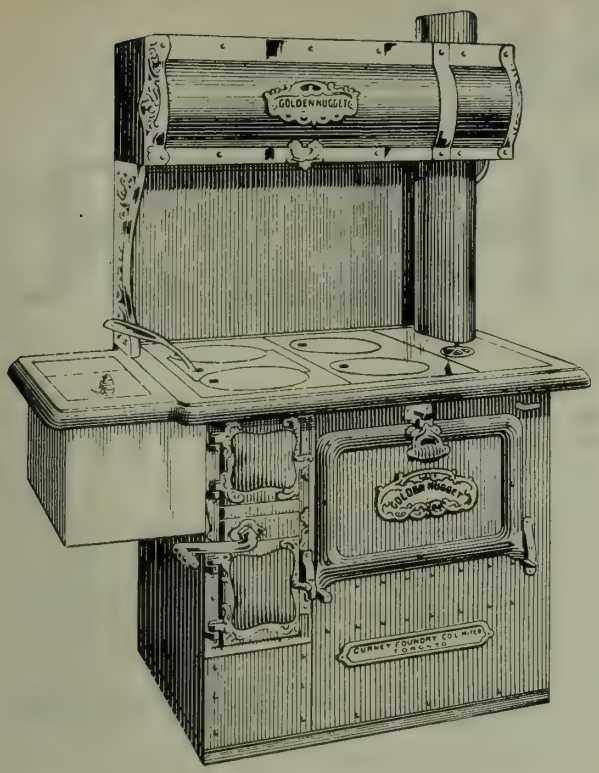
DO YOU KNOW

That a good cast range is the best investment you can make—that is, if you want a stove.

There are stoves—and stoves. What better guarantee for excellence and superiority could you have than the "backing" of the McClary Mfg. Co.?



We have been making stoves now for forty years; no short period. Our plant is the largest stove plant in the British Empire. We buy all raw materials in large quantities, thus securing lower prices, and you get the benefit. The "Ladies' Aid" is a cast range. The ovens are all manufactured of nickeled steel plate. The tops are all burnished with our special process; the nickel is all double coated.—Well, we haven't space to tell you all about it here, write us for a circular.

A "GOLDEN NUGGET" FOR —YOU!

"MORE WEALTH, AT LITTLE COST."

BUSINESS IS BOOMING—simply great! Did you ever know it to be better? Our representatives—the men who carry the Gurney-Oxford mark—are wildly enthusiastic. Most of them haven't time to tell us. But, oh! how the orders keep rolling in. It's a great Gurney-Oxford year this, to be sure! This hustling, bustling, activity

is a mighty fine tonic, especially on a blue Monday—but how's the game with you—are you keeping up with the pace? Are your guns well trained, ready for action—and, what's your commands. "New Chancellors," "Imperial Oxfords," "Crown Princes," or the greatest of all base-burners, The 300 Series "Art Laurel." By the way, the "Golden Nugget" Steel Range is going strong, always in the forefront—a dandy range—cooks, bakes, roasts to perfection, and that's what begets confidence between you and your trade.

The "Golden Nugget" is fitted with our new reversible grate, quickly changed from coal to wood use. Copper detachable reservoir, slips into oven—a convenient place when shipping. The oven is a big talking point—it's roomy, and a quick baker. Don't rob your floor of a quick seller. Give the "Golden Nugget" a fair show. You'll get a reward in quick sales—satisfied customers.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

SIMONDS No. 8½

This Saw is of the general style and shape which carpenters have been accustomed to using for years past. Has a carved apple handle with highly polished sides and edges, making a very pretty Saw. Holds its cutting edge and saws true. Its high quality and even temper are due to the fact that it is **Made of Simonds Steel.** Covered by the broadest Simonds warranty.

Solid Stem Expansive Bit

The Only One Made

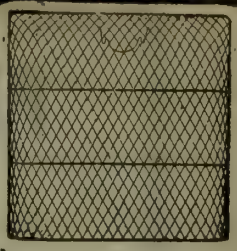
Drop Forged from Best Cast Steel

Especially adapted for Boring in Hardwood

ONE PIECE SOLID FORGING

WITH TWO CUTTERS

This bit is a great improvement over the old form in which the dovetail method of holding the cutter is used, it being so constructed that the cutter will stand the severest strain without creeping, springing or loosening.



The binding screw holds the cutter firmly in place, the small set screw preventing it from being forced in either direction, thus forming a double locking device with cutter immovable until screws are released.

If your jobber cannot supply you, write us for illustration and prices.

Ontraio Retail Hardware Assn. Executive Meeting

Committee Meets at Toronto on Thanksgiving Day—Want to Amend Ontario Insurance Act to Allow Merchants to Organize Mutual Fire Insurance Company—Arrangements Made for Convention at London Next February—Local Association Organized at Toronto.

The members of the executive committee of the Ontario Retail Hardware and Stove Dealers' Association, met in full force at the Mossop Hotel, Toronto, on Monday, Oct. 25, the only absentee being J. Walton Peart, St. Mary's, who has just returned from a three month's visit to Kentucky, for the benefit of his health. Mr. Peart sent a letter announcing his recovery, but regretting his inability to be present. He also urged that action be taken towards organizing a hardware mutual fire insurance company.

President Brooklebank, Arthur, called the meeting to order at 1.45 p.m., the following being present : A. Ballantyne, Brantford ; M. S. Madole, Napanee ; J. R. Hambly, Barrie ; D. Cinnamon, Lindsay ; R. C. Chown, Belleville ; J. S. Weichel, Elmira ; H. P. Morgan, Peterboro ; John Caslor, treasurer, Toronto ; and Weston Wrigley, secretary, Toronto.

Good Gain in Membership.

Secretary Wrigley made a report regarding the membership, announcing that 57 new members had already been enrolled during 1909. A report was also made showing the number of new members secured by members of the Association. J. R. Hambly, leads, closely followed by John Caslor, D. Cinnamon and R. C. Chown.

Prize Offer to Travelers.

It will be remembered that a prize of a suit case was offered for the member enrolling the largest number of new members up to Feb. 1, 1910. The executive decided to duplicate this offer to travelers, the salesman enrolling the largest number of retailers (minimum of five) to be presented with a valuable suit case at the London convention.

The question of placing an organizer in the field to extend the membership was discussed, but it was decided that until a mutual insurance company is formed it would be wise to concentrate all expenditures on the work of organizing such a company. It was reported that the membership of the Pennsylvania Retail Hardware Association had increased from 94 to over 500 in one year as a result of pushing the mutual fire insurance feature amongst the members.

May Incorporate Association.

The secretary was instructed to cooperate with the secretary of the London convention entertainment committee in getting out printed matter advertising the 1910 convention.

A sample button was submitted to be worn by members the year round, but as a supply for all the members would cost a large sum it was decided that action be delayed.

The secretary was given the power to engage an assistant during the London convention, and was also instructed to gather information regarding the advisability of incorporating the association.

Arrangements for London Convention.

It was decided that the fifth annual convention of the association be held at London from Tuesday to Friday, Feb. 8, 9, 10 and 11, 1910, the business meetings to be held in the Board of Trade rooms and the exhibition in the City Hall auditorium.

The selection of hotel headquarters, rates, etc., was left in the hands of Messrs. Ballantyne, Caslor and Wrigley.

Convention Programme.

The following program for the London convention was mapped out :

Tuesday—9 a.m., meeting of executive committee ; 2 p.m., open session of convention ; reports of officers, appointment of committees, mock sale and address on salesmanship ; 8 p.m., smoking concert in Exhibit hall.

Wednesday—9 a.m., business session and question box discussion ; 2 p.m., visit to McClary foundry ; 8 p.m., question box discussion.

Thursday—9 a.m., business session, reports of committees, etc.; 2 p.m., visits to other factories ; 8 p.m., banquet.

Friday, 9 a.m.—Business session, election of officers, and executive meeting.

A Novel Mock Sale.

In connection with the programme it was decided that a representative of the Sheldon School of Salesmanship be invited to deliver an address on the opening afternoon. Before this address, however, there is to be a "mock sale" conducted as follows :

Three of the stove firms exhibiting at the convention will be asked to supply a range and name some member of the association who will represent them as salesman. (If more than three stove firms exhibit the three will be selected by lot.) Then another member of the association, a retailer handling a line of stoves not in the competition, will take the place of a buyer and just as many stove buyers look at several makes before purchasing he will examine each of the three stoves in turn, each salesman having ten or fifteen minutes in which to try to sell his range. Following this the Sheldon representative will commend and criticise points in the argument, drawing such lessons as he can from the discussion, spectators thus being able to see the "mock sale" and then have their own conclusions supplemented by the opinions of one who is a student of salesmanship and entirely impartial as to the merits of the various makes of stoves.

Question Box Discussion.

It was decided that one evening and part of one morning would be given up to a "Question Box" discussion, the marked success and keen interest displayed in this feature at previous conventions, warranting a greater amount of time being devoted to this educational discussion. A committee composed of H. P. Morgan, D. Cinnamon and J. R. Hambly, were appointed to handle this part of the program, and it was also decided to invite Frank Russill, of the Russill Hardware Co., Toronto, to lead the discussion.

Banquet Committee.

It was announced that an entertainment committee of London manufacturers and jobbers selling to the retail hardware trade was being formed, the Secretary of the Western Fair Board to act as secretary of the committee. Members of the committee had signified their desire to tender a complimentary dinner to the members of the Retail Hardware Association, and to provide other entertainment if the programme permitted.

The offer of the banquet was accepted and a committee of D. Brocklebank, A. Ballantyne, M. Weichel and Secretary Wrigley were appointed to act with the London entertainment committee in making necessary arrangements. It was decided that the London hosts be requested to reserve a supply of tickets for sale to exhibitors or travelers who desire to attend the banquet.

Badge for Convention.

Treasurer Caslor and Secretary Wrigley were appointed a committee to arrange details regarding badges for members visiting the convention, the offer of the Lufkin Rule Co., to supply these having been accepted.

Railway Rates.

The secretary was instructed to secure the most favorable railway rates obtainable to the convention.

Ordinary convention rates require the attendance of 300 or over to secure a single fare rate and if exhibitors and travelers ask for certificates this number is easily assured. In the possible event of failure, however, the executive decided to guarantee a single fare rate to all members whose single fare rate to London is $5 or over.

Trade Exhibition.

The secretary reported that the City Hall auditorium had been divided into 33 spaces, the smallest being 8x8½ feet in size. These are to be divided off by a skeleton framework 8 feet in height at the expense of the association and some general decorations also provided. Last year's exhibitors had been given first opportunity to secure spaces at $25 and $20 according to location. In response to a preliminary announcement about 20 of the 33 spaces have already been applied for.

To assist the exhibitors it is planned to provide a programme for a smoking concert in the exhibit hall on the open-

ing night (Feb. 8), the idea being to allow members to move around between the different numbers on the programme and renew acquaintances with exhibitors. Admittance to the exhibit hall is to be confined to those with badges except at such times as it is decided to admit the general public (say Wednesday night and Friday afternoon).

The secretary also suggested that the exhibitors might form a committee to work with a committee of the Retail Association. Also that the profits to be derived from the trade exhibition be used as a fund to aid in establishing a retail hardware mutual fire insurance company, which would indirectly benefit jobbers and manufacturers by making it possible for retailers to carry increased fire protection at less cost than at present.

It was further suggested that the arcade under the City Hall auditorium might be used as a "model hardware store" exhibit. London firms manufacture iron work for store fronts, plate glass, silent salesmen, arc lamps, etc., and these with cash registers, hardware shelving, cash carriers, oil pumps, etc., could be made into a good exhibit, most of which would be "made in London" goods.

The suggestions as outlined were approved by the executive and a committee of D. Brocklebank, Treasurer Caslon, R. J. Bruce, S. M. Burt and Secretary Wrigley were appointed as an exhibit committee.

Prize for Best Window.

London retailers belonging to the association will be asked to arrange special window displays during the convention, two prizes of $5 and $3 being offered for the one voted to be the best by the visiting hardwaremen. The names of local firms making displays will be announced at the convention and delegates will be asked to visit the various stores and fill in ballots expressing their first and second choice.

Address to Mr. Lariviere.

The committee appointed to prepare an address to Fred C. Lariviere, Montreal, submitted a draft address and it was approved and instructions given to have an artist put it in shape for presentation. The draft address follows:

Mr. F. C. Lariviere,
Montreal, Canada.

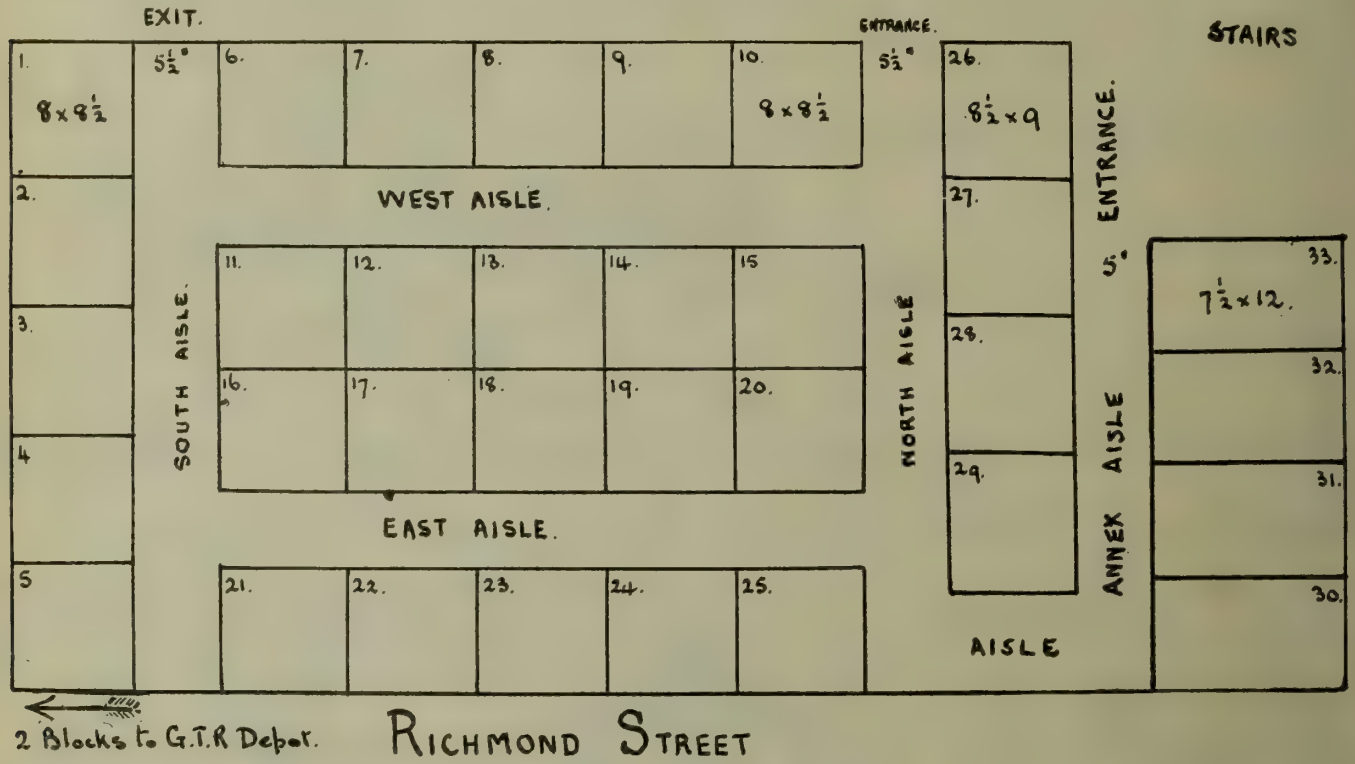
Dear Sir,—At a meeting of the Ontario Retail Hardware and Stove Dealers' Association, held at Montreal, on August 27th, 1909, it was decided, on motion of A. W. Humphries and J. R. Hambly, past-presidents of this association, that we make you an honorary life member of our association and express to you our sincere appreciation of the assistance you have rendered our organization by attending conventions at Toronto in 1907, and Hamilton in 1909, on each occasion giving us valuable advice on many subjects in connection with the many problems which confront every man engaged in the hardware business.

Your tireless efforts, as chairman of the reception committee, to make the visit of our excursion party to Montreal pleasant and profitable, is also fully appreciated by everyone who had the pleasure of being the guests of yourself and other Montreal hardware manufacturers and wholesalers.

It is our hope and wish that the pleasant relations existing between yourself and the members of our association will continue for many years to come, and be further cemented by your attendance at future conventions of our organization.

On behalf of the O.R.H. & S.D.A.,
D. BROCKLEBANK,
D. CINNAMON.
R. C. CHOWN.
WESTON WRIGLEY,
Committee.

Toronto, October 25, 1909.



Another Life Member.

President Brocklebank stated that it had been his intention to suggest at the Montreal meeting that Col. J. B. MacLean, publisher of Hardware and Metal, be also made an honorary life member of the association, but lack of time had prevented taking up this matter. He suggested that the executive recommend such action to the London convention and the members were unanimous in approving the suggestion.

Talk on Mutual Insurance.

E. P. Heaton, manager of the insurance department of the Canadian Manufacturers' Association, and A. G. F. Lawrence, solicitor, were introduced to the members of the executive, and an hour's discussion followed regarding various aspects of the proposition of forming a retail hardware mutual fire insurance company.

Mr. Heaton said that the two mutual companies organized by the Manufacturers' Association two years ago had been remarkably successful in their operations, and already carried fire risks amounting to over $100,000,000. He further said that according to the 1908 re-

Floor Plan of Exhibition Hall (City Hall Building) at London Convention, Feb. 8, 9, 10 and 11, 1910.
Eighteen of Last Year's Exhibitors Have Already Applied for Space for Exhibits.

port the 69 farmers' mutual fire companies had carried 123,791 policies, totaling $255,000,000, and allowing two policies to each farm, 60,000 Ontario farms are protected from fire loss by policies in mutual companies. In 1908, too, the total liabilities of the 69 farmers' mutuals amounted to only $38,000, while their assets amounted to over $10,0000,000. The average rate they charge is about 1½ cents on houses and barns, and their cost of doing business is only three-fifths of a cent.

No Governments appreciate what mutual fire insurance companies are doing for the people, contained Mr. Heaton. The Ontario Insurance Act allows farmers to form mutual companies, but prohibits merchants and manufacturers from doing likewise. Exception is rightly taken by the insurance department to the cash mutual companies, which take risks promiscuously, but there can be no sane objection taken to a specialized mutual company accepting risks only from one class of trade, such as retail hardwaremen. To start such a company now a deposit of $10,000 is called for, but a specialized mercantile mutual company deserves better treatment than a cash mutual, and merchants should be placed on the same footing as farmers. The real security in a specialized mercantile mutual is not in the Government deposit, and not in the premiums, but in the mutual feature of the organization.

Mr. Lawrence here pointed out that hardware stores are usually located where fire protection exists and it is seldom that an entire loss occurs, even in the case of a large conflagration, owing to the nature of the stock carried. On the other hand, farmers seldom have fire protection, and total losses are more frequent.

SAMUEL PEARSALL, TORONTO,

Elected President of Toronto Retail Hardware Association.

Up on 1894, said Mr. Heaton, Canadian fire insurance companies were so intent on piling up fire risk liabilities that they did not scatter their risks, and subsequent conflagrations have hit Canadian companies hard. A specialized mercantile company, such as the retail hardware mutuals in the United States, cannot be hit hard by a large conflagration, as their risks are so scattered that it would be very seldom that two losses would occur in one fire. Mutual insurance tends to reduce the loss rate.

In Great Britain, continued Mr. Heaton, fire insurance has always been cheap, only about 10 per cent. of what is charged in this country, but the companies are becoming more greedy and advancing rates have forced the drapers to organize a specialized mercantile mutual company. The drapers' rates have been equal to 35 or 40 cents, this being so low that it has not been a tax upon them.

President Brocklebank stated that in Wellington county, (not including Guelph city) there are fourteen hardware stores, and in the last 25 years there had only been one fire in a hardware store. This, he contended, was a strong argument in favor of a mutual company. The first farmers' mutual had been organized in Wellington county.

It was decided that statistics be gathered as to how many Ontario hardwaremen would place risks with a mutual company organized under the auspices of the association, what the average risk would be, and figures showing the successful operation of hardware mutuals in Wisconsin, Minnesota and other states, where rebates as high as 50 per cent. are paid, insurers, besides building up large surpluses.

A committee composed of J. W. Peart (convenor), D. Brocklebank and M. Weichel, were chosen to work with the secretary in this matter, and an appropriation of $100 was placed at their disposal to cover necessary expenses.

It was also suggested that Dr. Hunter, provincial superintendent of insurance, might be secured to give an address on insurance matters at the banquet to be given at the London convention. This was left in the hands of the banquet committee.

DINNER WITH TORONTO RETAILERS.

The executive committee adjourned at 6.15 p.m. to Orr's restaurant, where the members of the executive and a fair representation of Toronto retail hardwaremen had dinner together. During the meal a discussion on general trade matters was conducted, and the men from the city and the visitors from outside points came to have a better understanding of the problems met with in each branch of hardware activity.

After the turkey and plum pudding had been disposed of, the discussion drifted onto the question of the advisability of the formation of a branch of the Ontario Retail Hardware Association in Toronto.

J. S. Willoughby, who had made a canvass of about 60 of the local retailers during the previous week, sent a report to the effect that the trade in Toronto seemed ready to support a local organization, and he suggested that officers be chosen and regular meetings held. Mr. Willoughby said he found a more friendly feeling existing amongst the hardwaremen in the eastern part of the city than in other sections, such as Queen Street West, the reason for this being, in his opinion, the existence of the Riverdale Business Men's Association, which brings all classes of merchants together for the development and common good of all interested in that section of the city. Mr. Willoughby suggested that in addition to a central organization, the merchants doing business on Yonge Street, Queen West, College and Bloor, in West Toronto, etc., could get together as local committees to promote harmony and better feeling. Reference was made to how the Ottawa hardwaremen work together by helping each other out when overloaded or short of stock.

JOSEPH HARDING, TORONTO,

Elected Secretary of Toronto Retail Hardware Association.

President Brocklebank invited all present to express themselves freely and Sam Pearsall, of George Pearsall & Son, in response, said that the trouble in the hardware trade in Toronto was not so much competition amongst themselves as the competition of departmental stores, builders' supply houses, and paint and hardware jobbing houses selling to consumers at wholesale prices.

Manufacturers' Re-sale Prices.

"I have no trouble with Mr. Burt, my neighbor, up Yonge Street, or Mr. Russill, who advertises so extensively in the daily papers—I only wish I had his business. I refuse to buy, however, from jobbers who compete with me by selling to consumers, and if by organizing a local association, we can stand together

in refusing to buy from firms who compete with us, it will be a good thing for us all. I believe, though, that the best work a local association could do would be to encourage manufacturers to establish re-sale prices on their goods and compel departmental stores and semi-jobbers to sell at the same retail prices as we do. The Atkins Saw Co. adopted this plan this year, and though I did not push their goods before, I now do it enthusiastically, as I know I am on an equality with Aikenhead's, Vokes' or Eaton's."

President Brocklebank pointed out that the Toronto retailers could rely upon the support of the trade throughout Ontario in the establishment of re-sale prices, as well as in inducing jobbing houses to confine their trade to selling to retailers and cutting out consumers.

Officers Elected.

After others had expressed themselves along similar lines, a motion was made by J. Harding and S. M. Burt, "that we form a local branch of the Ontario Retail Hardware and Stove Dealers' Association." The motion was adopted unanimously, and the following officers were then elected:

President—Samuel Pearsall, 417 Yonge Street.

Secretary—Jos. Harding, 1427 Yonge Street.

Treasurer—G. W. Mathewson, 734 Queen Street East.

Another motion was then carried that all members of the local association must be members of the provincial association, that a fee of $1 yearly be charged members of the local association, and that another meeting be called by the president and secretary in November to complete the work of organization.

Several members were then enrolled into both provincial and local associations, the latter beginning with a membership of twenty-four, there being about 100 firms in Toronto selling hardware.

An interesting feature of the evening was a revival of some of the hardware songs the members learned while on the excursion to Montreal last August.

WHAT DESTROY NEW FILES.

New files, particularly double cuts, are soon ruined when used upon the thin edges of iron castings, which become chilled and form a scale on the surface, as the strain comes wholly upon a few teeth and breaks them. This scale should be removed by pickling in a solution consisting of two parts of water to one of sulphuric acid, and the surfaces which have become chilled should be ground off before applying the file. If it is impossible or impracticable to remove the scale by pickling, an old file that has been used until it is too dull for narrow steel work may be employed; the teeth will then not be broken by the hard scale.

Business Methods of Canadian Hardwaremen

Methods of Collecting Accounts—Keping Tab on Young Married Couples—Money Made in Holiday Specialties — Novel Window Display—Swearing at Clerks.

KEEPING TAB ON NEWLY-WEDS.

Chatham, Oct. 22.—"I find it is good policy," remarked a hardwareman the other day, "to keep tab on the Newly-weds.

"Every new household represents a new market for stoves, tinware, linoleum, coal oil, plumbing, and a multitude of things that appear in every hardwareman's stock-in-trade .

"Much of this is, of course, bought beforehand, but coming events cast their shadows before them, as everyone knows, and my stenographer is quite capable of covering a goodly share of the ground in this respect. It is wonderful how one wideawake stenographer can help a business by forecasting 'interesting events' of this nature. Whenever a young man comes within hailing distance of matrimony the selling staff, myself included, seize every opportunity to quietly 'cultivate' him. Well, as a rule the young man, when he wants his stove, will call on the dealer whom he knows, in preference to a personal stranger.

"Furthermore, the name of every Newlywed is forthwith entered in my mailing list. Whatever literature regarding household good I send out is sure to reach him. Young married couples rarely inherit the business affiliations of their parents. In fact, the tendency with them is to blaze a path entirely new. Probably they think they can do better by going elsewhere. Anyway, the old 'family' hardwareman has usually a harder job holding them than his rival has in capturing them. Why this is, I don't know; but I have noticed the tendency in many cases.

"I have made that my policy throughout—to go after the new households. No matter how many 'showers' have been tendered, there is always lots of stuff to be bought in the first few weeks after they are married; and I see that my selling staff is always in a position to suggest handy devices that have just come in as well as the old, reliable household utensils. The young lady's mother may have toasted her bread on the stove lid, but I can place an up-to-date little toaster in nine cases out of ten—and in six cases out of nine I can place the twenty-five cent article in preference to one not quite so good at fifteen cents.

"There is a point I try to emphasize in dealing with young couples—that it is always cheapest to buy good goods. And, when I speak of myself I include my selling staff as well. I find, too, that other merchants have pursued the same policy, for the results show in all my dealings with the younger generation. Just point out that a device will save labor and thereby lengthen life, and a sale is half made. For instance, there is the food chopper. It is worth infinitely more than the chopping knife for the average housekeeper, because it transforms drudgery into something pretty close to pleasure. And it is the same with a host of other articles, not all of which are in the small tinware line either.

"The carpet sweeper is an instance. Curiously enough, it is easier to sell to the husband than to the wife. The average woman looks at the mere money cost; the man charges his purchase with the money spent and credits it with the infinite amount of labor saved. This one thing, the value of the labor saved, is a gospel which my salespeople have been taught to preach assiduously to every Newlywed who buys. And it is doing an incalculable lot of good, too.

"There is always a good market with newly married couples for flower seeds, garden tools, and such like. They like to see things looking nice the first year at least.

"Anyway, it is worth while to keep tab on them. Not only can a hardwareman help his business that way, but he can also do a lot to direct young people along the path of comfort and contentment." W. E. P.

METHODS OF COLLECTING ACCOUNTS.

Calgary, Oct. 21.—The first thing necessary in collecting accounrs, said a local merchant the other day, is to get a debtor interested in a debt. In order to do so a letter, short and to the point, can be written laying before him the nature of the indebtedness, in order to get him interested. Once his interest is aroused other letters can be sent, it being necessary, of course, to form an idea of the nature and personality of the debtor in question.

As a matter of fact, correspondence through the mail is merely a matter of sizing up human nature. The employe to whom is assigned the duty of collecting accounts has a highly important work, for there is a time to be severe, and a time not to be severe. The collecting work should be under the management of one who while using tact and retaining the good will of the customers can keep up the collections.

The collector should explain to each debtor that it is necessary to collect money promptly in order to conduct a business properly, but few firms can force all customers to live up to an ironclad rule regarding the time of payment and retain their trade. In some places tradesmen in excellent standing are accustomed to pay bills only at the end of thirty or sixty days. Therefore, a firm desiring to have all bills paid in thirty days, must if doing business all over the country be tactful and allow its rules to be sufficiently flexible to meet varying circumstances. Many

firms hold to the policy of writing letters the day after accounts are due, and making formal requests for payment.

In most lines of business it is advisable to introduce some manifestation of personal interest that will take away from the dunning letters all the disagreeable effects, yet retain the usefulness of the work. In the case of a hard debt, a latter might be written enclosing a statement, and stating that it was necessary to have a payment as early as possible as you have bills of your own to meet. Then follow this up by showing that you still desire patronage by speaking of a new line of goods you have just received.

If a letter of this kind brings no response, it would be well, after giving a reasonable length of time for attention, to send a second letter firmly emphasing the fact that the account has run for some time over the usual limit, and as you must have money to run your business the account should be given attention without any further delay.

Then if debtors pay no heed to such letters, a firm is certainly justified in drawing on a customer. If the customer refuses to pay, or there seems danger of losing the account by failure it is then time to act quickly and send a personal representative. As many men object seriously to drafts, this method of collecting must be used with caution. It is really difficult to lay down rules, because what holds good for one business and one class of debtors would not hold good for another, because proper action must be considered largely by the circumstances of each case.

If letters and drafts have no effect the case should be placed in the hands of an attorney who is in the employ of the firm, as experience vroves that a letter over the signature af an attorney is often all that is necessary with obstinate and indifferent debtors. In all cases the correspondence and conversation should be courteous, as very often customers become offended at a harsh or hasty demand for money and turn their patronage elsewhere.

KEEPING THE STOVES BRIGHT.

October 26.—Now that the stove season is in full swing, there is one bit of advice which the hardwareman will find it profitable to keep in mind.

It is: "Keep your stoves bright."

The season is a brisk one in most places, and stoves do not stay long on the dealer's hands, anyway. Nevertheless, attention to the apparently trifling matter of keeping them bright will help them to move faster.

The great trouble is dust. This is bound to settle on any stove or range. But a few minutes' work with a dry dust rag or other appliance every now and then will make the stove bright as new.

Dust carries with it suggestions of held-over goods and old models. When the average purchaser goes out to buy a stove, the article he has in mind is bright and new in every particular. The careless dealer who shows him a dusty stove creates an unfavorable impression, the extent of which he probably does not realize. Experienced business men can testify to the utterly disproportionate effect which little things like this have upon the business of buying and selling. W. E. P.

CHRISTMAS NOVELTIES PROFITABLE.

Brantford, Oct. 25.—Telephone City stores will make a decidedly strong bid for the Christmas novelty trade this year, following the precedent set in previous years. They cater especially to the boys and girls, being locally known as "Santa Claus" headquarters. Already they have inaugurated their pre-Christmas boom, and their windows this week show, besides a line of stoves, forming the background of the display, a fine showing of Christmas novelties, in such lines as Buster wagons, with interchangeable runners and wheels, racer automobiles, dolls' vehicles and sleighs. "We have cleared a nice margin on these lines in previous years," said Henry Yeigh, the president, "but this year we will make strenuous efforts to have the sales exceed those of former seasons. Not only as they themselves give a good profit, but they act as inducements to the older folks. Mother or father comes in for a sleigh or doll carriage, and while filling their wants in this line, suggestions are made that possibly a nice coffee percolator, or a carving set, would prove acceptable to the wife, or a good shaving outfit for the husband, and sales result in the majority of cases."

A. W.

KEEP SHOW CASES BRIGHT.

Goderich, Oct. 26.—How often do we not see a tasty, attractive display of cutlery, razors, pen knives or something of that variety spoiled to a certain extent by the fact that the showcase in which it is arranged is not up to the proper mark in point of brightness.

Perhaps the plate glass is smeared with a big patch of grease, left by a careless hand. Pehaps the trouble is merely due to a heavy coating of dust, which has been carelessly allowed to settle upon the glass, and conveys to the customer an impression of neglect, which is all the harder to eradicate from the fact that it was perfectly unintentional.

Undoubtedly, dust will settle, and just as certainly grease will now and then leave its mark upon the glass of a show case or silent salesman; but it is the work of only a moment for a skilled and careful hand to brighten things up again.

A defect less frequent but probably more far-reaching in its results is due to allowing the woodwork of the showcase or silent salesman to become scratched, worn and tarnished. The varnish cannot help wearing off in course of time, with the result that the carefully arranged display very often fails to secure all the results that it should in the way of favorable attention.

Of all men the hardwareman has the least excuse for delapidated woodwork in his store furniture. He pretty nearly always has in stock one or more good lines of furniture polish, while varnish is not too dear to be used where necessary. The cost is trifling when the results are considered.

The woodwork, however old, will always look the better for attention of this kind in the occasionally dull spells of business. In fact, it should be gone over regularly and kept in proper shape.

E. P.

SWEARING AT THE CLERK.

Ottawa, Oct. 27.—The other day I happened to go into a hardware store and observed an atmosphere of disquietude. I could not receive immediate attention, owing to some neglect exhibited on the part of the clerks, which the proprietor was rebuking.

It is hard for one to keep his ears and eys closed under such circumstances, and the result was that I heard the proprietor address some decidedly direct remarks to his head clerk and emphasize them, as he thought, by the accompaniment of unorthodox language. I could not, of course, competently judge of the justification for these words of semi-anger, but it struck me forcibly that the effect of such epithets was lost upon those to whom they were addressed. While the immediate result might have appeared satisfying, yet I am sure that the clerk who listens to such rebuke cannot but fail to admire the action of his employer in thus exhibiting his lack of self-control.

Hasty words never accomplish the purpose for which the heat of the moment prompts their usage. A few quiet but fully explanatory words will not only lead to a sympathetic action on the part of the clerk, but his sense of neglect will be all the more keen than where he is addressed as though he were not a fellow man.

Swearing is not dignified and its practice unquestionably results in the loss of estimation by one's employes, co-workers and friends.

"A soft answer turneth away wrath, but grevious words stir up anger." So words of reason assist in encouragement to the underdog. M.H.

NOVEL WINDOW AT BRANTFORD.

Brantford, Oct. 26.—T. A. Cowan, plumber, carries off the prize for the most seasonable and attractive Thanksgiving window in this city. It is a representation of a farmyard. At the rear, a row of uneven palings forms a fence. On a block of wood, bespattered with blood (vermilion paint), lies the decapitated head of a Plymouth rock hen, with the little hatchet which did the deed yet remaining on the block, gory as the Field of Flodden, after the great battle. Feathers, blood and leaves form a carpet, showing very realistically the struggles of the deceased fowl.

How to Estimate Furnace Heating Jobs Correctly

The Basis for Success in the Furnace Business—Many Dealers Bid too Low and Then Make up Loss by Doing Inferior Work —Heating Trade Must be Built Upon a Foundation of Confidence—How a Job Should be Figured.

Errors in estimating cost of furnace work are responsible for more poor heating jobs than any other cause, according to those manufacturers who are trying to educate dealers to adopt a higher plane in accepting heating contracts.

The hot air furnace business has suffered for years because of the many poor jobs that have been installed. High-class work in hot air heating has demonstrated it to be one of the most economical and efficient methods for heating the ordinary sized dwelling. But poor jobs have destroyed the faith of many in hot air furnaces and it is taking considerable time, labor and money for manufacturers to educate their agents and consumers to appreciate hot air furnaces at their true value.

Many dealers, it seems, bid on a heating job offhand, without accurately figuring the cost. Then, realizing their error later, they do not pocket the loss themselves, which their own ignorance or carelessness has caused, but take it out of the job.

Somebody Will Lose.

A $200 heating job cannot be done for $150, without somebody losing. If the contractor does not lose the purchaser is sure to. The result is an unsatisfactory furnace that gives unsatisfactory results.

No dealer in heating apparatus can continue to do cheap work at cheap prices for long and hold the respect of his community. A hardware dealer who does not give a "square deal" on a heating job will not be trusted by his customers, and he will have destroyed the basic principle of all business success—confidence.

But if the dealer in heating apparatus takes only those contracts which are sure to pay him a good profit above the cost for the best of everything that enters into the construction of a heating system he should be able to build up a heating business that will be one of his most profitable lines.

There is little satisfaction to the dealer in taking a job at ridiculously low prices merely to keep it away from a competitor. If a city contractor visits a country town and bids on a job at a lower price than that for which the local man can afford to do the work it is best to let him have the job. Either he will lose money or the job will be so poorly done that he may never get another contract in that locality.

Bear These Facts in Mind.

Just bear these facts in mind when bidding on a heating contract:—

First, to impress upon the customer that you are not entering a competitive bid on price, but on quality.

Second, that it is better to let someone else have the job than to do it yourself at a loss.

Third, that to arrive at the cost of a heating system every item must be accurately figured, cost of labor must be computed and an adequate profit added.

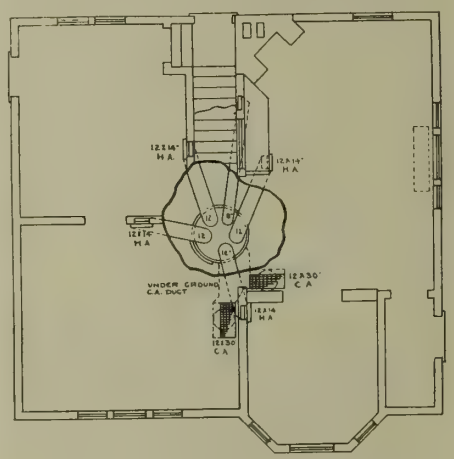

Fig. 1.—Plan of Ground Floor.

A dealer recently wrote to a well-known heating concern for plans and estimates for putting in a hot air furnace in a dwelling. In a letter the retailer stated that he had already agreed to do the job for $140.

In figuring up the job the manufacturer found that the cost for materials

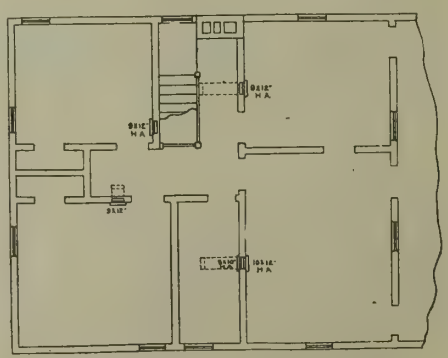

Fig. 2.—Upstairs Floor Plan.

alone would be $142.48, as shown in the table below. On top of this, labor must be figured, increasing the cost of the job about $35, and the dealer also had to pay the freight. The total of the estimate by the manufacturer was $180.55, this amount including a combination hot water coil.

On this job the dealer stood to lose about $40. His bid should have been about $225 in order to get a fairly decent profit on the work.

The following estimate shows how the dealer should have figured the material alone, that would enter into the contract for the furnace. The figures are as submitted by the manufacturer:—

	Net price.
1 No. .... furnace	$81.00
1 No. .... casing	11.20
4 12x14 side wall registers with boxes	3.00
3 9x12 side wall registers with boxes	
1 10x12 side wall registers	8.02
5 Boots	$3.57
2 12x30 faces	3.69
50 feet 3½x12 wall pipe	
3 No. .... heads for 9x12 reg.	
1 No. .... heads for 10x12 reg.	
6 No. .... elbows	7.91
4-inch round 12-inch elbows	
1-inch round 8-inch elbows	
5 casing collars	
5 hot air dampers	
25 feet 12-inch tin pipe	
10 feet 8-inch tin pipe	
15 feet 9-inch smoke pipe	
2 9-inch elbows	
1 9-inch damper	
17½ feet 18-inch galv. cold air pipe	16.59
2 galv. cold air boxes	4.00
1 roll asbestos wrapping 100 lbs at 3½c.	3.50

Methods of Instalation.

The accompanying cuts show the job that was to be installed. In regard to methods of instalation the manufacturer wrote to the dealer as follows:—

"We have your esteemed favor, with tracing of residence to be heated, and we return these sketches, also blue print of heating plant, showing what we consider the very best warm air lay-out.

"We have indicated side wall registers for all of the first floor rooms, as you will notice, and three of these are arranged to connect with wall stacks leading to chambers above. In this way only five warm air pipes are required to heat the nine rooms in the building, and, of course, a more positive circulation of the air is secured than would be possible were there nine independent basement pipes, and the fewer the basement pipes the less loss of heat by radiation in the basement.

"The register for the living room, you will notice, we have shown in front of the seat near the fireplace, as this is the only place we could find to put a side wall register. In our opinion, however, this would not be an objection, for with hot water it is very common to locate a radiator under a seat near a window. Of course, this plan would necessitate the seat being closed in front, and we could use here a regular side wall register or one having a flat surface, so as to make it come flush with the woodwork.

No Hesitancy in Guaranteeing.

"The arangement we have shown you need have no hesitancy in guaranteeing to your customer as a satisfactory operating plant and a proper proportion of heat in each room. If, however, your customer does not like the idea of putting a register under the mantel seat, you could place a radiator over by the window, as we have indicated by dotted lines, and make a floor return connection from the coil in the furnace.

"As you know the furnace we recommend is divided with an offset for a coil to heat the kitchen tank, and if your customer does not care for the kitchen tank connection you can use this offset for the coil to heat the radiator; or if your customer does not wish the kitchen tank connection you can make another independent coil attachment for the other side of the furnace to connect with the hot water radiator. It is better, generally speaking, not to connect a kitchen tank and the radiator on the same system, for the reason that with this arrangement to drain the tank would necessitate draining the radiator also.

"We have included in estimate the probable cost of a hot water connection with the radiator in living room so that if your customer thinks it advisable you will be in a position to make a proposition along that line.

Cold Air Supply.

"Now just a word with regard to the cold air supply. We have shown in our plan two 12 x 30 faces so placed as to insure a proper circulation over the layout. It is a mistake to think that the returns must be from the extreme corners of the room, and we have learned by experience that the shorter and more direct the cold air supply, the more rapid the circulation of the air, and the more even the temperature of the air in the house.

"The furnace on which we have based our estimate is large enough, we consider, to heat the house satisfactorily in the coldest weather. Of course, the wall stacks that are offset do not throw quite as much heat as the direct stacks would, but they wil warm the rooms sufficiently for sleeping purposes, if placed as shown on our plans."—Hardware Trade.

HARDWARE TRADE GOSSIP

Ontario.

J. R. McMillan, Guelph, spent Thanksgiving Day in Toronto.

G. H. Pratt, hardwareman, Bothwell, has sold his business to Dent Bros.

James Chalmers' stock of Hardware at St. Mary's was sold to J. M. Adam.

The McClary Mfg. Co., London, contemplate engaging a trained nurse for the care of sick and injured employees.

George T. Pepall, sales manager of M. & L. Samuel, Benjamin & Co., Toronto, suffered a severe loss on Oct. 23, by the death of his only child, a boy nearly two and a half years old.

Chas. Burke, an employee of the Belleville Iron and Horseshoe Co., Belleville, while engaged at feeding old tires into a rolling machine, slipped and fell into the machine and was instantly crushed to death.

J. Rumball, Niagara Falls South, states that the one sale referred to as being made by him after he sold his business at Harrow, and on which an attempt was made to secure damages, amounted to only $15, not $1,500 as stated.

Justice Britton issued an order at Osgoode Hall, Toronto, to wind up the Canadian Smallwares Co., of St. Mary's, manufacturers of safety pins, buckles and small metal objects. E. R. Clarkson was appointed interim liquidator.

Mr. and Mrs. Landreth, Stratford, have left for the west to join their son John, who left some time ago to take over a large hardware and tinsmithing business purchased by him during his tour in the west last summer.

Miss Edythe Birge, daughter of Cyrus A Birge, president of the Canada Screw Co., Hamilton, was married on Wednesday last to Lieut. John J. MacKay, of Tyrrell & MacKay, surveyors and civil engineers, Hamilton.

Alex. Lowry, formerly with the Burk's Falls Hardware Co., called at Hardware and Metal's Toronto office on Tuesday. Mr. Lowry has been prospecting near Gow Ganda all summer and has staked several claims. He says J. E. Moseley, formerly of Huntsville, is doing a good hardware business in the silver city in the bush.

Quebec.

Jos. Laberge, tinsmith at Ange Gardieu, is dead.

Wilson & Deacon, tinsmiths, Lachute, have dissolved.

J. B. Damour, Ste. Philomene, Que., has been staying in Montreal.

The assets of M. Burel, tinsmith, Beloeil, were sold on October 27.

A. Lemieux, Henryville, Que., has been a caller on the Montreal hardware trade.

Joseph Bouchard, of St. Hyacinthe, Que., has been on a business trip to Montreal.

H. L. Fenerty, of the Halifax Shovel Co., has been on a business trip to Montreal.

J. L. Bourgon, St. Telesphore, Que., has been a caller on the Montreal hardware trade.

T. H. Jordon, of A. C. Leslie & Co., Montreal, is on an extended business trip to western points.

T. H. Newman, of Caverhill, Learmont & Co., Montreal, is away from business owing to a severe attack of pneumonia.

W. J. Stairs, of William Stairs, Son, & Morrow, Halifax, and G. S. Stairs, Eric Stairs and Miss Stairs have been staying in Montreal.

David Ouimet, master plumber of Craig Street West, Montreal, died on Monday after a few hours' illness. He was in business for 30 years.

Irving Smith, formerly vice-president of the R. E. T. Pringle Company, Montreal, is setting up in business in Montreal in electrical apparatus and supply lines.

John Lovell Caverhill, formerly of Montreal, a cousin of George Caverhill, of Caverhill, Learmont & Co., Montreal, was killed at Suffern Station, N.Y., while attempting to catch another train going in an opposite direction.

Coulson & Blaikie, manufacturers' agents, Montreal, are dissolving partnership on the first of the month. Mr. Coulson is taking over Mr. Blaikie's interests and intends carrying on the business. Mr. Blaikie is to rejoin the Dominion Wire Co.'s staff, calling on his old customers in Montreal city.

Arno A Bittues, managing director of the Gillette Safety Razor Co., was presented with a traveling bag and kit case on the occasion of his birthday last week by the office and factory staffs.

West.

Chaloner & Fitzgerald, hardwaremen, Grandview, Man., have dissolved.

The Cunningham Hardware Co., Vancouver, have the heating contract in the new houses being erected there by C. E. Tisdall.

Louie Kiel, of Davidson, Sask., will open up a hardware store about 20 miles from Kindersly, Sask., on the Goose Lake section of the C.N.R. There is no townsite as yet there, but Louie says there will be. Until he can erect a store he will conduct his business under a canvas tent.

Maritime.

The Gordon Nail Works will remove from St. John to Coldwater, where a new plant will be erected.

Major John James Gordon, proprietor of the Gordon Nail Works, St. John, was married last week to Miss Elizabeth Quartermain, of Oxford, England.

Charles S. Wilcox, M.P.P., for Hants County, N. S., and leader of the Opposition in the Nova Scotia Legislature, died at the Payzant Memorial Hospital, Windsor, N. S,, on October 11. Mr. Wilcox conducted a successful hardware business at Windsor.

What To Do in November

Artistic Touches Tend to Make a Window—New Subject for a Winter Window Design, a "Comfort" display—A Great Point in Christmas is to Have the Stock on Hand Early.

With the coming of November the hardware merchant should commence to display his winter lines, and to give to his windows that seasonable appearance, which is expected and looked forward to at this time of the year. October, being one of the "between" months, is rather a difficult period for attractive yet appropriate display, but there need be no difficulty so far as November is concerned. It is a good plan for merchants to make their windows reflect the character of the season, not only by the goods they are displaying, but by the general get up of the design. The articles by themselves do not always give the fullest impression. Often one sees a window of skates and similar lines, and yet the display does not seem to convey any real idea of winter or of the enjoyment of the sports concerned. The little touches necessary to make the window seem "alive" and full of the spirit of the times are absent. It is very easy for a merchant in setting his windows to use a little decoration to stimulate the interest of the observers. Just as gardeners' tools are improved by some artificial foliage and other green stuff, so skates, cow ties, horse blankets, or whatever it may be can be improved by the suggestion of ice or snow. It is the little artistic touches, which tend to make a window.

Lines to Display.

During the month the merchant should display his horse blankets, cow ties, lumbermen's tools, lanterns, sleigh bells, weather strip, snow shovels, skates, snowshoes, toboggans, sleighs, and hockey sticks.

Many merchants neglect to push their glass, putty, and paint for the restoration of the storm windows. At one time this was a very important part of the early November trade, but in recent years the demand has gone by unstimulated. A lot of glass, paint and putty could be sold if the lines were pushed well. Many a disreputable storm window is put up because the householder, not being provided with the articles to renovate them, is not inclined to put off the unpleasant operation of fixing the windows in their places. The merchant could run a display showing paint, putty and glass, along with stepladders, window cleaners, mops, pails, etc., and exhibit cards calling attention to the fact that a house with shabby storm windows is spoiled in appearance, and that the glass itself, unless well fixed, is always liable to come out of the frame and inflict on some one a serious injury.

Stoves, ranges, oil cookers and heaters should be brought into prominence. These articles are too often allowed to sell themselves. They are left at the back of the store, and unless a customer is really in dire need, a sale is not stimulated in any way. But there are many people already posessing a stove, range, or oil heater, who could easily be persuaded to replace the article they already have with one possessing more up-to-date features. Oil and spirit heaters, for instance, are extremely useful in a variety of ways, and many customers by being prompted to buy would find that they had been wanting such an article for a long time, although they were not aware of the fact. Why these articles should not be more strongly pushed is puzzling. Just like other articles they need a salesmanship.

Winter Comfort Window.

It has been suggested that a good window could be made of winter "comfort." It is not always easy to think out fresh designs, especially to the merchant who has accustomed his community to look forward to something novel from him at different times "comfort" window, therefore, has the advantage of being novel and atractive, and yet at the same time a good seller.

With the long winter days before them, customers would be very responsive to a window showing those goods, which so materially assist in making the house warm and comfortable. At the first blush the number of articles coming under this head may seem somewhat small, but this is not the case. In the ranges, oil and spirit heaters, different designs of gas fires, weather strip, various forms of electric, gas and oil reading lamps, curtain rods, screens, ash sifters, pokers, coal hods, and so on.

Going a step further, the merchant could fit up a mantel grate at one side of the window, with a small table near by, on which could be displayed a lamp, coffee percolator, etc. The other articles named could be placed around. With the aid of curtains and screens a very cosy little room could be designed, and at night time, with the help of a red light in the grate and a light in the lamp, the merchant could have a most effective window. This "comfort" window is worth following up.

The Christmas Campaign.

While meeting his current demand the hardware merchant should, this month, map out his programme for his Christmas campaign. If he has not already ordered his goods he should lose no time in doing so. The great secret of securing the best of the holiday trade is to be in time with the display. Customers should not be left to pick out their presents from other stores, only to find them saying afterward, "If we had only known you were going to have such articles, we would have waited." You have just what we wanted, but we did not think we could get them here, and we have already bought."

Even before the merchant displays his goods he should let the district know that he is going to have a special and comprehensive stock on show. He should create curiosity, so that no one will be tempted to buy elsewhere before the stock of the hardware merchant is seen.

It is a good plan to advise customers that they can have their goods stored until wanted. This will encourage an early visit from those who like to have first pick, and also set the stream of customers flowing. The merchant, to do this must have his goods on time, and therefore before the month is through the major portion, if not all of the stuff, should be in the store. Those who have already ordered their lines should go carefully over the list to see that all the stock is complete.

There is another great point in ordering early, and that is the delivery of the goods is rendered more certain. Early delivery is especially essential in these lines, that are not staple ones, but are simply being carried for the Christmas trade. The merchant has no desire to add to his dead stock, and be compelled, owing to late delivery, to wait until next year, before he can hope to get rid of fancy lines. With the higher grade cutlery and silverware, too, if there is a very heavy demand, there is always a chance that the jobbers may not be able to make prompt delivery. Therefore it is imperative to order early, and if those who are in the habit of waiting for any particular traveler find that he is not coming round in good time, they should send the order to the house. The great point, once more, in the holiday trade is to have the goods on hand, and to let customers know what you intend doing.

Value of Illumination.

With the holiday displays close at hand this is a good time to point out the value of proper illumination for windows. Much of the value of a good display depends upon the manner in which the window is lighted, and the effect of many a good display has been largely lost, because of poor lighting. There is something particularly attractive about a handsome display brilliantly lighted up and looking cheerful, up-to-date, and prosperous, and this is especially the case at Christmas, when illumination is everything.

It can be seen from the foregoing that the hardware merchant has a pretty busy month in front of him. Not only has he to attend to, and to stimulate his ordinary trade, but he has to prepare for, and to plan out, his Christmas campaign. It must not be forgotten that the more thoroughly this is done, and the more attention that is paid to every little point, the better the chance of making a great success of the Christmas venture.

Suggestion for Advertising Christmas Goods

Pays to Begin Early—Samples of Effective Booklet Covers and Holiday Advertisements—A Revolving Shelf Window Display.

ABOUT HOLIDAY ADVERTISING.

Merchants who have learned the rules of holiday selling know that it pays to begin early and increase the push and

Cover Design for Holiday Booklet.

effort as Christmas approaches. Don't, however, give all your advertising and

Holiday Ad. That Sold Goods.

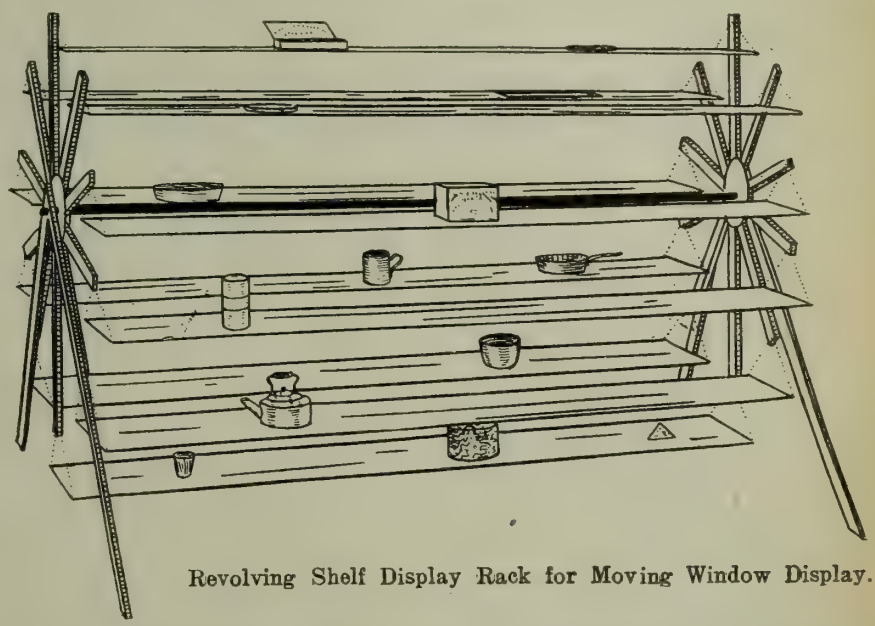
window and store display to small toys and fancy, expensive goods, but devote a fair share of both to low and medium-priced articles of everyday use, which have a ready sale at this season, and which somebody else will sell if you don't.

A look through your varied stock will suggest many things that can be utilized and advertised as profitable holiday sellers. There's a hint, too, for you who supply seasonable necessities such as fine goods, table cutlery, kitchen furnishings, stoves, ranges, etc. Harp strongly on the good sense shown in buying and giving useful things; on how much more such articles are appreciated.

In your early talk and advertising to the public you should aim to point out the advantages of early holiday buying, the benefit of making selections from a complete holiday stock, and before the crowds make choosing and holiday buying more difficult and tiresome.

Offering to lay goods aside on payment of a small deposit, for delivery at the customer's convenience, and to exchange such goods as can be exchanged without injustice to yourself or to other customers, if returned in good order and within a reasonable time, often lead to good and profitable sales that might otherwise hang fire and never materialize. Very often when goods are in this way brought to their attention you will find many of your customers will purchase or speak for a holiday article, make a deposit and ask you to lay it away until Christmas or such time as they may desire it.

Finally, see that the holiday spirit of helpfulness and good cheer is properly infused throughout your store and selling force. Do everything you can to make holiday buying easier and more satisfactory at your store than at any other store in your town. By all means keep up to date. Better be a little early than to be late. Add such new holiday lines as you consider salable and keep all the old lines. Keep your store clean and cheerful, a fit place for any lady to do her holiday shopping.



—

A REVOLVING SHELF DISPLAY RACK.

The accompanying illustration shows a revolving shelf rack, adapted for either a small or large window.

The mechanism for turning it consists of an ordinary electric motor connected under the floor of the window and connected to the pulley wheel on shaft by a leather belt. The adjustment should be such that the large wheels carrying the shelves should revolve very slowly. Brass plumbers' chain is used to support the shelves. To the persons looking in the window, the shelves then rise gradually to the level of their eyes, and as slowly disappear behind the mandrel.

There is a fascination about the device that draws people to the window.

Revolving Shelf Display Rack for Moving Window Display.

One reason may be that anything in motion is attractive, but another is that with the shelves full of small articles, one has to be a close observer to take them all in before they are carried past the range of vision.

Another way to use the device is to cut out a space a little wider and longer than the shelves at front and back of window flooring then suspend the floor of the window as a wide shelf to the revolving axle by chain and hooks thrown over the axle. The shelves will then have the appearance of coming up through the floor of the window.

In using this device, or, in fact, any window idea that is at all out of the ordinary, much of the advertising effect is lost if the name of the house using the device is not clinched in the observers' mind as firmly as the device itself. Be sure, therefore, to have your firm name stand out clear on the window or on some card bearing some such phrase as "Buy it at Brown's."

ENFORCEMENT POSTPONED.

As a result of the conference which took place last week between the deputation opposing the passing of the Extra-Provincial Corporations Act, in Manitoba, and four members of the provincial cabinet, the brokers were assured that the Act would not go into effect on November 1 next, as intended.

The matter was not discussed at any length until the members of the Government were quite willing to concede to the request of the deputation to have the date of the enforcement postponed until satisfactory alterations have been made. The arguments presented against the Act, recently published in Hardware and Metal, appealed to the ministers, and the necessity for a delay in the enforcement, as well as a change in the reading was quite evident to them. The four organizations composing the delegation were: The Board of Trade, the Winnipeg Grain Exchange, the Manufacturers' Association, and the Manufacturers' Agents of Winnipeg.

ABOUT BUYING BINDER TWINE.

In Hardware and Metal of October 2, letters were published from two representative Ontario retail hardwaremen, outlining existing evils in binder twine retailing which have made this class of business so unsatisfactory that some retailers have practically discontinued making any effort to sell twine in opposition to the numerous agents selling this line.

Desiring to secure the opinions of binder twine manufacturers on this question, Hardware and Metal wrote all Canadian manufacturers selling to the hardware trade asking their advice as to how to meet and overcome the evils complained about. Only one reply, however, was received and it is reproduced herewith :

Editor Hardware and Metal,—"We have your favor of Oct. 12th, and have read with interest the correspondence in your September and October publications, in regard to improving selling conditions of Binder Twine.

"It is difficult to place the whole blame of existing unsatisfactory Binder Twine conditions on any one class of distributors, whether manufactuter, jobber or dealer. The dealer will demand everything he can think of, to make his purchase as low as possible ; the middleman, or jobber, like the manufacturer, will offer everything possible to secure contracts. We feel, with the Canadian market open to the world's competition and prison-made Binder Twine, that many difficulties present themselves in establishing any uniform terms. Values, of course, are governed by the evenness and the quality of material supplied.

"The writer spent some time, trying to have the largest and most reputable twine manufacturers agree to the improving of selling conditions, but the manufacturers are as alarmed about losing business as those to whom they sell their twine, so no great benefit resulted.

"The points your publication refer to are those we have advised : to sell a firm only what they can dispose of, it being understood that it is an outright purchase, and the manufacturer will not accept return of any unsold portion. If all manufacturers adhered to this it would be one of the best remedies for the present evils."

Consumers Cordage Co. Ltd.

HOLDING CUSTOMERS.

Can you think of any farmer in your locality who has suddenly ceased his visits to your store? Can you think of a reason why he should cease buying your paints? If you cannot you should make it your business to find a reason.

The merchant himself or one of his clerks should take a day or two off some time and make a trip out through the country.

Every successful merchant knows that it is not half so hard to bring new customers to the store as it is to hold the regular trade. He should do all in his power to build up a big list of permanent customers.

One of the brightest sales managers in the country once said: "There is one man who knows a lot about your business and doesn't charge anything for imparting his knowledge. That fellow is the user of your article."

The man who is pleased with your merchandise is generally willing to speak well of it. The man who is displeased with it is just as willing to condemn it. Are your goods talking for or against you?

COLLECTING ACCOUNTS.

Just now the farmers of the country are realizing on their crops and therefore the present is a favorable time for merchants to look after their country accounts. The crops are rapidly being turned into money so there is no doubt that the farmers have the wherewithal to settle those accounts which they may have contracted during the summer season when money was rather scarce.

While the farmers who are on your books may be fully responsible for the amounts of the accounts, yet these accounts can be of no benefit whatever unless you get them taken off the books and place the cash in the drawer.

Merchants know that a tendency exists among farmers to delay the payment of their accounts until they have realized on the bulk of the season's crops. But this should not prevent any merchant from waiting for his money any longer than the time necessary for farmers to obtain enough to liquidate their indebtedness. You should not delay until the end of the year when the account has grown considerably larger and when it is more difficult to meet.

Establishing a system to protect yourself against bad debts is probably of greater importance than following up accounts properly. Be careful always when opening a new account. Where an asosciation has a protective system in vogue, it has something substantial to work upon.

A method now used extensively in the smaller places in the United States is that of having on hand a printed form to be filled out and signed by each applicant for credit.

This printed form contains the full name, present and past address of the applicant, where he is employed, whether married or single, the amount of credit which he expects to require and the terms upon which he proposes to settle. Every applicant for credit is asked to fill out and sign one of these forms before an account is opened with him and the man who refuses to fill out such a form, in all probability is not a desirable customer. On the other hand, the man who fills out the form, representing himself to be in better financial condition than he really is, can, if he fails to settle as agreed upon, be proceeded against for obtaining goods under false pretences.

THE TRAVELER AND THE CLERK.

A wise traveler will cultivate the acquaintance of the clerks in the stores on which he calls. It is to his own direct advantage and to the advantage of the house for whom he works, to do so.

The letter which follows written by a traveler for Holbrooks, Limited, to his firm illustrates the necessity of treating clerks courteously :

> "I called upon a grocer this afternoon, and after a pleasant business chat, secured an order for two cases of Holbrook's Sauce. After thanking him for his order, and giving him a sample for his own use, I turned my attention to the clerks, gave them a sample each, told them what we were doing, and asked them for their co-operation. After I got through, the grocer called me back, and said that he was very pleased to see his clerks recognized by a salesman. He said, "I am the proprietor of this store, but I am no use to you apart from giving you an order. My clerks are the men who will sell your goods for you.
>
> He recalled an incident that happened during the time that he was a clerk in a retail store. A traveler used to come in and ask him in a gruff manner if the proprietor was in. He said that this traveler never had a pleasant word for him, because he supposed he was only the clerk, and naturally felt hurt about it. "To-day," he said, "I have a store of my own, and have a good business, and this same traveler wonders why I never give him an order."

This represents the effect that the lack of courtesy has upon clerks. It means that less interest will be taken by the salesmen behind the counters in the goods sold by travelers and is bound to have a bad effect when these clerks become proprietors themselves.

POOR SALESMANSHIP.

A richly dressed woman entered a Toronto store recently and asked one of the clerks to show her a chafing dish, to which the clerk responded, "about how much did you want to pay for a chafing dish, Madam ?"

"That doesn't make any difference," curtly retorted the lady, with a toss of the head.

How often we find clerks asking prospective customers, "how much did you want to pay ?"

Unquestionably it would greatly facilitate the clerk's labors if he or she knew about how much the customer cared to invest. But cannot this usually be found out without asking the abrupt question ? And does the customer always know before looking at the goods just what she does want to invest ? And if she does know, does she care to tell ?

Evidently in the case cited, the customer very strongly objected to telling, and really felt that it was something of an insult to be asked such a question, presuming that the clerk would suppose that the price cut little figure with her, just so she was suited.

NEW ERA IN GRAND TRUNK AFFAIRS.

The importance of the change in the presidency of the Grand Trunk Railway, does not lie in the mere fact that Chas. M. Hays succeeds Sir Rivers-Wilson, but in the fact that it marks a distinctly new era in the administrative affairs of the railway.

Of all the great railway systems on this continent the administration of that of the Grand Trunk Railway has probably been the most unsuccessful, in spite of the fact that it ran though the oldest and best settled parts of Canada. The cause of this was unquestionably the fact that the executive head resided in Great Britain and not in Canada.

To be compelled to signal across the ocean before any important move could be made was not conducive either to the interests of the bond holders in Great Britain or those of the business men and others in Canada who were concerned in the Grand Trunk System. There has been a decided improvement of late years in this respect, but the best results certainly could not be obtained with the executive head 3,000 miles away, and who only came to Canada at periods of long intervals.

No ordinary business could be successfully run under such conditions, and a railway is just as much a business enterprise as that which sells merchandise.

Under the new order of things we may shortly expect something doing. Mr. Hays is a man who does things and knows what a railway should be in order to render efficient service to its clients, earn dividends for its shareholders, and interest for its bond holders.

It is to be hoped that under the new order of things benefits will accrue to all concerned : to the business men in Canada and to the bondholders and shareholders of the company.

The directors of the Grand Trunk are to be congratulated on at last having eyes with which they can see.

A little hot water will remove caked powder better than anything else. never use oil on a barrel of this kind until you have removed the caked powder with hot water. If hot water will not remove it then your rifle will have to go to the factory.

PRIZES FOR HOLIDAY ADS. AND WINDOW DISPLAYS

To encourage a greater interest in holiday advertising by special Christmas displays, Hardware and Metal again offers prizes for a Holiday Window Dressing Contest. Contestants will be divided into two classes.

For the best selling window display shown in (1) a city over 10,000 population, and (2) in towns and villages under 10,000 population.

In each case there will be three prizes as follows: 1st, $5 in cash; 2nd and 3rd, copies of "Hardware Window Dressing" (cloth bound, $2.50,—making in all six prizes totalling in value to $20.

To enter the contest send a clear photo of one or more Christmas windows, with a description and the name of the person who arranged the display. Photos must be mailed to us by December 31.

Most hardware merchants use increased newspaper space during the the Christmas season to boom holiday trade. We want copies of these advertisements.

The advertisement submitted should be about Christmas goods sold through hardware stores, such as cutlery, silverware, sporting goods, lamps, stoves, carpet sweepers, household goods or other holiday lines. Forward one or more clippings from your local paper to us, with the name of the writer of the advertisement, and the name of the paper it was clipped from. A prize of $5 cash is offered for the best newspaper advertisement as described.

The award will be made by an advertising specialist and will be announced, with a reproduction of the prize ad., shortly after the close of the contest. All entries should be mailed not later than December 31.

Another prize of $5 cash will be awarded to the merchant or clerk sending the best holiday booklet advertising holiday gifts purchasable in his hardware store. With the ad. or booklet send a description of any special selling plans or display features used during the holiday season.

Address : "The Editor," Hardware and Metal, 10 Front Street East, Toronto.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

Sash Cords—Now 32½c.

Toronto.

Cotton Goods—Up about 5 per cent.
Pipe Cutters—Advance 10 per cent.

MONTREAL.

October 29.—No changes have been announced in jobbing prices, although copper is much weaker in tone, and a continuance of the depression in the primary markets will bring about a decline here. Tin showed signs of sagging but pulled up towards the end of the week. There is no doubt that but for the strong consuming demand local figures would have more closely followed the primary markets. Jobbers report plenty of orders, and the general opinion is that business is excellent. No stocks are being accumulated by the smaller users, although of course the larger interests, especially locally, are putting in good stocks for the winter, as the close of navigation means so much to them in freightage.

Heavy consignments are arriving weekly at the port, and orders are being distributed as quickly as possible. Trade in sheets is very good, and booking in these lines extend far into next year. Spelter is a strong seller. Iron and steel show no abatement in development, and great activity in Canadian furnaces and mills are reported. The firm tone of iron and steel across the border is doing much to keep up the strength of the other metals. For the time being the primary spelter markets are creating great attention. Quotations in the States are now very high, and rumors of a corner are being circulated. But a few cents separate the home price and the price at which English spelter can be laid down in New York despite the high price of the metal in the Old Country.

PIG IRON—There is a good tone to pig iron and steel and Canadian furnaces and mills report heavy business at firm prices. Large consignments of pig iron continue to arrive at the port, and prices hold firm despite a break in Cleveland warrants. The United States markets continue to shows less activity which is looked upon with relief as it allows furnaces and mills to digest the orders that have been accumulating. Steel producers seems to be fully sold up, and it is reported that not only are the Steel Corporation mills operating at full capacity, but that in many lines they are booked eight months ahead. Pig iron has also adopted a more sedate movement, but the steady buying movement continues all over the country. With iron stocks much heavier than they were at this time last year, Cleveland warrants are quoted at 51 shillings and three pence, a decline of six pence over last figures. It is probable that the advance in the Bank of England rate had something to do with this decline.

COPPER — Copper has not been changed this week, and local jobbing prices continue around 14c, with of course shading for good lots. But for the stronger trade showing, the weakness in the primary markets would undoubtedly have affected prices, and it must do so unless an improvement takes place in New York. London has entirely gone back on the New York copper market. The advance in the Bank of England rate was a hard hit at speculators, and with the heavy stocks that are being carried the situation is far from being strong. In the circumstances New York had to decline with London, and the situation is not a very bright one at present. Production is away ahead of consumption, and although heavy exportations still continue from New York the stocks will now cost more to carry. It would be safer if the copper remained in New York. With other mines, Granby has been turning out copper as fast as it can, and last week it made a new record for the year by sending out 27,573 tons, making 808 850 tons for the year to date.

TIN — Despite fluctuations in the primary markets, tin has been unchanged, and quotations for jobbing lots are still at 32½c. Business has been very good, and there is a firm tone to the market. As in the case of copper the advance in the Bank of England rate made the tin market weak in London, but the metal is in a better position than copper, and recovery is much more easy. With the demand for tin plate so good in the States conditions are favorab'e for a stronger market in the raw material.

SPELTER—Spelter is unchanged at $5.75, and good trade is reported. For the moment great interest is centered in the U.S. spelter market where high prices are giving belief to the report that a corner has been brought about. The high prices ruling have cut off what Canadian trade the United States usually gets, while the home price is now but a few cents cheaper than the price at which English spelter can be laid down. Spelter generally is under very strong control, and the development in iron and steel has greatly helped the metal.

LEAD—Lead is unchanged at $3.60 with Trail at $3.50. Buying shows improvements. The English market has been slowly sagging, and prices are now around those obtaining at the beginning of the month. There is too much metal in sight for consumption, and the exportations of heavy quantities from Australia is not improving the situation.

TORONTO.

October 29.—There is a considerable volume of business being done by the local houses, but with the exception of iron and steel and spelter the metals are rather disappointing. Copper, tin and lead are unsteady. Immense quantities of ore from the Lake Superior region are being sent down to Pennsylvania and the east this fall, and this has helped the Canadian metal and ore situation at Port Arthur and the Soo.

Spelter has advanced 25 cents a hundred locally and the market is strong. Manufactured iron and steel goods are advancing at the rate of one line at least per week. Recently pipes increased in value and this week pipe tools are going up. Rods and wire are holding firm at their new prices and good trading is being done in them.

PIG IRON—Trading continues very good and orders are breaking into the year 1910, booking and inquiry for the first half of next year being quite active. no advance has been noted now for the past fortnight, but almost daily a perceptible firmer tone is abroad. Midland is at $22; Hamilton about the same; Clarence, $21; Summerlee, $23; Cleveland, $21.75. Immediate delivery is impossible, even manufacturers who are getting supplies under contract are experiencing difficulty in getting sufficient pig iron for their needs.

SPELTER — This metal in common with demand for sheets and plates, is going out in splendid sales. Under a steady market all summer the quotations have advanced 25 cents a hundred, the local price now being $6. Sheet zinc, too, has advanced at the same rate, 5-cwt. casks being now $6.75 and part casks $7.

COPPER—The volume of business just now is at a normal level, but being unsteady the local situation is somewhat disappointing. The Toronto quotation is unchanged—14c for lake and 14½c for casting ingots. Supplies are amp'e, present stocks on hand all over Canada and the United States sufficing for two months, without any production going on. More copper is going into use every day, however, and some buyers are cautiously anticipating their requirements. Brass founders and manufacturers all over the country report heavy orders for brass goods.

SHEETS AND PLATES—These two lines remain around the high water mark in trade. The volume of business done this year is reported to have been simply enormous. New uses are being found for both black sheets and galvanized sheets, and where formerly box lots were sold carlots are not infrequent.

LEAD—While trading is fairly active there is some unsteadiness to the lead situation. The quotations remain at $3.65 for imported, and $3.55 for domestic.

TIN—This metal is in about the same position as is lead. Moderate business is being done at 32½c, last week's figure.

OLD MATERIALS — Iron and steel continue to carry the old metal market. The other lines are active and strong,

but iron and steel figure in the volume of trading passing. Dealers are paying for: Heavy copper wire, 11¼c; copper bottoms, 10½c; heavy red brass, 10¼c; heavy yellow brass, 8¾c; light brass, 6½c; tea lead, 2½c; heavy lead, 3c; scrap zinc, 3¾c; No. 1 wrought iron, $11; machinery cast scrap, No. 1, $15 to $16; stove plate, $13; malleable and steel, $8; old rubbers, 9c.

HARDWARE MARKETS

MONTREAL.

October 29.—The markets have been without any particular feature this week, with the exception of an advance in sash cords which are now at 32½c. The excitement over the nail and wire changes has subsided, and now the prophets are selecting the next item to advance. There is a firm tone all the way round, and there is little doubt that merchants will before long be paying much higher prices on most lines. Cotton rope, cotton clothes line, and bar iron seem the next best probable items to show higher figures.

The volume of business gets heavier as the close of navigation approaches, and the shipping departments of the jobbers have as much as they can handle without working overtime. Orders are well assorted, and it is apparent from their sorting up character that dealers generally are experiencing a good demand. Holiday lines in the shape of cutlery, silverware and plated ware are in better call, and a very satisfactory trade has opened up. Winter lines are also in good request, there being a strong call for horse blankets, cow ties, sleigh bells, cross-cut saws, axes, weather strip, and snow shovels.

The aggregate volume of trade is extremely satisfactory, and if the year finishes at the present rate, more than a normal year's trading will be done. The east has quickened up, and with the northwest buying so well trade is assuming big proportions.

BUILDERS' HARDWARE—The market is very firm. Sash cords have advanced from 30c to 32½c. Delivery continues difficult in some makes of lock sets, and orders are away behind hand. Good assorted orders are coming in, and trade is very satisfactory all the way round. We quote: Lock sets (inside) $4 per doz. and up, lock sets (outside) $13.20 and up, common rim locks $1.10 per doz., porcelain knobs $1.10 per doz., sash cords, 32½c

WINTER LINES — Horse blankets, weather strip, sleigh bells, stable fixtures, are in stronger demand. Good sorting orders have been received in cow ties, lanterns, lamps, and burners. There is a strong movement in enamelware, the demand from the northwest maintaining its strength. Household utilities such as carpet sweepers, wringers, washers, baskets, brooms, scrubbing brushes are moving well in a general assorted way.

CUTLERY, SILVER AND PLATED WARE—A very brisk movement has opened up in these lines, and a record season seems to be developing. Many dealers are placing their orders earlier this year, and there is no doubt that the wisdom of doing this is gradually being perceived by the trade generally. Carvers in cases, table cutlery, table spoons, berry spoons, and pickle frames are the most prominent movers.

SPORTING GOODS—Skates, hockey sticks, straps, pucks and snowshoes are moving actively, and strong inroads are being made on the heavy stocks laid in by the jobbers. The colder weather has quickened the sale of most sporting lines. Good repeat orders have come in for guns and ammunition. Gymnastic lines, such as dumbbells, Indian clubs, fencing sticks and basket ball outfits have shown stimulation.

MINERS' SUPPLIES—There is still a steady demand for miners' supplies, the most prominent movers being picks and powder. Railroad supplies are likewise in good request, construction work is still being pushed forward energetically in many districts. We quote: Miners' picks, 16½c a pound; prospectors' hammers, 16½c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—The market is very firm under a good demand. We continue to quote: Discounts on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

NAILS—The advance in nails does not seem to have checked the demand, and some very good orders have been received during the week. We continue to quote: Wire nails, $2.25; cut nails, $2.40.

SCREWS—Good assorted orders continue to come in. The market is firm and unchanged. We quote: 85 and 10 off for flat and round head bright; 75 and 10 off for flat head brass, and 70 and 10 for round head brass.

LUMBERMEN'S SUPPLIES—Cross-cut saws and axes are in very good demand. Camp supplies are also strong sellers. The market is unchanged, and we quote: Cant hooks, $12 a dozen and up; axes, $6.50 a dozen and up; axe handles, $1.15 and up; cross-cut saws (inferior) 25c per foot and up; better grades 43c per foot and up; axe wedges, 25c a doz. and up.

SHOVELS — A good demand has arisen for snow shovels. The call is steady in other lines. We quote: First and second grade of spades, 60 and 2½: 3rd and 4th, 50 and 2½; scoops, 1st and 2nd grades, 50 and 5; 3rd and 4th, 45 and 5.

WIRE—A steady volume of trade is being done. The advance in plain wire, etc., does not seem to have checked the call to any great extent. We quote: Barb wire, car lots, mixed, $2.50; small lots, $2.55; plain twist, car lots, $2.80; small, $2.85 Galvanized wire, No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots, f.o.b., Montreal. Coiled spring fencing, $2.30; straight and mixed car lots, and $2.35 small lots. Plain wire, bright, annealed and annealed and oiled, $2.35 base. Staples, bright, $2.60; gall., $2.85.

TORONTO.

October 29.—Trading is steady and good, demand at present being for seasonable lines in the country and builders' hardware in the cities and larger towns. While the volume of business is hardly so heavy as at the beginning of the month—and some jobbers state they could handle more orders if they came to hand—hardwaremen and jobbers are generally well satisfied with what is passing. Individual sales during the week have been moderately large, with a naturally increasing demand for winter goods. Sentiment in the trade is now more than optimistic, some of the houses already being able to show sales records ahead of any previous year in their business.

Prices are firm for all prominent hardware lines, and especially manufactured iron and steel goods. In the tool class, pipe cutters have advanced at least 10 per cent. on all makes. Cotton goods, too, have advanced, though only slightly. No. 8 sash cord is up a cent, and other cotton lines have increased values from one to two cents.

BUILDERS' HARDWARE — The larger Ontario towns are yet taking up fair quantities of builders' hardware, and Toronto builders are pressing for the filling of their orders. There is noticeable a lessening in demand, though hardwaremen say they have their hands full trying to keep up with present inquiry. Tools are selling well; and all prices are firm. Building paper is having a record season.

SEASONABLE LINES—Eearly winter goods are supplanting fall lines. Shovels and spades are active, and snow shovels and scrapers, etc., are especially brisk. Wood saws, axes, and tool handles are prominent in almost every order. Christmas articles are still light on order, but inquiry has increased.

HEATING AND LIGHTING GOODS —The furnace trade in Toronto and Ontario generally was never so brisk as it is this fall. One factory turning out between 125 and 150 hot air furnaces a week is unable at present to supply for immediate delivery and is accepting time orders only. This incident is but one illustration of many which might be given. The same story is true of stoves, particularly kitchen ranges. They and base burners, with oven attached, are good sellers. The hall stove line is not so active, furnaces replacing then to a large extent in the more settled parts of

the province. Wood burners are active, going out to the north country. Lamps and supplies, stable and road lanterns are seasonable goods and much called for just now.

HOUSEHOLD GOODS—Housecleaning articles like tubs and pails, brooms and mops, etc., are steady. Kitchen articles in enamel, galvanized and tinware are fair. Sales have let up a little.

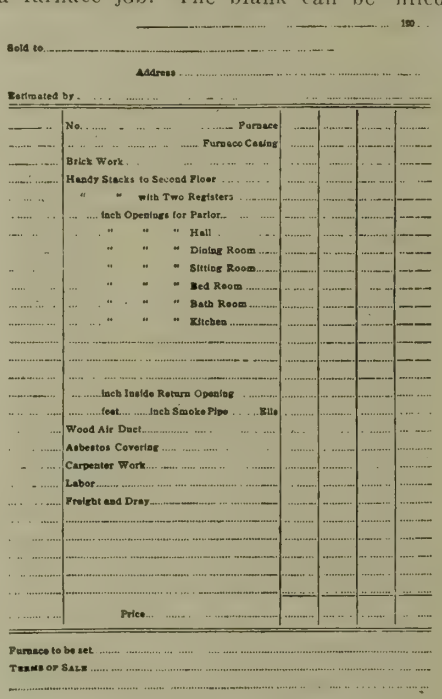
CUTLERY AND SILVERWARE—There is a strong demand for medium grades of cutlery in small lots. Silverware is slow, though the approach of the Christmas holiday season has opened up inquiry fairly well. Some few sales of plated ware were made this week.

COTTON GOODS—Another slight advance has been made in cotton twine, rope and lines, the second within the month. The advance is but slight. No. 8 sash cord is now 32½ cents instead of 31; for cotton rope the price is 24 cents for 3-16 and larger sizes; and for cotton clothes lines the discount is now 27½ off.

HEAVY GOODS—Wire nails hold the advance made a week ago and demand is yet enormous. Production, too, is great. Structural steel is active, and screws, wire, bars, pipe and rods continue steady lines.

SPORTING GOODS—This is a "between seasons" week. Guns and ammunition have eased up considerably and outdoor sporting goods are almost dead, so far as actual sales are concerned. Winter goods are inquired about, and already great quantities of snowshoes have been sent to the west. Hockey sticks, skates, pucks and supplies seem to be the coming prominent lines.

U.S. IRON TRADE.



Cleveland, O., October 28.—The Iron Trade Review says: Conditions in the iron and steel market have advanced to the point where the situation is a very favorable and gratifying one from a seller's or maker's standpoint. Mill books are filled with orders, and capacities are being taxed in some lines so that no longer the problem of reviving trade, but rather that of handling present business is of first importance. Buyers are clamoring for material, in the face of the strengthening market. The steel maker now finds himself in a strong position to discriminate between offerings and to exercise a more complete control over the factor of speculative effort. There is no evidence, however, that the producer is inclined to take advantage of present conditions at the expense of the consumer. On the contrary, the impression is being given out that sound and reasonable policies will govern in the advance of prices.

ENTHUSIASM AMONG SALESMEN.

There is no better element to have in your store than enthusiasm among your salespeople. Have some system for originating and keeping up this spirit. For instance, a merchant might offer prizes for the best sales during the month. If you have a line which should be pushed, offer a prize for the best monthly sales in that line. Any legitimate method to make it an object to your clerks to sell more goods is well worth what little extra it will cost.

BLANK FOR FURNACE WORK.

Herewith is shown a reproduction of a page from a booklet recently published by the F. Meyer & Bro. Co., Peoria, Ill. The booklet is called the Handy furnace estimating book and tinners' ready reference. The page reproduced is a blank form for estimating a furnace job. The blank can be filled

out by any dealer, whether he has a techical knowledge of heating or not.

WHEN YOU HAVE MADE A BAD INVESTMENT.

One of the hardest things a business man is called upon to do is to accept a great loss when he has made a mistake without trying to get his money back by the same means that he lost it. He says to himself: "Well, I am going to keep that thing up long enough to get my money back, and then I'll quit." But, as a rule, it is a mistake to continue in a thing which your judgment condemns.

When you are convinced that you have made a mistake, that you have entered into some business relationship or have gone into something which you should have kpet out of, cut it off as quickly as possible.

Many a man has made the fatal mistake of continuing in a bad venture, trying to get his money back. Most business men find that when they make a mistake, no matter how great the loss or how unfortunate, the best thing to do is to apply the heroic treatment, amputate the diseased limb, not try to palliate the symptoms with medicine.

A New York business man told me that he made an investment outside of his own business a few years ago, and that it did not turn out well, but that he was so determined not to lose any money, and to make it win, although it was a business which he knew practically nothing of, that he kept putting in more and more until he found that he had over two million dollars in the venture. He had made his money in his own business, which he knew all about, and after he found he had made a mistake in the new venture, when people laughed at him for his failure, his pride was touched, and he determined to show them that he could win out even in a business which was foreign to his training.

He said that his experience had taught him two lessons; to keep out of things which he knew nothing about; and when he found he had made a mistake, no matter how great the loss, to take his medicine and quit immediately.—Success Magazine.

"PUSH—DON'T KNOCK."

Upon a door I saw a sign;
I cried, "A motto, and it's mine!"
A wiser thing I never saw—
No Median or Persian law
Should be more rigidly enforced
Than this, from verbiage divorced,
Its logic's firm as any rock—
"Push—don't knock."

'Twas simply meant to guide the hand
Of those who wished to sit or stand
Within the unasuming door
This weight of sermonry that bore
'Twas never meant to teach or preach,
But just to place in easy reach
The ear of him who dealt in stock—
"Push—don't knock."

But what a guide for life was that—
Strong, philosophical and pat;
How safe a chart for you and me
While cruising o'r life's restless sea;
Push, always push, with goal in view,
Don't knock—avoid the hammer crew;
This rule will save you many a shock—
"Push—don't knock."

When on that door I see the sign,
I say, "Great motto, you are mine!"
No stronger sermon ever fell
From human lips; no sage could tell
The hothead youth more nearly how
To point alway his vessel's prow;
There are no wiser words in stock—
"Push—don't knock."

Do not be discouraged if a window dosen't bring immediate sales. Weeks later you will have calls for "one of those hammers I saw in your window," for instance. People may not be ready to buy at the time your display is made. If it's a good window, it will impress itself upon them, however.

Trade Gossip from Canada's Eastern Provinces

New Hardware Store Opened at Halifax — Reorganization of Montreal Firm—St. John Nail Manufacturer Married.

ST. JOHN.

October 27.—A delegation from St. John is now in Ottawa interviewing Sir Wilfrid Laurier on the subject of having an increased subsidy offered for the construction of a dry dock and ship repairing plant at this port. The committee appointed by the local Government to choose a site for the erection of a sanitarium for tuberculosis is expected to make a report in a few days.

Major John J. Gordon, proprietor of the Gordon Nail Works, West St. John, was married last week to Miss Elizabeth Quartermain, of Oxford, England.

In view of the fact that the expropriation by the city of a portion of the property of the Gordon Nail Works, has left the industry somewhat cramped for room, it is probable that that plant will be moved to the site of the old rolling mills, at Coldbrook, three miles out of the city, along the line of the I.C.R. A new building would be erected and the plant extended somewhat, if this is decided on. W. E. H.

HALIFAX.

October 26.—A new hardware concern opened up business here last week, the Lawrence Hardware Co., at 152 and 154 Granville Street, and although the firm is new, the members of it have had much experience in the trade, all three having been connected with the H. H. Fuller & Co., hardware business up to the time that firm was burned out. H. G. Lawrence, the president of the new company was a member of the Fuller firm; A. W. Way, the vice-president has spent twenty-five years in the hardware business, and C. H. Bennett, the secretary-treasurer, has been twenty years in the Fuller Company's employ.

The new concern will deal in general hardware, and will make a specialty of builders' hardware, mechanics tools, cutlery, silverware, and household hardware. Particular attention will be paid to builders' hardware and mechanics'

H. G. LAWRENCE, HALIFAX.

tools, and the north store is being fitted up for the mechanical department. The south store is now well stocked with general wares and is ready for business.

The goods display system adopted by the firm will no doubt prove very satisfactory to the patrons. Counters are done away with, and only counter ledges under the shelves and silent salesmen show cases used. On the walls are show cases and shelf boxes on which samples of goods are plainly in view, so that customers can make their own selections without depending on the judgment of the clerks attending them. This system is operated in both departments and the big double building is stocked with new goods from the cellar to the roof. J. H.

Float Used by Wm. Stairs, Son & Morrow, Halifax, in Labor Day Parade.

MONTREAL.

October 26.—An important development has taken place in connection with the Canadian Sales Company, St. James Street, Montreal. The manager, J. Sophus, has been joined as partners by John Drewson, engineer, and J. E. Johnston, accountant, and with this additional strength, the productive scope of the firm has been greatly widened.

Not only is there now an import department, but manufacturing and electrical departments, and the company has launched forth into a very extensive yet comprehensive producing and selling campaign. The import department comprises the many agencies which the Canadian Sales Company at present represent, and also other lines which the company import themselves.

The manufacturing department comprises the making of various kinds of wire goods, such as conductor strainers, coat hangers, lamp shades, and florist supplies. A commodious factory, equipped with the latest machinery for turning out these goods, has been established at St. Paul Street, the mechanical staff being under the direction of F. S. Downham, who is an expert in this particular industry.

J. SOPHUS, MONTREAL.

The electrical department comprises the cleaning, oiling, and general maintenance of electrical motors under a contract for various terms, this contract, including a weekly or fortnightly inspection. This is an entirely novel idea, and has already been well received. This department is under the charge of W. E. Bullen.

An important branch of the company is the giving of expert advice and estimating free to clients by the firm's engi-

neers. The Canadian Sales Company have already several travelers on the road, and are represented by agents in all large centres of the Dominion. Mr. Sophus continues to be general manager, while Mr. Drewson is works manager, and Mr. Johnston, secretary and treasurer.

Interesting Trade Items Gathered in Ontario

Kingston to Have Dry Dock—Business Change at Ottawa—Lloyd Harris, of Brantford, Announced as a Supporter of the Co-operative Movement—Brantford and Smith's Falls Manufacturers Unite—New Theatre at Owen Sound.

KINGSTON.

October 26.—An important announcement was made to-day, when it became known that the Kingston Government dry dock had been leased to W. J. Fair, of Kingston, for a term of twenty-one years, at the rate of $10,000 per year. A company is to be formed, with Kingston capital. The dry dock has not been a paying concern, for the reason that it has not had a fully-equipped repair plant, and for this reason, vessels went elsewhere for repairs. The new company will instal an up-to-date repair plant, and this will mean that the dry dock will be a very busy place.

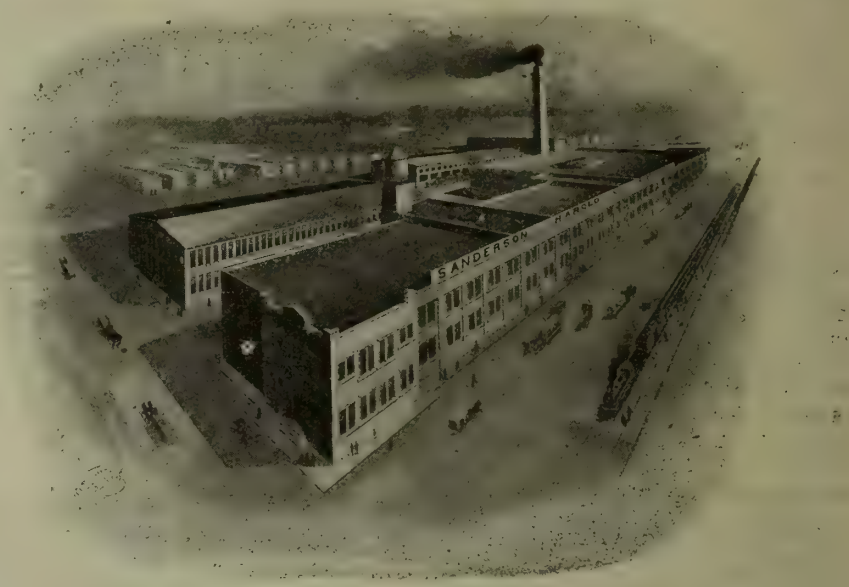
E. G. B.

OTTAWA.

October 26.—The National Mfg. Co. report a heavy trade in stoves and ranges. Indeed, the factory has been running overtime, and even then the demand remains in advance of the supply. Their Brockville factory, which manufactures cream separators, etc., is also busy filling orders.

The Ottawa Paint Works report a scarcity in glass. Linseed oil is now very high, being 76 cents a gallon by the barrel. Turpentine is 82 cents a gallon.

An invention that promises to simplify the intricate mechanism of automobile engines is the diffenential gear lately invented by Geo. J. Dallison, of this city.



The local branch of the Canada Cycle & Motor Co. has been taken over by Ketchum & Co. This means that Ketchum & Co. will have the agency for Russell machines for the coming year, as well as the "Silent Knight" engine. The present quarters will be maintained as showrooms, and those of the Canada Cycle & Motor Co. will form their garage.

G. E. M. H.

PARIS.

October 27.—As readers of Hardware and Metal will remember, a disastrous fire occurred here last Christmas eve, destroying the factory of the Sanderson-Harold Co. Several towns anxious to secure the industry made offers to the company, but the town of Paris placed a temporary factory at the company's disposal, and the company decided to rebuild here, using the temporary factory and two unburned warehouses in handling this season's trade.

The new plant has now been completed, it being situated on a six-acre site beside the G.T.R. main line at Paris Junction, the company having their own siding into the works. The main factory building is 292x62 feet, two storeys in height, of red pressed brick, mill construction. The boiler and engine room is 40x60 feet, the dry kiln 20x50, and warehouses 52x90 and 50x90 feet. The machinery is new and specially adapted for the turning out in the best possible manner the goods which this company manufacture—refrigerators, screen doors and window screens.

New Plant Erected at Paris Station by the Sanderson-Harold Co.

The whole plant is protected by sprinkler system, while the Webster system of heating is used. A good feature of the new works is the large windows to let as much daylight in to the workmen as possible.

W. W.

CHATHAM.

October 26.—The firm of Campbell & Callahan, which has been carrying on a large business in furnace and heating work, tinsmithing, metallic roofing, etc., has been dissolved, J. N. Campbell retiring. Frank Callahan will continue the business.

The possibilities of metallic roofing are shown by the contract for the metal shingling of Geo. Cramer's new livery barns at Wallaceburg. Upwards of 240 squares of steel shingling were used.

V. L.

BRANTFORD.

October 26.—The Brantford Emery Wheel Co. has moved into its new quarters on Pearl Street.

Ross & Short, Galt, have secured the contract for the heating of the Dunnville House of Refuge, the total cost of which will be about $30,000.

The Schultz Bros. Co., have been awarded the contract of the new collegiate building here, at a cost of $64,519, exclusive of plumbing, heating, electric wiring, ventilation and dolomite flooring, which will bring the total cost to about $80,000. Owing to the high cost, the collegiate and technical buildings will not be erected separately as at first proposed.

With the advance in the price of broom corn, and the consequent increase in the price of brooms, local hardwaremen look forward to a boom in the purchase of floor brooms. The floor brooms are used almost altogether in England, and they are very popular here, but the low price of brooms has worked against their sale. Now, however, the sales are expected to materially increase in quantity.

Martin Bros. will erect a concrete storage warehouse on Erie Avenue.

"The Canadian Co-operator," a magazine published in Brantford in the interests of the Canadian co-operative movement, has made its initial bow in this city, being distributed free to the members of the local Co-operative Society, says:—"That indefatigable Parliamentary champion of the movement, F. D. Monk, M.P., intends to bring in again a Co-operative Bill in the next session. In the last session the movement had a valuable recruit on the other side of the House, in Mr. Lloyd Harris, M. P., one of the brightest and best of the new members and a man of great business capacity. Mr. Harris is a charter member of the Brantford Society, and on behalf of the Union, has done consider-

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises should not fail to use the Want Ad. Advertisement page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere who is looking for just such a proposition as you have to offer.

WANTED—Hardware salesman for retail store; must be good stock keeper. Write, stating age and experience and salary expected. None but first-class stock keeper need apply. Apply Box 904, HARDWARE AND METAL, Toronto. (44)

able work in interviewing the Premier and other authorities at Ottawa with the view to the re-introduction of the Bill as a Government measure."

Watt & Squire exhibit a monster California pumpkin, weighing 90 lbs. in their window this week, it drawing a great deal of attention.

E. L. Squire, for some time with Howie & Feeley, of this city, has joined the staff of the Russill Hardware Co., Toronto.

The Cockshutt Plow Co., will hereafter handle the Frost & Wood line of farm machinery in Western Canada. The Cockshutt Co. manufacture a complete range of plows, seeding machines and other farm implements adaptable for spring work, and the Frost & Wood Co. a full line of harvester and haying tools. The Cockshutt Co. have acquired a financial interest in the Frost & Wood Co., and Harry Cockshutt, has been elected a director and vice-president of the Harvester Co. Permits have been issued for the erection in Brantford of a storage and show room at a cost of $2,900, and a brick core room, at a cost of $14,000 in view of the above amalgamation.

WALKERVILLE.

October 26.—It has been decided to establish a Canadian branch of the E. M. F. Automobile Co., of Detroit, here. Capital for the new enterprise is being furnished by the firm of Hiram Walker & Sons, while Detroiters are also interested. W. E. Flanders, of Detroit, will be president of the new company, which is capitalized at $400,000. It is expected that 200 men will be at first employed, the number being eventually increased to 1,000.

W. E. P.

OWEN SOUND.

October 25.—Creeper & Griffin, the hardware men, have two very attractive windows, both of which are attracting considerable attention. The south display is a "hunters' window," which has excellent specimens of moose, red deer, prairie wolf, wild cat, and grey squirrels, besides a display of guns, ammunition and sporting goods. The north window is devoted to lumbermen's supplies—showing the firm's special brand of axes and saws and electric welded chain.

An up-to-date theatre is being built on East 2nd Avenue, by John H. Moore, at a cost of $12,000. The building is to be of solid brick, covering a space of 125 x 48 feet, of fireproof construction throughout. The stage will be fitted with the latest scene shifting machinery and supplied with a fireproof curtain. The building is expected to be ready for opening sometime in November. Plans were prepared by Forster & Clark, Owen Sound.

News From the Prairie and British Columbia

Victoria to Have Two Large New Buildings—Business Transfers in Western Towns—Mica Fields in B. C.

INNISFAIL.

October 26.—P. T. Goulter has sold the business of the Innisfail Hardware Co. to N. H. Briggs and J. T. Rogers, two hardwaremen from Shoal Lake, Man.

REVELSTOKE.

October 20.—O. Young, the New York mining engineer, who has spent three weeks looking over the mica deposits in the Big Bend, says these mica fields, in his opinion, have undoubtedly an important future. The deposits are extraordinarily large, the mica crystals impregnating the schists in large numbers and the crystalization is on a large scale. The deposits occur in numerous parallel strikes. They are easily worked, the only difficulty being the transportation problem, and in connection with that he congratulates the Board of Trade on having taken steps to have the Government build a wagon road from the head of navigation. If that is done he says it will solve the problem sufficiently to enable the development to be carried on and a limited amount of the mineral shipped out.

The bands of mica schists contain segregations of quartz of from four feet to 100 feet in width, and these carry mica crystals, the size of which makes them of high commercial value, while the quality is unsurpassed. The crystals will give sheets of mica two feet in length. Many of the crystals are fractured by the excessive brecciation of the enclosing rocks. In one strike of mica crystals he found them extend for the extraordinary length of two and a half miles and in places where there was deep erosion the presence of the crystals indicated their evident extension to considerable depth.

Mr. Young has advices from a New York firm whose representative is considered to be one of the five leading mica experts in the world, that from the samples sent and information supplied as to quantities of the mineral available, the Big Bend is bound to become one of the leading mica fields of the world, and they are organizing a company with large capitalization to acquire and operate these claims on a large scale by the most up-to-date methods.

A local syndicate is being organized to hold and develop the property in the meantime, till negotiations are completed for its being taken over by the proposed New York company.

VICTORIA.

October 22.—Trade, considering the time of the year, is keeping up very well.

A permit has been taken out for $45,000 for the erection of the Royal Bank building. This will be two storeys in height, with a very fine stone front.

Victoria is to have a new theatre. The new building, which will be erected as quickly as possible, will be one of the best as far as general conveniences are concerned on this coast. The building will cost $75,000, and will seat 1,500 people.

Tenders have been received for 87,500 feet of steel pipe for waterworks purposes, The specifications call for a type of pipe known as Mannismann steel tube. J. H. Rickaby was awarded the contract, as his pipe was the only one of the three received which was in accord with the specifications, The contract price was $40,928.45.

C. P. Spencer Smith, managing director of the cutlery firm of Thos. Ellin & Co., Sheffield, England, was in town this week. Mr. Spencer Smith also represents the following English firms: S. A. Ward & Co., Sheffield; Samuel Osborne & Co., Sheffield, and Haggie Bros., Gateshead-on-Tyne.

The city council has decided to purchase a large water meter, at a cost of $1,278, to register the amount of water supplied to the Oak Bay municipality.

J. H. McRae, representing the Gillette Safety Razor Co., Montreal, was in town this week.

W. B. C.

ERROR IN ADVERTISEMENT.

Owing to a mistake made by one of the engraving firms in Toronto sending Hardware and Metal's ad. writer a wrong engraving, similar in size to the "Monarch" cobbler's outfit illustration used in the Taylor-Forbes Co.'s advertisement, an error was made in this firm's ad. on the front cover of the Oct. 23 isue of Hardware and Metal, the "Eaton" outfit being advertised instead of the "Monarch." The Taylor-Forbes Co. have asked Hardware and Metal to announce that they do not wish to be held responsible for the engraving company's mistake.

THEY DON'T TAKE IT DOWN.

In every country town there is a sign at the railroad crossing like this: "Railroad Crossing."

Now, everybody in the neighborhood knew it was a railroad crossing the day the track was laid. When the sign was put up it took a couple of days for every inhabitant to become familiar with it.

But did the railroad take it down? No. If they had the warning would have been forgotten in a week and smash-ups and damage suits would have resulted.

Transient advertisements act the same way. You must keep everlastingly at it, like the railroad crossing sign.

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook — Hardware Quotations Corrected by Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Oct. 29.—There is a slight falling off in the market output and demand just now. The trade is quiet everywhere with the exception that retailers are busy in stoves and heaters. The builders' lines are very weak and retailers over the country are well stocked, and are waiting for a more active winter trade. As a consequence only specialties are going out now, although the demand for chains of all kinds, and for pipe and fittings keeps up well. We quote advances in several lines, cut nails, harvest tools and Canada plate have all gone up. Prices on pipe and chains are firm and an advance may be made soon. Linseed oil continues to have an advance tendency, the price to day being 76 cents for the raw product. Retailers everywhere are busy with glass and finishing paints and varnishes.

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire $2.85 base; oiled, 10c extra; bright iron, $3.15 base; brass spring wire, 29c base, plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12 $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

Mr. Whiting, of Humboldt, is to have an elevator built at Lanigan, Sask.

The Dominion Bridge Co. is adding another building to its Winnipeg plant.

Fort William interests will build a cement industrial plant near that city.

Active work has again been begun on Port Arthur's waterworks extensions.

The Northern Construction will put up a lumber mill at Turtle River, Ont.

James Morgan & Co., Montreal, are erecting a new factory to cost $15,000.

A $31,000 addition will be built to the John Murphy & Co. store, at Montreal.

The Toronto Carpet Mfg. Co., Toronto, will build a new warehouse, at a cost of $42,000.

The Office Specialty Co. will erect another $50,000 addition to its plant at Newmarket.

The Brackman-Ker Milling Co., Vancouver, will erect a brick warehouse, to cost $16,000.

The National Electric Heating Co. is a new concern, to employ 30 hands, which will locate at Galt.

The Graham Nail Works will build at Toronto an office and storage building, at a cost of $6,000.

The Beaver Lumber Co. have purchased a site for the extension of their plant at Portage la Prairie.

The new steel casting plant of the Vancouver Engineering Works at Fairview, B.C., was opened last week.

The Crystal Glass Works, at New Westminster, are to be enlarged, and a large chemical plant will be established.

J. Geoffrey, identified with J. B. Stetson & Co., England, has been looking for a site for a hat factory at Victoria.

The Alberta Clay Products Co. will likely erect a $150,000 sewer pipe plant at Calgary to employ from 60 to 100 men.

The Brackman-Ker Milling Co. have obtained a permit for a warehouse at Vancouver. The building will cost $116,000.

A by-law granting J. W. Ford $10,000 to erect a flour mill and elevator was carried by the ratepayers of Swift Current.

The McLaughlin Co. will erect an elevator at Osage, Sask., at once. P. R. Carroll also intends to build an elevator there.

The Amalgamated Asbestos Corporation will shortly erect several plants in the Quebec district, for the manufacture of their products.

The C.P.R. has purchased some 650 acres of land at Longue Pointe, with a view to the construction of docks for a new ocean terminal.

E. R. Reid has recently interested himself in concrete work and is planning locating a small plant at St. John for the manufacture of cement products.

The Jordan-Wells Railway Supply Co., a U. S. concern, manufacturing innumerable patent railway devices, intend to erect a Canadian plant at New Westminster.

D. D. Mann says that if steel works are not established on the Pacific coast when he reaches there with the Canadian Northern Railway, he will build them himself.

The Linde-British Refrigeration Co., Montreal, will make $3,000 alterations to their warehouse, and the National Breweries, at same place, will make alterations to cost $7,500.

A company has been incorporated with $300,000 capital to establish a plaster of paris industry on Lulu Island. The plant will cost $50,000. The raw material will be secured at Ashcroft, B.C.

Berlin will have another new industry in the form of a Fireless Cook Stove Co. Premises have been leased in that city where the stoves will be manufactured. Only skilled labor will be employed.

It is a settled thing now that the Canadian Government will enlarge the Welland Canal so that ocean-going vessels will be able to go through it, thus being able to successfully compete with the Erie Canal across the line.

A company subsidiary to the Sydney Cement Co. has already commenced the construction upon a plant for the manufacture of brick from blast furnace slag cement and this industry will be a producer by the first of the year.

The Dominion Tar & Chemical Co. are increasing their Sydney plant to the extent of nearly double their present capacity, with the view to taking care of the increased output of crude by-products, the result of expansion at the Dominion Iron & Steel plant.

The Central Milling Co., Peterboro, have one of the most modern plants in Ontario. For the past three months expert millwrights have been busy overhauling and instaling new machinery of the latest design. The mill has now a capacity of four hundred barrels per day, running the entire 24 hours.

The representatinve of Harland & Wolff, who has been in Canada for the past month looking over sites at Levis and St. John for proposed drydocks and shipbuilding plants in Canada, has gone to Belfast to report direct to his company. Meanwhile representatives of the Fairfield Shipbuilding Co. and of John Brown & Co., of Glasgow, and of Vickers, Son, & Maxim, of Sheffield and Barrow, will also look over the ground in Canada, with a view to locating Canadian branches of their world-famous British plants.

Municipal Undertakings.

Hamilton's proposed sewage disposal plant will cost $110,000.

A by-law has been passed at Bridgeburg, to establish a sewer system.

Nanaimo, B.C., ratepayers have approved a by-law to issue $30,000 waterworks debentures.

Tenders are invited until November 1 for the construction of a waterworks system at Weston.

Tenders are being called by the Campbellton, Ont., council for the extension of sewers along George Street.

The Edmonton city council has taken out a permit for the electric power plant and waterworks, to cost $39,000.

Tenders are invited for a supply of pipe, 42 inches in diameter, to cost about $64,000, for Ottawa's waterworks.

The contract for the construction of the main sewer at Hull was awarded to G. F. Martin, of Smith's Falls, for $38,697.

J. H. B. Rickaby received a $40,000 contract for the supply of 87,500 feet of steel tubes for the Victoria waterworks system.

A. P. Burns, of Medicine Hat, has been awarded the contract for building about five miles of sewers at Maple Creek, Sask.

A Dauphin, Man., civic delegation is looking over various waterworks plants in the west, with a view to establishing a similar one in that city.

The water pipes for the new distribution system in the municipality of Oak Bay, B.C., have arrived, and the council have decided to lay them by day labor.

The National Iron Works, Toronto, received the contract for 1,080 lengths of 16-inch cast iron water pipes, at $27.45 per length, from the civic authorities of that city.

City Engineer Ker, of Ottawa, is preparing plans for the drainage of the western end of Hintonburg, at an estimated cost of $150,000. The work will commence early next season.

The Verdun, Que., town council has awarded the contract for the extensions to the waterworks buildings, to be utilized as accommodation for the electrical department, for $3,774, to Isaac Collins.

W. Beverly Robinson, Montreal, agent for the Stanton Iron Works, Nottingham, Eng., has been awarded the contract for the supplying Winnipeg with cast iron pipe at $49,000, a much lower figure than any other tender.

Railway Construction.

The C.N.R. have decided on New Westminster as the Pacific terminus of that road.

Steel laying on the Superior Junction to Winnipeg Section of the G.T.P. is practically completed.

It is expected that the International Railway will be completed to St. John, N.B., this fall. Eight miles of the line are yet under construction.

Work has commenced on the extension of the Port Arthur street railway, the first of a series of branch lines to serve parts of the city not reached by the main line.

Sir Thomas Shaughnessy is reported to have said that the double-tracking of the C.P.R. between Brandon and Port-

Floor Finishers, Ltd., Ottawa, capital, $100,000; to manufacture material, devices and appliances suitable for the purposes of laying, treating, and preserving wood or mosaic flooring; and to acquire the business of The Simplex Floor Finishing Co. Incorporators, D. R. Thomas, J. H. Pushman, and S. C. Thompson, Ottawa.

Public Buildings.

A post office is to be erected at Tiltson, Man.

A new fire hall to cost $13,600 will be built at Ottawa.

A new school, to cost $7,000, will be built at Starbuck, Man.

A new Anglican church is to be built in Grandview, B.C., to cost $2.000.

St. Andrew's municipality (Winnipeg) will erect a new municipal building.

The Brantford public school board is looking for a site for a new school.

McGill University, Montreal, will build a new museum, at a cost of $90,000.

New police quarters, to cost $40,000, are proposed to be built at Hamilton.

The Canadian Northern Railway proposes to have a station of its own in Ottawa.

City and Galt Hospital Trustees, Lethbridge, will build a new hospital, to cost $60,000.

The N. B. Provincial Government may soon establish a tuberculosis sanitarium at St. John.

Guelph ratepayers will vote on a by-law to raise $25,000 for the building of a new school.

A new theatre, which will cost about $100,000, will shortly be erected at Chatham, Ont.

It is announced that the Schuberts, of New York, will build a theatre at Vancouver this fall.

The Ottawa Public School Board is purchasing a site on Breeze Hill for the erection of a new school.

The Roman Catholic church will erect a $30,000 edifice in Saskatoon, the foundation to be in this fall.

Simonean & Dion have been given the contract for building the Quebec technical school, for $233,800.

Plans will be at once drawn up for new G.T.R. terminals at Montreal, on the site of the present structure.

A by-law to raise $15,000 for additions to public schools will shortly be submitted to the Penetang ratepayers.

Brandon ratepayers will vote on a by-law to raise $13,000 for the purpose of extending the Winter Fair building.

The Fort Rouge Congregational church, Winnipeg, has taken out a permit for the erection of a new church.

A site has been purchased by the Annex Baptist congregation at Montreal, for the erection of their new church.

A by-law to raise $25,000 for the erection of a new school building will be submitted to the Meaford ratepayers.

A by-law will shortly be submitted to the Yorkton, Sask., ratepayers to raise $16,000 debentures for school purposes.

Brandon ratepayers will vote on a by-law to issue $13,000 debentures for the purpose of erecting a market building.

The Catholic church recently destroyed by fire at the town of St. Paul, Que., will be rebuilt at the earliest opportunity.

The first sod has been turned at Strathcona for the new Alberta University. The first building will cost $2,000,000.

The Edmonton city council have accepted plans for a market building and will submit a by-law for the necessary amount.

The Toronto Board of Education has taken out a permit for a two-storey brick Girls' Home, to be erected at a cost of $15,000.

The Winnipeg civic authorities are discussing the purchase of a site, with a view to the ultimate erection of a new city hall.

E. & W. S. Maxwell, Montreal, have prepared plans and are inviting tenders for an addition to the Alexandria hospital there.

A new public school, to cost $13,000, and a new separate school, to cost $5,500, are new buildings to be erected at Vonda, Sask.

A permit has been granted for a new $40,000 grand stand at Hanlan's Point, Toronto, to replace the one destroyed in the recent fire.

The School Commissionsers of Westmount are considering the advisability of adding to the King's and Rosslyn school buildings.

The Edinger-Nesbitt Construction Co., of Edmonton, secured the contract to build the new public school at Tofield, Alta., for $9,000.

St. Mary's College, Montreal, has purchased a block of land in Cote des Neiges, where they will ultimately erect a large building.

Plans for the new addition to the Isolation hospital are ready and will shortly be submitted to the Toronto Board of Control.

A by-law to raise $320,000 for new permanent buildings on the Toronto Exhibition grounds will be submitted to the ratepayers on January 1 next.

Ground is being prepared for the extension of Place Viger station at Montreal. Several plans have been submitted, but none will be chosen until the spring.

Contracts have been awarded for the building at Toronto of the Jones Avenue public school, $54,886, to Chas. Bulley, and the Logan Avenue school, $39,534, to H. Needham.

At a recent meeting of the Burnaby, B.C., municipal council the contract for the additional offices to the municipal hall was awarded to Bowden & Hardwick, at $1,200.

L. R. Montbriant, Montreal, is preparing plans and specifications, tenders for which are invited, for the erection of the Saint Jean Baptiste school, in Montreal Annex.

The special committee appointed by the counties of Lanark, Renfrew and Carleton, are to choose a site for a tuberculosis hospital for joint use of the three Ontario counties.

L. C. Gilman, assistant president of the Grank Trunk, has submitted to the Vancouver city council plans for the construction of a union passenger station and joint freight terminals.

It is rumored that the Manitoba Provincial Government is contemplating the purchase of a central site for the erection of parliament buildings to replace the present structure at Winnipeg.

Sir Thomas Shaughnessy has promised the Victoria Board of Trade the financial support of the C.P.R. in the erection of a new opera house, the plans of same to meet the approval of C.P.R. architects.

Work on the new Union Depot, which is being erected at Fort William for the Canadian Pacific, the Canadian Northern and the Grand Trunk Pacific, has been started by the contractors, the J. McDiarmid Co., Winnipeg.

The Retail Paint Trade

KNOW YOUR GOODS.

Let us take a concrete case—let's take the bull by the horns—let us take paint—perhaps the easiest money-maker in the store when understood: we cite the following in illustration simply to prove our proposition:—

You as the retail salesman, as the storekeeper or the clerk, want to understand first of all what is the general situation in the paint business as it affects your store and your customers.

Analyze it this way:—

There are four kinds of men, and four kinds of paint.

There is the man with one idea, the man who can't see anything in sight except his all-absorbing particular theory or hobby. He's the crank. Nothing counts except that one point with him; everything else is worthless.

Well, there is one-idea paint, too.

Some of the big folks in that business would have you believe that there was but one essential thing, and that was their essential thing.

There are lead cranks, and zinc cranks, and turpentine cranks, and dryer cranks, and one-idea specialists of all sorts.

The one-idea man isn't the safest man in the world, nor the best balanced.

Maybe you will agree with us that the safe plan with him is to take his enthusiasm with a grain of salt—just a little saving grace for fear he might be overdoing it. He's honest, the chances are—but he may be mistaken.

And then we come to another kind of a man, and another kind of paint—the man who has no ideas—the empty man—the honest kind of a fellow—the pickup—the indefinite, the ne'er-do-well and the never-can-tell, and there is paint of just this sort—same as the man; paint that's a problem—paint that hasn't any idea back of it or anything in it that anybody believes in anyway; paint like Topsy—that had no parents, just got born and began to grow; this is bad paint—nondescript paint—just as hopeless as a nondescript man.

Let's stop just for a word about cheap paint competition; it is just like cheap competition in anything else.

You as storekeeper or clerk ought to and do know that the sign of the cheap paint—the cheap article of most any sort—is the cheap guarantee. If you buy a thing dirt cheap, you know in your heart when you do it that the chances are it is a cheat, but your pride steps in and saves you from taking advantage of the cheap guarantee. Cheap price saves the life of the cheap guarantee.

No house can guarantee cheap paint.

No manufacturer nor wholesaler nor retailer can guarantee cheap low-grade hardware or anything else that is low grade or poor quality. All such talk about guarantees should be understood by the man in the store.—Store Salesmanship.

PAINT AND OIL MARKETS

TORONTO.

October 29.—Business in the paint trade is fair this week. There is not the rush of orders there was a few weeks ago, nor is there the volume of goods moving; but paint jobbers say they are satisfied with what trading is being done at present. Sorting-up continues among hardwaremen with a prominence being given to glass. Varnishes and interior paint lines are pretty good; but turpentine, oil and leads are rather slow. The high prices of the two former lines do not conduce to active business, hardwaremen contenting themselves with light stocks; and in lead buying is light also, because of uncertainty.

Rosin prices are firmly maintained for what are known as lower grades; the finer grades known as water white and window glass advanced 50 cents per barrel, and there does not appear to be any likelihood of a reduction in price before the new crop, which will not be produced sooner than next March. All other lines hold their quotations of a week ago, though turpentine shows a slight firmness.

LINSEED OIL—The market is very firm and as seed seems to be scarce in India and the United States, there is no probability of a reduction at the present time. Calcutta seed is reported in London at fully 10 shillings higher per quarter (416 lbs.) than it was some four months ago, and River Platte seed is quoted at about the same price. The difficulty in getting linseed oil promptly and in quantities is greater than ever before in the history of the trade in the U. S. Some buyers are ready to pay almost any price for prompt shipments. All this reflects indirectly on the situation here, tending to firm up and advance the market. This condition has made hardwaremen cautious about buying and they are putting in light stocks only. Toronto prices are yet unchanged from last week's quotations, raw being at 72 cents and boiled at 75 cents for single barrels.

TURPENTINE—During the past week there was an attempt on the part of some large buyers of turpentine at Savannah to beat the price down, offering to clear the market at 1 cent per gallon less than had been paid; but they did not succeed. With offers coming in at once from other parties, the market again advanced, and is now within 1 cent of the highest point it has touched for many weeks. One vessel took 2,747 casks for shipment to Antwerp, leaving the stock of turpentine at Savannah considerably less than it was last year same time. The price for turpentine locally has not changed, though there is a firmer feeling. The ruling quotation is 83 cents for single barrels, with two houses selling a cent below this figure. Buying is rather light.

WHITE LEAD — The jobbing movement of lead in oil is keeping up to seasonable proportions, though there is not the strong demand that prevailed some short while ago. Even the low prices ruling, have not induced this week any big buying. Price quotations range from $5.55 to $6, according to brand, and rumor states that even lower prices have been offered to some buyers.

RED LEAD — Prices are unchanged, with demand listless. Casks are at $4.25 and 100-lb. lots 25 to 30 cents higher.

GLASS — This is the particularly bright line among paint goods just now. Both city and country hardwaremen have been buying steadily and quietly until now the volume of glass moving is considerably higher than in any other previous season of late years. Jobbers report lower stocks. They are evidently holding off importing until they are forced to do so, knowing that they must buy abroad at higher prices.

PUTTY—This glass companion line is selling well at firm prices, though unchanged from last week. Casks are $1.75; 100-lb. drums, $2; and bladders, $2.15 to $2.25.

STAINS AND VARNISHES — Demand is fair indeed for floor coverings and all inside paint lines. There is no great volume of any one line moving, but when bulked together varnishes and kindred lines show good figures on the sales slips.

PETROLEUM — Hardwaremen say coal oil lines are moving with a good swing, and jobbers are well pleased with the season's trade. Pratt's astral is 17½c; water white, 15½c; and prime white, 13½c.

MONTREAL.

October 29. — Trade has been very brisk despite the interruption of the holiday. With the close of navigation near at hand many merchants, who are not in very accessible places are ordering for their early spring trade. There is also a good demand for houshold lines, and evidently plenty of brightening up for Christmas is anticipated. Varnishes are also being well called for from the large manufacturing centres—a good sign of general prosperity.

The market is unchanged. After its advance last week, linseed oil is quiet for a time. Turpentine is very firm under a steady demand. Altogether the tone of the market is very good, and jobbers and manufacturers seem satisfied with the trade doing.

TURPENTINE—The market is firm, with a disposition to advance prices where possible, especially by those who are not heavy holders. With the demand steady, but not over active, there is no great inducement to advance prices at present, and the quotation of 80c for single barrels can still be obtained.

LINSEED OIL—While the heavy advance last week checked the demand

White Lead

At the present time the white lead situation is interesting.

We are the only firm in Canada who corrode and grind white lead, in addition to making Varnish, Dry Colors, Paints, Enamels, etc., etc.

Our white lead proposition is naturally the very best.

NEW YORK CHICAGO LONDON BERLIN BRUSSELS

somewhat, there has still been a good call, and the market is in very firm shape. Some heavy orders have been received preparatory to the closing of navigation. We continue to quote: 1 to 4 barrels, in one delivery, raw, 72c per gal.; boiled, 75c per gal.; net 30 days, f.o.b., Montreal.

GROUND WHITE LEAD—With good trade this week, the market has strengthened somewhat, and there seems a better tone to the situation generally. No marked change is announced, and we continue to quote: Strictly pure about $5.25 to $5.75, according to quality, and No. 1 $4.85 to $5.25 f.o.b., Montreal.

RED LEAD—Some good orders are reported owing to the nearing close of navigation, dealers getting in stock to be ready for the early spring demand. We continue to quote: Genuine red lead in casks, $4.25; in 100-lb. kegs, $4.75; less quantities at $5.75 per 100 lbs.; No. 1 red lead, casks, $3.75; kegs, $4.25, and smaller quantities, $5.25.

WHITE ZINC — The call for white zinc is steady. Quotations remain firm and unchanged. We quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure,, 8½c; No. 1, 7c; No. 2, 5½c.

VARNISHES AND JAPANS—There is a good demand for varnishes from the large industrial centres, showing that trade generally is very good. There is also a fair call for household varieties. Hard oil finishes and shellacs continue to be in good request. The market is firm and unchanged.

PUTTY—With the bringing out of storm windows, etc., putty is always stimulated, and good orders have been received. The market is firm and we quote: Standard putty, 800 lbs., in casks, $1.75; in 100-lb drums, $2; bladder putty, 400 lbs., in barrels, $2.15; in 100-lb. cases, $2.25; in 25-lb. tins, $2.15; 12½-lb. tins, $3.25, f.o.b., Montreal.

TEST FOR CHALKING.

The report of the committee of the Paint Manufacturers' Association of the United States on paint tests contains particulars of an interesting method of determining the comparative chalking of paint, the method being aranged so that the results can be photographed and tabulated in percentages or otherwise.

The process is briefly as follows: Small strips of black felt are cut three inches wide and five inches long. One of these strips is placed lengthwise across a solid block of wood, which fits into the palm of the hand. This outfit resembles very much in appearance the ordinary blackboard eraser, and is used in very much the same manner. The width of the eraser is approximately that of one board of the panel used on the test fence.

In making any test, the "eraser" is held firmly against the panel, and drawn (not pushed) half-way across in a straight line, as by drawing towards the operator approximately the same amount of pressure is used each time, and the same area is covered.

A Splendid Arrangement for a Paint Department in a Hardware Store.

The white mark on the black cloth represents the quantity of perished paint surface, and is directly proportional in intensity to the chalking, which has taken place on the given area.

If a series of these cloths have been prepared from different formula and panels, they may be photographed, and the photograph will very clearly illustrate the comparative chalking.

This chalking test applies only where the perishing of the paint has proceeded to a certain extent, but under conditions where rains and weather have removed from the fence the chalk that has been formed, such a test would not be applicable.

Paquette & Godbout, St. Hyacinthe, will do the painting and roofing of the new convent at St. Lambert, Que.

THE CANADA PAINT COMPANY L'T'D

ABOUT LINSEED OIL

The market is very high at present and there does not appear to be any relief in sight. You will see therefore the necessity of buying only the best oil—oil that will drain out to the last drop clear and sweet. Now, when you buy

RAMSAY'S BOILED LINSEED OIL

you know you are getting the standard. We boil our own oil and settle it in large tanks. You get only clear oil, and of a standard that pleases the painter. It pleases the painter because it is not only clear, but pale—as pale indeed as the raw which many dealers offer. Now, just figure out how much you lose by buying somebody's unsettled oil and losing three gallons for stuff left in the bottom of the barrel. That means at least five cents a gallon. Buy Ramsay's Boiled Oil, always sold at lowest market price.

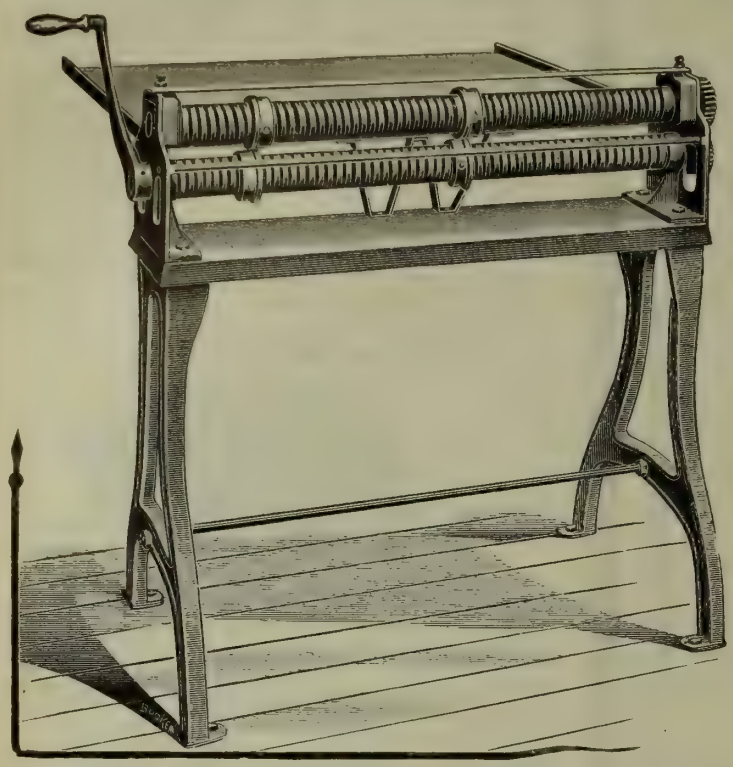
Turn Your Losses Into Profits



Every drop of oil you are now losing through leakage. evaporation and waste means just so much out of your profits.

Stop these losses, turn them into profits by selling your oil from a Bowser Self-Measuring Oil Tank. The Bowser adds to your profits every year an amount that would surprise you.

Is not an investment like this at least worth a thorough investigation? It will cost you but one cent to send a postal for Catalog 5446. Write to-day.

S. F. Bowser & Co., Limited
66-68 Fraser Ave. - TORONTO

If you have an old Bowser and Want a new one, write for our liberal exchange offer.

MR. TINSMITH DON'T RUIN

your brake cutting or breaking off sheets. If you cannot afford to instal a large squaring shears just now get one of our ROTARY SPLITTING SHEARS. It will slit sheets any length, not exceeding 36" wide, 20 GAUGE and lighter. Has TWO SET CUTTERS so you can cut TWO strips at a time. The edges are left clean and straight. You will find this an ECONOMICAL INVESTMENT. Order TODAY.

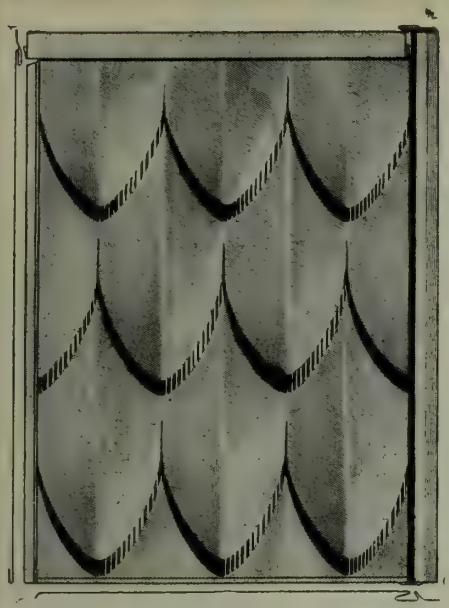
O.K.

Adjustable Thimbles



are the most practical Stove Pipe Thimbles in the world. They are handsome, durable and economical. They have no parts to get out of repair, and no springs to lose tension. They are composed of two sections, which screw together so easily that anyone can adjust them to any size wall or floor.

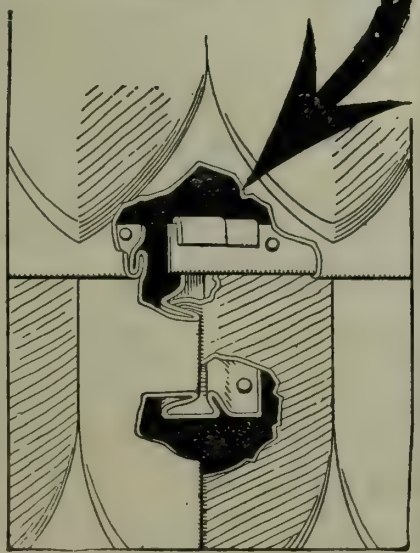
Sold by jobbers, or by the manufacturers

METAL SHINGLE & SIDING Co LTD.
PRESTON & MONTREAL

When writing to advertisers, kindly mention having seen the advertisement in this paper.

"Not the First Shingle but the first Perfect Shingle."

A Shingle of Doubt is a Trouble Forever



Ordinary metal shingles are generally water-tight. The "Galt" is always water-tight. Any practical man can see that in a glance.

When metal shingles leak they leak through the locks, invariably. Water gets in the side-lock and is forced by the storm up past the end-lock through the roof. This point—the intersection of three shingles—in the "Galt" Shingle is protected by our patented "closed-end" shown in the cut below, which positively prevents leakage. Notice the broad, deep, self-draining side-lock and continuous, over-lapping end-locks. They are patented in the "Galt."

This is the shingle with the future and now is the time to get control of it in your locality if you wish to handle it next year. Drop us a card to-day.

Every Test Proves the Superiority OF

GREENING'S Patent COW TIE

TWENTY YEARS OF PRE-EMINENCE.

Quality is the basis of all values, and time the critical trial of all things. Long established houses know this, and realize that the only permanent satisfaction in business comes from handling the best.

Greening's Patent Cow Tie has been proved by the tests of time, wear and endurance to be the strongest on the market. Back of it is a reputation of a score of years. These Ties are of seven kinds and are made in six sizes.

We have a complete line of all sizes ready for shipment.

Insist on getting "Greening's" from your jobber.

CURRENT MARKET QUOTATIONS.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

WASHING MACHINES THAT SELL

The "Maxwell Line" of Washing Machines has recently had a notable addition—the "Champion High Speed" Washer, illustrated below. There is now a Maxwell Washer to suit every taste and every purse. When you handle the "Maxwell Line" you need fear no competition.

The "Puritan" Washer has become a great favorite throughout the country. Thousands have been sold, and the "Puritan" is recognized as the leader of its type.

The "Puritan" Motor Washer is a comparatively recent addition to our line, and one which has taken splendidly wherever there are waterworks. The motor is very simple, very strong and very durable, and works under a low pressure. Costs absolutely nothing for power in most cities and towns.

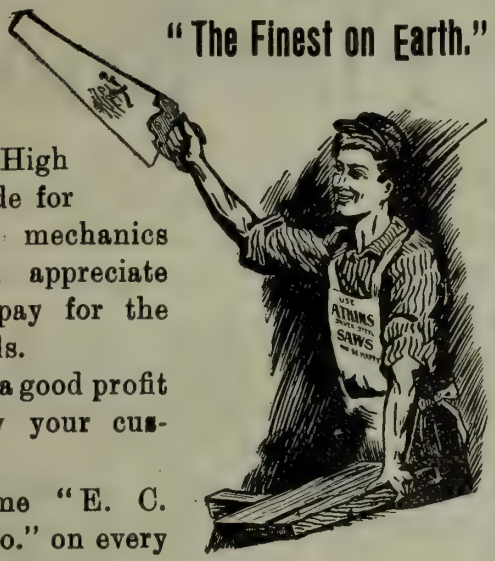
The "Champion High-Speed" Washer has the same tub and dolly-board as the "Puritan," with an improved driving machanism. The heavy "momentum" wheel runs very fast, gaining a force which is used to carry the dolly-board through the hard parts of the stroke, making the machine run very smoothly and easily and do quick work.

The "Blue Belle" is a new and improved machine of the "rubbing" type—a type which many prefer. The tub revolves in one direction while the upper board turns the other way, making it very fast. Mounted on a light but rigid angle-iron frame, with adjustable wringer stand.

The "Spotless" is a new box machine, also of the rubbing type. Clothes are rubbed on both upper and under sides. A good low-priced machine.

Write for full information and prices on our

Washers, Wringers, Mangles, Churns, Lawn Mowers, Wheelbarrows,



etc. etc.

Sell Clark Heaters and Coal

Here's the "BIG HIT" Assortment

2 Leader Heaters
2 No. 5B Heaters
2 No. 7D Heaters

6 Dozen Clark Fuel Brickettes (Best Grade)

Some of these heaters you can sell as low as $1.20 and make a good profit.

The Proposition to Dealers is Mighty Interesting

Its a proposition that means ready sales and liberal profits.

Everyone who drives or owns a carriage, wagon, sleigh, automobile—any kind of vehicle—needs them. Everybody traveling in cold weather needs them. The need is known—the demand is positive—It's for the dealer to supply the product and pocket the profits.

Clark Heaters and Clark Coal sell wherever displayed. The wonderful compactness, the unique principe of heat distribution, the neat appearance, the low price—all are factors that make Clark Heaters the unchallenged leaders.

Our guarantee goes with each, and the guarantee protects the dealer and the consumer.

And the coal is just such another proposition. To **prove conclusively** that it's better than other fuel, we give a guarantee, **with each brickette,** that it will give 25 per cent more heat than any other heater fuel made.

DEALERS——ACT NOW

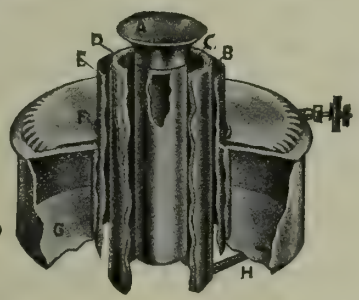
The season is on. Send for the "Big Hit" assortment and add more dollars to your profit. Send to your jobber. Put a heater just inside your store—where customers can **feel** the goodness of it. "Warm them up" to the necessity of buying from **you.** We'll help.

CHICAGO FLEXIBLE SHAFT COMPANY, 250 ONTARIO STREET, CHICAGO

"Big Hit"

The World's BEST, Because They're the BEST in the World

And because of this established fact, the demand for "ALUMINO" and "ELECTRIC" Oil Heaters increases in volume every day. Competition and imitation simply make it easier to sell these great Oil Heaters. There's a reason—yes, many reasons—no other Oil Heater is equipped with our GRAND "SAFETY BURNER," and so it is impossible for any other Oil Heater to give the same satisfactory results as do the



ALUMINO AND ELECTRIC OIL HEATERS

The dealer who sells these Heaters will never have to send a man out to make repairs, or explanations, or demonstrations, or excuses, of any kind, nor will he have to take back an "Alumino" or "Electric" Oil Heater for any cause.

We impress the intense significance and importance of the construction of

Our Grand "Safety" "Burner"

A—Flame Spreader. B—Air space outside of wick. C—Air space inside of Wick Tube. D—Wick. E—Outside Casing to burner. F—Air space between Fount and Outside Casing. G—Fount for oil, entirely separate from burner. H—Feed Pipe carrying oil from Fount to Burner.

Look at it. See the generous air passages. Mark the fact that the Wick does not enter the oil fount direct. Cannot be anything else but perfect combustion, therefore cannot be any unpleasant odors—no danger—no smoke.

The Burner is the very soul of a Heater, and this GRAND "SAFETY BURNER" is the only perfect Burner in any Oil Heater in America to-day. The "Alumino" and "Electric" Oil Heaters radiate heat just like a good base-burner—from sides and bottom, as well as from the top—heat the floor, as well as the ceiling. Very economical of oil, because of perfect combustion, and, as above said, no trouble to operate—a child can care for them, explosions are impossible.

You cannot afford to sell your trade any other Heater, Mr. Dealer, because every "ALUMINO" and "ELECTRIC" goes to you reliably guaranteed to satisfy.

LEWIS BROS. CO., Limited

EXCLUSIVE CANADIAN DISTRIBUTERS

SEND US A TRIAL ORDER

FROTHINGHAM & WORKMAN, Ltd.

Wholesale Hardware and Iron Merchants

Montreal : : : : : Canada

Any hardware dealer can work up a considerable trade in ready roofing providing he gets the right line to begin with, and part of our policy is to make sure that goods are exactly right before offering them to the trade. We have been successful from the beginning with our own brand of

"Samson" Roofing

which is a combination of the best materials now used for making a high-class Ready Roofing and is adapted to most kinds of roofs. The fact that this business is based on solid values is sufficiently well-known, and when we recommend "Samson" Roofing it means more than appears on the surface.

"Samson" Roofing is easily laid and lasts for years. Send at once for samples.

Graham Nails are the Best.

Disston quality has made the DISSTON plant grow to Fifty acres since 1840.

How Disston "Bucksaws" Make Customers

This is only one of a list of shapes and styles. See catalogue mentioned below.

YOU can't safely tell an experienced bucksaw user "one make of bucksaw is like any other." He knows, through actual use, what differences there are. It is because of the absolutely unvarying uniformity of DISSTON Bucksaws that dealers make not one but SEVERAL sales and profits.

Some of the reasons for the steady increase in the plant of the DISSTONS is the increasing call from shrewd dealers for DISSTON Bucksaws. Pointing to the actual truth about DISSTON Bucksaws wins the customer, with that resulting profit---and it wins him back again, with other resulting profits, for experience with a DISSTON Bucksaw bears out every recommendation you give it.

Show your customer the wood seasoned for several years—the variety of shapes to select from---the styles of blades---the bracings---the varnishing---the weather protection---the ease of handling---the strength ---the qualities for heavy cutting---the absolute rigidity---the fact that in a DISSTON Bucksaw there is positively no lost motion or "give."

Behind every DISSTON Saw, Tool or File you sell there is a profit for you---and after that a steady stream of profits. The highest quality never fails to bring a customer to your shop again.

FREE If you haven't got the latest DISSTON Catalogue, send us a postal. It gives clear and complete descriptions of DISSTON Saws, Tools, Steels and Files, in all the various styles and makes. This new Catalogue may mean a handsome addition to your profits.

ABOUT THE QUALITY OF

BOECKH'S BRUSHES

FOR PAINTERS, HOUSEHOLD FACTORY AND STABLE USE

They are "made in Canada" which means a decided advantage over the Imported Brushes as WE SAVE YOU THE 27½% DUTY. Besides, BOECKH'S BRUSHES are the best finished, most durable and servicable line on the Canadian Market, being made in all the most useful and convenient designs which comprise a line for every known use. The variety of prices and grades makes it possible to secure just what you want, as we make everything from the very low-priced lines for ordinary use to THE SUPERIOR GRADES FOR THE VERY BEST CLASS OF WORK. In all Grades our values are right—OUR PRICES BEING EXCEPTIONALLY LOW (quality being considered), owing to our facilities for buying raw materials in large quantities, direct from the producers, and also to the up-to-date processes of manufacture in our Factories which enable us to keep the cost of production down to the minimum. Consequently the dealer who handles our lines gets all the benefits that the Canadian-made Brushes have in their favor. Write for full particulars.

Also we manufacture all kinds of Corn Brooms for house and factory use.

THE BOECKH BROS. COMPANY, LTD., Toronto and Montreal

THE IDEAL GIFT RAZORS

ARE "WADE & BUTCHER'S," OF SHEFFIELD, ENG.

YOU WILL be asked for them all over. Because OVER A CENTURY of RAZOR-MAKING experience is behind every one of these celebrated BLADES.

ALL the safety razors in the world will never stop the sale of BUTCHER'S fine hollow ground brands, all of which were originated by W. & S. Butcher, of Sheffield, Eng. We put them up in cases to suit your gift customers, and, for a man, no present pleases more. Every razor is set for use, and is WARRANTED to shave to PERFECTION. Excellence, durability and easy to use, are the cardinal elements. INCLUDE these RAZORS in your next order to your nearest jobber. All up-to-date jobbers keep Butcher's goods.

GURNEY-OXFORD

"The Stove Sign of Highest Quality"

THE "O.K." STEEL RANGE, WITH HIGH CLOSET AND RESERVOIR.

Here's Another Winner

IN all the realms of stovedom you'll not find a range that has anything on the "O.K." It's a good one—full of points—good talking features. Dealers tell us that the "O.K." "*gets*" a customer's attention first time. That's how we planned it. After that the dealer should get real busy—that's his cue—the time when he can conveniently and with telling effect drive his arguments home. How that the "O.K." has double-lined oven door with heat retaining air-space—flue strip all round oven which guarantees an even baking heat—firebox that will accommodate a 24-inch stick of wood—grate that can be quickly changed from wood to coal use—removable firebox linings—large roomy warming closet, and so on. That's just a little jog-up for your memory's sake, Mr. Dealer. Don't miss what's going strong, and our hint to you of a sure thing is that the "O.K." is a certain winner.

THE GURNEY FOUNDRY CO., LIMITED

ANNOUNCEMENT

TO THE

NORTH-WEST TRADE

The destruction of our Winnipeg warehouse and stock by fire on Saturday, Oct. 30th, means practically no interruption to our business, temporary quarters having been immediately secured, and cars of stoves which were on the way when the fire occurred, now in stock.
Further shipments have been rushed and are arriving at Winnipeg daily, so that your orders for

GOOD CHEER

STOVES, RANGES AND FURNACES

can be filled promptly and from a bright new stock.
The repair castings department will again be in running order in a few days.

Send on your orders as usual.

We have the goods made specially for your trade

The James Stewart Mfg. Co., Ltd.

of Woodstock, Ontario

Lock Box 1831, Winnipeg, Man.

DAVIDSON'S
"Premier Marathon"
STEEL RANGE

IS NOW A LEADER on account of its proved perfection and neat appearance

We have used heavier gauge steel than usual in making this body.

Special attention has also been paid to adapting the fire box for wood as well as coal and it will take comfortably a 28-inch stick.

The New Duplex Draft with which every "Premier Marathon" is fitted assures perfect combustion at both ends of the fire box.

This range has many other desirable features and the number of repeat orders received plainly show that the criticising public have found them satisfactory.

Write for Illustrated Circular.

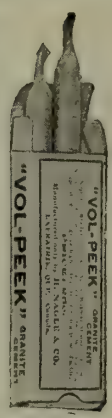
The Sliding Furniture Shoe
for Metal Beds

Pat. Feb. 9-09.



For metal beds, round or square posts, these Wishbone Bushing or long steel stems used in connection with Cone Washer, will retain itself centrally and can easily be removed. Made so as to fit any size of post. The ball and socket principle of joint allows Shoe to adjust itself to uneven surfaces, hence the shoe will slide where castors will not roll. Do absolutely no damage to hardwood floors, carpets or matting.

Ask your jobber. If he cannot supply you write us for free circular and discounts.

CONGO NEVER LEAK ROOFING

THE GUARANTEED ROOFING

One of the most attractive features about Congo is that you get a genuine Surety Bond with EVERY ROLL. This Bond is issued by the National Surety Company. EVERY roll of 3-ply Congo is guaranteed for a period of TEN YEARS if printed directions are followed.

Thus the buyer is protected for a long time by the strongest guarantee ever issued, backed by a Surety Company whose bond is as good as the Government's.

That Congo is made of the right stuff durable and lasting, is attested to by the fact that the Surety Company was willing to back it, and for so long a period.

Congo is really a better purchase than ever before.

In addition to the Surety Bond, we furnish with every roll GALVANIZED CAPS, instead of the tin caps or nails supplied by others. The galvanized caps can't rust or bend or break. Liquid cement is also furnished free.

We mean to get the roofing trade of the country and think these SPECIAL FEATURES will come pretty near landing it.

Send to-day for free Sample of Congo and a copy of the Guarantee Bond.

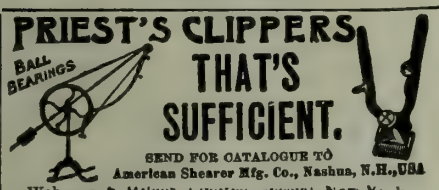
DIRECTORY OF MANUFACTURERS



Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.
